THE great fortune of John Murray Forbes, the famous merchant and investment banker of Boston, was founded largely on the confidence of two Chinese merchants whose acquaintance he made while traveling in the Far East. Such was the confidence which these oriental gentlemen reposed in Mr. Forbes that they gladly permitted him to invest large sums of their money in American securities which proved profitable to all concerned.

Hundreds of thousands of Chicago citizens repose much the same confidence in the financial advertising in The Chicago Daily News as the Chinese merchants placed in Mr. Forbes. As Chicago's home newspaper, with 400,000 average daily circulation, The Daily News is the customary buying guide of the great majority of Chicagoans whose incomes enable them to purchase investment securities.

Advertising space in The Daily News is an investment in confidence.

Scott "Straight-Unit" Central Folder Octuple Press Consisting of 4 Floor Fed Units
and 2 Central Heavy Duty 64 Page Folders

Scott Presses Afford Superior Web Control

All webs on Scott "Straight-Unit" and "Multi-Unit" Presses are individually controlled. Instead of being pulled by one drag roller, each sheet is individually propelled, thus permitting the use of leather trolleys on the drag rollers. These are set so lightly that they can be turned

by hand when in full adjustment.

Such control prevents the flopping of sheets up and down and sideways. It maintains a square pull on the web and does not strain the paper unequally — thus reducing web breakage on all Scott Presses to an absolute minimum.

For better web control install—

Friend or Foe— He Reads It!

- ¶ Everyone in and around Baltimore is either a friend or foe of the Sunpapers. Fortunately the list of friends is many times longer than the list of enemies.
- ¶ But friends or foes—those who believe in our policies and those who do not—they all buy and read the Sunpapers!
- ¶ The Sunpapers may step on their pet corns. The Sunpapers may ridicule all their favorite “isms” and “itions”—but to get the news of their own town, of the nation and of the world, they’ll read the Sunpapers—Morning, Evening and Sunday.
- ¶ And friend and foe agree that the Sun Carrier System which delivers the larger part of the Sunpaper’s circulation right to the front door is one policy that is above criticism!

Baltimoreans Don't Say "Newspaper"—They Say "SUNpaper"

How many are

533,169

People?

Yale Bowl Seats 80,000 people

125,565 People attended The Dempsey-Tunney Fight!

*That's a whale of a lot of People **BUT***

Philadelphia Sesqui Stadium Seats 125,565

When you come to think of it, that's a small number if compared with the tremendous mass of people who assemble each evening to read 'Philadelphia's newspaper'—The Bulletin.

Franklin Field, Philadelphia, Seats 83,500 people

*For Comparison let's consider
the following capacities of well known Stadiums*

Princeton Football Stadium Seats 55,000 people

Sesqui-Centennial Stadium . .	125,565 people
Franklin Field (Philadelphia) . .	83,500 "
Shibe Baseball Park	33,000 "
Phillies Ball Park	19,000 "
Princeton Stadium	56,000 "
Yale Bowl	80,000 "
New Baltimore Stadium	75,000 "
New York Polo Field	55,000 "
	527,065 people

That many people and 6,104 more buy The Bulletin each day, and there is a vast army of others—their families—who read it.

New York Polo Grounds Seats 55,000 people

To be exact, 533,169 copies of The Bulletin were sold each day during the six months period ending March 31, 1926, and there has been a steady increase during the period which will end on the last day of this month.

The circulation of The Bulletin is far larger than that of any other Philadelphia newspaper, and is the third largest in the U. S.

PHILADELPHIA NEWSPAPER CIRCULATIONS

No. 19

Employee Control of Munsey Newspapers to Follow Purchase by Dewart

Mutualization Plan Fostered by Late Publisher Now Being Formulated—\$13,000,000 Price for New York Sun and Telegram and Mohican Chain Stores—Sun Highly Prosperous

WILLIAM THOMPSON DEWART, who started as \$12 a week bookkeeper, is now the owner of the Munsey newspapers, the *New York Sun* and the *New York Evening Telegram*. He purchased them this week together with the Mohican chain of grocery stores of the late Frank A. Munsey from the Metropolitan Museum of Art, residuary legatee in the will of the publisher. The transaction involved in the neighborhood of \$13,000,000.

Mr. Dewart's purchase, he announced, was the first step in a mutualization of the newspaper properties, which would eventually place them in the hands of employees of both dailies, according to a plan considered by Mr. Munsey a short time before his death on Dec. 22, 1925.

When Mr. Munsey died, Mr. Dewart became the president of the companies publishing the Sun and the Telegram. More than a quarter of a century had elapsed since his humble entry into the business as bookkeeper. Mr. Dewart had advanced to be head bookkeeper, treasurer, and then vice-president and manager of the companies he owns today. He was one of Mr. Munsey's closest friends.

The statement he issued this week through Keats Speed, managing editor of the *New York Sun*, follows in full:

"William T. Dewart announced that he had purchased the *New York Sun* and *Evening Telegram* from the Metropolitan Museum of Art, the residuary legatee under the will of the late Frank A. Munsey. At the same time Mr. Dewart announced that his purchase also included the Mohican properties.

"In a short time, Mr. Dewart said, the process of mutualization of these properties will begin. It was Mr. Munsey's plan to have the associates of his newspapers join with him in the conduct of the business.

"For many months prior to Mr. Munsey's death, Dec. 22 of last year, he had been planning the mutualization project.

"In taking over the newspapers Mr. Dewart is making his first step toward carrying out the ideas of his late friend.

"The amount involved in these transactions was in the neighborhood of \$13,000,000."

When the will of Mr. Munsey was made public last December it was estimated that the museum would realize about \$40,000,000 from the various Munsey properties. The directors of the museum said that, while the legacy undoubtedly was immense, they were unable to calculate anywhere near the exact amount.

Purchase of the two newspapers still leaves much Munsey property undisposed of. Among these unsold properties are the *Munsey and Argosy All Story* magazines, the Mohican Hotel at New London, Conn.; a large estate, Garondah, at Elizabethtown, N. Y., and the old Louis Sherry estate at Manhasset, L. I. The unsold assets of the publisher also include realty in New York City and many stocks and

William T. Dewart

bonds, including large holdings in the Munsey Trust Company, Washington.

Outside bankers will not enter into the present transaction. All financing will be done within the organization it is stated.

From unconfirmed, but reliable sources, EDITOR & PUBLISHER learned that mutualization of the newspapers will center around three main wheelhorses besides Mr. Dewart, the chief. The trio will be Frank O'Brien, editor of the Sun; Keats Speed, managing editor, and Edwin S. Friendly, business manager. Of course R. H. Titherington is vice-president of the Sun Printing and Publishing Association and co-executor with Mr. Dewart and the Guaranty Trust Company of the Munsey

will and Fred A. Walker is managing director of the Telegram.

Mr. O'Brien has been with the Sun almost continually since 1896. Mr. Speed was managing editor of the *Press* when Mr. Munsey purchased that newspaper in 1912. Since then he has also been associated with the *New York Journal* and the *Atlanta Georgian*. He was managing editor of the *New York Herald* when that newspaper was sold to Ogden Reid, remaining with Mr. Munsey on the Sun.

Mr. Friendly first joined the Sun in 1922, coming from the *New York Times*.

Details as to the value of the several properties involved are not revealed by the principals. The Mohican Company is capitalized at \$3,000,000, and if that

valuation is the one accepted by the museum and the purchasers, the combined valuation for this sale of the Sun and Telegram is about \$10,000,000.

Gross earnings of the Sun for 1925 are estimated to have been about \$7,500,000, and Park Row estimates the net profit for that year at \$1,500,000.

For the first six months of 1926, the Sun carried 11 per cent more national and about 25 per cent more local advertising than during the same period of 1925. Its total of 8,402,130 page lines for the period surpassed the 1925 record by about 20 per cent. Circulation figures are not greatly changed.

The Telegram has not made similar progress. While its circulation hovers about the 200,000 mark, its lineage has not held the pace of increase set by the Sun and kept by other evening papers. Classified lineage shows a gain, but losses appear in the local display and national columns during the first six months of 1926.

Mr. Munsey frequently discussed the mutualization of his properties with his chief executives, and it is the plan as he saw it that is being worked out now. Mr. Munsey before he died was firmly convinced that a mutual profit sharing system, enriching those who accomplished most for his properties, was the most equitable business system.

In an editorial entitled "The Future of the Sun," the plans of Mr. Dewart and his associates are outlined. The editorial is herewith presented in full:

"On December 31, 1925, nine days after the death of Frank A. Munsey, owner and editor of this newspaper, the Sun said editorially:

The terms of Mr. Munsey's will make it possible for the Sun to assure its readers that they will continue to enjoy a clean newspaper of interest, political independence, honesty and fearlessness. The organization with which Mr. Munsey brought the Sun to its present commanding position remains intact. That organization will bend every effort to make the Sun a newspaper even more worthy of its readers and its late owner.

"The manner in which this continuity was to be maintained was indicated about the same time in a statement issued by William T. Dewart, Mr. Munsey's long-time friend, closest business associate and the first of the three executors named in Mr. Munsey's will.

"Mr. Dewart announced that it had been Mr. Munsey's purpose, conceived after his will was executed in 1921, to make partners of those associates who had helped him to bring the Sun to its high success. Mr. Dewart, speaking for himself and the two other executors, Richard H. Titherington and the Guaranty Trust Company of New York, expressed a desire to translate into fact the unwritten wishes of Mr. Munsey.

"To bring this about would have been difficult if the executors had not received the sympathetic understanding and aid of the trustees of the Metropolitan Museum of Art, the residuary legatee of Mr. Mun-

LEADING EXECUTIVES OF DEWART NEWSPAPERS

sey's fortune. A beneficiary less unselfish might have insisted upon putting the Sun on the auction block, thereafter to be the

Edwin S. Friendly
Business Manager, Sun

plaything of some personal ambition or to become a mere commercial or political organ. But President De Forest of the Metropolitan and his fellow trustees were quick to appreciate the plan which Mr. Munsey had been making; quick to realize the importance of the Sun as it was, and is, and will be, to this community.

"The outcome, briefly, is that the Sun, now purchased by Mr. Dewart from the Metropolitan Museum of Art as the first step toward mutualization, will continue to be conducted by those who under Mr. Munsey's guidance brought it to eminence and who, under the direction of Mr. Dewart since Mr. Munsey's death, have carried on. In this connection it is pleasant to record that in the nine months since Mr. Munsey died the Sun has not lost a single department head or, in fact, any man whose work was vital to the paper. Under the leadership of Mr. Dewart as president of the Sun Printing and Publishing Association the organization has worked in perfect harmony. The Sun's advance in circulation, advertising and general excellence, rapid as it was in the final years of Mr. Munsey's guidance, has continued steadily. Nothing could be better proof than this that the way to keep the Sun in its high place as the greatest evening newspaper is to leave it in the hands that have sustained it since Mr. Munsey turned away from his desk for the last time.

The details of Mr. Dewart's plan for the mutualization of the property will be announced in due time. Meanwhile the readers of the Sun—and they compose the most important element of its success—may rest assured that the Sun they are to have is the same Sun they have known. More than ever the Sun will be an independent newspaper, free from all political and financial shackles and bound only by its own pledge to be honest, clean, intelligent and interesting."

At 22, when he entered the Munsey employ, Mr. Dewart brought with him a curious assortment of past experiences. He had been a button manufacturer, a chemist, a professional singer and a public accountant.

It was his knowledge of bookkeeping that started him on his newspaper career.

"I had to straighten out the worst set of books I ever tackled and to make an inventory," Mr. Dewart has said, referring to his first Munsey job, which he obtained through Erman J. Ridgway, general manager of the Munsey concerns in New London, Conn., after application directly to Mr. Munsey. He did so well at this initial task that he was assigned to one of the sets of books in the Red Star News Company, a dis-

tributing organization for the Munsey publications. Working from eight in the morning to midnight every day for 18 months, Mr. Dewart was promoted in rapid succession to head bookkeeper of the Red Star News Company, assistant superintendent of the manufacturing plant, and editor of the business. When the Frank A. Munsey Company was incorporated in 1902 he was made treasurer without bond.

Development of a cost system almost universally used in business today was one of the outstanding achievements of this early period of Mr. Dewart's career. It seems Mr. Munsey carried most of his business affairs in his head, and considered that his employees should do likewise. Mr. Dewart did not care to trust to his memory entirely, nor did

Keats Speed
Managing Editor, Sun

his superior of those days, Mr. Ridgway. The former, therefore, began keeping a record book out of which the cost system grew.

When Mr. Ridgway retired as general manager in 1903, Mr. Dewart was appointed to succeed him. He was then given his title of vice-president and general manager. As newspapers were purchased he became vice-president and manager of several concerns.

Meanwhile, as the years passed by, Mr. Dewart became a closer and firmer friend of Mr. Munsey. During the last days of the publisher this friendship became most apparent. While Mr. Munsey lay dangerously ill in a New York hospital, he was unwilling for Mr. Dewart to be away from him even for a short while, and on awakening would invariably ask for him. Just before his death, Mr. Munsey directed that Mr. Dewart would succeed him as president of the Munsey interests.

Mr. Dewart might have become a maker of buttons instead of metropolitan dailies. Born in Canada of Scottish stock, he had early in life moved to Rochester, N. Y. In the part of the city where he lived, a button factory was located. One day the boss asked young William if he wanted to learn the trade. William, then 14, agreed. Chemistry, he learned, was a valuable asset to any man engaged in the business he had entered. Consequently, although he had been unable to take a high school course, he matriculated at the University of Rochester as a special student in applied science.

When he had sufficiently mastered the chemical secrets he had been seeking, he left college. With his brother Robert he found financial backing with which to start the German-American Button Company. About that time, however, the Cleveland tariff began to make itself felt, and profits were so reduced the brothers decided to sell out and did. The button factory continued long afterwards, however. During the World War the name

was changed to Art in Buttons, Inc.

There were still two years to elapse before Mr. Dewart was to find his real groove in the publishing business with Mr. Munsey. He traded on commission in sugar, tea, coffee, lubricating oils and the like for New York interests. Urged by friends, he tried railroading, working on a wrecking crew and in the machine shops of the Buffalo, Rochester & Pittsburgh Railway.

This did not seem to promise much of a future, and Mr. Dewart tried still another tack. Public accountancy, he determined, would prove a likelier opportunity for his talents. He studied bookkeeping for more than a year and then, feeling that he was ready to tackle a big job, he applied for a position to Mr. Munsey, then unknown to him except by name.

It was Charles A. Dana who first put truth in the saying that the New York Sun was the "greatest force in the republic." Benjamin H. Day, the man who "discovered people were human and wanted to read human pieces in their newspaper" had had the courage to found the Sun in 1833 as a penny paper in a city where only sixpenny respectables had prospered before.

Dana had become owner in 1868, purchasing it from Moses Y. Beach. For 29 years this brilliant American journalist held sway. He was the greatest satirist of his time, the keenest analyst of public problems.

The Sun prospered under Dana. When he died in 1897, the newspaper was held to be worth at least \$5,000,000.

For a short time after Dana's death, his son, Paul Dana, was editor. He was succeeded by Edward P. Mitchell, who today is a director of the paper. Meanwhile control passed to William M. Laffan, who also established the Laffan News Bureau.

Frank O'Brien
Editor, Sun

The news bureau was not a prosperous venture. In 20 years it was estimated the Sun lost \$2,000,000 on its news service, which Mr. Munsey was later to discontinue. For several years before Mr. Munsey entered the picture the Sun ran behind nearly \$200,000 annually, not because of poor management, but because of the drain of its resources by its news-service.

William C. Reick and associates had acquired the Sun from Mr. Laffan's widow in 1911, and it was from Mr. Reick that Mr. Munsey purchased the Sun in 1916 for more than \$3,000,000, and immediately began his series of consolidations.

Mr. Munsey's purchase included the Evening Sun, established by Mr. Dana nearly 20 years after he had bought the morning publication. Mr. Munsey's first step on assuming control was to merge the Sun with the New York

Press, a paper founded in 1884, and acquired by Mr. Munsey in 1912 for \$2,500,000. This merger gave the Sun its Associated Press membership.

In 1920, Mr. Munsey bought for about \$4,000,000 the New York Herald, the New York Evening Telegram and the Paris edition of the Herald from the Bennett estate. He consolidated the Sun and the Herald as the New York Herald. At the same time the Evening Sun became the Sun.

Then he announced that his total investment in newspaper properties was \$16,000,000. Of that total, he said, the value of the Herald, Sun and Telegram amounted to \$11,500,000.

There were other purchases and consolidations to follow. On May 26, 1923, he bought the New York Globe and Commercial Advertiser, oldest daily in America, and merged it with the Sun. The price paid was reported to be \$2,000,000. On Jan. 24, 1924, he bought the New York Evening Mail, paying Henry L. Stoddard "well in excess of \$2,000,000." This brought the total investment up to more than \$20,000,000. But since then, in March, 1924, the Herald was sold by Mr. Munsey to the New York Tribune for a price said also "to be more than \$2,000,000," and probably more nearly \$4,000,000.

Of romance and glamor, there is plenty in the stories told of the early days of both the New York Sun and the New York Telegram. Frank O'Brien tells the Sun's story in "The Story of the Sun, 1833 to 1918."

Among many incidents, O'Brien's book tells how the Sun's first reporter, challenged to a duel by a quack dentist, accepted the challenge and named as weapons syringes filled with the faker's own medicine; how the Sun's first sports editor went on horseback to the fields behind Hoboken to cover the Sun's first sport story; how the Sun's first animal story was about a flock of wild pigeons roosting in a tree at the Battery; and how the Sun first obtained the governor's advertisement, calling an election at which the people of New York gained the right to elect their mayors by popular vote.

The Telegram was established in 1867 by James Gordon Bennett and in time became a lively and very profitable news paper.

Mr. Munsey, purchasing the Evening Mail and merging it with the Telegram in 1924, announced:

"This purchase puts the evening news-

Fred A. Walker
Managing Director, Telegram

papers of New York in a safe and strong position. Financially they are now impregnable."

CUTTING FREE PUBLICITY FROM RADIO PROGRAMS

Many Newspapers Refuse to Print Names of Advertised Goods as Labels to Air Entertainment—Majority Hold Question Is for Editors to Decide, but Advertising Executives Frown on Brand Names in News Columns

By ARTHUR ROBB

A NEW phase of relations between the newspapers, the radio industry, and the reading and listening public is apparent as the cool nights of Autumn bring new life to the ether waves. The radio industry, by which is meant the broadcasting stations and the allied manufacturers of receiving sets and the parts thereof, enters the new season thoroughly convinced of the immense possibilities of financial gain to itself by the sale of time on the air to firms which want "name publicity."

The listening public, it is apparent from the published programs and trade gossip, will be introduced to a number of newcomers acting as sponsors of various forms of entertainment. The newspapers are receiving tremendously increased volume of publicity matter announcing these new features and the programs of daily events, with the last possible comma edited out, threaten before winter comes to run to prohibitive lengths, even in the present-day encyclopaedic newspaper.

It is the last element which is giving impetus to the new phase mentioned in the first sentence. The newspaper publishers are taking new stock of the situation. They see the owner of the broadcasting station selling time in competition with space in the daily press, taking money which they feel could be spent to better advantage in their own columns. They hear of solicitors for the broadcasting station promising not only phenomenal results in the form of good will and direct business from the broadcast programs, but also publicity in the newspapers for the programs.

Solicitors for local stations seeking local merchants' contracts for radio time were promising newspaper publicity which the newspaper solicitors refused to the same merchants!

One publisher narrates an instance of a solicitor for a radio station who called upon an advertiser with letters, post cards and a list of telephone calls received in response to appeals for applause for this firm's program of the night before, explaining that there would have been an even greater response but for the fact that "the damned newspapers" did not handle the announcement of the program as prominently as they should have.

This publisher also found that a considerable number of firms which had never advertised in his or any other local newspaper were being sold on broadcasting and were relying on the publicity given to their announcements in the newspaper radio columns to recruit listeners for their broadcast propaganda.

Developments of the past few months and indications for the future are that more names of firms and brands will find their way into the free radio program space than will be found in the paid space of the average day.

The newspapers' radio pet of 1922 is growing into a space-devouring monster comparable to the parasite which eats much of the publisher's potential profit from automobile advertising. It has far more dangerous possibilities for the newspaper than automobile publicity ever had. It has all of the bad characteristics of automobile or any other free publicity—partaking of space-wasting, rate-cutting, and unfair competition with non-recipient firms or industries—it has also the additional disqualification that every line of favor given the radio industry by the daily newspaper helps the radio industry to take a dollar from the publisher's rightful income.

There is fair warrant for believing that so many dollars spent wisely in newspaper advertising will bring so many dollars return.

There is absolutely no warrant for belief that any expenditure in radio name publicity, which must have publication support, will bring in onemore dollar

than the publications alone would have returned.

Radio and the newspapers are therefore competing for the same piece of the same dollar.

This fact is finding its way into newspaper publishers' consideration of the subject and many of them are trying to find a way out which will do the least possible damage to the radio industry and to themselves by resentment of the listening public and at the same time prevent radio from becoming a malevolent giant at the newspapers' expense.

One publisher who responded to EDITOR & PUBLISHER's telegraphic poll this week, believes that the process of shortening the publicity tail should start directly back of the ears. He doesn't know whether his idea can be worked successfully and does not care to be identified with it as yet, but here is the solution which he and his fellow publishers this week put into effect:

Immediate discontinuance of all commercial radio publicity, regardless of circumstances, including even the elimination from regular programs of the names of firms broadcasting entertainments and

the nicknames given orchestras and entertainers.

"We reached this decision," he said, "after attempting vainly to adopt a plan which would enable us to discriminate fairly between those programs which might be entitled to attention because of musical or other merit and those for which publicity is demanded solely because the firms promoting them are advertisers."

"We are going to eliminate all write-ups of manufacturers, sets, accessories, equipment and everything else of a commercial character," he continued. "We are planning to suggest to the manager of our leading local broadcasting station that he use a part of the money he receives from broadcasting entertainment paid for by advertisers to advertise his paid programs on our radio page in the same manner that the theatres advertise their bills daily."

"We have spent many hours studying the problem and we can't see how a rule that permits any exceptions can be enforced without endless difficulties. Under our plan, we will treat everybody alike. Any advertiser who feels that his radio program will bring him business

or valuable good will should be willing to make the slight additional investment necessary to invite our readers to listen when he is on the air. We can't see that we are under any obligations to do this for him. We have also a few examples of advertisers who are doing just this thing."

General sympathy with this policy is indicated by the opinions of leading executives of a score of newspapers questioned by EDITOR & PUBLISHER this week. Newspapers whose community of interest with their readers is attested and bulwarked by substantial advertising patronage are slowly but certainly getting out from under the free publicity burden. They are leaving the question of what goes into the text columns of the paper for the decision of the editorial staff and EDITOR & PUBLISHER has evidence that its unremitting campaign against press agency and free publicity has awakened editorial men as well as publishers to the menace of this defect in their vessel. Take this reply as an instance:

"The advertising department has no control of the news department," declared Fleming Newbold, business manager of the *Washington Star*. "Our radio programs are handled purely in the interest of the reader, with the least possible mention of advertisers. The *Star* does not print free publicity for automobiles or any other industry, the editors being the sole judges of what interests our readers."

A similar view is held by S. E. Thomson, business manager of the *Chicago Tribune*, who said:

"We do not carry names and brands of advertisers in our radio programs and have not for some time. The *Tribune* has taken the position that radio programs are news columns and that advertising has no more place in them than in other news columns of the paper."

Likewise similar and characteristic is the answer of J. K. Groom, national advertising director of the *Aurora* (Ill.) *Beacon-News*, *Joliet Herald-News* and *Elgin Courier-News*, who said:

"I am for elimination of advertising from radio programs. If I was editor, I would not publish radio programs. When advertising begins on the radio, I turn to some other program. When the big papers quit giving free service, the small ones can, and all will benefit. The way to resist demands is quit giving anything free."

The *Philadelphia Bulletin* believes "that to print free advertising in the radio columns is bad newspaper practice," according to William Simpson, business manager.

The *Richmond News-Leader*, owned and published by John Stewart Bryan, president of the American Newspaper Publishers Association, declares that it does not use the advertisers' names or brands in radio programs.

The *Baltimore Sun* makes the same statement, and J. F. Bresnahan, business manager of the *New York World*, holds that "advertisers' names and brands in radio programs certainly could be construed as free advertising and newspapers could very properly consider the elimination of such and not materially weaken the programs."

Says Victor H. Hanson, publisher *Birmingham News* and *Montgomery Advertiser*:

"Our radio programs to all practical purposes contain no free advertising. We long ago stopped any such indiscriminate use of the programs. A few trade names appear here and there in such a way as to constitute far more of information to the radio fan than of advertising to the promoter. Any legitimate movement to curb parasitic growths of free publicity has our general sanction."

NOVEL AD CLUB CEREMONY IN LOS ANGELES

Grouped around a huge register, members of the Advertising Club of Los Angeles wrote down their names with a tremendous pencil at the first club meeting of the year, Sept. 14. Those in the picture are, from top to bottom: Florence Gardner, A. J. Hanson, Albert D. Stetson, H. A. Water; (kneeling) Marshall Dana, associate editor of the *Portland Oregonian* and president, Pacific Coast Advertising Clubs association, and Harold Stonier, president of the Los Angeles club.

A. B. C. ANSWERS OPPOSITION TO PLAN FOR LISTING ADVERTISING RATES

Directors Make Plea for Proxies to Vote Proposal in at October Meet—Assert Extra Expense Will Be "Infinitesimal"—Ask Other Pledges Be Rescinded

O. C. HARN, president, and Stanley Clague, managing director, representing the directorate of the Audit Bureau of Circulations, this week issued an official plea for proxies to combat opposition to the Bureau's plan affording opportunity to all publisher members, who desire it, to insert their standard rate cards on the last page of their publisher's statements. The proposal will be voted on by the

O. C. HARN

A. B. C. membership at the annual convention to be held in Chicago, Oct. 21-22. Personal attendance at the convention was urged, but in the event that is impossible, the board advised members to rescind proxies "given without full knowledge of the objects desired," and to issue another naming either their own special representative or a director.

The official communication, addressed to Bureau members, answered two objections to the advertising rate proposal voiced by New York newspaper members through a committee consisting of Fred A. Walker, *New York Telegram*, J. F. Bresnahan, *New York World*, and E. G. Martin, *Brooklyn Eagle*, who have issued a call for opposition proxies.

The two objections listed in the communication, the added cost organization of the new Bureau service would entail, and the assertion that changes in rates after the issuance of publishers' statements would not be available, are declared to be based on misconception and error.

"The extra expense to the Bureau will be infinitesimal—less than one per cent of the membership dues," the communication stated.

Answering the second objection, it is declared that a form of service has been devised by the Bureau so that upon receipt of advice by telegraph or other manner of a change of rates, all advertiser and advertising agent members will be immediately equipped with material giving full and permanent information.

The letter, dated Sept. 27, follows:

"In pursuance of its constant policy to improve and augment the service rendered to members, the Board of Directors decided at its June meeting to give opportunity to all publisher members who might so desire, to insert their standard rate cards on the last page of their publishers' statements.

"The Board was unanimous in its belief that this additional service, giving as it would all the facts about circulation and rates in one document, would be appreciated by all members—Advertisers, Advertising Agents and Publishers.

"It was also the opinion of your Board that this was another step toward the attainment of its objective to secure a thorough knowledge by advertisers of all the facts concerning publications' circulations, through the study of every page of A. B. C. reports instead of relying upon condensed excerpts.

"And it was also the opinion of the Board that in concentrating attention on A. B. C. publications, giving added publicity without extra cost, it was serving every member of the Bureau and making A. B. C. membership increasingly valuable.

"Over four-fifths of the newspaper publisher members of the Bureau have already signified their desire to use this added service.

"And a great many letters have come to the Bureau—unsolicited—enthusiastically commending the step. Proof sheets from a forthcoming Bulletin to be issued by the Bureau are enclosed herewith.

"On the other hand, some criticism has been published by a small but prominent group of publishers, who do not favor the plan. Aside from this group the Bureau has received directly from publishers less than twenty letters in opposition.

"The opposition to the plan is based upon:

"Objection 1: The added cost.

"This is based on misconception. The extra expense to the Bureau will be infinitesimal—less than one per cent of the membership dues.

"Objection 2: That changes in rates between the time of issuance of publishers' statements will not be available.

"This too is based on error. A form of service has been devised by the Bureau so that upon receipt of advice by telegraph or other manner of a change of rates, all advertiser and advertising agent members of the Bureau will be immediately equipped with material giving full information in a manner to make the record permanent.

"There are other minor objections which will be discussed during the annual convention of the Bureau to be held in Chicago on October 21st and 22nd.

"But in the meantime, the group unfavorable to the plan is asking for proxies from publishers to pledge themselves in advance of any deliberation on this and other matters which may be vital to the further success of the Bureau.

"Your Board feels that in your interest it should appeal (1) for your personal attendance at the annual convention of the Bureau; or (2) if that is not possible and you have given a proxy without a full knowledge of the objects desired, that you rescind such proxy and issue one to your special representative, or to a member of the Board representing your division—Walter A. Strong, publisher, *Chicago Daily News*, or David B. Plum, publisher of the *Troy (N. Y.) Record*—to some fellow publisher who has not committed himself on the questions in advance and before adequate consideration. A proxy blank is enclosed herewith.

"Your Board regrets the necessity of addressing such a communication as this to the members of the Bureau, but it believes that the vital issues to be discussed at the convention warrant this appeal for independent judgment after a full hearing of arguments on both sides of all the questions at issue."

NEW DAILY STARTS

Sunset News and Times-Leader Launched in Bluefield, W. Va.

BLUEFIELD, W. Va., Sept. 30.—The *Sunset News and Times-Leader*, an afternoon newspaper was launched here Sept. 22. Its first issue consisted of 24 pages. Wire service is furnished by the Associated Press, International news and special correspondents.

The paper is published by the Daily Telegraph Printing Company, publishers of the *Morning Telegraph*. It will support Democratic policies.

W. K. McDowell, who has had 35 years' experience in newspaper work, is in charge of the editorial page.

CHANGES ON COAST DAILY

Franklin O. Schroeder has resigned as editor and publisher of the *San Diego (Cal.) Daily Independent*. George W. Lynn was named as editor, and Charles J. Plambeck, former advertising manager, is now general manager.

EDITOR & PUBLISHER CALENDAR

- Oct. 4-6—New Jersey Press Assn., Newspaper Institute, Rutgers University, New Brunswick, N. J.
- Oct. 4-7—Newspaper Librarians, 4th annual conference, Hotel Chelsea, Atlantic City.
- Oct. 5-7—Window Display Advertising Assn., Pennsylvania Hotel, New York.
- Oct. 6—Associated Press Directors, meeting, New York.
- Oct. 8-9—Associated Dailies of Florida, Florida State Press Assn., South Florida Press Assn., joint meeting, Clarendon Hotel, Daytona Beach, Fla.
- Oct. 11-15—Associated Merchandising Assn., annual meeting, St. Louis.

- Oct. 21-22—Audit Bureau of Circulations, annual convention, Hotel La Salle, Chicago.
- Oct. 21-22—American Society of Sales Executives, annual convention, White Sulphur Springs.

62 YEARS WITH DAILY

T. E. Sullivan of Chicago Tribune Is Oldest Staff Member

Thomas E. Sullivan, one of the veterans in the composing room of the *Chicago Tribune*, rounded out his sixty-second year with the paper this month. He is the oldest member of the Tribune staff from the standpoint of service. He will be 84 years old on Oct. 16, 1926.

Mr. Sullivan has handled, in the composing room, stories of the Chicago fire, the Franco-Prussian war, the assassinations of Presidents Garfield and McKinley, the Tilden-Hayes campaign for the presidency, and the eight to seven decision which gave the office to Hayes.

"I think the most remarkable achievement of the Tribune was the printing of the revised edition of the New Testament as a part of a regular Sunday edition," Mr. Sullivan says. "To achieve this it was necessary to put 120 printers (hand-setters) on this job and to keep them at it for 18 consecutive hours. I believe this was a record in hand composition."

When Mr. Sullivan came to work for the Tribune, Horace White was editor-in-chief and Alfred Cowles was secretary and treasurer.

N. Y. LIBRARIANS MEET

The heads of reference departments of the various New York newspapers held a dinner meeting at the Newspaper Club, New York, on Monday evening Sept. 20, to discuss matters to be placed before the coming conference of Special Libraries Association in Atlantic City. David Rogers, reference director, *New York Herald Tribune* had charge of the arrangements. Besides Mr. Rogers, others present were John Goetz, *Evening Post*, Richard Meyer, *Daily Mirror*, John Miller, King Features Syndicate, Frank Purdy, *Bronx Home News*, Matthew Redding, *Evening Telegram*, Arthur Rosenstock, *Bronx Home News*, Charles Stolberg, *Evening Sun*, Maurice Symonds, *Daily News* and James Wells, *World*.

DALE CASE SUBMITTED TO SUPREME COURT

Writ of Error Filed Monday in Washington—May Not Come Up for Argument for a Year

The complete record of the contempt case of George R. Dale, editor of the *Muncie (Ind.) Post-Democrat*, vs. the State of Indiana, now reposes in the over-crowded archives of the United States Supreme Court.

By filing the customary writ of error with the highest law tribunal Monday, Dale formally appealed from the Indiana Supreme Court decision upholding the action of the Delaware Circuit Court of Indiana in holding Dale in contempt on the grounds that he "wilfully, knowingly and corruptly published and caused to be published" in the *Muncie Post Democrat* matter which brought the lower court and the Grand Jury "into disregard and disrepute of the citizens" of said county.

The record, as filed by counsel for Dale Monday, covers 65 typewritten pages (foolscap legal size).

Owing to the badly congested state of the docket of the highest court EDITOR & PUBLISHER was informed this week that there is little chance of the case being heard by Chief Justice Taft and his judicial associates for a year or more unless some agreement is reached to set the case forward. Even then it will probably be months before the case is reached. Briefs are not likely to be filed by either side until the date of hearing or argument is fixed.

PUBLISHER "CALLS" GOVERNOR

Blethen of Seattle Times Now Demands \$1,000 For Charity

Colonel C. B. Blethen, publisher of the *Seattle Times* refuted the statement made by Governor Roland H. Hartley recently that he, the governor, had never sought to buy any state timber, and demanded payment of \$1,000 to charity which the governor had promised if the Times' charges could be proved.

In a speech in Tacoma, Sept. 9, Governor Hartley said: "I never did make application for a tree of state timber personally. I have been engaged in buying timber for other companies and that particular tract was being purchased for the Cherry Valley Logging Company.

"If Clarence Blethen can show where I did make application personally for any state timber I will give \$1,000 to any charity he names."

Colonel Blethen the next day printed photographs of two applications for state timber signed by Roland H. Hartley only, and demanded payment of the \$1,000.

DAILIES CHANGE NAMES

The following newspapers have notified New York headquarters of the Associated Press of a change in their names: *Fredericksburg (Va.) Evening Star* to *Free Lance-Star*; *Freeport (L. I.) Daily Review* to *Nassau Daily Review*; *Abilene (Tex.) Daily Reporter* to *Morning News*; and *Boonesville (Mo.) Republican* to *Sentinel-Missourian*.

I. A. A. CHANGES 1927 DATES

Dates for the 1927 Denver convention of the International Advertising Association have been changed from June 5-10 to June 26-30, to permit delegates to visit the national parks of the Rocky Mountain region. The Pacific Coast district of the association will meet at Portland, Ore., June 19-22.

COAST PAPER INCORPORATED

Articles of incorporation have been filed by the *Palos Verdes Valley Times* of Blythe, Cal., showing Floyd Brown, T. S. Rush and W. H. Plummer of Blythe as directors.

NEWSPAPERS PUT NEW GASOLINE ON MARKET

Name Contest Conducted in Advertising Columns of Pacific Coast Dailies Polled 750,000 Replies for General Petroleum Corporation—Director Tells the Story

(By Telegraph to Editor & Publisher)

SAN FRANCISCO, Cal., Sept. 28.—A new product, which advertising executives agree, is one of the most difficult to advertise—gasoline—has just been presented to the public of the Pacific Coast with tremendous success.

It was put over by means of a contest for a name conducted in the advertising columns of Pacific Coast newspapers. Fifty thousand suggestions were expected, nearly 750,000 were received.

A list of 148 newspapers was used. Judges have chosen the name "Motocrat," which is to be announced in the newspapers this week.

Officials of the General Petroleum Corporation of California had a new gasoline to offer, a gasoline that was the result of manufacturing a special fuel for hydroplanes and subsequently perfected for commercial production. It was necessary to convince the public that this gasoline was really new, that it would do the things that others gasolines would not.

While the product had shattered two world speed records for hydroplanes within a period of two months, it was realized that this was not enough to make the public demand it. How often do we read that Mr. Blank, famed automobile racer, has again broken the world's speed record using "Blue Moon" gasoline? But how many sales are made that can be traced to Mr. Blank's race? Very few, I am afraid.

The General Petroleum Corporation had a gasoline to present that not only produced increased speed, but that gave more gas miles, produced less carbon and more power. N. W. Ayer & Son prepared the merchandising plans and the advertising program that called for a contest to name the fuel.

Morning newspapers carried the first inkling to the public of the introduction of the new product. Scattered through each newspaper were three teaser advertisements, reading:

"We'll pay \$1,000 for a name. Watch the papers Monday."

The following two days more of these teaser advertisements appeared. On one Monday morning, the newspaper reading public in California, Oregon, Washington and British Columbia were told the complete story of the new gasoline and that the \$1,000 name about which they had been reading was wanted for this new product.

The General Petroleum Corporation distributes its products through independent dealers only. Meetings of the dealers were held several days before the first contest announcement was printed and all of the details of the program were presented to them by officials of our company and representatives of N. W. Ayer & Son.

Thus dealer co-operation and acceptance for the new product were obtained before a single line appeared in the newspapers.

In many ways the company is handicapped in distributing through independent dealers. These gasoline stations in numerous cases are poorly located. Company-owned stations have the choice locations. Because of the expense and added staff required, many of the independents cannot give the service that is offered by the larger company-owned stations.

All of this was taken into consideration and the copy was prepared in such a fashion that the public was directed to the independent stations.

The rules of the contest provided that the judges would award 10 points in judging the names if the name submitted was written on blanks obtained from general independent dealers. This induced the contestant to go into a service station to obtain a blank. Few people are willing

By L. HOFFMAN-PINTHER

Advertising Director, General Petroleum Corporation

Judges met in San Francisco this week and picked from 750,000 suggestions a name for a new gasoline produced by the General Petroleum Corporation.

The amazing total of suggestions was received as a result of 30-day \$1,000 prize contest conducted by the corporation in the advertising columns of Pacific Coast newspapers.

As a comparison a contest conducted by a comparatively new but powerful magazine might be cited. This magazine in a "President's contest," which required putting together correctly the composite pictures of Presidents of the United States, and conducted over a period of three months, brought out what the magazine claims is the biggest response ever received from a contest it had held—116,000 replies.

to go to a station for something free without making a purchase.

The response was so great, in spite of the many thousands of blanks that were issued, that it was all that contest headquarters could do to keep the dealers supplied. Many dealers, handling other brands besieged the corporation's offices, requesting that they, too, be allowed to distribute the "new mystery gasoline." The public was demanding it, and they realized that they were at a great disadvantage without it.

The contest was conducted for 30 days. Half-page advertisements in the larger cities, reduced to smaller sizes in the rural districts, were run in the newspapers during the entire contest period.

The gasoline was heralded as the "latest and greatest development in motor fuel oil—developed for hydroplanes that broke the world's record and now ready for your car."

In detail, the seven new qualities of the gasoline and the results the consumer could expect were presented and why these results could be obtained.

Public acceptance was almost immediate. Tank trucks were kept running

nights, replenishing rapidly diminishing dealer tanks. Within 24 hours, name suggestions started coming in to contest headquarters. Dealers and distributors in almost every territory reported that sales were increasing by leaps and bounds.

By the end of the first week, the expectations of the contest managers had been reached. Already 50,000 names had been received. The middle of the second week saw the mail wagons dropping letters off in sacks of half a dozen or more.

The largest number of letters received in one day was during the closing week, when the post office delivered 36,000 separate pieces of mail.

Name suggestions came in all forms. A cake was sent in with the name iced on the top. Many were done in oils. Even a bronze casting with the name molded in it was received.

Hundreds of registered letters, special delivery letters, and even telegrams came in. Despite the fact that a margin of 10 points was allowed by the judges on all suggestions received on dealer blanks, thousands were received on newspaper coupons, which were printed with the ad-

vertisements. The interest in the campaign was so great and widespread, that the executives of the General Petroleum Corporation have announced additional awards in the form of district prizes, approximation, and honorable mention awards, totaling \$2,000, in addition to the original prize of \$1,000 in cash for the winning name.

Other advertising media were used to support the newspaper campaign. Billboards called attention to the contest details printed in the newspapers. Signs at stations, printed literature for dealers to distribute, all tied in.

As a result of the campaign, sales of the new gasoline have increased more than 22.7 per cent over the sales of the gasoline formerly marketed. The increase started the first week and gained steadily throughout the contest.

After all, the vast number of names received is only an indication of the success. The actual sales figures tell the story.

SCRIPPS ESTATE TOPS SIXTEEN MILLION

Bulk of Noted Publisher's Property in Stocks and Bonds—Liabilities Listed at \$5,683,114

Gross value of the estate of the late Edward W. Scripps is \$16,255,710.45, according to an application for determination of inheritance filed in Hamilton, O., recently by Robert P. Scripps, his son. Liabilities are listed at \$5,683,114. Most of the assets include stocks and bonds.

The debts of the estate include notes and accounts payable to H. E. Neave, trustee \$1,580,641.13; E. E. Martin, \$132,000; First National Bank, \$450,000; Midland National Bank, \$500,000; O. A. Williams, \$134,000; O. S. Herschner, \$1,661,000; W. B. Colver, \$231,000; C. F. Mosher, \$345,756.

Real estate in Ohio, according to the application is appraised at \$12,230 while the following stocks are listed. 41½ shares capital stock of Daily News Company of Omaha, Nebraska, valued at \$62,500; 10 shares Capital stock, Evening News Association, Detroit, \$311,066; 1,000 shares class A stock of E. W. Scripps Company and 3,000 shares class B stock of the same company, both valued at \$11,221,282.

E. W. Scripps died while on board his private yacht on March 12, 1926. Stock at that time held by him in the Scripps-Howard Company was transferred to the E. W. Scripps Company.

CIGARETTE LAW VOID

Utah Statute Prohibiting Advertising Declared Unconstitutional

That section of the Utah anti-tobacco law which prohibited the advertising of cigarettes in any form and in any medium, save in periodicals published outside the state and imported, has been declared unconstitutional by the State Supreme Court.

The original law, passed in 1921, prohibited the sale of cigarettes as well as their advertising; but this law was amended two years later so as to permit the sale but the ban on the advertising was continued.

The decision of the Supreme Court was that the law as it stood at the time of review was an unwarranted interference with interstate commerce and its enforcement not a proper exercise of police powers.

AUGUST LINAGE GAINED 7.4 PER CENT IN N. Y.

AUGUST advertising in the daily and Sunday newspapers of New York City totaled 11,943,302 agate lines, a gain of 882,970 lines, or 7.4 per cent over August, 1925. Gains were made by 10 of the 15 newspapers listed. The number of total pages printed was 15,024, an increase of 580, or 4 per cent, over August, 1925. Three evening papers, two of which carried more business than they had in August, 1925, printed it in a smaller number of pages. Eliminating these, the number of pages printed by the other dailies for the month shows an increase of 10.1 per cent over the total of August, 1925.

Comparative figures for 1926-1925 and for 1926-1920 follow:

CARRIERS OVERCHARGING FIVE PAPERS A. N. P. A. TRAFFIC BUREAU FINDS

**Charges for Transportation of Newsprint and Returned Cores
Being Investigated by New Department Under W. J.
Mathey—Roads Generally Fair, He Finds**

AT least five newspapers are being overcharged by railroads for transportation of print paper and returned cores, according to M. J. Mathey, manager of the new traffic department of the American Newspaper Publishers Association. Mr. Mathey is making a survey of the entire A. N. P. A. membership having received to date about 300 replies to a questionnaire sent out to the membership of about 500.

"The cases where we have found that the rates are too high have been placed before the railroad companies, and we expect to obtain readjustments in an amicable manner," Mr. Mathey said. He withheld the names of the newspapers and the companies concerned, pending possible settlement.

The new traffic manager has not yet been able to make a resumé of the questionnaires returned. R. A. Cook, an expert rate man has been employed by the department and took charge Oct. 1. Mr. Mathey, therefore, expects he will be able to make a detailed report at the A. N. P. A. fall convention at French Lick, Ind., Nov. 10-12.

"We will undoubtedly uncover other cases of over-charging," Mr. Mathey said. "In several cases we hope to get back \$5,000 spent by individual publishers for excessive rates. In all cases we plan to deal first direct with the railroad companies, taking our grievances to the Interstate Commerce Commission or into court only as a last resort.

"Railroad representatives have welcomed inauguration of the A. N. P. A. traffic department. Many have declared they prefer to deal with a man who understands their point of view, rather than with outside claim collectors.

"Newspaper members of the A. N. P. A. are also furnishing us with gratifying co-operation."

A. P. MAKES BARTON HONORARY STAFF MAN

**Advertising Man Also Wins Watch for
Obtaining Interview with President—Senator Says Its
Press Agency**

For getting beyond the "Official Spokesman" and obtaining an interview quoting President Coolidge himself, Bruce Barton, president of Barton, Durstine & Osborn, New York advertising agency, has been elected an honorary member of the staff of the Associated Press, which put the story on its wires.

Kent Cooper, general manager of the A. P., also presented the advertising agent with a wrist watch as an added token of appreciation.

Interviewed by EDITOR & PUBLISHER, Mr. Barton declined to go into detail describing how he obtained the interview quoting the President directly.

"It wouldn't be proper," he said.

"I will tell you, however, there was absolutely no hokum in that story. It was a true picture of the President's human side. Mr. Coolidge, when I saw him, was holding his two collie dogs in leash and he showed me a place on the leash which he had mended himself."

Mr. Barton is a graduate of Amherst College as is Mr. Coolidge, but the advertising man followed the President there by about 12 years. They first came to know each other in 1920, when Mr. Barton was a member of a voluntary committee, seeking to obtain Mr. Coolidge's nomination as Chief Executive.

Other A. P. honorary writers include Capt. Fried, of the S. S. Roosevelt;

Mr. Mathey would not make any predictions regarding the amount of money he hopes to save publishers by safeguarding their railroad rate interests. His duties, he said, were not only concerned with saving money, but also with preventing increases in present freight rates.

"One of the chief functions of the bureau for the present," he declared, "will be to make an analysis of all freight rates now in effect. By the end of this year, we hope to be able to show which rates are out of line and proceed to line them up. Our primary concern will be adjustments of freight rates for transportation of newsprint and returned cores. Newsprint freight charges represent 75 per cent of the newspapers' traffic problems. We will not attempt to handle purely local transportation problems, unless we are specifically asked to do so, although we are watching railroad baggage rates for the circulation departments of member papers."

The traffic department is dealing chiefly with those carriers serving the territory where newsprint originates. Big newsprint mills already have traffic managers, Mr. Mathey said, but their main interest has been to maintain a parity between different mills, rather than to look after the interests of the newspaper publishers. Carriers serving the newsprint sources include: Canadian Pacific Railroad, Canadian National Railway, Maine Central, Boston & Maine, Bangor and Aristoock, Delaware and Hudson, New York Central, Chicago & Northwestern, Chicago, Milwaukee & St. Paul, and Great Northern.

"Railroad companies, such as these and others, have not wanted to be unfair to the newspapers," Mr. Mathey concluded. "But they do not care to change their rates unless they are specifically asked to do so."

O. B. Keeler, of the *Atlanta Journal*, called "Bobby Jones' Boswell"; and the late Commander Rodgers who telegraphed the A. P. news of the naval flight to Honolulu.

Senator Thomas F. Bayard, Democrat, from Delaware, on Sept. 27 attacked Mr. Barton's interview as "a press agent effort to sell the President personally to the country."

"The Republicans," said Senator Bayard, "have been banking on 'Coolidge popularity,' but are now trying to sell the President personally to the country through a press agent—Bruce Barton—who is best known as the author of the book 'The Man Nobody Knows.' This is simply an effort to draw a red herring across the trail of the dismal record of the complete failure of the so-called 'Presidential program.'"

NEW COAST PLANT

**Work Starts on Two-Story Structure
for Watsonville (Cal.) Register**

Work has started on a two-story steel and concrete building to be occupied by the *Watsonville* (Cal.) *Register*, morning newspaper, published and edited by F. W. Atkinson.

The structure will be in the Spanish-Mission style of architecture, will have a frontage of 45 feet and a depth of 177 feet paralleling a private driveway. The second story will have a depth of 47 feet.

The south side of the composing room will be constructed almost entirely of wire glass, with numerous skylights.

The printing department will occupy about 1500 square feet of space and the composing and press room about 2700 square feet. To the rear of these de-

partments will be located the carriers' room, the stereotyping department, and a large storeroom for paper stock, while beyond this will be a private garage.

The business office, in the front of the building, will occupy a space 30 by 46 feet in size, to be finished in ornamental plaster cornices, paneling, etc. At the left will be the Associated Press room, while to the right will be a private office. A stairway leading to the mezzanine floor, will give access to three rooms to be used as the newspaper expands.

NEW HAVEN PAPER 160 YEARS OLD

**Journal-Courier Issues 128-Page Special
Edition Celebrating Event—
Founded in 1766 By
William Green**

The *New Haven* (Conn.) *Journal-Courier* is this week celebrating its 160th anniversary, by issuing a special edition of 128 pages.

HERBERT PETERSON

This issue is throughout of a historical nature and gives not only the history of the newspaper itself, but also of New Haven, its institutions, its industries and business concerns. The issue of 50,000 was covered by advance orders before publication.

While the *Journal-Courier* has for many years carried the line "established 1766" it nevertheless feels entitled to reckon as from 1755, as the *Connecticut Gazette* was founded in that year. James Parker a former friend and fellow workman of Benjamin Franklin started the little weekly paper by that name. The paper was a single sheet with but three columns to the page. Parker whose main business was in New York City had as partners John Holt and Thomas Green. Green belonged to the old Boston and New London family of printers and nearly every man in his family for 50 years had been a printer.

In 1760 Parker removed to New York leaving the paper in charge of Thomas Green. Four years later the *Gazette* being in fine running order, Green went to Hartford leaving the paper in charge of Benjamin Mecom, who was a nephew of Benjamin Franklin and a writer of much elegance of style.

The following year William Green, a brother of Thomas, moved to New Haven and started in business as a printer and publisher. In 1766, he started a rival newspaper called the *Connecticut Journal*. This paper prospered greatly and Thomas Green, who had gotten the *Connecticut Courant* running well at Hartford, came back to New Haven and joined his brother William on the *Connecticut Journal*. (Its full title was *Connecticut Journal and New Haven Post Boy*.)

Soon, Mecom gave up the struggle being so financially embarrassed that he had to seek assistance from his creditors in order to leave New Haven. Whether by outright purchase or otherwise, Green induced Mecom to transfer to the *Journal* the goodwill of the *Gazette* which went out of existence. Since that period, the *Journal* (for 80 years, the *Journal and Courier*) has absorbed one paper after another.

Its survival represents the triumph of the conservative as the *Journal-Courier* has always been a conservative newspaper and has devoted its chief attention to local matters.

The *Journal-Courier* has established itself in the affections of New Haven people. Some families claim that it has been read constantly in their line for six generations.

The president of the company is John B. Carrington, whose father, of the same name, entered the employ of this same newspaper almost 100 years ago and in 1845, after a long apprenticeship, was admitted to partnership in the paper.

In August 1925 the former publisher, Edward T. Carrington, was suddenly killed in an automobile accident and was succeeded by Herbert Peterson, who had charge of the business office for more than ten years preceding.

Mr. Peterson is a native of Bridgeport, Conn., and has had a publishing experience of more than 30 years. He is a member of the S. A. R., the Rotary Club and the Knights Templar Club.

The editorial department is managed by Col. Norris G. Osborn, editor-in-chief and Amos P. Wilder, associate editor and Arthur J. Sloane, managing editor.

The officers of the company are: John B. Carrington, president; Herbert Peterson, vice-president, treasurer and publisher, and H. M. Peterson, secretary. The business manager is Everett B. Harvey, formerly of the *Quincy Patriot Ledger*.

WEST VIRGINIA PAPER STAGES N. Y. EXHIBIT

**Clarksburg Telegram Sponsors Display
of City's Products and Attractions
During Manufacturers' Meet-
ing at Waldorf**

Newspaper enterprise in a novel, if not wholly unprecedented form, will be seen in New York next week when the *Clarksburg* (W. Va.) *Telegram* opens its "Greater Clarksburg" exhibit in the Empire Room of the Waldorf-Astoria. The exposition of Clarksburg's natural and financial resources and its manufacturing accomplishments will be opened at noon of Oct. 4. A special train has been engaged by the *Telegram* to bring exhibitors to New York and on their arrival they will be greeted at the City Hall by Mayor James J. Walker.

The exhibit, which will coincide with the annual convention of the National Association of Manufacturers at the Waldorf-Astoria, was arranged by M. Milton Nachman, advertising manager of the *Telegram*, who originated the idea, and, with Col. Guy T. Viskniski, partner and manager of the paper, carried it to a successful conclusion. Twenty booths will be occupied by leading manufacturers of the city and its surrounding territory, showing their products and giving their reasons for locating in the region.

Speakers of national note who will appear during the week include Gov. Howard M. Gore of West Virginia, John W. Davis, John J. Cornwell, former governor, and V. L. Highland, one of the *Telegram's* owners and member of the Republican National Committee.

The *Telegram* will be host at luncheon Tuesday noon in the Green Room to prominent New York newspaper and advertising agency men. Lou Wiley, business manager of the *New York Times*, will be one of the speaker.

CELEBRATES 40TH YEAR

Spokane Chronicle Issues Special Historical Edition

Spokane Daily Chronicle celebrated its 40th anniversary Sept. 21, issuing a special birthday edition. Reproduction of page one of the first issue was a feature of the section. The section also contained historical account of the paper's progress and character sketches of old time editors and employees.

Interesting among the historical facts was the story of the founding of the paper. Whether "Spokane" should be spelled with or without a final "e" had started a controversy and the anti-"e" party decided they needed a mouthpiece, the *Chronicle* being founded as a result.

PRESS PUT GOLD INTO TEX RICKARD'S POCKET

Promoter Tells of Publicity Value—Has Spent Little in Paid Space—Got It All for Nothing—News-papers All Over Country in Grand Fight Splurge

JUST get your name and your proposition in the papers, regardless how it gets in, and you can sit back and take things easy."

This golden advice to all those who would use newspaper columns free of charge for their own personal gain, was issued last week by Tex Rickard, the promoter the newspapers have made. While engaged in the pleasant task of counting his share of the \$2,000,000 Dempsey-Tunney fight, Rickard, who has spent little money in paid newspaper space, told a newspaper correspondent the secret of his success.

The interview, as published by the *New York Evening Post*, Sept. 24, gave more intimate details. It follows in part:

Twenty years ago last Sept. 3 Rickard entered the boxing promotion game when he staged the world's lightweight championship fight between Joe Gans and Battling Nelson, having offered a seemingly insane purse of \$32,000 to the principals.

Such an unprecedented sum had never been dreamed of for a mere lightweight championship finish fight, especially when it was held in no less an isolated place than Goldfield, Nev. But the bout was held, and Tex made some money, as well as beginning his career.

"The people of Goldfield wanted to have themselves put on the map in the worst way," Tex said, "and came to me to do the thing for them. Though I had seen but few fights before that time, I knew that boxing got a lot of publicity, and thought up the idea of the Gans-Nelson bout at Goldfield.

"It's a matter of record now, that fight, and the publicity everyone got out of it," Tex continued, "but it started me off on the wrong track. It was then that I grew to value publicity more and more, but the publicity I always thought was best was that which always praised you or favored you.

"It took me twenty years to learn that publicity of any kind was the biggest boost in the world for a person. Favorable publicity I always regarded as the best, but, would you believe it, I'm beginning to think that the more adverse criticism hurled at you, the better results you'll get.

"Certainly," Rickard explained, "no better example than this fight need be taken. Has there ever been as much trouble attending anything, even an international war, as there has been over this fight? Have things happened with such rapidity that would scare off the strongest man and cause him to abandon all plans, in another line of endeavor as it has in this?

"No, I guess not," Tex answered himself, "and all the mud-slinging in the world couldn't make me back down on the proposition. Adverse criticism is a solid proposition with me now. As some of the boys say, it's duck soup with me.

"Many men have tried to curb my enterprises whenever I attempted to put them over," Tex said, "and have resorted to foul means and fair while attempting it. They didn't like to see me make a success and did whatever they could to make it uncomfortable for me. I used to dodge the things they used to print about me.

"I knew that there wasn't any way in the world that I could try to explain that all the remarks made weren't true. People don't take excuses until after you're dead, and then it does you no good. So I used to boil up inside, and grow tired of thinking of all the things they were saying about me. There was hardly a fight of any importance that I wanted to put on that I didn't have trouble with.

"But criticism isn't going to bother me any more. I've been foolish to be bothered by it up to now. Just get your name

and your proposition in the papers, regardless how it gets in, and you can sit back and take things easy. Look at Ford automobiles. They've been razed and jeered and what not ever since they were manufactured. Is Henry Ford worrying? Not much. He's just selling them as fast as he can make them.

"I've abandoned the idea of seeing that everything said about whatever I put on is the best. Let them say what they will, as long as the customers present themselves at the box office. Just think of all the things that have been said about this fight, of all the unfortunate circumstances attending it.

"Then take a look at the gate receipts. You'd think money meant nothing to any one. It's just flowed in despite the knockers and the many who have tried to stop the thing."

Newspapers all over the United States made a grand splurge of the Dempsey-Tunney fight. All available editorial imagination was pressed into service to promote the two principals, Tex Rickard, and the fight industry in general.

Of all New York newspapers the *Sun* was alone in refusing to give "the passing of the heavyweight crown" lead position on its first page on Sept. 24, the day after the championship bout. During the long training preliminaries this paper alone in New York was moderate in its play of the event, was constantly advising readers: "Don't Bet on Fights."

The majority of "trained boxing critics" and fight experts predicted Dempsey would win.

In New York there were only three successful experts out of more than a score. James W. Jennings, of the *New York Evening Graphic*, picked Gene Tunney to win "without reservation." Ed Van Every of the *Evening World*, and George Daley of the *Morning World*, also gave correct predictions.

William Gibson, manager for Tunney, at a luncheon given newspaper men in New York Saturday took occasion to tell them how wrong they were in their fight predictions. His outburst brought considerable response from New York sports writers.

The rain which deluged spectators at the Dempsey-Tunney fight played havoc with the telegraph arrangements to send news of the fight to the New York newspapers. The wires began to falter and go out of commission before the end of the fight, and for an hour between 1 o'clock and 2 o'clock nothing could be sent at all. It was not until the last editions that the complete stories of the fight were printed.

The ringside instruments and wires, which it was supposed were in the most advantageous position, and which were allotted to the larger newspapers, were actually in the worst possible position because of the rain. Other wires, some dis-

tance from the ring and in an enclosed space, were looked upon as the second choice wires and were used by smaller newspapers, who received their service without a break.

The trouble started before the fight was over, although the instruments held up until the earlier news of the crowds, the preliminary bouts and early details of the main bout, as well as the round-by-round descriptions of the championship battle, were in the newspaper offices. Then the service began to break, as the waterlogged instruments and wires were short-circuited.

There was no protection for the ringside instruments, except as some telegrapher held his hat over one or tried to shield it with a soggy newspaper or an umbrella. That didn't work so well, because the operator had to use one hand for sending and the other for handling the sheets of copy. There were two inches of water running around their shoes.

When the wires all died, about fifteen minutes after the fight was over, there was a rush for the smaller enclosed space, where the newspaper men on far-away or smaller papers were sending their stories. Demands were made for wires, but the fortunate ones in possession of a dry, workable wire only laughed.

So the operators went back to their soaked instruments and at intervals managed to get through a few sentences. In this way the leading stories dragged their way into the New York offices until about midnight, when the protected wires were available, and the stories came in rapidly again. But during the long period from 10:45 o'clock until after midnight there were gaps of twenty minutes when not a word got through.

It was interesting to notice how different newspapers played the same story. One wire dispatch of the United Press, for instance, quoted Estelle Taylor as saying vaguely that "they" must have given Jack "something" before the fight. The headline the *Evening Graphic* used was "DEMPSEY DOPED, WIFE SAYS," in heavy black type on page one. As handled by the *Evening World*, the same story, carried the one-column head "WIFE DECLARES DEMPSEY MUST WIN TITLE BACK."

The amount of space given to the story the morning after was amazing. Six of the eight columns on the first page of the *New York Times* were filled with the fight story. The total was nearly 40 columns or five full pages. A novel stunt worked by the Times was the publishing of a stenographic report of the radio broadcast account of the fight which was put on the air by the Royal Typewriter Company.

For its "Fight Extra," the *New York World* folded its second section over the main news section. Including pictures, six pages were devoted to the "battle of the Sesqui."

TO HARRY ANDREWS

Late Managing Editor, *Los Angeles Times*

By CRUSE CARRIEL

While thread, from fateful wheel Lachesis whirled,
Still ran (before dire Atropos' conspiracy
Snipped short the distaff weave of Sisters Three)
Olympic thunderbolts, he forged, were hurled
With cataclysmic strength against a world
Of ignorance. With equal deftness, he
Wooded Erato and fair Calliope,
Or banner of equality unfurled.

His passing sets a beacon on the shore
Of Pluto's dark domain; a blazing light
To tell old Charon where the voyage should end.
My fears of yester-year are now no more
And gone are shadows of impending Night,
For now, beyond the Styx, awaits a friend.

As a follow-up feature for Saturday, Sept. 25, the *World* ran two stories under a two-column box head captioned: "ONE DAY IN TWO LIVES." One story told how the "King on the throne" was to get the keys of New York City and other "real and verbal bouquets and commissions," while the second told of "lonely tears and bruises softened only by a loving wife." Both stories were of the same length to the line.

The story was played as heavily on the west coast as in the east. The *Los Angeles Examiner* on Sept. 24 gave the event six columns on page one. An appropriate headline placed by this newspaper over short side-lights on the fight sent by Universal Service wire was, "Links in Tex's Gold Chain; Hot Dogs 25 Cents at Stadium."

Action photos of the ring battle were published in the "Sporting Green" of the *San Francisco Chronicle*, on Friday, Sept. 24. They were sent by telephoto by Times-Wide World.

The *Salt Lake (Utah) Tribune* printed photos of the fight on Saturday, Sept. 25.

Pacific & Atlantic Photos, Inc., had sent the pictures by telephone wire from Philadelphia to San Francisco and the San Francisco office had rushed them by air mail to the *Tribune*.

Radio announcements didn't keep the fans at home in Davenport, Ia., according to the *Daily Times*. This newspaper extended the Associated Press wires to the balcony of its building and E. E. Buchner, A. P. operator, and Bob Klauer, city editor, gave out the returns through a big megaphone. The largest crowd ever assembled at the Times was at hand and the detailed wire account of the fight kept well up with the radio.

The *Beloit (Wis.) Daily News* likewise claimed to have successfully met radio competition. The crowd that gathered around the Daily News building was the largest in the newspaper's history. It drew more people than any election night service, world series baseball game, football game or previous fight. Before the crowd had left the building a fight extra was issued, and within an hour or two 5,000 copies were sold.

A most conservative coverage of the battle was that of the *Kansas City Star*, which gave it less than a column on page one under the simple one-column headline, "Dempsey's Turn to Pass." The main dispatch was written by the Star's sports editor. On page four another single-column story appeared headed "Tunney Calm in Victory." A color story, also little more than one column long, was on page 18. It described a "bout not on the card," the struggle of the crowd to leave the stadium, and was written by a staff correspondent. Three action pictures were published without any comment on how they were "rushed" or "speeded" to Kansas City.

A racing airplane and a motorcycle rushed the fight pictures from San Francisco to Los Angeles for NEA Service, Inc., after they had been sent by telephoto to the former city. An airplane was in readiness to carry the pictures to Fresno, where they were to be put on. The Owl, the limited train for Los Angeles.

However, two forced landings and a broken oil line delayed Pilot D. A. Templeman, and when he came into Fresno with his assistant standing on the wing holding the broken oil line in place, the train was on its way.

R. W. Salmon, motorcycle racer, was obtained to rush the photos on to Los Angeles. Leaving Fresno 2 hours and 26 minutes after the train, he traversed the winding mountain roads with such speed that he arrived at his destination one hour and 25 minutes ahead of the fast train. At times he made 80 miles an hour. He made the trip to Los Angeles in 5 hours and 24 minutes.

BARTON INTERVIEW NOT NEWS MATTER COOLIDGE TELLS CORRESPONDENTS

It Answered General Human Interest Questions, His Secretary Declares—Lawrence Denies Reported Criticism of President

By BART CAMPBELL

WASHINGTON, Sept. 30.—President Coolidge did not consider as "news matter" the frank statements he made last week to Bruce Barton, magazine editor and special writer, which were carried in a series of copyrighted articles by the Associated Press.

GEORGE E. DURNO

Whatever revelations were imparted to Barton regarding the intimate personal life, thoughts, ideas or opinions of the "Official Spokesman" for

the White House were "but answers to general questions of human interest."

"The President quite naturally left to Mr. Barton the decision as to the manner in which the interview was to be used." Through Everett Sanders, his secretary, Mr. Coolidge has made this explanation of the free and unusual use of quotation marks by Barton in broadcasting through many of the country's leading newspapers the result of his talk with Mr. Coolidge upon the eve of the latter's recent departure from his vacation retreat in the Adirondacks.

The letter from Sanders was in reply to a protest sent to the President by George E. Durno, of the International News Service, in behalf of the White House Correspondents' Association, of which he is acting president.

The Barton "beat" still rankles in the minds of a number of those correspondents who summered with the President and, though with ears constantly attuned to every syllable uttered by the "Official Spokesman," were not granted the privilege of setting down between "direct quotes" whatever statements the President made to them under the restrictions imposed upon each and every "conference" they had with him.

To the written protest submitted by George Durno, Mr. Sanders has made this response:

"I have been glad to lay before the President your letter of yesterday with reference to the interview given by the President to Mr. Bruce Barton. As you are aware, whenever the President has any news item or statement of fact or policy concerning the transaction of government business, he has always been most scrupulous to give it to the entire press. Having decided to give the interview to Mr. Barton, which was not news matter but answers to general questions of human interest, the President quite naturally left to Mr. Barton the decision as to the manner in which the interview was to be used. The President is appreciative of the co-operation of the White House Correspondents' Association in the dissemination and interpretation of official news and has clearly expressed himself to this effect on more than one occasion."

The letter Durno wrote previously to the President as acting president of the White House Correspondents' Association, and which he first submitted to several of his associates in the White House Press Room for approval or change, was as follows:

"On this day the Associated Press published a lengthy interview with you under the signature of Bruce Barton.

"Since your elevation to office the White House correspondents have found you always fair and sympathetic in your attitude toward their association. In fact, your unequivocal honesty in the impartial dissemination of news has been the sub-

ject of much favorable comment among them.

"As you are aware, the association of correspondents pledge themselves to certain restrictions placed upon them by you, and their consistent devotion to those rules is the proudest boast of the organization. As you are also aware, the two outstanding regulations of our agreement are, that any conference you may give us is never treated as an interview, and that you are never directly quoted.

"We, therefore, are surprised by your action in giving an interview to an individual entirely foreign to our organization, who is allowed to quote you directly, and without qualification, and its exclusive publication in one designated press association. This press association represents less than half of the newspapers in the country. The remaining four press associations and the independent newspaper bureaus feel they have been grossly discriminated against.

"We wish to protest most heartily against this practice, which we consider a violation of our agreement with you.

"Most respectfully,

(Signed) "THE WHITE HOUSE CORRESPONDENTS' ASSOCIATION,
"GEORGE E. DURNO, Acting President."

David Lawrence, who was named in EDITOR & PUBLISHER's story of last week as joining in the protest, this week denied he was a party to it and said he believed the President was entirely justified in giving out the Barton interview.

Mr. Lawrence's letter follows:

"It isn't often that the EDITOR & PUBLISHER makes an error, but in your issue of Sept. 25 you carry a Washington despatch which does me an injustice and which I sincerely hope you will correct.

"In that despatch you stated that I joined in a protest of several Washington correspondents to President Coolidge for having granted an exclusive interview to Bruce Barton through the Associated Press.

"The fact is that I did not join in the protest. Also, I believe that the President was entirely justified in departing from precedent in giving a writer permission to quote him directly, and the Associated

Press is to be commended for its enterprise in obtaining the interview.

"Also, your despatch states that at one time I was rebuked for taking stenographic notes at one of the White House conferences. This statement is also in error. One of the reporters attached to our Bureau was taking notes and the President expressed a desire not to have any stenographic record kept of what he was saying. I was not even present at the conference when this occurred. Permit me to say that I think the President was also well within his rights in asking that no stenographic record be kept.

"I am one of those who believe that the President of the United States has a right to make his own rules. He also has a right to discriminate between correspondents, to favor some and discriminate against others. Several Presidents have done this in the past. This is entirely a question of Presidential policy."

SERIES DRAWS SPORTS WRITERS TO GOTHAM

Four Hundred Scribes Will Cover Baseball Classic—Meeting of Association Oct. 2—Daley, N. Y. World, in Charge of Seats

Nearly 400 sports writers from newspapers all over the country were arriving in New York this week to report

the World Series between the Yankees and St. Louis. Headquarters for the newspaper men have been established at the Commodore Hotel, with George Daley, of the *New York World*, in charge of press arrangements.

JAMES M. GOULD

A meeting of the Baseball Writers Association was sched-

uled to be held Oct. 2, at the Commodore. The association is made up of 11 chapters in various cities of the country. James M. Gould of the *St. Louis Star* is president, and Henry R. Edwards, *Cleveland Plain-Dealer* is secretary.

In other years the association has awarded prizes for the best baseball stories written by newspaper men in major and minor league cities. This practice was discontinued last year.

OREGON DAILY STAGES WALKING CONTEST

Portland Oregon Journal Labor Day Event Drew 200 Entries for \$100 First Prize—Thousands Watch Race

On Labor Day the *Portland (Ore.) Oregon Journal* promoted a walking contest from the State House at Salem to the Journal building in Portland, a distance of 52 miles, which from the standpoint of popular interest far exceeded its expectations, according to Donald Sterling, managing editor of the *Journal*.

"Last December," said Mr. Sterling, "we received a letter from a 60-year-old millwright who is opposed to smoking, stating that he could outwalk any smoker. His challenge was immediately accepted by a shoe clerk, a medical student and a number of others, with the result that on a given Sunday the group walked from Portland to Forest Grove and return, a distance of over 40 miles. The hike assumed the nature of a race and attracted considerable attention."

Late this summer a number of the participants in this walk asked the *Journal* to sponsor a real walking race, which was done. The entry list was limited to 200 and each entrant was compelled to pass a physical examination. At 5:20 o'clock, Labor Day morning, 154 entrants started from the capitol steps, and proceeded throughout the day along the highway to Portland. The winner, E. L. Sadler, reached the Journal building at 3:19½ p.m., having walked the distance in 9 hours 59½ minutes, which broke the American amateur record for this distance. The finish of the contest was a close affair, the first four crossing the finish line within four minutes of each other.

Thousands were stationed in the street in front of the Journal building and all traffic was stopped for a period of several hours, and all along the line from Salem other thousands watched the progress of the race. Splendid co-operation was obtained from the state and city traffic police.

The *Journal* gave prizes of \$100 to the winner, \$75 to the second man and \$25 to the third man, and there were merchandise prizes for the first ten. Thirty-five men actually finished the race, varying in age from 14 to 63 years, the last man crossing the line more than four hours after the winner. In appreciation of the sportsmanship of those who finished, after the first three when they knew they had no chance of winning any awards, the *Journal* gave \$10 to each.

"The race was in charge of Pil Parrish, assistant city editor, was judged by a professional walker, and was watched by several carloads of staff reporters.

"We were amazed at the reader interest which this walk created," said Mr. Sterling, "and plan to make it an annual event as a splendid news feature on what is ordinarily a dull holiday."

BELL JOINS U. S. DAILY

Public Ledger Washington Man Named News Director

Samuel W. Bell, for eight years connected with the Washington bureau of the *Philadelphia Public Ledger*, is the latest member of the Washington corps of correspondents to join the growing editorial staff of the *United States Daily*. Bell will be assistant to the news director.

Bell is a native of Toledo, O. He started his newspaper career on the old *Toledo Press*. He was formerly connected with the *Atlanta Georgian* and *Atlanta Journal*, the *New Orleans States*, and the Washington bureau of the Associated Press.

COMPLETES 50TH YEAR

The *Fresno (Cal.) Republican* celebrated its 50th anniversary last week with a special edition. George A. Osborn is publisher.

DAILY'S WALKING CONTEST DREW HUGE THROG

Crowds watching the finish of the Portland Oregon Journal's walking contest, a Labor Day feature (story in column 4)

NEWSPAPERS BUILT RECORD SALMON SALES

Serious "Carryover" Problem Facing Pink Canners Solved with Sale of 3,800,000 Cases in 8 Months
—\$200,000 Initial Campaign Placed at "No Cost" Agency Reports

ADVERTISEMENTS placed in newspaper columns this year prevented a heavy carry-over in the Pacific salmon industry and in eight months caused the sale of more than 3,800,000 cases of the product—a greater amount than was sold all last year or the year before.

This story was told in detail in a special report issued by Strang & Prosser, Seattle advertising agency, and sent to EDITOR & PUBLISHER this week. The report follows in part:

Early this year leading packers were holding heavy stocks of salmon for a price which they had to have based on production costs, but which the market wouldn't meet. With a heavier carryover each year, the prospects of an unusually large pack during July and August, the situation was serious.

Here it was that the advertising agency outlined a plan for a quick nation-wide sale of salmon stocks, as a department store might have a special sale, but without the destructive cut-price appeal. They urged the use of leading newspapers in the principal cities of the country, selling to the public the economy and high food value of pink salmon, but especially showing by new and varied recipes many more ways of enjoying canned pink salmon than most people thought possible. Supplementing the newspapers were other publications to come in later and help round out the program—notably women's periodicals, small town magazines and farm publications.

Half a dozen of the industry's strong figures at once fell in line and subscribed liberally toward a \$200,000 initial campaign, confined to March, April, May and June.

These few men knew that others, non-contributors, would benefit as much or more than they themselves, but they were interested in the welfare of the industry even more than in their own immediate problems; what if a few packers did pursue a narrow course and get a "free ride"? Prove advertising successful and fair-minded men would come in later and share the burden. The industry right then stood in need of strong, aggressive leadership.

Assessments were made on pink and chum stocks then on hand, on a basis of 30 cents per case (5 cent per dozen cans). This represented less than 3½ per cent of the then wholesale selling price of pinks. The entire advertising campaign cost no more than it ordinarily costs to warehouse the stocks three to four months.

Time was vital, and it was impossible on short notice to round up the full \$200,000 for the campaign, so three of the strongest factors, convinced that the advertising plan was right and would succeed, underwrote or guaranteed the balance up to that amount and the campaign was released.

This word "Go" came in March 1 of this year. Everything had been prepared in advance and in ten days full page copy was shot out to foremost newspapers in the 30 leading salmon markets of the United States.

This came in the midst of the Lenten season, when salmon sales are especially susceptible of stimulation.

Later the list of cities was brought up to 45. With one or two exceptions one city newspaper was used in each city.

Following the full page, telling the story of pink salmon, but in no way disparaging other varieties of salmon, came weekly displays of varying sizes on the odd pages of all these newspapers. An important feature of the copy was the offering of \$1,000 in fifty prizes for the best pink salmon recipes received by the Associated Salmon Packers up to August 31.

Even before that first full page appeared, word went out by air mail and wire that a big national advertising cam-

How advertising increased salmon sales over last year.

campaign on pink salmon was coming, and the effect upon the trade and the market was electrical. Orders began to break in a veritable flood. Knowing by past experience the immediate increase in demand for the advertised commodity every broker, every jobber, every retailer wanted to be protected with stocks, and salmon shipments in March surprised the packers. But they were fairly amazed by the volume of sales as the campaign carried on into April, May and June.

Pink and chum salmon sales, it is estimated, were five times as great in the first six months of this year as in the same period last year.

Sales during the salmon years from July 1, 1925, to July 1, 1926, were 750,000 cases more than the entire pack of 1925.

The carryover that had been 1,500,000 cases January 1, 1926, dropped to less than 400,000 cases by July 1.

With these really astonishing figures before them, the salmon packers determined that nothing should break the continuity of their campaign. It must be maintained right through the summer, and with the support of the great number of carrymen returning from Alaska in late August and September, must be carried forward right through the next year and made a continuous policy of the pink packing industry.

These leaders could point to the fact that the advertising had really not cost the industry anything, but instead had returned a profit of 100 per cent on the money actually invested by those who had the courage and the spirit of leadership to advance their own money for the benefit of the industry as a whole.

This "no-cost" feature came about through the fact that advertising, supported a price level averaging 40 cents a case higher on pink salmon than had prevailed the previous year, when there was no advertising, while the advertising had cost but 20 cents a case—and that only on a limited part of the pack.

Yet the interesting part of this is that it helped to give the packers a fair price for their pack without requiring a higher retail price to the consumer of pink salmon. Selling wholesale at \$1.35 a dozen it is generally called a 20 cent retail seller. At \$1.45 or \$1.50 it still is a 20 cent seller. The grocery trade prefers handling an advertised product with a quick turnover even at a narrower profit margin—it means bigger profits in the end.

Coming down from the North the great majority of the packers of pink and chum salmon were quick to step in behind the new advertising program, insuring an appropriation for the ensuing year at

least double that of the initial campaign. Not all the canners are represented on the dotted line, but the advertising and executive committee expect to see 60% to 75% signed up this year and they feel the continuance of good results will ultimately convert the balance who in some instances, despite the overwhelming sales figures, may as yet be loath to admit that advertising turned the trick.

By the end of August with only eight months of the year represented, sales of pink and chum salmon totaled more than 3,800,000 cases—a greater amount than was sold in all last year, or the year before.

Not only had the 1925 pack been practically cleaned out, but virtually half the 1926 pack had gone—a record unequalled in any previous year.

With pinks making such a remarkable sales record, the red packers are giving the advertising program much more serious consideration. Some of the leading red packers are making ventures to join a general campaign but so far no definite plan has been worked out for cooperation with the pinks, and the pink packers feel that they have gone a long way toward solving their own particular problems.

With the termination of the \$1,000 prize recipe contest, replies from 60,000 women all over the United States were received, enclosing, it is estimated, 200,000 choice recipes for preparing canned pink salmon dishes.

The mere number of replies to an advertising campaign may or may not be significant, but in this campaign there was a definite merchandising feature that meant actual sales of salmon on a large scale.

Though it was not a condition of the contest, entrants were requested to try out each recipe in their own kitchen before submitting it; then to indicate how many persons it would serve, the cost of the dish per person, and they were then requested if possible to send in the label from the can of salmon used, in order that their favorite brand might be recorded.

Thousands and thousands of labels poured in, and were definite evidence to the packers that people do read advertising and act upon its suggestions.

It was at once evident that grocers' shelves were being cleared of salmon, some of it having been on hand for years. Labels in many cases were black with age; some were the pack of companies long out of business; other labels had been discarded by packers years gone by.

In many cases recipes were accompanied by one to two dozen labels, indicating the entrants had purchased not one can but quantities of pink salmon.

If there ever has been any doubt on the part of advertisers as to the efficacy of newspaper cooperation and merchandising, this campaign should dispel it.

In advance of the launching of the campaign telegraphic requests went out to newspapers in all the leading salmon marketing centers of the country requesting a quick survey among jobbers of the stocks of the various grades of salmon on hand. The very next day the agency had available a more complete picture of their own national market than had ever been placed before the salmon packers in the history of the industry. They were shown just where stocks were light and buying could be hastened; where stocks were heavy and for quick moving needed the stimulus of advertising.

With the release of the campaign newspapers notified brokers, jobbers, chain store organizations and retailers and successfully urged them to get behind the campaign. The papers arranged literally thousands of window and store displays throughout the country; they distributed tens of thousands of posters, dealer helps and display materials; they called upon hotels, cafes, restaurants, lunch counters and fountains asking that salmon salads, salmon sandwiches and other salmon dishes be served, and they sent in to the Associated Salmon Packers hundreds upon hundreds of menus featuring delectable pink salmon dishes, many of the most prominent hotels and restaurants in America being represented.

In some cases the newspapers of their own volition offered prizes for the best salmon window trims and the best recipes sent in to their own home economics editor. In other cases full page broadsides were issued to the trade. The radio, too, was called into play, and cooking lessons on the many ways of preparing pink salmon for the table were broadcast far and wide.

A. J. BALDWIN RE-ELECTED

Magazine Men Choose Leaders at Shawnee-on-Delaware Meet

Members of the National Publishers Association, a magazine organization, re-elected Arthur J. Baldwin president at the annual meeting held last week at Shawnee-on-Delaware, Pa. Postal rates were taken up in a report made by A. C. Pearson, of the United Publishers Corporation, while R. W. Allen reviewed developments leading up to efforts now being made to have the copyright law of 1909 amended.

Other officers elected included, F. L. Wurzburg, Conde Nast Publications, secretary, and Mr. Allen, Allen Business Papers, treasurer.

RADIO SCHOOL FOR EDITORS

A series of 12 radio lectures on problems and angles of the country publishers' business will be given by Prof. Frederick J. Lazell, professor of the college of journalism, University of Iowa, Iowa City, this fall and winter as part of the courses of the Iowa "College of the Air." The series will begin Oct. 4 from WSUI on a 484-meter length. Lecture topics have been announced as "How to Build Circulation," "Distribution and Renewals," "Premium Contests," "Printer, Business Man or Both?" "Local Advertising," "Other Advertising," "Valuations and Prices," "The Print Shop," "Office Management" and "What Does It Cost?"

NEW A. B. P. MEMBERS

The Associated Business Papers, Inc., this week announced that the *National Underwriter* and the *Furniture Journal*, both of Chicago, have been admitted to membership.

R. M. WHITE, VETERAN MISSOURI EDITOR, CELEBRATES 50th YEAR AS PUBLISHER

**Bought Mexico (Mo.) Ledger in 1876, Later Making It a Daily
—Active in Press Organization and
Community Work**

By C. H. SCHOOLEY

COL. R. M. WHITE, 71, owner, editor and publisher of the *Mexico (Mo.) Ledger* for the past half-century, and picturesque in the annals of Missouri's newspaperdom since he bought the *Ledger* on Sept. 21, 1876, from J. Linn Ladd, his predecessor, observed his fiftieth anniversary of ownership on his recent business birthday.

Already active in all branches of newspaper work, he is past president of the Missouri Press Association, a former recording secretary of the National Editorial Association, and a former vice-president of the Western Federation of Editors. He was officially connected

Col. R. M. White

with the National Editorial Association for years after its organization, and when such widely known editors as Joseph Pulitzer, Charles Anderson Dana, James Gordon Bennett, the younger; William Rockhill Nelson, and others, were associated with its work.

A member of the Missouri State eleemosynary board for the past 26 years, he is now its senior member. A charter member of the State Historical Society of Missouri, he has been chairman of the finance committee of that body since its incorporation in 1899. With Dean Walter Williams, of the School of Journalism of the University of Missouri, and Dean Isidor Loeb, of the College of Commerce of Washington University in St. Louis, the trio have served as the only members of the society's finance body.

As a Democratic editor of a Democratic newspaper, Col. White has co-operated with his party since the campaign of 1876, though he has refused to hold party above principle.

But although aiding many friends and fellow-Democrats who have been elected to public office, Col. White never has held an elective office of any kind. Years ago, when in the late '90s, friends in and out of the profession launched a "White boom" for him for secretary of state, he spiked it with characteristic energy and promptness.

White was born of Yankee parents at Southampton, Long Island, May 3, 1855. With his parents he moved in 1866 to a farm south of Mexico. After attending the public schools he went to Westminster College at Fulton, Mo., where he was graduated with the class of '76.

As first baseman of the college baseball nine, he attracted major league notice,

Last week a regular correspondent of EDITOR & PUBLISHER telegraphed the statement that Col. R. M. White of Mexico, Mo., had died and the item was printed. In the words of Mark Twain the "report was greatly exaggerated." Col. White is as alive as a cricket as the attached story of his anniversary celebration indicates. Our correspondent has not given us a very satisfactory explanation of the error, but expresses deep regret. EDITOR & PUBLISHER hereby apologizes and wishes Col. White many years of health and continued usefulness.

but declined an offer from the St. Louis Browns. Having refused to seek a baseball career, he bought the *Ledger*, then a weekly. In 1886 he established the *Daily Ledger*, and has published both editions since that time.

Under his management, the *Ledger* grew until it became a community asset, as well as a profitable investment.

Circulation and advertising grew apace. The paper's strength is evidenced by the twenty-odd managements rival newspapers have had during the past half-century.

In 1899, Col. White, having overworked himself, was ordered abroad by his physician. With characteristic energy, he won some international repute when he travelled 26,000 miles in four months, sightseeing as he went.

Besides being editor and proprietor of his paper, Col. White also was reporter, copy reader, head writer, proofreader, makeup man, bookkeeper and advertising solicitor of his own organization during many of the early years.

During the past eight years, he has transferred the active editorship of the *Ledger* to his son and present partner, L. Mitchell White, and has made a success of a second business-banking. He is now president of the Mexico Savings Bank. Besides serving on the Board of Directors of the Bank, he also is a member of the Board of Directors of an insurance and an abstract company, is past president of the Chamber of Commerce, and a board member of a bond and trust company and a building and loan association.

Since his first years as a "country editor," Col. White has been "growing men" for his profession, developing young men until the present-day list of former city editors of the *Ledger* is similar to that of the graduate roll of a school of journalism. Even now, plans for a Mexico *Ledger* City Editors Alumni Association are being discussed.

Among the better known graduates of Col. White's "school of journalism" are the late Charles H. Grasty, editor and owner of the *Baltimore Sun*; Homer Bassford, managing editor of the *St. Louis Times*; W. G. Hutton, editor of the *Weekly St. Louis Globe-Democrat*; Wallace Bassford, formerly private secretary to Champ Clark; James L. Edwards, formerly city editor of the *St. Louis Republic*; Leigh Mitchell Hodges of the *Philadelphia North American*; J. J. Shouse, later a member of the Kansas State Senate, and assistant secretary of the treasury; Joe Cauthorn, business manager of the *San Francisco News*; Jeter Crews, now with the Mexico postoffice; Mitchell White, now a partner in the publishing business and a past president of the Missouri Press Association; Frank Houston of a Kansas City

advertising agency; Sid Houston, editor of the *National Tribune*; Miss Mary Margaret McBride, author; Curtis Mitchell, editor of *Film Fun*; Fred Gray, city editor of the *Quincy (Ill.) Whig-Herald*; Carter Vaughn, treasurer of the Sinclair Oil Company of Louisiana; Robert Ginsburg of the Indianapolis bureau of the International News Service; Alex Hope, St. Louis bond salesman; Wesley Maurer, journalism faculty member of Ohio State University, and G. Lock MacFarlane of New York City.

A believer in the country newspaper work, he has often said, "Not much money in it, and a lot of work, but a lot of fun, too. I wouldn't do anything else if I could," declining various metropolitan offers, among them an offer in the early '80s for the purchase of the *Kansas City Times*, later acquired by William Rockhill Nelson, in 1901.

An early riser, and early means 6 o'clock, brisk exercises and a cold plunge follow in rapid succession, and by 6:30 o'clock almost any morning, "Bob" White can be seen hurrying down the street, on the way to the office, a large gray-haired man, wearing a broad-brimmed black felt hat, dark suit, and a narrow black string tie—a sort of Kentucky colonel in appearance, but in more of a hurry than any Kentucky colonel on record.

"Reformer?" No, sir, I'm no reformer. I'm for the things that will help this town, the right things, but don't class me with the reformers. Fights? Yes, a few, and only when it was necessary, for I'm a peace loving man, and fistic, with the passing of 'personal

journalism,' are now largely tabooed," twinkles.

Progress, however, is something else and Col. White, with his paper, has been constantly at the fore, advocating improved highways for Audrain County, paved streets for Mexico, electric light local option long before the day of the renowned eighteenth amendment and the Volstead enforcement act, the public library, and other civic enterprises.

A famed penman, Colonel White asks no odds from Horace Greeley at his worst, in the matter of hieroglyphic. In and out of the public eye, for real enjoyment and comfort, "Bob" White prefers Mexico. Here are his friends, here his interests. Here he finds his recreation, which, as he says, is his work.

"How did I spend my anniversary day? Why, by going to my desk an hour earlier," he said when queried on his anniversary observance, and his store of energy, apparently unlimited at 21, is seemingly as boundless a half century later.

NEW NAVY PRESS CHIEF

Lt. Richard W. Gruelick, who has been in charge of the Navy Department press room for two years, has been ordered to join the U. S. S. *Pittsburgh* as assistant engineer before she sails for the Pacific. Lt. H. W. Thurber has been placed in charge of the press room.

AD GOLFERS PICK FLORIDA

The Winter Golf League of Advertising Interests will hold its annual tournament in St. Augustine, Fla., Jan. 8-15, it was announced this week.

Department Store Lineage

The Department Store advertising appearing in the *Florida Times-Union* during the first 8 months of 1926 amounted to 148,132 lines more than for the same period of 1925.

The Florida Times-Union

JACKSONVILLE, FLA.

NEW YORK . . .

the most important market in the World

The NEW YORK EVENING JOURNAL

dominates it

THE richest market in the world is concentrated within the limits of Metropolitan New York.

There is more money in the New York trading area than in seven of our large states.

It is a quick turnover market. New Yorkers live well and they buy regularly and often.

New York is a very inexpensive market to sell because—

1. Its outlets of distribution are many and close together.
2. Its transportation facilities are rapid and cheap.
3. Salesmen live at home and traveling expenses are nil.
4. Its population can be reached effectively, dominantly and most economically, because one newspaper reaches 46 out of every 100 people who read New York evening newspapers.

That paper is the *New York Evening Journal*.

Its circulation is 700,000—double that of any other New York evening newspaper—plus 100,000.

Its copies go into the homes—and

its circulation is such a large part of the New York market that it can almost be said the *New York Evening Journal* IS the New York market.

Its people have the money to buy anything from Steinway pianos and Packard cars to the best known cigarettes and breakfast foods.

For twenty-seven consecutive years it has had the largest evening circulation in America. For twelve consecutive years more money has been spent in advertising in the *Evening Journal* than in any other New York evening newspaper.

Every evening it is carried into the home and is read by 700,000 families, or figuring three readers to a family, 2,100,000 people—the most responsive audience of evening newspaper readers in the United States.

Let us tell you how you can sell 25% of your production in New York City and at the lowest sales and advertising cost.

What the New York Evening Journal did for Wheatsworth Self Rising Whole Wheat Flour

The letter from the F. H. Bennett Biscuit Company, reproduced herewith, tells a story which is typical of the experience of *New York*

Evening Journal advertisers. The results obtained, after only four weeks of advertising, were "far beyond our expectations and beyond anything we ever experienced in any of our previous campaigns."

Nothing could better illustrate the power of the *Evening Journal* than its success in launching a new product in a short space of time. The co-operation of the *Evening Journal* Merchandising Department, and the tremendously effective color pages in the *Evening Journal* itself, established Wheatsworth Self Rising Whole Wheat Flour in the New York market within thirty days!

F. H. BENNETT BISCUIT COMPANY

Manufacturers of
BISCUIT SPECIALTIES
139-141 Avenue D
NEW YORK

November 23rd, 1925

New York Evening Journal,

Columbus Circle, New York City.

Gentlemen: It is still a little bit early to state accurately the results of our advertising campaign on Wheatsworth Self Rising Whole Wheat Flour in the *Evening Journal*, but we can say today, after only four weeks of advertising, that the results are far beyond our expectations and beyond anything that we have ever experienced in any previous advertising campaign.

We began this campaign with a full page in color in the Saturday Home Journal on October 24th. The work of securing dealer distribution began only one week previous. A check-up made during the week of November 9th showed that we already had better than 50 per cent distribution of all stores, including chains.

Before the second full page in color appeared in the Saturday Home Journal on November 14th, we had sold and secured active co-operation from ten of the leading chain store grocers. Some of these chain stores called us on the telephone on the Monday following the appearance of the full color page, and asked us about the new product before we had time to call on them.

Frankly, the quick response from the trade and the general and almost instantaneous reaction from consumers produced by this campaign are unique in our experience. The work of your merchandising staff in supplementing the efforts of our own sales force has been extremely effective and valuable, and we wish to express our sincere appreciation of your whole-hearted support and co-operation.

Cordially yours,
FRANK A. HARTWELL,
Sales and Advertising Manager

BARTLETT HONORED BY GRAPHIC ARTS GROUP

His 50th Year in Field Celebrated by Banquet—Bronze Medallion Plaquettes Presented by Associates

Edward Everett Bartlett, president of the Bartlett-Orr Press, Director of Linotype Typography for the Americas, and chairman of the International Typographic Council, was the honor guest at a dinner given Wednesday evening, Sept. 29, at the Hotel Biltmore, New York, in appreciation of his 50 years of devotion to the betterment of the graphic arts.

Leaders in typography, art, literature, business, and other associates of Mr. Bartlett attended. The honorary committee consisted of, for America: Edward Dean Adams, Charles Clifton, Philip T. Dodge, T. E. Donnelley, E. F. Eilert, Michael Friedsam, Alexander C. Humphreys, Samuel Insull, Alfred W. Kiddle, Dr. John J. MacPhee, Charles I. McLaughlin, Charles W. Price, Julian Street, Ambrose Swasey, Worcester Reed Warner, Frank B. Wiborg; Great Britain, George W. Jones; France, Georges Draeger; Germany, David Stempel; Italy, Raffaello Bertieri.

Bronze medallion plaquettes designed by R. Marschall, sculptor of Vienna, were presented to Mr. Bartlett by the members of the Advisory Board of the Bartlett-Orr Press. The recto panel carries a portrait of Mr. Bartlett accompanied by this descriptive matter: "In commemoration of the fifty years of devotion by Edward Everett Bartlett to the advancement of the graphic arts this medal is issued by his associates and friends." The verso panel is a decorative composition typifying the various graphic arts accompanied by this inscription in Gaelic: "Chan Ann Dhuinn Phein Amhain"—"Not for myself alone."

The speakers of the evening were Liston L. Lewis, toastmaster; Worcester Reed Warner, "The Graphic Arts in 1885"; Norman Dodge, "Building Up the Industry with Typography"; Ernest F. Eilert, "On Behalf of the Master Printers"; John Clyde Oswald, "The Business Significance of Beauty"; Harry L. Gage, "Intimate Notes"; I. Van Dillen, "On Behalf of the Immediate Business Associates."

Mr. Bartlett, who was born in Brooklyn in 1863, began his apprenticeship in the graphic arts at the age of 13, and studied design and drawing under working masters. He gained his early reputation drawing directly on the wood block. In 1880, at the age of 17, he established his own wood engraving business. Seven years later he originated the "phantom" illustration, drawing on boxwood the first such illustration ever made—a Westinghouse engine. He developed the retouching of photographs, his plant serving for many years as the recognized "training school" in this art, and was the first to

Recto and verso panels of placquette presented Edward E. Bartlett by associates

establish a printing plant combining all branches of the business—design, illustration, engraving, printing and binding—under a single management. In 1892 he made the first complete dummy of a commercial catalog, and with his partner, the late Louis H. Orr, became one of the chief influences in improving the standard of commercial printing. Twelve years ago, in 1914, he established the Department of Linotype Typography. Several journeys of typographic research in Europe were made by Mr. Bartlett—in 1920, 1924, and 1925. In 1925, also, the book, "Typographic Treasures in Europe," by Mr. Bartlett, was published in a limited edition by G. P. Putnam's Sons of New York and London.

As chairman of the Committee on American Co-operation with the Gutenberg Museum, Mr. Bartlett has played a leading part in saving the typographic treasures in the world-famous museum at Mainz, Germany.

Mr. Bartlett is a member of the Engineers' Club, New York City, and chairman of its art committee, a member of the Grolier Club, the Lotus Club, the Union League Club, and of the American Institute of Graphic Arts.

"N. M. PRESS IS FREE"

Can Now Speak Freely on Public Affairs Magee Says

"No one in New Mexico now challenges the right of newspapers to talk freely of public affairs, within the prescribed limits of the libel laws. The only hope of democracy is to let editors work out their problems and speak their minds; if they are wrong, the public will

eventually judge them, and they will be the losers."

Carl C. Magee, "fighting editor" of the *Albuquerque New Mexico State Tribune*, so stated Tuesday before the Washington Advertising Club.

"Thanks to an aroused public opinion the State of New Mexico is cleaning up its courts and government," Magee continued.

Magee described his long battle with the State political machine and his being sent to jail for contempt by the same Judge Leahy who he had charged with being corrupt and unfit for office.

The man who brought about the Teapot Dome expose, and the downfall of Fall, received a warm reception.

MRS. KIRKWOOD'S ESTATE

The personal estate of Mrs. Lat Nelson Kirkwood, wife of Irwin R. Kirkwood, publisher of the *Kansas City Star* and heir to the estate of William R. Hill Nelson, its founder, amounts \$1,864,813.82, the appraisal filed in Jackson County probate court shows. Mrs. Kirkwood died in a Baltimore hospital last February. Her will provided that no appraisal be made of her estate but her husband felt that the estate was a public trust and that the appraisal made and the amounts duly recorded the beginning of his executorship. Kirkwood was named as executor.

NEW AD BUREAU MEMBERS

Five newspapers became members of the Bureau of Advertising of the American Newspaper Publishers Association effective Oct. 1. They were: *Cornell (Cal.) Observer*; *Willows (Cal.) Daily Journal*; *Woodland (Cal.) Mail*; *Woodland; Bend (Ore.) Bulletin*; and *The Dalles (Ore.) Chronicle*.

Better Results for Advertisers Means More Linage For You

New heights in lineage are being reached by newspapers using Ludlow equipment, for the bright, new sluglines it produces insure better results for advertisers.

The increased volume of lineage made possible by clean-cut Ludlow faces is more than met with Ludlow speed. This compact time-saving machine goes right to work without preliminaries. There is never any need to hunt sorts—never any hold-over distribution from the previous day's work—for such delays are done away with by the Ludlow system. Without machine or mold changes, your compositors quickly cast any size typeline from six point condensed to full-width sixty point bold, and larger, in any quantity desired, because they set matrices—not type.

Your advertisers want better results. You want more lineage. You can give them what they want, and get what you want by installing the Ludlow, for then you will brighten up your pages by setting your ads and heads with attractive, always-new Ludlow faces.

INDEPENDENCE

INDEPENDENCE of spirit never fails to be recognized, whether in a newspaper or in an individual. By the way a man thinks, acts and speaks the whole world knows whether he is captain of his own soul. And similarly, by the very content of a newspaper, in its editorial opinion and its treatment of news, all who read may easily know whether that newspaper is the product of independent editing or whether it is guided by an unseen hand.

RECOGNIZING that independence is the very foundation stone of successful journalism, the Scripps-Howard organization leaves to the individual editors of its twenty-four newspapers complete control of what appears in their columns. They are responsible only to the traditions of honest, fearless journalism on which these newspapers were founded.

ON THIS independence has been built the confidence of more than a million and a half families in twenty-four cities throughout the United States. In Scripps-Howard newspapers they find that spirit which reflects the life and ideals of their own communities, the sane and liberal attitude toward national policies, a freedom from log-rolling, and an absence of hidden motives.

THIS editorial independence, by its very nature, must of necessity be based upon financial independence.

SCRIPPS-HOWARD

The Scripps-Howard newspapers are completely owned within their own organization. But more than that: The editor of every Scripps-Howard newspaper is a partner in the ownership of his paper. Financial independence of each Scripps-Howard newspaper is a guarantee against outside influence.

THE conduct of Scripps-Howard newspapers since 1879 has proved conclusively that independent journalism, rightly conducted, can be a stable and prosperous institution. Scripps-Howard newspapers have grown, are growing, constantly in power, influence and circulation.

Succeeds Clark as
Editor**

Henry H. Conland, for many years treasurer of the Hartford (Conn.) Courant Company and general manager of the *Hartford Courant*, was this week elected president and publisher by the directors.

Coincident with the election, announcement was made of the appointment of Maurice S. Sherman, formerly editor of the *Springfield (Mass.) Union*, to be editor of the *Courant*, filling the vacancy caused by the death of Charles Hopkins Clark. Mr. Sherman, at Mr. Hopkins own direction, had previously been named associate editor, as published several weeks ago in *EDITOR & PUBLISHER*.

Mr. Conland first came to Hartford from his native city of Brattleboro, Vt., in 1904. He was drawn to the city by a former Vermonter and friend, Clifton Sherman, then managing editor of the *Courant*, now editor of the *Times*.

Mr. Sherman had brought his friend to Hartford to work in the *Courant's* business office. There were no openings at the time of his arrival, however, and the young newspaper man spent nearly a year as a reporter before going down stairs.

Once in the business office his rise was rapid. He became secretary of the company in 1911, and in 1915 was elected treasurer. During the last illness of Mr. Clark, Mr. Conland assumed almost the complete publishing task.

Mr. Conland is the son of Dr. James and Matilda Conland. Dr. Conland was Rudyard Kipling's physician when the English poet was visiting this country. Both used to spend their summers in Cape Cod. There Dr. Conland collaborated with Mr. Kipling in the writing of "Captain Courageous." Henry Conland spent much of his boyhood in a literary atmosphere, and his aptitude and fondness for the arts have continued.

On Feb. 11, 1905, Mr. Conland married Miss Caroline Henschel of New York. They have four children. Mr. Conland is president of the Hartford Water Board, the only public office he ever consented to accept.

Maurice S. Sherman, editor of *Springfield (Mass.) Union* and for 32 years connected with the newspaper, received the spontaneous tribute of more than 300 civic and merchantile leaders in Springfield at a farewell banquet Tuesday evening. Mr. Sherman this week became editor of the *Hartford (Conn.) Courant*, succeeding the late Charles Hopkins Clark.

Among those who joined in the farewell party were Lieut. Gov. J. Edward Brainard of Connecticut and Lieut. Gov. Frank G. Allen of Massachusetts—one to welcome the editor to a new state, the second to bid him farewell for Massa-

HARTFORD COURANT CHIEFS

H. H. Conland

M. S. Sherman

chusetts. Mayor Fordis C. Parker of Springfield voiced appreciation of the editor's part in building the city and presented him with a beautiful grandfather's clock. Mayor Norman C. Stevens of Hartford welcomed Mr. Sherman on behalf of the Connecticut city.

Senator Frederick H. Gillett, one of Mr. Sherman's closest friends, paid tribute to his career in the Commonwealth.

Henry H. Conland, business manager of the *Hartford Courant*, announced that while Mr. Sherman had modestly agreed to come to the paper as associate editor, the directors at a meeting Tuesday afternoon voted to invest him with the full title of editor.

Henry H. Bowman, president of the Springfield National Bank, was toastmaster. His first words were directed as a compliment to Mr. Sherman's mother, listening in on the radio in Hanover, N. H., when he said that he wanted her to know of the affection and high esteem in which her son was held in the community.

Richard Hooker, president of the Republican Company, publishers of the *Springfield Republican*, declared he was glad to pay tribute to a great editor. Mingled with his regret at Mr. Sherman's going was an expression of appreciation of the courtesy and gallantry of

Mr. Sherman as a competitor and his ability as an editor.

Mr. Hooker created considerable amusement by remarking that while he and Mr. Sherman might differ on political views they were in accord in their enthusiasm for angling. He wondered if his former editorial adversary's conversion to belief in the infallibility of the dry fly would have any effect on his editorial comments on the dry laws.

He paid a glowing tribute to the memory of the late Charles Hopkins Clark and said he knew of no man so well fitted to take Mr. Clark's editorial chair as Mr. Sherman.

Congressman Henry L. Bowles read letters from Senator William M. Butler, from Gov. Alvan T. Fuller and from Justice James B. Carroll of the Massachusetts Supreme Judicial Court. Louis K. Liggett also sent a letter.

Robert Lincoln O'Brien, editor of the *Boston Herald*, was the concluding speaker. Most of his address was delivered in a light vein, rallying Mr. Sherman's outstanding convictions regarding the 18th amendment.

Seated at the speakers' table were: Mr. Bowman, Mr. Sherman, Mayor Parker, Lieut. Gov. Allen, Waldo E. Cook, editor of the *Springfield Republican*, Mr. O'Brien, Mayor Stevens, Senator Gillett, Congressman Bowles,

Mr. Hooker, Lieut. Gov. Brainard, J. Dr. James Gordon Gilkey, Atty. Will G. McKechnie, former Mayor Arthur Adams, Harry H. Caswell, president of the Springfield Chamber of Commerce and Mr. Conland.

Members of the *Courant* organization present included H. I. Horton, editor, writer, Theodore C. Wallen, assistant managing editor, Joseph W. Thurston, advertising manager, John Sudars, office manager, Henry H. K. Welch, Edward M. Day, directors, and Geo. H. Armstead, managing editor.

Among the Springfield newspapers who accepted invitations to the farewell banquet were: Sherman H. Bowles, general manager of the *Springfield Newspapers*; Francis T. Bowles, Managing Editor; W. Dickey, managing editor of *Springfield Union*; William M. Hays, night city editor of the *Union*; Edward W. Penfield, financial editor, and C. Withe, mechanical superintendent of the *Union*.

The farewell party came as the climax of a series of banquets tendered in Mr. Sherman's honor. Some 80 members of the Union staff presented Mr. Sherman with a gold watch at a banquet Saturday night. At that time a proposal to organize a Springfield Union Alumni Association to meet annually was acted upon by a committee named to put the organization into effect.

Postoffice clerks tendered Mr. Sherman a dinner and presented him with a traveling bag.

The Kiwanis Club of Springfield, other organizations, also took advantage of the opportunity to honor the departing editor.

FLORIDA NEWSPAPERS NEARING NORMAL

**Dailies in Hurricane Area Printing
from Own Plants; Weeklies Harder
Hit—Expect Big Tourist Season**

(By Telegraph to EDITOR & PUBLISHER)

MIAMI, Fla., Sept. 29.—Newspapers in the section of Florida struck by the hurricane on September 18 are rapidly getting back to normal publication conditions. The *Miami Herald* which missed the Sunday issue of September 19 in its own plant printed its Monday edition in the plant of the *West Palm Beach Post*, but resumed publication in its own plant on Tuesday.

The plant of the *Miami Tribune* which lost its roof was not seriously damaged and that paper resumed printing in its building after two editions of publications in the *Herald* plant.

The *Miami Daily News*, which was not seriously damaged, but the plant of which was shut off from power, printed two days in the *Herald* office and then resumed in its own publication office.

The *Fort Lauderdale Evening News* is still being printed at Pompano while the *News* building and plant are being reconditioned.

The *Hollywood Weekly News* is also being printed at Pompano.

Miami Life, weekly, resumed publication this week in its own building. The *Miami Beach Beacon*, the plant of which was greatly damaged, is being printed in another office. The building of the *Miami Weekly Post* was destroyed and the publication of the *Post* has been arranged for in other plants. The *Miami Weekly News*, labor paper, which was printed in Miami Post Building is being printed in a job printing office. The *Homestead Daily Leader* and *Weekly Enterprise* have not yet resumed publication in their own plants but expect to do so in a few days.

Circulation of the daily newspapers in Miami reached normal proportions the middle of last week. The *Miami Herald* home delivery was accomplished with a loss of only 300 locations. The total circulation of all the *Miami* papers has been considerably larger for ten days than previous to the storm. The *Miami* dailies are of normal size and are running a proportion of news and advertising of about 20 to 80. Within another week all of the newspapers should be back to normalcy. Owing to this being the beginning of the winter tourist season it is expected that advertising will gradually increase from now until March 1. *Miami* merchants are preparing for one of the largest tourists seasons in the history of the city.

O'BRIEN ON AD PROGRAM

Robert Lincoln O'Brien, editor of the *Boston Herald* will be one of the chief speakers at the convention of New England Advertising Clubs to be held at Worcester, Mass., Nov. 8 and 9.

HEARST TRAIN WINS MIAMI'S PRAISE

THE relief train sent to Miami by the *Chicago Herald and Examiner* left for home Sept. 27, after winning the praise of officials of the devastated city. It was held over an extra day following an appeal made to William Randolph Hearst by Mayor Romfh, Mayor of Miami, and other city authorities.

The train established one of the most remarkable records in the history of disaster relief in the United States. Word of the hurricane was flashed to Chicago Sunday morning, Sept. 19. Within two hours the situation had been laid before Illinois Central Railroad officials and a train had been allotted to the *Herald* and *Examiner* with orders for a clear track.

At 10 o'clock Monday morning the cars had been loaded with tons of provisions donated by Chicago mercantile and stock yards firms. More than 100 trained nurses and physicians, with full field equipment, were on board, and the journey began.

Tuesday morning, before dawn, the train was in Miami, seven hours ahead of the fastest time ever made. It was the first organized relief unit to reach the devastated area from any point outside of Florida.

Following is the message wired to Mr. Hearst:

"William Randolph Hearst,
"Los Angeles, Cal.:

"On behalf of the city of Miami we appeal to you to keep the *Chicago Herald* and *Examiner* relief train here. This train, in charge of Dr. Bundesen and Dr. Briggs, chief surgeon of your papers in the Middle West, has saved the situation in Miami, and it is absolutely necessary that this train stay here another forty-eight hours. We implore you to grant our request.

"Without the assistance rendered by this unit there is no telling what our situation would have been.

"I am sending a copy of this message to the *Chicago Herald and Examiner*.

"Please acknowledge receipt of this message and authorize them to allow this train to remain here at least until Monday night."

The *Chicago Herald and Examiner's* relief fund for Florida storm sufferers was swelled by \$12,779.41 in a theatrical benefit at which all of the principal performers in Chicago's theaters took part.

TEACHING COUNTRY SCRIBES

Benton (Ark.) Courier Lists 15 Rules for Its Correspondents

The *Benton (Ark.) Courier*, published by E. B. White, has drawn up the following 15 rules as a means of instructing its country correspondents:

Above all get the news.

Boost every worthy movement in your community; in fact, have progress for your slogan.

Do not express your own opinion of news events; just give the facts and let the reader form his own opinion.

Do not depend on rumor; investigate carefully all important news.

Write regularly, even though there are only a few notes. People become accustomed to a letter each week and look for it.

Who? Where? When? What? Why? How? Answer these questions in your news stories, and you are sure to make them interesting.

Speak a good word for everyone in your community. If you can't, leave them alone.

Give accurate reports of all public meetings.

Do not use the paper to "get even" with anyone.

Speak a good word for the paper you represent. The paper is here to serve the best interests of our country, state, and nation.

We welcome articles on timely subjects; only ask that same be as short as possible.

Try to make all items and articles concise—that is, to the point.

Leave one line between each item.

Mail letters so that they will reach this office Wednesdays.

In case of some extraordinary news event, telephone us at once.

The rules are enlarged in a circular called "The Country Correspondent" by Gus M. Oehm, recently issued by the College of Agriculture, of the University of Arkansas. Mr. Oehm, now a member of the college staff, was formerly with the *United Press*.

Gutenberg invented printing by means of movable wooden blocks or type in 1438.

FLORIDA PRESS GROUPS TO HOLD JOINT MEET

**Three State Associations Will Gather
at Daytona Beach, Oct. 8-9—
Police Summons Used to Assure
Full Attendance**

Florida problems will be discussed at a joint meeting of the three press associations of the state to be held at Daytona Beach, Fla., Oct. 8-9. The associations are the Associated Dailies of Florida, the Florida State Press Association, and the South Florida Press Association.

J. W. Allan, managing director of the Associated Dailies of Florida, anxious to get out a full attendance, resorted to a novel idea. Fake legal summons were drawn up, commanding members to be present, and sent to local police chiefs who detailed an officer to serve them of newspaper publishers of their towns.

"It is essential that we have full attendance at this meeting," Mr. Allan wrote the police chiefs, "and since our is at once the busiest and the laziest bunch in the world, something extraordinary must be done to attract their attention to the meetings.

"Col. Bill Glenn, of the *Orlando Morning Sentinel*, suggested that we send a fake warrant after them, and it seems such an unusual thing, as well as such a good joke, that we have arranged to do this."

The home-made warrants are worded as issued "In the Florida Court of Loyalty, Any County, Fla." Lew B. Brown, George E. Hosmer and Gilbert D. Leach are listed as attorneys for the plaintiff.

Defendants are summoned to appear at Daytona Beach to "satisfy the judgment of editors, publishers, et al, of the State of Florida, to prevent an uncivil action justified by a claim upon your loyalty to the cause."

Free: A booklet of facts, "Argentina as a Market for American Products," mailed free on request.

SOUTH AMERICA BOUGHT NEARLY A MILLION DOLLARS WORTH OF AMERICAN RADIO APPARATUS IN 1925

In 1925 Argentina alone bought \$408,593 worth of American radio apparatus, an increase of \$116,853 over 1924. Total sales in South America during 1925 amounted to \$999,123, an increase of \$283,286 over the previous year.

LA PRENSA

of
Buenos Aires

is the best advertising medium for radio in the Argentine market, the most important in South America.

The first newspaper in Argentina to give daily news of developments in radio was LA PRENSA. For several years daily and Sunday radio sections have been a feature of the paper. Many thousands of letters have been received by the radio editors from amateurs.

A special report on sales of radio apparatus in Argentina telling why increased sales are forecast for 1927 will be sent without cost to sales and advertising managers.

Women's Enterprises, Fashions and Activities

The Newest Member of the Textile Family

WHERE one asked to name the most important textiles, the answer would be, "cotton, wool, silk, and linen"; only a few persons would mention the material that is now placed as the third in rank among the great textile industries. Yet though its brilliant glossy surface is growing familiar and its old name—artificial silk, art silk, or fiber silk—is known, still its proper name of "rayon" remains unfamiliar to many people.

Rayon Defined
What is rayon? Barely a year ago President Coolidge, in his speech before the National Cotton Manufacturers' Association, complained that he failed to find the word "rayon" in his unabridged dictionary when he was seeking an accurate definition of the term. The word is still lacking in the dictionaries, and although it is now included in the semiannual supplement to one of the encyclopedias, even the newspaper almanacs have not yet acknowledged the fact of its importance to list it in their annual industrial statistics.

As defined by one of the largest manufacturing concerns, rayon is "a natural textile fiber made by converting pure cellulose into thread by means of chemical and mechanical processes." This sounds dull enough, but back of that definition lies the tale of man's dream and his search for an idea. And from this dream came a product which, in less than 40 years, has pushed itself into the forefront of the textile industry. We wear it in our "silk-and-wool" sweaters; the sailing stripes and figures on gingham and voiles employ this material, and it forms the satin damask patterns on most of the heavy draperies and upholstery material.

How It Was Discovered
Some 60 years ago the French chemists, realizing the popularity and cost of silk, began to experiment in making a similar material. They knew that silkworms fed on cellulose in oak and mulberry leaves and then spin the filaments that take from the cocoons to the silkworms. So the chemists reasoned that there must be some way of producing synthetically the changes in cellulose without the silkworm. They took up which is the chief constituent of all plants. Life, years studied and worked with it, they found four different ways of making a material that is like silk. One of these, which is the most important, is the cellulose acetate.

Even in France the origin of new fiber is somewhat obscure. It was probably never known whether the credit for the first production of rayon was the work of the famous chemist Beaumont, or of the Count de Chardonnet, who, in 1884, secured the first patent. The de Chardonnet method was a micro-cellulose process, which passed the cellulose from cotton plants through a filtration process, then dissolved it in alcohol and ether and forced it through a glass tube with a very small opening. This formed a thin filament that hardened as the alcohol and ether evaporated, after which several filaments were twisted into a thread. The process was simple and promised well, but unfortunately this thread would not dye easily. Moreover, it was both inflammable and expensive. People could not be persuaded to make use of a material that might suddenly take a notion to blow up.

Experiment Toward Perfection
For years men experimented, trying to remove the objectionable features of this process and by 1900 was perfected the cupro-ammonium process. But this method demanded complete temperate control, and the following year the cellulose-acetate

process was discovered and hailed as a success. But it proved to be less waterproof than the others and is now the least used manufacturing method. The most popular method is the viscose patent taken out by Cross and Bevan in Great Britain in 1892 and intended mainly for making a plastic compound of cellulose. While the solution was known to be suitable for the manufacture of textile fiber, no particular attention was given this phase of the matter at first. A manufacturer of electric light bulbs got the idea of forcing viscose into a single thread and using it as a filament in electric bulbs. Although the bulb filament replaced the fiber before it had a fair trial, this idea gave impetus to the project of using the material for a textile.

This was further advanced by an inventor named Topham, who succeeded in making an apparatus for forming textile fiber from a solution of cellulose, twisting it, and at the same time coiling it in a cylindrical package. With this improvement the industry was put on its feet and grew so rapidly that today over 100,000,000 pounds are produced each year.

Directions for Cleansing
While rayon has not the softness, tenacity, or durability of silk, it is more lustrous and combines well with silk, cotton, or wool, and it properly handled, withstands much wear. Many of the very costly, high-finish materials, sold under fancy names as this or that sort of satin, are really rayon. The material has not the same water-resisting quality as the other textiles. It is a weak point, it is not so strong as the other textiles. It is a weak point, it is not so strong as the other textiles. It is a weak point, it is not so strong as the other textiles.

Polish Restored
Quickly and Easily
Once over with the FINNELL Electric Floor Machine and— presto!—every trace of spilled water or dusty or muddy foot prints is gone. It is not even necessary to remove the rugs or furniture from the room. The FINNELL runs under chairs, between furniture and rugs. The FINNELL does the four things necessary to have truly beautiful floors. It prepares the surface. It polishes the wax. It polishes the floor, rubbing the wax in and leaving none on the surface to smear or get slippery. It keeps floors polished.

The FINNELL scrubs, too, cleaner and faster than hand methods. Ideal for scrubbing the bathroom, garage, laundry or porch.

Costume Plays Representing Three Races, Chinese, European, and Indian, Suggested These Very Indian Frocks

We Point With Pride

to the group of National Advertisers whose advertisements appear on this page, reproduced from a recent issue of *The Christian Science Monitor*. Unusually keen reader interest in the advertising columns is one reason for the Monitor's steadily growing list of National Advertisers.

Modern Dress Designs In Costume Plays

ONE wishes to express individuality in clothes, but cannot have one's own ideas, the stage found to offer a wealth of ideas to assist originality. From plays may be obtained some ideas if good sense is used and what is too bizarre and 'n present modes and present ideas which in exacting form might be inappropriate. Small costumes (which are respectively Chinese, and eighteenth-century), were worn in three plays given last winter at neighborhood Playhouse in New

York. The charming features in the rock and themselves modernized into an evening frock for the stante. Conventionalized flower silks are traced in beads or metallic thread on georgette crepe, and in place of the cumbersome Chinese sleeve which covers even the hand, are added long flowing pieces of plain georgette. The skirt is of the same material and takes advantage of the interesting manner in which the kimono and blouse together. The panel which hangs in front of the original is moved around to the side with a handsome bead ornament terminating in fringe. Very occidental in mode is the central figure, and yet the picturesque costume of the Burmese dancer provides its most novel feature. The panel of contrasting material with

passionate around the edge is lifted bodily from the Burmese costume where it is loose-hanging and separate from the fantastic trousers. Two box plaits are held in place by the point in front and the tied cords carry out the harmony. The young man in the third picture suggests immediately the "page boy silhouette." In a simple street dress of taffeta the flare is slightly reduced and the belt and front trimming appear as one. The long points of the theatrical collar and cuffs find their duty likeness in the modern collar and the trim at the wrist.

Jades, Precious to Touch
Along the term jade in its broadest sense, there is a great variety of coloring. Jade black; clear white jade; jade with red and brown veins; yellow jade in which the yellow is tinged with green, and gray jade with white or brown interlacings. The most common variety is green jade, in which color many shades may be found. China, beyond all countries, values jade at its true worth. Among the large pieces carved in jade there are

Shellac, Ancient and Honorable

IN THE yesterdays of the Old World shellac played its part; today it is more valuable than the ancient materials which first made use of it could have dreamed that it would become. One of the earliest references to lac gum now extant in literature is found in a vast encyclopaedia of the knowledge of the ancient world, written by the Roman naturalist, P. L. "The Elder," and published in 77 A.D. Not alone in the antiquity of its history, but also from the standpoint of its origin and characteristics, is the shellac industry one of unusual interest. Lac is a product of the animal kingdom and may be defined as a resinous excretion by a scale insect known as *lacchidius lacca*. The insect is indigenous to the forests of India, which country holds virtually a world monopoly on shellac. The name, lac, is derived from the Indian term for the numeral lakh—100,000—and is indicative of the countless hosts of insects which congregate in masses around the twigs of certain trees. Fifty-six trees attract it. The encrusted twigs, known as stick-lac, are broken from the tree by the jungle tribes, cut into sticks two inches or more long and dried in the shade. After passing through the hands of many adulterers it reaches the factory to be made into shellac varnish. The stick-lac is ground in hand mortars and sifted through hand sieves. Following the grinding and various processes, the mixture is put into long narrow cloth bags 10 to 12 feet long and two inches wide. For handling in this way one quality of lac bags must be made of American willow. The bags are worm-eaten affairs which are held over open charcoal fires by two operatives, who twist the bags in opposite directions, while the melted lac slowly oozes out and drops upon the floor. The next day it is ready to be broken into thin flakes and packed into bags ready for shipment, when it becomes what is known in commerce as shellac. Lac, in its original state is blood-

red, as brilliant a scarlet as cochineal and more permanent. The furniture of palaces, magnificent bedsteads and thrones, chairs, hair, chests elaborately carved and often mounted and inlaid with gold, jewels and ivory, and always shined and polished, are depicted in great numbers in the early literature of India. Almost to no particular did the ancient process differ from that now commonly employed in India. Nations have been conquered, but not changed. One recalls a significant phrase of Kipling's, "Here lies the man who tried to hustle the East."

To Clean Glass Vases
Take some newspaper and twist it up into a wisp and put it into the vase with a little clean water, and keep on turning it round and round until all the stain comes off the glass and it looks clean and bright. This is an easy way to clean glass vases, water carafes, or bowls.

RADIO PROGRAM CHIEF SCORES FREE ADS

C. D. Isaacson, of WRNY, Says Newspapers Are Foolish to Print Trade Names in Broadcast Announcements—Defends Air Advertising

Gratuitous publication of trade names in radio programs was this week described as a newspaper folly by Charles D. Isaacson, program director of station WRNY, Roosevelt Hotel, New York.

In an interview with **EDITOR & PUBLISHER**, Mr. Isaacson maintained newspapers ought to drop this form of free publicity.

"It is advertising and should be paid for," he declared. "I cannot understand why newspapers have ever allowed it to continue as long as they have."

"Use of the trade names in commercial radio programs are more important to the advertisers and to the stations than to the readers, and, therefore, according to all editorial rules, should be omitted."

Mr. Isaacson was referring to commercial programs like the Ipana Troubadors, the Edison Hour, the Happiness Boys, the A. & P. Gypsies and other radio entertainment features paid for by general advertisers and duly listed by name in published programs, despite contrary advice of the American Newspaper Publishers Association.

Station WRNY sponsors commercial broadcasting, and Mr. Isaacson pointed to the fact that the Edison Company, one of this station's accounts, purchases space next to radio programs in newspapers to acquaint readers with its radio offerings.

A new technique for radio broadcast advertising was foreseen by Mr. Isaacson. It will, he believes, be somewhere between the present form of goodwill promotion and direct advertising.

"It may take the form of dramatization of a product," he stated. You will remember Maeterlink wrote a play the scene of which was laid in a man's stomach. The same idea might be used with effect over the radio by the manufacturer of a health food product.

"Someday radio stations may find a way to inform women who care to listen in about opportunities for bargains awaiting them in local department stores. Naturally stations offering this type of advertising will have to pay for space in the newspapers to tell listeners about it."

"Eventually I believe radio stations will be big users of newspaper advertising columns."

Goodwill advertising as it is sold by some stations today was defended by Mr. Isaacson. He said, however, he had no patience with thinly disguised direct advertising. The new technique he expects will be developed will make air advertising acceptable to listeners, he believes.

Mr. Isaacson pointed out that since the Edison Company has been broadcasting it has increased its newspaper advertising appropriation. A sum of \$80,000 has been spent in 25 New York City dailies during the last eight months. Beginning next month company will increase its use of newspaper space.

FLORIDA DAILY SOLD

Pulliam and Thomas Take Over Daytona Beach Journal

Eugene C. Pulliam and Raymond A. Thomas purchased the *Daytona Beach* (Fla.) *Journal*, on Oct. 1.

Both of the new owners are trained newspaper men and have had a wide experience in the business.

Mr. Thomas achieved success as gen-

eral manager of the *Franklin* (Ind.) *Evening Star*. He was recognized as one of the most aggressive, industrious and capable newspaper managers in the state. He has been connected with the newspaper industry in some capacity for more than 10 years.

Mr. Pulliam is editor and publisher of the *Lebanon* (Ind.) *Daily Reporter*, his paper being recognized as one of the outstanding small city newspapers of the Middle West. He formerly was associated with Mr. Thomas as editor and half owner of the *Franklin Star*. His newspaper training was received on the *Kansas City Star*.

CUTTING FREE PUBLICITY FROM RADIO PROGRAMS

(Continued from page 5)

Certainly we do not want to aid in building up another automotive publicity Frankenstein and thus cheapen all advertising and automatically reduce our rates."

"News, regardless of its advertising element, should be published," declares Hugh A. O'Donnell, assistant business manager of the *New York Times*. "Mere publicity is neither news nor good advertising and should be eliminated at least from the news columns. And advertising, as the news of merchandise, should be placed in the advertising columns. This applies to all classifications, whether radio, automobiles, or the products of any other industry."

"We try to give radio the same break on news that any other industry receives," said M. C. Meigs, publisher of the *Chicago Herald & Examiner*, "namely, that the editorial department be the judge as to its news value."

Total elimination of firm names and brands from radio programs does not appeal as fair to Harvey R. Young, advertising director of the *Columbus Dispatch*.

"The Columbus Dispatch eliminates all publicity except that which may be considered news, and it is news to radio listeners that the Waldorf-Astoria orchestra or the Edgewater Beach orchestra, or the Hotel Sherman orchestra is on the air," said Mr. Young. "If this is news, how can publishers eliminate Atwater-Kent, or Cluett Eskimos, or Washburn-Crosby's WCCO? We don't allow any explanation as to who the Washburn-Crosby Company is, or any other business or product. If a large band was to be put on the air, listeners would want to know what band is playing and if it is called the Ford Motor Company Band, how can you eliminate that identification from the programs? Anything publishers may do for the mutual benefit of readers and publishers, the Columbus Dispatch stands for."

Newspapers which operate broadcasting stations occupy a peculiar position in the newspaper-radio situation. Some of them sell time on their stations. Some do not. Some of them participate in the interstate hook-ups of the two leading New York stations, receiving their share of the proceeds paid by the firms sponsoring the nationwide entertainment.

Some newspaper-operated radio stations have their own groups of artists and entertainers and supplement their services by giving broadcasting opportunity to local orchestras and individuals. Sometimes local stores are permitted to sponsor entertainments, the stores paying the actors, musicians or singers, and newspaper supplying the air time free of charge. What policy is to be followed in these cases as to program publicity?

The *Portland Oregonian*, operating KGW, publishes only firm names and no brand names of organizations using its station, according to W. J. Hofmann, business manager. Sponsored programs on other stations are not listed under the sponsor's name.

The *Memphis Commercial Appeal*, whose WMC has a widely-heard voice, never prints the names of firms in its programs except when the firm furnishes WMC with an orchestra or other entertainment, says C. P. J. Mooney, editor. "We have never made a charge for the

radio, but have never hesitated, when the firm gives us a program which we accept, to give the firm decent credit therefore," Mr. Mooney added.

The *Kansas City Star*, a pioneer broadcaster, says "WDAF will allow no free advertising on the air in future. We will take high class commercial programs paid for on a regular radio advertising rate, however."

These few flashes indicate the many complexities that face both newspapers and radio station operators.

These complexities give no hint of self-solution. The newspapers a few years ago recognized the immense news value of developments in this new use of the invisible ether. All of them gave its kaleidoscopic expansion of the early days millions of words of news. Some few of them early sensed the advertising possibilities inherent in an industry which could easily place apparatus in every home in the country within a few years and sought to foster those possibilities by the same stimulants that had been applied to the infant automobile and the bicycle. They had never given similar stimulation to the piano or talking-machine industries, to which the newcomer was to deliver a body blow, nor to any other of a dozen industries whose products held a wide and commonplace public interest. The news interest produced by the mysterious technicalities of radio, the overnight development of small manufacturers of radio receivers and accessories, the rise of the high-power big city stations and their early "miracles"—the enthusiasm generated by all these tended to dim the caution signals on the track ahead of the newspaper publisher.

Four years later things are seen more sharply, but the future of radio is not yet clearly defined. Just at present, there is no man or body within or without the industry equipped to wield regulatory or police powers on the broadcasters. The only restraint is the occasionally irresistible, but usually sluggish, force of public displeasure at misconduct on the ether waves. It is not likely that such an anarchic state will persist beyond the next session of Congress, but what form of rule will be adopted no one has yet prophesied.

The past year saw many new broadcasters added to the already crowded ranks of those using the limited wave bands available, but it is not likely that this kind of growth will continue. In fact, the tendency is toward reduction of the number of broadcasters, toward centralization of broadcast program in the large cities, except for events of nationwide interest which may occur elsewhere. Details of the transactions by which WEAF passed from the possession of the American Telephone & Telegraph Company to that of the Broadcasting Company of America, the latter affiliated with the Radio Corporation of America, are still somewhat obscure outside of circles directly concerned. The R. C. A., however, in addition to controlling much of the trans-oceanic communication by radio and to drawing royalties on parts essential to almost every radio set, seems about to assume control over programs

that will reach most of the radio listener throughout the land.

Whether newspapers are to support or foster this development either on grounds of public policy or selfish interest, or resist it, is not yet apparent.

Certainly, no matter how the industry develops, it will thrive lustily at the expense of the newspaper unless the present flow of free newspaper service is curtailed. Radio programs are an incidental part of the newspaper's contents; radio sections with their technical articles on construction interest deeply only a small minority of newspaper readers. Their circulation value, once presumed important, is now comparatively small in a well-edited, complete newspaper.

What then, does a newspaper gain giving many columns of editorial space? Advertising of radio manufacturers will be answered. Let us see.

New York morning and Sunday newspapers during the first six months 1926 carried 557,142 lines of radio advertising, or 1.2 per cent of their total advertising space. Evening newspapers carried 1,074,034 lines, or 2.4 per cent of their total advertising space. Although direct statistics are lacking, it may be surmised that New York papers with their great concentrated radio market carried a larger proportionate volume of radio advertising than the papers of other cities.

The paid radio advertising in the morning and Sunday issues is the equivalent of a little more than 250 pages, over a period of six months. In the evening papers, the space is the equivalent of about 480 pages. The morning and Sunday papers in that period published 46,000 total pages; the evening and Sunday papers published a total of 48,780 pages. Radio advertising occupied a little more than half of 1 per cent of the total morning space and almost 1 per cent of the total evening and Sunday papers' space.

Figure programs at two columns daily in each of the 15 newspapers and at two columns in the special Saturday or Sunday summaries of the week's broadcast—a total of 5,000 columns for programs alone during the six months conservative. Five thousand columns translated into 833 eight-column pages for programs alone—balanced against total advertising input of 730 pages. An account is taken of the columns, pages and sections devoted daily and weekly to technical discussions, reviews of broadcasting, and studio gossip, but it is safe to say that an additional 200 pages would not hold the six-months' production of the radio editors and publicity men who supply their needs.

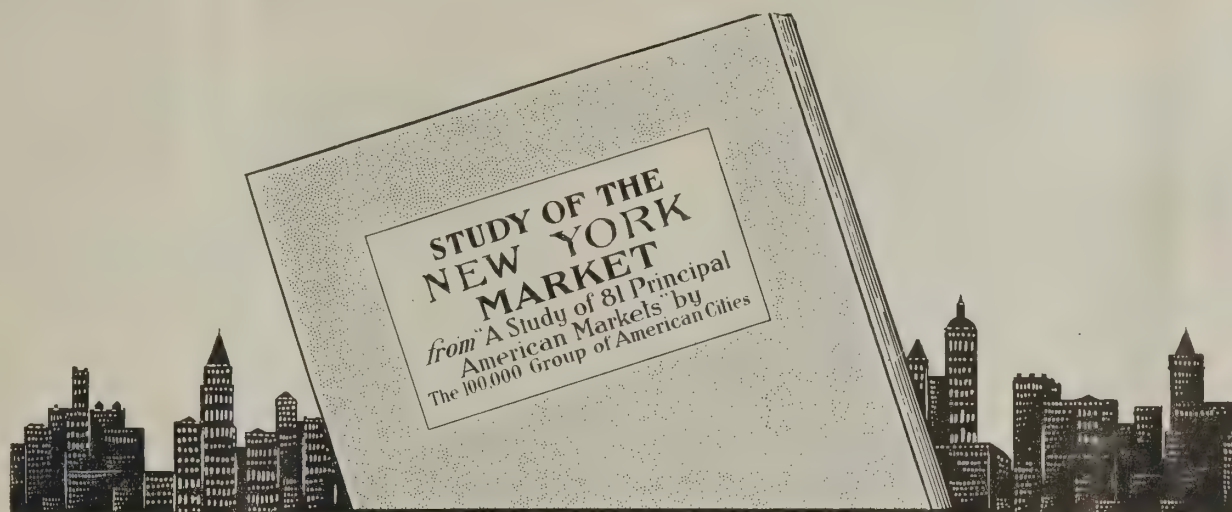

The scale are badly over-balanced against the newspaper on the space account alone. Add to that the fact that the broadcasting stations are using the gigantic gift of newspaper space to line their own pockets with money that they produce sales for advertisers should be spent in the newspaper columns and the picture is not one to give comfort to the newspaper publisher. Relations of the press with the radio need adjustment before their economics get completely out of hand.

18 INTERTYPES

are being used by

No Standardized Intertype has ever become obsolete

THE NEW YORK TIMES has issued a sixteen-page book which embraces the exclusive data covering the New York market appearing in the 358-page book "A Study of 81 Principal American Markets," recently published by The 100,000 Group of American Cities.

The work comprehensively analyzes the vast concentrated New York market. The ten pages of statistical information give complete, for the first time in simplified form, the figures of New York City, and of 300 towns in the metropolitan area—population, families, dwellings, male and female buyers fifteen years of age and over, automobiles, retail outlets and wholesale firms. The statistics cover every town of more than 1000 population.

The advertiser who wishes thoroughly to cover the New York market will find the information in this book of greatest value and interest. A copy will be sent to any advertiser or agent on written request.

WOODBIDGE TALKS TO SPECIALTY AD GROUP

I. A. A. President Emphasizes International Aspect of Advertising in Chicago Speech—Goes Elected President

C. K. Woodbridge, president of the International Advertising Association, emphasized international aspects of advertising in his address at the executive session of the Advertising Specialty Association, which held its annual convention at the Hotel Sherman in Chicago, Sept. 20-24.

Mr. Woodbridge mentioned plans, if the necessary funds are obtainable, to stage a special day in each of the affiliated I. A. A. clubs to give men in the specialty advertising field an opportunity to put on an effective program.

Of the international scope of advertising, Mr. Woodbridge said:

"In America we have made advertising the common language of trade. It gave me a thrill to receive California fruit for breakfast in Amsterdam, Holland—to use Palmolive soap in Paris, where I sat next to a French business man who speaks our American language as well as I do. 'All I know about America I have acquired reading advertisements in American trade papers, newspapers and magazines,' he told me.

"I bought California raisins in packages at the Zoo in London, and Virginia peanuts for the elephants."

Advertising standards have been raised to such an extent that the amount of worthless advertising today is negligible beside the body of legitimate advertising, Mr. Woodbridge declared.

The convention opened with registration and viewing of trade exhibits. The opening program session was held Tuesday, at which the members heard two speakers—John N. Van der Vries, Chicago, manager of the north central division of the United States chamber of commerce on "What's It All About?," and Harry Collins Spillman, New York City, on "Emphasizing the man in SalesMANship." Reports of officers and committee chairmen followed.

On the program at the annual banquet was Judge John H. Lyle, Chicago, who spoke on "What Every Business Man Should Know."

Thursday morning, the sales promotion round-table meeting was presided over by Stanley W. Allen, secretary-treasurer of the Kemper-Thomas Company, Cincinnati. R. R. Cunningham, director of sales, personnel and advertising of La Salle Extension University, Chicago, talked on "Hiring and Training Salesmen."

Charles E. Goes of Chicago was elected president of the Association. Other new officers are: I. C. Clover, Coshocton, O., first vice-president; W. A. Repke, St. Paul, second vice-president; E. N. Fordon, Aurora, honorary vice-president; J. B. Carroll, Chicago, treasurer.

PRINTING CRAFT IMMORTALIZED IN BRONZE

Capt. Pierre de Rohan (left), associate editor of the *Camden (N. J.) Morning Post and Evening Courier*, went all the way to Colorado Springs to present this statue, "The Make-Up Man," to the International Typographical Union, through President James M. Lynch (right). The statue was executed by Max Kalish for J. David Stern, publisher, as a tribute to the printers of the world. It is the first work of art glorifying the men who bear the actual burden of newspaper-making. The statue will be placed in I. T. U. headquarters, Indianapolis.

FOUR FIRMS CITED

Federal Trade Commission Eliminates Misleading Practices

The Federal Trade Commission this week cited four concerns as having employed misleading advertisements, brands and labels. Each firm agreed to cease and desist from the practices complained of, and so their names were withheld by the commission.

One cigar manufacturer had been using the term "Havana Crumbs" in advertising a cigar which was not manufactured from Havana tobacco, either in whole or in part.

A firm manufacturing soy bean and wheat products agreed to cease using a label bearing the words "Sanuki, Japan," and from stating that it was an "importer" of soy beans, inasmuch as it "does not import the product which it so represents."

A corporation engaged in the sale and distribution of fabrics agreed to cease using the term "Sil-kee Pongee" in reference to a product which did not contain any silk.

The fourth firm agreed to cease using the terms "Sheffield Silverware" and "Sheffield Plate" in reference to silverware that was not made in Sheffield, England, and not by the famous Sheffield process.

BROOKLYN CLUB GETS CHARTER

The Brooklyn Newspaper Club has obtained a New York state charter of incorporation. Arthur Lozier, *Brooklyn Eagle*, is club president.

First newspaper merchandising departments were established more than 10 years ago.

NEWARK PRESS LOSE POINT IN SUIT

Court Denies Damages to Defunct Tabloid—Receiver Alleged Senator Frelinghuysen Owed Company \$105,000

Chancellor Backes, in the Court Chancery, Newark, this week held off hearing testimony that the now defunct *Newark Press*, a tabloid, had no ground for collecting the \$105,000 alleged due newspaper from former United States Senator Frelinghuysen. Joseph J. Fiske, the promoter of the tabloid, the court decided, might have grounds for recovering damages, and plaintiff's attorney was allowed to submit further brief in argument.

The action was brought by John Bernhard, receiver for the company. Testimony by Mr. Fiske was to the effect that Mr. Frelinghuysen had promised to finance the publication of the *Press*, but withdrew when his demand for 51 percent of the stock was refused. The former Senator took the stand for an hour, and, while admitting that he made personal loans to Mr. Fiske and that he had investigated the proposal to publish the paper with a view to financing it, he thought advisable, denied he promised definitely to finance it. He also said that Mr. Fiske had released him from further obligations when he gave \$8,000 to pay the salaries of the paper's employees.

The *Press* started publication Sept. 1, 1924, and suspended Oct. 17 of that year.

PLANS NEW PAPER MILL

The plant of the Tumwater brewery Olympia, Wash., has been taken over by T. Osmund, for 24 years connected with the Hawley Pulp and Paper Company, Oregon City, Ore., and will be converted into a paper mill. About \$400,000 will be spent in alterations.

NEWSPAPER FINANCING

Primarily, our business is the developing of newspaper revenue through greatly increasing Display and Classified advertising by properly prepared plans and promotion.

However, we are also in a position to negotiate the financing or purchase of several good newspaper properties up to the extent of \$5,000,000.00.

All correspondence will be treated in sacred confidence.

Nearly half the Citizens of RICHMOND are gainfully Employed

One out of every 2.15 citizens of Richmond, Va., is actively employed in a gainful occupation.

And they are employed STEADILY.

For Richmond is not subject to deflation and periods of inactivity and the laying off of employees.

This is because Richmond's enterprises are not centered upon the manufacture of any one commodity or type of commodity. Richmond's capital is invested in diversified interests—and seldom, if ever, are they affected simultaneously by the condition of the country at large.

The fact that nearly half the citizens of Richmond are employed gainfully and steadily means that Richmond is a market with a tremendous and permanent buying power. It means that Richmond is a desirable market for the sale of any commodity.

LORAIN JOURNAL FIGHTS UNDERWORLD TO PRESERVE CITY'S PROSPERITY

Its Drive on Vice Supported by Governor—Full-Page Ads Being Used—Economic, Not Moral, Angle Stressed

THE underworld of another city is being cleaned up as a result of the crusading activities of a newspaper.

The *Lorain* (O.) *Journal*, alarmed because an almost unprecedented period of activity on the part of industries of the city had resulted in little or no additional prosperity for stores, real estate dealers, banks and other business establishments, started an investigation to find out why.

It found the town saddled with more than 200 booze, gambling and vice resorts—about one for every 200 of population—which were diverting approximately \$100,000 weekly from legitimate business channels. The newspaper throughout its campaign against the underworld emphasized the economic rather than the moral or social phrases of the situation, pointing out that most of the huge sums consumed in traffic in booze, vice and gambling were taken out of town and that this played a large part in depression of business.

FRANK MALOY

The investigation first started several months ago under the direction of Frank Maloy, editor of the *Journal*, has had the following results in recent weeks:

The *Lorain* police force has been reorganized; the state prohibition department sent special agents into the city in an effort to close big bootleg establishments that defied local authorities; Gov. A. V. Donahey summoned the mayor and chief of police of *Lorain* to the state capital and officially ordered a clean-up; the federal district attorney is preparing to take a hand.

To date city police and state agents have made more than 70 arrests and padlock proceedings have been started against many of the more notorious resorts by the city solicitor.

As a result of the *Journal's* exposé there was a break with the city administration and it was necessary for the governor to step in when city officials failed to act. Following a conference with David Gibson, publisher of the *Journal*, D. F. Williams, business manager, and Maloy, the governor sent his own investigators into the town. They confirmed charges made by the paper. The state executive then, under threat of removal proceedings against the mayor, demanded that the city be cleaned up.

Subsequently, the mayor in a letter to the state prohibition department, admitted the truth of the paper's charges and asked for aid in fighting entrenched bootleg interests.

Not content with forcing a clean-up,

DAVID GIBSON

the *Journal* is going a step further. Taking the attitude that so long as there are enough people willing to patronize underworld resorts, there will be resorts to serve them, it has started publication of a series of full-page advertisements directed against such patronage.

These advertisements do not preach. They appeal to the pocketbook and common sense rather than to morals or virtue.

The first of these ads appeared Sept. 25. It pointed out how, under the law of averages, the patron of a professional gambling house eventually loses because of the percentage that goes to the house regardless of who wins.

In an editorial the *Journal* said that the commercial value of advertising had been fully established, but that its sociological value was an unknown quantity.

"The *Journal* assumes," said the editorial, "that if advertising can cause people to increase their purchases of food, clothing and other merchandise * * * things good for them and the community it can also cause them not to do things that are harmful to themselves and the community."

Gibson believes *Lorain* did not develop its own underworld.

"Our city became the dumping ground for underworld characters driven out of nearby cities of Cleveland and Detroit," he said. "These cities have been trying to get rid of their criminal elements in the last year."

According to D. F. Williams, business manager of the *Journal*, the newspaper's campaign has won the support of the business interests of the town.

"There was some criticism at first," he said, "but this changed to commendation when we disclosed that the underworld was carrying \$5,000,000 a year out of town and robbing the city of prosperity."

In commenting on the *Lorain* clean-up, B. F. McDonald, state prohibition commissioner, said that if newspapers and business men generally would consider the professional gambler and bootlegger from an economic point of view and realize that they are a menace to the prosperity of the community, the fight against these evils would be half won.

The *Journal* is the youngest newspaper in northern Ohio. Established five years ago, it was purchased by Gibson in 1923.

LUBBOCK, TEX., DAILIES ARE CONSOLIDATED

Single Publishing Company Now Operating Journal and Avalanche with Dorrance D. Roderick, President

The two companies publishing the *Lubbock* (Tex.) *Daily Journal*, evening and Sunday, and the *Lubbock Morning Avalanche* were recently consolidated, and the papers are now under one management, the *Avalanche-Journal Publishing Company*.

Dorrance D. Roderick, who has been manager of the *Journal*, is now president and general manager of both publications, while Charles A. Guy, editor of the *Journal*, and James L. Dow, editor of the *Avalanche*, continue in their former positions. The papers are combined in one edition on Sunday mornings under the name of the *Sunday Avalanche-Journal*. Two weekly publications have been merged as the *Weekly Avalanche-Journal*.

The merger unites the only two daily newspapers between Amarillo and Sweetwater. Stockholders in the company, all newspaper men, in addition to Guy, Roderick and Dow, include Houston Harte, San Angelo, publisher of the *San Angelo Standard* and the *Sweetwater Reporter*; Bernard Hanks, publisher of the *Abilene Morning News* and the *Abilene Reporter*; Dr. J. E. Nunn and J. Lindsay Nunn, both of Amarillo, former publishers of the *Amarillo News and Post*, and now operators of eight weekly newspapers.

At a meeting of the stockholders, D. D. Roderick was elected president of the consolidated companies; Bernard Hanks, vice-president, Charles A. Guy, secretary, J. L. Nunn, treasurer, other directors being Houston Harte and J. L. Dow.

BILLBOARD TAX OPPOSED

K. C. Advertising Club Says Move Dangerous to All Paid Space

Opposition to a proposal of the city council of Kansas City, Mo., to tax bill boards has been voiced by the Advertising Club of Kansas City.

"Taxation of billboards would injure all other forms of advertising, including newspapers, street car display, direct advertising and other forms of publicity," C. E. Griffin, president.

YES SIR! THERE'S A L

The Greatest Newspicture Achievement on Record Was Accomplished by NEA Service When It Scored Country-wide Beats on Three Events in One Week.

FIRST---with Miami Hurricane Pictures!

FIRST---with Sikorsky Plane Disaster!

FIRST---with Dempsey-Tunney Pictures!

A few representative members of "The Happiest Family on Earth," give eloquent testimony on these two pages to results achieved with this triple sockdolager. All of this was made possible by the best trained, the most resourceful and the most loyal staff of men who ever worked together.

BIG AND LITTLE, EAST AND WEST, NORTH AND SOUTH

NEXT DOOR TO IT

Thanks and congratulations on Miami storm pictures—first seen in Haines City.—HAINES CITY (FLA.) HERALD.

Thanks for wonderful service on Miami storm pictures.—SAVANNAH (GA.) PRESS.

The enterprise of NEA made it possible for us to scoop all newspapers north of Atlanta with actual storm photos from Miami.—E. G. Denham, Managing Editor, HENDERSONVILLE (N. C.) TIMES.

Service on Miami pictures is great. Congratulations and thanks.—ASHEVILLE (N. C.) TIMES.

Thanks to NEA, New Era scooped them all on Florida pictures.—HOPKINSVILLE (KY.) NEW ERA.

OUT WEST

First pictures, published in Southern California of the championship fight at Philadelphia, NEA Service breaking all records for speedy picture transmission. — POMONA (CALIF.) PROGRESS.

Congratulations on rush service on fight pictures.—PARSONS (KAS.) REPUBLICAN.

We beat opposition with fight pictures.—VANCOUVER (B. C.) SUN.

Congratulations on fight and storm pictures. They were best ever.—HELENA (MONT.) INDEPENDENT.

First with the fight pictures.—WATERTOWN (S. D.) PUBLIC OPINION.

First fight pictures in the county. Sent by NEA.—AMES (IA.) TRIBUNE.

FIRST IN NEW YORK

Your fight pictures were on street here at two o'clock. Thanks and congratulations.—W. N. Wilkinson, Managing Editor, BUFFALO (N. Y.) TIMES.

Congratulations on splendid service you gave us on Florida hurricane and Fonck accident. Five hours ahead with Dempsey fight pictures.—H. L. Rennick, Managing Editor, MIDDLETOWN (N. Y.) TIMES-PRESS.

As was the case with the Florida hurricane, the Springfield Daily News was enabled to furnish the public the first pictures of the fight through NEA Service. Compliments on excellent service.—Bert A. Teeters, Managing Editor, SPRINGFIELD (O.) NEWS.

First pictures of Dempsey losing title to reach Raleigh were those rushed by NEA.—RALEIGH (N. C.) TIMES.

NEA Service, Inc., 1200

The World's Greatest Newspaper Feature

T IN KNOWING HOW!

A Promise Made and a Promise Kept--and How!

All NEA clients expected to be **FIRST** with the Dempsey-Tunney pictures. They are accustomed to being **FIRST** with all important pictures. The Canton (O.) News was so sure that NEA could not fail that--well, let this box in that paper tell the story:

A SILENT TRIBUTE

It seems like old, old stuff to say "Well done!" but I can't let this brimming news week pass, tired as we are here, to let good old NEA know that we appreciate the superb service--the Florida pictures, the airplane wreck and fire, and last of all, the fight stuff--more than we can tell.

We can just say "Marvelous"--and then grope for words.

How you fellows do it is more than I can understand.

To think that a little sheet like ours, sitting out here remote from the cities, can scoop other papers of much larger circulation, and illustrate the daily sheet far better than they, is just a silent tribute to the splendid character of your service.

NEA certainly has a faculty of tackling the next big job in a bigger, better way than ever before, and if the clients of your service didn't spread themselves gloriously hours ahead of their competitors, it certainly wasn't your fault.

I only wish we had 48 pages in our sheet, instead of 12 or 16, so that I could use every line and every picture--and every comic--that you send. That would be the millennium for me, I guess--but I would be supremely happy. --James A. Murrin, News Editor, FRANKLIN (PA.) NEWS-HERALD.

BIGGEST IN 10 YEARS

Miami pictures biggest beat I have seen NEA put over in 10 years I have handled it. Hearst paper advertised, 'Watch News for first pictures of Miami disaster, now en route by airplane.' Opposition published three editions since we printed pictures, but we are only one to have them so far. --Ralph Roddy, Managing Editor, BALTIMORE POST.

Please accept our congratulations and thanks for the fine way you have been handling spot news mats this week. Through your service we have been able to give our readers the best and speediest pictures obtainable on the Miami disaster, the crashing of the long-distance plane and the Tunney-Dempsey fight. The last mentioned photos climaxed a great week. --Gilbert Jarvis, City Editor, LITTLE FALLS (MINN.) TRANSCRIPT.

This kind of service packs a champion's wallop. --Tom H. Keene, General Manager, ELKHART (IND.) TRUTH.

A full week, but NEA kept us on top of the news with the Fonck, Florida and fight pictures. The **FIRST** pictures. --MANISTEE (MICH.) NEWS-ADVOCATE.

Keeping Promise

In Thursday night's prize fight extras the Canton Daily News made an unusual promise. It announced that it would present the first pictures of the big fight to its readers on Friday morning, just 12 hours after the bout.

THAT PROMISE WAS KEPT

The Daily News presented a half page of action pictures Friday morning, three hours before any other Canton paper presented them. This was made possible by the superior facilities at command of THE NEWS. The pictures, rushed from Philadelphia to NEA Service in Cleveland by airplane, were brought to Canton by two special messengers.

This is the first time known that a newspaper has announced a day in advance that it was going to "scoop" its opposition, tell what the "scoop" was to be, and make good.

Incidentally, it was the second big picture "scoop" of the week, the News having presented first pictures of the Florida hurricane.

RECORD IN OKLAHOMA

Less than 24 hours after Tunney won in Philadelphia, photographs of the fight were published in the News, establishing a new record of transmission of pictures from the east to Oklahoma City. It used to require three days. Now, thanks to science, to the air mail and to the enterprise of NEA Service that time has been cut to less than one day. --OKLAHOMA NEWS.

THIRD BEAT

Today I congratulated the service on the Florida and Fonck pictures. Tonight the Dempsey ringside illustrations came in and I was delighted. That makes the third beat on the opposition this week on pictures, and I cannot too warmly commend the enterprise of NEA. --Lloyd Robertson, Managing Editor, PADUCAH (KY.) NEWS-DEMOCRAT.

We wish to add our praise to that you no doubt have already received over your Florida hurricane and Dempsey-Tunney fight picture service. We not only scored a beat over our local paper, but beat strong opposition from outside papers. --Geo. W. Crittenger, ANDERSON (IND.) BULLETIN.

ONLY A PONY CLIENT

The protection you have given us on the Trans-Atlantic airplane disaster, the Florida hurricane and the Dempsey-Tunney fight was great. We are only a Pony client, but you gave us the same kind of service you gave the big city papers and enabled us to scoop all opposition in our field, and that is going some. Once more, thanks for your service and assurance that we appreciate being a member of your big family. --Oldham Paisley, MARION (ILL.) REPUBLICAN.

SPEED AND QUALITY

Thanks for the excellent service on the big fight. We scooped the opposition in two editions. Let me compliment your service on the Florida hurricane pictures. No paper in this neighborhood excelled us either in speed or the quality of the pictures. --Richard Cull, Editorial Director, DAYTON (O.) DAILY NEWS.

THIRD TIME IN WEEK

Fight mats were in our office at 6 this morning. That's service, and it's appreciated. Again, and for the third time this week, I say thanks for the quick service--the Florida hurricane; the Sikorsky wreck and the fight. --Earl W. Hamer, Editor, WABASH (IND.) PLAIN DEALER.

FULL PAGE

Fine service on Dempsey-Tunney fight pictures. We were able to make up a full page, as enclosed. We are proud to be served by NEA. --F. G. Hickey, Managing Editor, CHESTER (PA.) TIMES.

IN SPITE OF MISHAPS

I want to thank you and the NEA staff for giving us a good beat on the Miami pictures in spite of all your mishaps. Also first fight pictures to arrive in Cincinnati. --Elmer P. Fries, Editor, THE CINCINNATI (O.) POST.

First pictures of Miami appeared in The News in the home edition Tuesday. Two full pages were run. Neither of the other afternoon papers had pictures until hours later. --WASHINGTON (D. C.) DAILY NEWS.

We beat opposition by five hours Dempsey-Tunney fight pictures. Congratulations. --L. E. Judd, Editor, AKRON (O.) TIMES-PRESS.

Today's wonderful photos of last night's fight in our opinion easily outstrip anything NEA has heretofore done and once again you have demonstrated why NEA leads in its field. In the words of Major Hoople, "Egad, folks, but you're great!" --S. R. Banyon, Editor, BENTON HARBOR (MICH.) NEWS-PALLADIUM.

RADIO PROGRAMS

AN increasing number of newspapers are eliminating from radio broadcast programs the names of advertised merchandise, disguised as entertainment features. There is no uniform action over the country, but in one city in the Middle West this week all of the newspapers, we understand, agreed to cut from programs names that smack of publicity.

A rule of editing, almost as old as the newspaper, governs this situation: Advertising belongs in the advertising columns, not the news columns. No amount of artful disguising can alter this principle. "Maxwell House" is intended to mean a branded coffee, for sale at all grocery stores, whether it appears in an advertisement stating that fact, or in editorial columns announcing that the "Maxwell House Orchestra" will be on the air at 8:30 p. m. "Eveready" is intended to mean a brand of merchandise for sale at a profit, not primarily a public entertainment.

When newspaper editors publish these names as "news" they fall for free publicity. It is but an advertising trick. Radio listeners may have become accustomed to identifying program material by these names, but this does not justify the theory that the newspaper is giving "news service" when it publishes these names. If the entertainment is labelled "Advertising music" or "Dempsey-Tunney prize fight" or just plain "Advertising," as the editor may elect to identify the items, the newspaper has done enough, assuming that the editor wishes to give any notice.

What are the facts in this radio publicity case? Broadcasting was established to give the public a motive for buying radio sets and maintaining them. Without broadcasting every set becomes useless junk. But the interests that profit from the manufacture and sale of this merchandise have been unwilling to bear the expense of furnishing entertainment and have sought to sell "space on the air" to advertisers. Not only do they propose to give publicity to brand names on the air, but also in the columns of newspapers printing their programs. To enforce the contract one broadcaster copyrights his program and threatens newspaper editors who change them. So, in reality, when a newspaper prints the name of an advertised article in its news columns its editor may be sure that the advertiser expects to pay for that agate line, since it is a part of the broadcaster's service to him. Radio gets the money and the newspaper gets the very doubtful satisfaction of having told its readers that some band named for some brand of merchandise is to play at a certain hour.

It is up to those who profit from radio to supply entertainment. In England radio sets are licensed and from fees thus collected entertainment is supplied. This may be a good or bad plan, but it is better than leaning on the newspaper for a support that so obviously should not be given. Some radio genius may supply a better method. Our own notion is that those who profit from the manufacture and sale of radio sets should tax themselves in proportion to their profits. If they are disorganized, let them organize! If they pass the tax along to the public in the price of what they sell it would be the usual thing.

The question whether a newspaper should omit advertised names from radio programs is perhaps best answered by another question: Mr. Editor, if a local retail merchant should hire a brass band, name it for himself, cause it to perform daily at his store to draw a crowd would the program be news?

Strictly speaking, radio programs in advance of the performance do not belong in the news columns, except as they may be extraordinary and be so judged by editors. There is just as much reason for printing advance programs of every local entertainment as "news." It is wholly inconsistent that radio programs should ride free in newspapers that make local theatres, movie houses, concerts, circuses and so forth draw their crowds by paid advertising. However, it was the newspaper that invited radio into the news columns and it would be a severe blow to a new industry to throw them out. But radio should not abuse the privilege.

When the true spirit of free press finally succeeds in taking the stronghold of secret diplomacy one of the great steps in history will have been taken to guarantee justice and its concomitant—peace.

Do good, O Lord, unto those that be good,
and to them that are upright in their hearts.—
Psalms; CXXV, 4.

EMPLOYEES AS OWNERS

JOURNALISM will look with keen favor on the announcement that Frank A. Munsey's two great metropolitan newspapers, *New York Sun* and *New York Telegram*, have passed to the control of William T. Dewart, who will presently develop a mutualization plan through which employees of the newspapers may share in the profits. Mr. Munsey allowed five years for the conversion of his properties into cash, and Mr. Dewart has accomplished this in respect to the newspapers in nine months, the sales price approximating \$13,000,000, including the *Mohican Company*. It is a feat that is but another proof of the singular ability of the man whom Mr. Munsey chose to carry on his policies and effect his desires.

The sale of these newspapers to employees makes the year 1926 historic in American journalism as, since March, announcements have been made that five leading publishers of the nation had been succeeded in ownership or control after their deaths by men who had assisted as paid workers in the up-building of their journalistic organizations. The majority stock interest in the vast Scripps-Howard organization is owned by employees; Walter A. Strong and associates, with the aid of a group of prominent Chicagoans purchased from the estate of the late Victor F. Lawson, for \$13,671,704.30 the goodwill and assets, less realty, of the *Chicago Daily News*; in July Irwin Kirkwood and associates purchased the *Kansas City Star* for \$11,000,000; and, during the year, George B. Dealey and other employees of the *Dallas News* gained ownership control of that great paper.

The year is also extraordinary for newspaper publisher benefactions to the fine arts, both Mr. Munsey and Col. Nelson having left their entire fortunes for the specific benefit of art as a cultural development of the people of New York and Kansas City. To this interest these two publishers have contributed, from the sale of their newspapers, exclusive of other properties, \$24,000,000, an hitherto unapproached philanthropy in the realm of aesthetic life.

Mr. Dewart has not announced his mutualization plan, for the simple reason, frankly stated, that it has not been perfected. However, he makes it clear that, as Mr. Munsey's friend, he proposes as best he can to effect the late publisher's wish to see his properties perpetuated by those whom Mr. Munsey had selected as employees. How deep this mutualization will be carried in the organizations therefore remains to be seen.

From the time that Mr. Munsey died **EDITOR & PUBLISHER** has expressed the belief and hope that the able men who surrounded him in life and did so much to make his newspapers a high credit to American journalism would succeed to ownership, rather than that the newspaper should pass to other interests. It seems to us to be an instance of simple justice to the individuals concerned, and while there are many other able newspaper men who might purchase the properties and carry them to even higher success, the Munsey organization deserves the honor and profit through sheer force of achievement.

William Randolph Hearst, in complaining of the summary discharge of an old employe by an ambitious newcomer, once said that an employe established a certain equity in his employer's business which deserves to be considered as a positive right. It is something for ruthless executives to consider. However, journalistic martinets are fast losing their power, as executives who are leaders demonstrate superior results.

ABETTING LOTTERY

YEARS ago the New York news manager of one of the press associations noticed that a client evening newspaper in a New England manufacturing city was making unusual requests for certain obscure Wall Street statistics. He wanted New York bank clearances, total stock and bond sales and other figures from the New York Stock Exchange which were so technical that their news value was in doubt. But this editor persisted, finally demanding that these figures be "flushed" on his wire ahead of all other interests in the world, including the health and safety of the President of the United States.

Investigation revealed that the ignorant factory workers of that drab city were gambling on these numbers and that the press association was being used by an unscrupulous editor who was lending his newspaper to a corrupt gamblers' ring, all in the name of "circulation." That was the first time this writer learned of a newspaper conducting a "number lottery."

This week the *New York World* opened a crusade against a similar lottery which for five years has been spreading demoralization through the negro section of Harlem, with pernicious social results. It is said that the daily turnover in this lottery in New York is \$100,000. It is fraudulent, of course, and has impoverished many families and keeps the ignorant players in a constant state of futile agitation. Betting is on numbers, or combinations of numbers, in Stock Exchange Clearing House statistics as published in the newspapers.

About a year ago the *Survey* exposed this evil condition and pointed out that some of the New York evening newspapers were catering to the frenzied negro gamblers by printing the statistics among the sport items on first pages of late editions.

Every circulation manager in New York knows exactly how many thousand extra circulation may be had by delivery of the edition carrying this "financial news" to the heart of the negro section ten minutes ahead of competitors. When they are labeled "official" the bets may be settled. The *World's* exposé will now explain to thousands of mystified persons why sporting editions of certain evening newspapers have regularly featured this bit of "financial news" which, by the way, is not very important even to bankers or brokers, and certainly not relevant to sports, unless the figures are the basis of a gambling game.

There can be no apology for editorship that consciously caters to a cheap lottery. That form of gambling is a dire evil which the people of this country have outlawed for more than a quarter of a century. Circulation gained by such methods is of doubtful value.

"What most of these Dictators seem to dictate are special cables to the London morning newspapers," says Punch, wholly ignoring the fact that second rights on these dispatches are eagerly purchased by newspapers here.

QUEER ADVERTISING

DOUBTLESS the jokesmiths will amply deal with the international complication certain to arise from the action of the British government in offering to the highest bidder England's letter cancellation advertising privilege. The government proposes, as a means of gaining revenue, to sell the right to print advertising slogans on mail passing through the post office. The advertiser need only furnish dies to be inserted in the cancelling machines which now print "British Made Goods Are Best" on every piece of mail matter that not only circulates in Great Britain but in all other nations. The dies may be changed as often as the advertiser desires. He may buy "circulation" in England for one slogan and "circulation" through United States mails for another.

The British example of printing government slogans on mail matter has already been followed by several other small nations, all members of the International Postal Union. While the propriety of the enterprise has often been questioned, the question has not yet reached the channels of diplomacy. In Washington it is believed that the State Department would hesitate long before entering a protest, but when commodity advertising begins to show on overseas mail we imagine that the columnists will open fire with their heaviest spoofing guns.

PERSONAL

WILLIAM PRESTON BEAZELL, assistant managing editor of the *New York World*, has returned from a month's vacation spent at Asheville, N. C. William F. Wiley, general manager of the *Cincinnati Enquirer*, has returned with his family from his vacation at Harbor, Maine.

C. Howard Thomson, nephew of David C. Thomson, Dundee, Scotland publisher, and an associate editor of the *Dundee Saturday Post*, visited the Curtis Publishing Company's plant, Philadelphia, Sept. 27. With Mr. Thomson was W. F. Anderson, associate editor of the *Dundee Courier*, also a Thomson publication. They arrived in New York last week to make a tour of the United States as far west as Chicago, visiting newspaper and magazine plants.

Charles F. Scott, editor and publisher of the *Iola (Kan.) Daily Register*, who was forced to quit all editorial work on account of his health several months ago, has returned to his desk. Mr. Scott spent the summer in Colorado and is completely recovered.

Charles H. Spilman, editor and part owner of the *Edwardsville (Ill.) Intelligencer* and postmaster at Edwardsville, Ill., has been elected secretary general of the Supreme Council of the Scottish Rite, and will have headquarters at Boston. The election is for life.

Royal W. Weiler, president of the *Allentown (Pa.) Call*, was crowned a thirty-third degree Mason at the recent sessions of the Supreme Council, Ancient Accepted Scottish Rite, held at Buffalo, N. Y. Weiler is a member of the board of directors of the International Circulation Managers Association.

Herman Roe, publisher of the *Northfield (Minn.) News* and president of the National Editorial Association, has returned from a six weeks' trip to the Pacific coast.

Swan J. Turnblad of Minneapolis, editor and publisher of the *Svenska Amerikanska Posten* and one of the best known Swedish publishers and authors in America, has just been decorated with the Order of the North Star by the King of Sweden.

Roy C. Irvine, publisher of the *La Presse (Wash.) Clipper*, has been appointed game commissioner of Whitman county.

Al Bowen, editor of the *Huntington Park (Cal.) Signal*, has returned from his visit to Hawaii.

IN THE BUSINESS OFFICE

WILLIAM N. VETROMILE, formerly in the advertising department of the *Worcester (Mass.) Telegram-Gazette*, returned to newspaper work after a year's illness from injuries received during the World War. He has joined the advertising department of the *Boston Sunday Advertiser*.

T. Hopkins, business manager of the *Vancouver Evening Columbian*, who recently underwent a major operation, is convalescing.

IN THE EDITORIAL ROOMS

JOHN H. GAVIN, sports editor of the *New York World*, recently appointed city commissioner of revenue and finance in Jersey City, N. J., will retire from newspaper work at the close of the present baseball season. Mr. Gavin has been connected with the *World* for 28 years. For several years he was city editor, before taking over the sports desk. His successor as sports editor has not yet been named.

Mer Dressman, former movie critic of the *Cincinnati Post*, has been named editor.

Sam Feldman, police reporter of the *Chicago Tribune*, has passed the bar examination and entered the practice of law. Feldman has been on the *Tribune* for two years.

Edward White, society editor, *New*

York Herald Tribune, has returned from a three weeks' trip through the Adirondack and White Mountains.

A. S. Koonce, former Texas and Kansas newspaperman, has joined the *Des Moines (Ia.) Register* staff.

John Pickering, formerly school board reporter for the *Chicago Tribune*, has left the *Tribune* to go to Paris. He has been succeeded by Levering Cartwright.

James Greene has been promoted from reporter to managing editor of the *Imperial Valley (Cal.) Press*.

Milton O'Connell, formerly of the *New York Herald Tribune* staff, is doing publicity for the San Carlo Opera Company in New York.

Perry Olds, formerly head of the exchange department of the *Milwaukee Journal*, has been appointed a member of the editorial staff. Dale Wilson, formerly at the copy desk, succeeds Olds as head of the exchange department.

Charles Parker, hospital reporter for the *Chicago Tribune*, was graduated in August from the Rush Medical College of Medicine and Surgery and is serving as an interne at the Presbyterian hospital. He has been with the *Tribune* for five years.

Frank Hicks, managing editor of the *Logansport (Ind.) Press*, has resigned to join the copy desk of the *Lima (O.) Daily News*. For four years prior to joining the *Press* he was on the *Minneapolis Star* staff.

John and Genevieve Forbes Herrick of the editorial department of the *Chicago Tribune* have returned from a month's vacation in Michigan.

J. Kenneth Jones of the *New York Herald Tribune* staff, who made a round trip voyage to France as a seaman, has returned to work.

A son, Francis Arthur Flynn, was born Sept. 7 to Mr. and Mrs. F. M. Flynn at Tokio, Japan. Flynn, who was graduated in 1924 from the Missouri School of Journalism, is on the staff of the *Japan Advertiser*.

Malcolm L. Stephenson has joined the *Jersey City Jersey Journal* staff. He came from the *Hartford (Conn.) Courant*.

Everett S. Irwin, assistant editor of the *Worcester (Mass.) Telegram-Gazette*, is sailing Oct. 9 for England with a Worcester soccer team which will play a team representing Worcester, England, in the latter city this fall for an international championship.

James Davies, music critic for the *Minneapolis Tribune*, reported the Marion Talley concert at Kansas City, Sept. 20, for his paper.

E. I. Collins has rejoined the rewrite staff of the *Jersey City Jersey Journal* after recovering from a physical breakdown.

John J. O'Brien, police reporter, *Worcester (Mass.) Gazette*, has been

FOLKS WORTH KNOWING

SERVING as city editor of a modern daily newspaper during the day, and as a justice of the peace in Municipal Courts at nights every third week for more than 10 years, Justice August T. Brust, 36, Frederick, Md., has established for himself an unusual record for public service.

He joined the reportorial staff of the *Frederick News* in Sept. 1913, and almost immediately began a career marked by public favor seldom afforded a newspaper man. Two months later he was elected a member of the Maryland Legislature, and in February, 1916, soon after the expiration of his term, was appointed one of three justices of the peace for Frederick city. He has served continuously since then under three state administrations.

Offenses covering the entire category of misdemeanors have been represented in cases reaching him for hearing. Twice he has sentenced men to the whipping post for wife-beating. His sentences for "automobile drunks" have ranged from fines of \$100 to \$200 to six months in jail. One "repeater" was given two years' imprisonment.

Throughout his term he estimates a conservative weekly average of 30 cases.

He has found neighborhood quarrels, originating in "back yard fence" discussions, the most trying to handle. Hundreds have come to Municipal Court in hope of finding a legal remedy for quarrels. But he has confined himself entirely to disposing of cases, not in dispensing advice.

The thirteen years in the newspaper field have brought him added responsibilities. He has passed through all editorial departments of the *News*, one of two daily newspapers published by the *News-Post*, to the city editorship, which post he has filled for about six years. Twice each week he supervises the publication of the *Semi-Weekly News*.

made editor of *The Sentry*, a new World War Veteran's magazine to be printed in Worcester.

Harold Coates, Sunday editor of the *Cincinnati Commercial Tribune*, has been made an assistant dramatic critic, in addition to his other duties.

150 Nassau St., New York City

How Central Press Covered the Fight

The manner in which the Central Press Association covered the heavyweight championship fight at Philadelphia is an admirable example of up-to-the-minute journalism.

Pictures of the fight were wired direct to Chicago from Philadelphia, the first one reaching our Chicago representative a few minutes after the fight was over. We had previously made arrangements with the Chicago office of the Western Newspaper Union to make cuts and mats of the fight pictures. They gave us splendid service, and shortly after midnight fight mats for all our clients in the west and middle west were in the Chicago postoffice.

Eastern and southern clients were taken care of by our New York office. Pictures of the fight were rushed from Philadelphia to New York, cuts made and mats mailed out from New York not long after midnight.

Pictures which were wired to Chicago were rushed to Cleveland by fast train, arriving at 7:35 in the morning. Clients in Cleveland and within a radius of 75 miles received their fight pictures in time for use the same afternoon.

Editor and Manager

Deal with this group as with one publication, if you wish. Uniform marketing help throughout the state, under our "Iowa plan."

Good news for space buyers

Now cover all Iowa with daily newspapers with one order, one plate, one billing

The 28 leading Iowa daily newspapers comprising this association have combined circulation of 571,151.

The number of families in Iowa is 550,000.

There is your answer to the question of "How can I best reach the buyers of Iowa?"

Are we safe in assuming that you know the value of this Iowa Market? It is rather generally known that Iowa people rank far above the nation's average, as prospects for life's luxuries as well as necessities.

In taxable wealth per capita, Iowa is 51% above the nation at large.

Relatively high in education too. The percentage of Iowa people 18 years of age who have finished a four year high school

course is *twice* as high as in the United States as a whole.

Lowest of all the states in percentage of illiteracy. Iowa has more telephones in proportion to population than any other state.

More automobiles on farms than any other state. There is now one car for every 3.7 persons in Iowa.

And a point worth remembering is the fact that practically *every Iowa family* reads the local daily newspaper *every day*.

Uniform merchandising co-operation by all of these newspapers gives you a wonderful send-off with jobbers and dealers.

Any further information gladly sent upon request.

IOWA — WHERE EVERY FAMILY READS A DAILY NEWSPAPER

(Continued from page 30)

Glenn Babb, recently appointed Peking correspondent of the Association Press succeeding Walter Whiffen, spent ten days in Tokyo early in September while en route from his last assignment in San Francisco to his new post in China.

Edward Q. Anderson has been appointed Olympia, Wash., correspondent for the Associated Press, succeeding Clement H. Hayes, who is taking a leave of absence. Anderson for the past five months has been with the *Morning Olympian* and *Evening Recorder* as day city editor.

Stanley Day, of the Detroit bureau of the Kent Press Service, has been promoted to St. Louis correspondent succeeding David Resnick.

NEW PLANTS AND EQUIPMENT

PLANT of the *Bell* (Cal.) *Herald* and the *Maywood* (Cal.) *Review* has been moved to 519 Baker avenue. The publishers, Joseph A. Fleitzer and S. E. De Rackin announce that plans are being made for changing the weekly into a daily in the near future.

New plant of the *Washburn* (N. D.) *Leader* is rapidly nearing completion. Fred F. Jeffries is editor and publisher.

Harry Hoffman, owner and editor of the *Oxford* (Kan.) *News*, has let the contract for a new home for his paper. The building will be of brick and devoted entirely to the newspaper work.

Extensive alterations, repairs and additions have been begun on the municipal building at Ashland, Va., and, when these improvements are completed the structure will be occupied by the *Hanover Herald-Progress*. Modern presses will be installed.

Another 24-cylinder multi-color Hoe press has been delivered to the Hearst Publications in New York City.

SCHOOLS

ACOURSE in news writing is being offered this year at Northland College at Ashland, Wis., under the direction of Mrs. Lucy Rogers Hawkins. Mrs. Hawkins has been secretary to the president and directs the publicity at Northland. She studied journalism at the University of Wisconsin and has had several years of experience in Madison, Detroit and Chicago.

Two hundred and fifty-two students in the Missouri School of Journalism this semester make up the record enrollment in the history of the school. One hundred and nine students from other divisions of the university are also enrolled in journalism courses.

More than 75 students registered in the Lee Memorial School of Journalism, Washington and Lee University, Lexington, Va., at the opening of its second year since its revival. The Lee School of Journalism was begun in 1869 by General Robert E. Lee, then president of Washington and Lee University, and was re-established last year under the supervision of Professor Roscoe B. Ellard, formerly head of the Journalism School at Beloit College, Beloit, Wis.

Expansion of the *Oklahoma Daily*, student newspaper of the school of journalism, University of Oklahoma, Norman, was announced with the resumption of publication at the beginning of the fall term. The paper has been elected to membership in the Associated Press and will carry daily news dispatches of state and national affairs. A telephone pony from the Oklahoma City A. P. bureau will be used.

First annual convention of "Quill and Scroll," the national high school journalists' organization will be held at the University of Iowa Oct. 15, and expectations are that representatives of 60 chapters will attend. George H. Gallup of the University School of Journalism, sponsor of the association and its secretary-treasurer, has announced that awards for news writing, editorial work, technology, copy reading, headline writing and advertising copy work, will be

announced at the meeting. The delegates will edit and publish one edition of the *Daily Iowan*, the university daily. A feature of the meeting will be the "covering" of the "mysterious crime" under direction of the psychological department of the university.

Two new instructors have been added to the staff of the Joseph Medill School of Journalism at Northwestern University, for this year. Prof. Theodore B. Hinkley, editor of the magazine, *Drama*, and associate professor of playwriting at Northwestern, will teach the course in dramatic criticism, and Harper Leach of the *Chicago Tribune* will be supervisor of the newspaper laboratory.

ASSOCIATIONS

B. J. WILLIAMS, director of sales of the Paraffine Companies, Inc., spoke before the ADVERTISING CLUB of St. Louis on Sept. 28, on "Some Fundamentals in Sales Management."

C. K. Woodbridge, president of the International Advertising Association was the speaker at the opening meeting of the 1926-1927 season of the WOMEN'S ADVERTISING CLUB of PROVIDENCE, R. I., at the Biltmore Hotel in that city Monday night.

H. P. Everest, publisher of the *Kirkland* (Wash.) *Journal*, has been elected president of the King and Kitsap counties group of the WASHINGTON PRESS ASSOCIATION. He succeeds Gunnar Lund, publisher of the *Washington Posten*.

The first autumn meeting of the WOMEN'S ADVERTISING CLUB OF PITTSBURGH was held at the club house of the Congress of Women's Clubs. Dinner was followed by the business meeting when the new officers were installed. They are: President, Miss Betty Bell; vice-president, Miss Violet Symons; corresponding secretary, Miss Doris Mirrieles; recording secretary, Miss Mary Moore, and treasurer, Mrs. Frances Howell.

H. T. Bussman, president of the Bussman Manufacturing Company, has been nominated for president of the ADVERTISING CLUB OF ST. LOUIS. Other officers nominated follow: first vice-president; Fred E. Winsor, General Outdoor Advertising Company; second vice-president, W. J. Johnson, Chappelow Advertising Company; third vice-president, R. M. Wright, advertising manager, Scruggs, Vandervoort & Barney Dry Goods Company; secretary, Hubert Echele, Warwick Typographers, and treasurer, Frank Fuchs, advertising manager, First National Bank. The election will be held at the annual meeting at Hotel Chase, Oct. 12th.

LANCASTER COUNTY PUBLISHERS ASSOCIATION held a dinner at the Stevens House, Lancaster, Pa., recently.

The Texas press will be honored at the pioneer dinner of the STATE FEDERATION OF WOMEN'S CLUBS in Dallas, Nov. 11. George B. Dealey, president of the *Dallas News and Journal*, will speak. During the federation convention, Nov. 8-12,

the press will be tendered a breakfast. With George McQuaid, Dallas, principal speaker, the press and publicity program of the convention will be held Nov. 12. Miss Margie Neal, publisher of the *Carthage East Texas Register* and Texas' first woman state senator-elect, also will speak.

Under the sponsorship of the PORTLAND ADVERTISING CLUB, an advertising club is being formed in Eugene, Ore., the site of the University of Oregon. W. F. G. Thatcher, head of the advertising department of the school of journalism at the university, has cooperated with the business men in forming the club. A large delegation from the Portland Advertising Club went to Eugene on September 24 to participate in the organization meeting.

DEL-MAR-VA PRESS ASSOCIATION, composed of publishers and editors of newspapers in Delaware and the Eastern Shore of Maryland, held its semi-annual meeting last Saturday at the University of Delaware, in Newark, Del. Following the business meeting the members were guests of Dr. Walter Hulihan, president of the University, at a luncheon. During the meeting a memorial was adopted to the late Everett C. Johnson, founder, publisher and editor of the *Newark Post* and also former secretary of State of Delaware.

Members of the NEW ENGLAND NEWSPAPERS ALLIANCE have been invited by William J. Pape, publisher of the *Waterbury* (Conn.) *Republican-American*, to hold their fall meeting in that city Oct. 27. At this time they will inspect the Republican-American's new \$15,000 model electrical home, which has been built in co-operation with the local electrical interests.

FOURTH ESTATE LODGE, A. F. & A. M., composed of Boston newspapermen, recently observed *Christian Science Monitor* Night, when entertainment for the evening was provided by employees of that paper.

FLASHES

"Drinking illicit liquor in high society is quite de rigueur"—Society journal. In some instances, quite de rigor mortis.—*New York American*.

Since securing a divorce a St. Louis man is gradually regaining the use of his voice.—*Florence* (Ala.) *Herald*.

A man who never forgets a face, though he may have seen it but a few thousand times, is Mr. S. Jay Kaufman. Hopping out of a taxicab in Philadelphia with a friend he encountered the writer of this column and, introducing him, said: "Arthur, I want you to meet an old friend and fellow worker, Mr. Ripley, the great cartoonist."—H. I. Phillips in *New York Sun*.

What some people don't know about driving would fill a book—also a hospital.—*Florence* (Ala.) *Herald*.

One wonders if those people, who decry the manner in which the automobile is "undermining the home," would refuse one as a gift.—*Sioux Falls* (S.D.) *Daily Argus-Leader*.

Still, it was kind of Mr. Kipling to put his ill will in verse, where it will not be widely memorized as it might have been in a jazz song.—*Ottumwa* (Ia.) *Daily Courier*.

If you wish to find the writers of stories about "the great open spaces," look in the small, closed and steam-heated spaces of New York City.—*Davenport* (Ia.) *Daily Times*.

The man who claims to be seeking new fields for his genius usually is looking for a place where he isn't so well known.—*Hamlin* (S. D.) *Republican*.

We are now employed by 326 newspaper publishers to handle the entire detail work of supplying checking proofs to their agencies and advertisers—which is another way of saying that 326 newspapers have solved their checking proof problems.

Consolidated Press Association

**More than 78,000
Average Net Paid
Daily and Sunday
Circulation —**

Eighty-five per cent of the total net paid city circulation of The OAKLAND TRIBUNE is delivered directly into the Eastbay homes by carriers. Seventy-seven per cent of the total net paid circulation is city circulation and 90 per cent of the total net paid circulation is local (city and suburban) circulation. With this thorough and unusually responsive newspaper circulation in a steadily growing, prosperous trading belt all OAKLAND TRIBUNE advertisers are practically assured an ever increasing volume of business.

The Home of Radio Station KLX

in Oakland, California

[AND TRADING AREA]

THERE ARE

107,578 AUTOMOBILES

184 AUTOMOBILE DEALERS

41 AUTOMOTIVE FACTORIES

AND—

10,680 NEW CARS WERE SOLD AND REGISTERED DURING THE FIRST SIX MONTHS OF 1926.

Oakland, California, (and trading area), is surely the automotive center of the Pacific Coast and there are good and sufficient reasons why this is so—

Climate is peculiarly adapted to all-year-round touring—

Roads are excellent, numerous and picturesque—

And the people of these communities demand and are financially able to enjoy recreation of the better sort—

The gateway is open for varied automotive selling appeals and through the advertising columns of THE OAKLAND TRIBUNE the automotive and automotive accessory manufacturer enters a market rich with prospective consumers,

EDITING A CHINESE PAPER AN "EXTRA- HAZARDOUS" OCCUPATION

Two Editors Shot Recently by Military Authorities — Native
Press Subsidized by Political Aspirants—
120 "News Agencies"

By RANDALL GOULD
Peking Manager, United Press

NEWSPAPER editing in Peking comes under the general heading of "extra-hazardous occupations" and under current wartime conditions the casualties among editors and papers alike run into figures which compare well with those of the armies.

Yet a hasty survey of the Peking field shows that there are today approximately 60 Chinese newspapers and 120 news agencies. Such a survey must needs be hasty, for births and deaths among these institutions occur faster than anyone can record. As to the number of newspapermen in Peking—that is a figure which nobody on earth can compile. Being a newspaperman here is at once the easiest and the hardest job on earth; easy, because the papers appear to accept and print anything, and hard, because to be known as a Chinese newspaperman is to court imprisonment or death at the hands of any petty military leader who takes a dislike to one. Therefore a large number of contributors to Peking papers are not even on the payroll, and their activities are secret.

It will be gathered from the foregoing that Peking is an abnormal city from a journalistic standpoint. Quite right; Peking is a city of intrigue, graft and politics rivaling anything elsewhere in either Orient or Occident, and practically the entire vernacular press is given over to the work of furthering somebody's cause and feathering somebody's nest. Though the Peking population is close to a million, a large number of the so-called citizens are illiterate coolies who can neither read nor afford a purchasing public for possible advertisers. Since Peking has few industries which might advertise in any event, the advertising columns are chiefly filled with the praises of patent medicines, cigarettes, and a great deal of other matter which, if offered to the advertising manager of an American paper, would cause that worthy to fall on the floor in a swoon.

With a small reading public and a great many newspapers in existence, circulations cannot be large. The Catholic-owned *Yi Shih Pao*, the *Shun Tien Shih Pao*, the *Chung Mei Wan Pao*, and one or two other papers manage to keep in the public eye to a certain extent in spite of military and political fluctuations, but it is doubtful if any Peking paper can today come within hailing distance of 20,000 circulation; at present the maximum circulation probably is closer to 10,000, and only one or two are anywhere around that; most of the papers print a few hundred copies, and many must print only enough to show their "backers" that they still exist.

This brings up the question of subsidy. In Peking, subsidy is everything. Without a subsidy practically no paper can exist, and some ingenious journals manage to obtain subsidies from several sources simultaneously. It is not expensive to start a paper here, since the vernacular press is about where the American press was prior to the Civil War, and every time some upstart General or political aspirant manages to force his head out of the ruck, there is sure to be a bright young Chinese lad with the proverbial "shirt-tail full of type" ready to start a newspaper chiefly devoted to acclaiming its patron as the Man on Horseback who has come to drag stricken China up to her rightful place in the front row of the family of nations.

To start a news agency is an even cheaper proposition, since all that is required for that is a writing bush, an ink block and stone, enough paper to distribute a daily service to the various newspapers, and the fertile imagination with

which all Chinese newspapermen seem endowed. Since the papers are willing to print anything, there is not much difficulty in showing results to the "backer."

Under these conditions, the quality of newspaper output may readily be imagined. On second thought, it can't be. One must live in Peking a while and enjoy the pleasure of daily translation from the vernacular press fully to savor the amount of filth, billingsgate, and plain and fancy lying which may be done in print. Anything and everything is put into the paper. Apparently no effort is ever made to "check up" on a piece of alleged news. The only governing factor is the editor's sense of discretion, which appears to function in direct ratio to the probabilities of personal danger.

Closures of papers by the military or police are frequent. Occasionally a mob gets together and wrecks a paper, but this is much less frequent. Most frequent of all is the kidnapping or theoretically legal arrest of an editor by personal enemies. Several months ago an editor of rather radical tinge was taken out and shot by the military; there was something of an uproar, but nothing was done. Now the next logical step has occurred. General Chang Tsungchang of Shantung province, sojourning here while fighting the Nationalists, caused a perfectly harmless and non-radical editor whom he disliked to be shot as unceremoniously as was the radical. Again comes the uproar, and again there is lack of action. When law has been suspended as completely as it now has in North China, the matter of a murdered editor or two cannot greatly trouble the public. So cautious have the other editors now become that they delayed, for 24 hours, publication of a resolution passed by an organization of Japanese journalists here condemning the shooting.

With Chinese papers founded on such a wholly unwholesome basis, there is little attempt at competition. The news which the editors want is the news which will please their subsidizers—that is local and political news.

There is other news available. United Press news from abroad is translated into Chinese and distributed, and because the United Press makes an effort to bring in news of special interest to China, this news is often prominently displayed. Senator Borah's utterances on behalf of a square deal for China, cabled to Peking, got excellent "play." But the run of the foreign news is little regarded here, though provided in abundance. Reuter distributes a foreign service in Peking and there is a considerable distribution of governmental propaganda brought in by radio, but the papers care so little for such material that collection of service charges is practically impossible in most cases.

Foreign residents of Peking receive a good selection of cabled news through the media of the *Peking Leader*, the *North China Standard* and the *People's Tribune*, all published in English, and *Le Journal de Peking*, published in French. The *Peking Leader* is foreign controlled, edited by Grover Clark, an American, and makes an honest effort toward giving fair news and constructive comment in the midst of the Peking political turmoil. The *North China Standard* is Japanese controlled, and the *People's Tribune* is a Nationalist Chinese-owned organ; both are American in style and well-edited from a news point of view.

WOMAN LEADS DAILY'S TOUR

The wife of Governor Henry Fuqua of Louisiana will lead the *New Orleans Item-Tribune's* Palm-to-Pine tour from the Louisiana city to Winnipeg, Canada.

WHAT'S WHAT IN THE FEATURE FIELD

**Gene Tunney Writes Autobiography for King—Rhyming Bedtime Stories on Market—Motherhood Serial Offered—
New Daily Cartoon**

GENE TUNNEY, new heavyweight champion, has written his autobiography and it is being distributed to newspapers by King Features Syndicate, Inc., New York. Tunney is said to be one of few sporting celebrities who can actually write. "My Life and Ring Career" is the title of the feature.

Carroll Brown, feature writer and artist of the *Cincinnati Enquirer*, has signed a contract to furnish the Thompson Features Service, New York, with a new daily cartoon, with short humorous text.

NEA Service, Inc., has started a new bedtime story written in rhyme by Hal Cochran and called "The Tiny Mites."

The latest biography of Gene Tunney has been written by Ed Van Every for the New York World Syndicate.

Francis J. Tietz is writing a series on aviation for the McClure Newspaper Syndicate, New York.

Miss Sonia Cook, of the McCoy Health Service, Los Angeles, which distributes a daily health column to newspapers, was in New York this week to arrange for opening a New York office.

Mrs. Gertrude Guthrie Treadway, editor of the Home Forum page of the *Cincinnati Enquirer*, has signed with the Thompson Features Service, New York,

for publication of a "novel of motherhood," called "Day Star."

Robert F. Sulkers, creator of "Seketary Hawkins," has resigned as promotion manager of the Cincinnati Enquirer, to devote all his time to his boy story feature, distributed by the Metropolitan Newspaper Service, New York.

"Blaze of Glory" is the title of a new serial novel by Fred McIsaac, New York and Boston newspaper man, to be handled by King Features Syndicate, Inc., New York. It has a college football theme.

Bell Syndicate, Inc., New York, is offering a new photo-strip with serial text called "Private Life of a Flirt." Text is written by Jean McDonough.

Latest from the pen of Winifred Van Duzer, serial writer for King Features Syndicate, Inc., is called "Golden Roads."

Sidney A. Silberman of the National News Service and Mrs. Silberman celebrated their 10th wedding anniversary on Sept. 26 at their Philadelphia residence with a reception. More than 200 guests were present among which were many newspaper publishers from all parts of the country.

The O'Dell Newspaper Service has attained the second serial rights of "They Had to See Paris," by Homer Croy, who wrote "West of the Water Tower."

ADVERTISING AGENCY AFFAIRS

**Harold F. Barber Heads New England A. A. A. Council—McCann
Opens Seattle Office—McGehee Joins Bauerline, Inc.—
Ayer Executives Hold Meeting**

HAROLD F. BARBER, president of the J. W. Barber Advertising Agency of Boston, Mass., was elected chairman of the New England Council of the American Association of Advertising Agencies, which is in annual session at the Boston City Club this week. Mr. Barber has served on the board of governors and as secretary-treasurer for some years. He is also past president of the Advertising Club of Boston. The Barber Agency is one of the oldest in the United States, having been founded in 1866 by the late John W. Barber.

Others elected were: C. H. Bunting of Walter B. Snow and Staff as vice-president; Richard S. Humphrey of the H. B. Humphrey Company as secretary-treasurer; and A. E. Greenleaf of the Greenleaf Advertising Company as member of the executive board from New England.

The H. K. McCann Advertising Agency of New York has opened offices in the new Skinner building in Seattle. Coulter McKeever, who has been with the company for many years, and was formerly an executive in the San Francisco offices, has charge of the new branch.

Harry S. McGehee, formerly of the New York offices of Cecil, Barreto & Cecil, has joined Bauerline, Inc., advertising agency of New Orleans. McGehee was previously connected with the Ferry-Hanly Advertising Company, of New Orleans.

James Davis Woolf, secretary of the J. Walter Thompson Company, New York advertising agency, has written a book on "Writing Advertising," published by the Ronald Press, New York.

Raymond Atwood, manager of the Cleveland office, was elected a vice-presi-

dent and director of the H. K. McCann Company, at a recent meeting of the directors. L. E. Firth, in charge of the Zonite and Beech-Nut accounts, was also elected a director. L. W. Ellis has resigned from the board.

George L. Cooper has joined the staff of the New York office of the Lyddon & Hanford Company, New York advertising agency. He was formerly associated with Best & Company, New York store.

E. T. Tomlinson, Jr., vice-president of Doremus & Co., has returned to New York from a visit to the newly organized San Francisco office of the agency.

W. W. Fry, senior partner of N. W. Ayer & Son, entertained 150 employees of the Philadelphia, New York, Chicago, Boston and San Francisco offices of that agency at his ranch 50 miles north of Binghamton, N. Y., this week.

Ray D. Lillibridge, Inc., New York, has been retained by the Canadian Pacific Railway to handle the advertising for the Chateau Frontenac, Quebec, and other Canadian Pacific hotels.

The Cosmopolitan Advertising Agency, Reading, Pa., has commenced to place newspaper contracts for the following advertisers: Dr. Robert J. Yost Company, Bethlehem, Pa.; Glen-Gery Shale Brick Company, Reading, Pa.; Mosemann Company, Lancaster, Pa.; and P. H. Hildebrand Cigar Company, Reading.

EDITOR INJURED IN CRASH

Harlow Brown, editor of the *Princeton (Ill.) Bureau County Tribune*, may lose his left arm as the result of an auto crash near Rockford, Ill., when he was pinned between two cars. Mrs. Brown was also injured.

They "do it better" with GAS

THOUSANDS of companies, large and small, in widely varied types of business, and located in all parts of the country, know from actual experience that "You can do it better with gas". Some of the nationally-known industrial users of gas are listed below:

Bethlehem Steel Corp., Bethlehem, Pa.
Valentine Varnish Co., New York, N. Y.
International Harvester Co., Chicago, Ill.
Cascade China Co., Portland, Oregon
Loose-Wiles Biscuit Co., Long Island City, N. Y.
General Electric Co., Pittsfield, Mass.,
West Lynn, Mass., Fort Wayne, Ind.,
Schenectady, N. Y.
Armour & Company, Chicago, Ill.
New York Times, New York, N. Y.
Western Pacific R. R., Sacramento, Cal.
Reo Motor Car Co., Flint, Mich.
Textile Chemical Co., Providence, R. I.
Ward Baking Co., Brooklyn, N. Y.
Continental Motor Corp., Detroit, Mich.
Crane Company, Chicago, Ill.
The Great Atlantic & Pacific Tea Co.,
Bellefonte, N. J.

Allis Chalmers Co., Milwaukee, Wis.
Cheek-Neal Coffee Co., Brooklyn, N. Y.
Baltimore Sun, Baltimore, Md.
Edison Lamp Works, Little Ferry, N. J.
Sprague-Warner & Co., Chicago, Ill.
Bausch & Lomb Optical Co., Rochester, N. Y.
Sunbeam Chemical Co., Evansville, Ind.
Kitty Kake Kone, Atlanta, Ga.
Yellow Cab Manufacturing Co.,
Chicago, Ill.
National Biscuit Co., New York, N. Y.
Public Ledger, Philadelphia, Pa.
Los Angeles Press Brick Co., Los Angeles,
Cal.
Morse Drydock Co., Brooklyn, N. Y.
Puritan Pie Co., Denver, Colo.
New Willard Hotel, Washington, D. C.
Bock Bearing Co., Toledo, Ohio

Stewart-Warner Speedometer Corp.,
Chicago, Ill.
Pitcairn Varnish Co., Milwaukee, Wis.
Pusey and Jones, Gloucester, Mass.
New York Carbon Co., Long Island
City, N. Y.
Warner Sugar Refinery Co., Edgewater,
N. J.
Kansas City Star, Kansas City, Mo.
Reynolds Spring Co., Jackson, Mich.
Brooklyn State Hospital, Brooklyn, N. Y.
Call Publishing Co., San Francisco, Cal.
Cribben & Sexton Co., Chicago, Ill.
American Manganese Steel Co., Denver,
Colo.
New Process Gear Co., Syracuse, N. Y.
Oxenburgh Brothers, Brooklyn, N. Y.
Illinois Tool Works, Chicago, Ill.

These companies use gas because it means economy, better production and improved product. Have you investigated gas for your own use? Write today for our interesting book, "Gas — The Ideal Factory Fuel".

American Gas Association
342 Madison Avenue, New York City

**YOU CAN DO IT BETTER WITH
GAS**

WITH THE GENERAL ADVERTISERS

**A. B. Lambert Severs Connection with Lambert Pharmacal Company—
Cranberry Campaign Starts in Newspapers—Postum
Company Buys Tapioca Firm**

ALBERT BOND LAMBERT, has severed connection with the Lambert Pharmacal Company, manufacturers of Listerine, of which he was chairman of the board for many years, and has formed a connection with a new St. Louis corporation, known as the Pasteuring Chemical Company, which was formed to advance the sales of Pasteurine, also an antiseptic which has been manufactured for many years by John T. Milliken & Co. Of the \$50,000 capital stock of the new company, Lambert holds 4,500 shares, D. Briggs, 4,998 shares, J. D. Gillis, president of the Milliken Company, 500 shares, and one share each to J. A. McCarthy and R. L. Hedges. The Lambert family, which formerly owned all of the stock of the Lambert Pharmacal Company, sold their holdings to Eastern brokers last March for cash and stock of the equivalent of \$16,500,000.

Members of the American Lumber Association, Transportation Building, Washington, D. C., are holding conferences in San Francisco and other Pacific Coast cities to raise \$1,000,000 for a national educational campaign.

About \$200,000 will be invested in the annual campaign of the American Cranberry Exchange this year in an advertising campaign, just launched in 200 newspapers throughout the country, to market the cranberry crop of Massachusetts, New Jersey, Wisconsin and Long Island, which this year totals about 700,000 barrels. Women's publication and other media, including twenty-two broadcasting stations, are also being used.

The American Cranberry Exchange is a co-operative farmers' organization, the members of which, it is said, grow 65 per cent. of all the cranberries in the country. A. U. Chaney is the organizer and general manager, and C. M. Chaney secretary-treasurer and sales manager. The account is directed by the Robert M. McMullen Company, 522 Fifth Ave.

The Postum Cereal Company has arranged to buy the property and business of the Minute Tapioca Company, Orange, Mass. The latter firm has been in business 32 years. No change in management or policy is contemplated.

Following inauguration of an advertising campaign, earnings of the Ax Pennsylvania Railroad reached a new high record for August, with total revenues of \$62,303,359, representing an advance of \$2,846,266 over the same month last year.

Paul G. Hoffman, vice-president in charge of sales of the Studebaker Corporation, and Howard Welch, export sales manager, sailed this week on the *Mauretania* to visit the Paris Automobile Show.

Gerard Swope, president of the General Electric Company, is president of the National Electrical Manufacturers' Association, a new organization announced this week, consisting of 270 electrical manufacturers with a gross annual business of \$1,500,000,000. One of the objects of the new association is listed as "to collect and disseminate information of value to its members or to the public."

H. Colin Campbell has resigned as advertising manager of the Portland Cement Association. He has held the post for 10 years, during which time the association's advertising has grown from a small beginning to an account using as many as 5,200 papers in one calendar year.

The San Antonio Chamber of Commerce has allocated \$29,000 to spend on a national advertising campaign for tourists this Winter. Railroads entering

San Antonio are expected to spend another \$30,000 during the campaign.

Jack N. Pitluk, of the Pitluk Agency, San Antonio, has prepared a one-year advertising campaign adopted by directors of the United Merchants of Texas, with its object to encourage trading at home. The copy will be run twice a month in towns where member-merchants operate.

The name of the Wayne Tank and Pump Company, of Fort Wayne, Indiana, has been changed to the Wayne Company.

Permission for the change was granted for the reason that the old name is no longer descriptive of all the products made by the company, which in addition to its extensive gasoline pump and tank line also manufactures Wayne oil burners, water softeners and electric refrigerators for homes and Wayne industrial water softeners.

G. C. WILLINGS TENDERED FAREWELL DINNER

Associates Honor Retiring Vice-President of Intertype Corporation—Presented with Gold Watch, Golf Outfit

A farewell dinner was tendered G. C. Willings, vice president of the Intertype Corporation, by his old associates among the officers and executives of that organization, Tuesday evening in New York. Mr. Willings, retired as vice-president Oct. 1.

G. C. WILLINGS

H. R. Swartz, former president and now chairman of the Board of Directors of Intertype, and president of R. Hoe & Company, paid the following tribute to the retiring executive:

"George C. Willings joined the Intertype organization in its infancy and he has been a most important factor in raising it to its present high position in the industrial world. His intense ambition and sound common sense always gave us the impetus to move forward with extraordinary results.

"Willings not only thought out sensible and practicable plans for developing business, but seized the first possible moment to put them into effect. He did not permit difficulties to hinder him but proceeded to surmount them with surprising promptness, and that is what always gave us new strength and energy."

Among the tokens of esteem received by Mr. Willings from his associates in the Intertype sales offices and factory, were a solid gold cigarette case, a gold watch and a specially selected golfing outfit.

Mr. Willings is retiring from active business life and is returning with his family to Pensacola, Fla.

NEW CALIFORNIA DAILY

R. T. Barrett, who suspended publication of the *Hawthorne* (Cal.) *Daily Ledger* the latter part of July, has started publication of the *Van Nuys Daily Ledger*.

PAPER COMPANY MOVES

The Newspaper and Magazine Paper Corporation on Oct. 1 moved offices to 21 East 40th street, New York City.

Sell Sporting Goods Where People Play

Florida has 1,100 miles of coast line, nearly 3,000 miles of shore line, 2,500 miles of navigable rivers and 30,000 fresh water lakes. Naturally it is a Mecca for all who like fishing, boating and swimming.

In Florida are located the winter training camps of most of the important baseball teams of the country. Here are hundreds of splendid golf courses which are playable all the year. Nearly every city has its parks and playgrounds with facilities for tennis, roque, lawn bowling and every kind of sport.

Florida is, indeed, the world's winter playground, and it is fast being recognized as a summer playground as well. In addition to its year-round population of almost 1,500,000, it has a like number of winter visitors who are attracted by Florida's warm, sunny climate and its recreational advantages, and who leave approximately \$1,000,000,000 each year to pay for their sojourns.

Considering these facts, where can the manufacturer of sporting goods find a better market than Florida? And in Florida what more complete and economical media than the Associated Dailies?

WOMEN IN ADVERTISING AND JOURNALISM

Miss Lillian Schaefer Possesses Invaluable "Little Black Book"—Mrs. Allinson Named Woman's Page Editor of Providence (R. I.) Journal and Bulletin—Domestic Science School Conductor

OFFICIALLY Miss Lillian Schaefer is secretary to John Craig, city editor of the *Daily News*. As a matter of fact, however, she is that and reporter, general information bureau, and counsellor of the younger members of the staff, as well. But as the possessor of a little black book she is invaluable to the paper.

MISS LILLIAN SCHAEFER

In this book are names, addresses and phone numbers, and such additional data as are necessary to identify the persons in the book. As a result, when some one must be reached quickly for a story, in Chicago or out of Chicago, the little black book is pressed into service and is pretty certain to yield up the desired information as to where he can be found. And Miss Schaefer can work faster over the phone than the best reporter.

The reliability of the little black book was demonstrated only recently when three jewelry salesmen were held up on an Illinois Central train and robbed of \$500,000 in diamonds near Champaign, Ill. Miss Schaefer looked in her book and within ten minutes she was talking to the proper authorities in Champaign and getting all of the necessary information for the story, including the steps being taken to capture the bandits.

Supplementing her black book she has voluminous files of her own in which she puts away clippings and bits of information gathered in the course of the day, during office hours or out of office hours. And time after time these files of her own furnish the information necessary to get a story and get it quickly. According to Mr. Craig, Miss Schaefer can be depended on to find any one in record time.

Miss Schaefer, too, knows and can take a story over the phone as well as the most seasoned rewrite man without missing a detail. And Brooks Beitler, news editor of the *Daily News*, is authority for the information that she can also write the story in good style.

Miss Schaefer started out as a switchboard operator with the City News Bureau in Chicago. She served in that capacity for five years, but while on the job she developed her great interest in and knowledge of news and how it is gathered. She left the News Bureau five years ago to go to work as switchboard operator for the *Daily News*, but it was not long before that job was turned over to another young woman and Miss Schaefer was given the position of secretary to the city editor. She has a wide knowledge of people and affairs.

In private life she is Mrs. Walter E. Wright, wife of the publisher of the *Northside News*, a neighborhood paper, and also *Police*, a magazine of police news.

Mrs. Anne C. E. Allinson, former dean of women at Brown University and author of several travel books and magazine articles this week, became woman's page editor of the *Providence (R. I.) Journal and Bulletin*.

The annual food and household appliance exposition of the *Chicago Herald and Examiner* opened Sept. 25, at the Coliseum. Prudence Penny, of the *Herald and Examiner* home economics staff, is conducting a Domestic Science School from 11 a. m. to 1 p. m. daily as part of the show, which also includes music, singing and dancing. Leading manufacturers of food products, house-

hold appliances and furnishings are represented by exhibits.

Miss Antoinette Burns has been appointed to fill a vacancy in the woman's department of the *Milwaukee Journal* caused by the departure of Miss Dorothy John for New York City.

Mildred Jaklon, society editor of the *Chicago Tribune*, has returned from a six weeks' vacation in Europe. Miss Kate Webber, club editor, was in charge of the society column during Miss Jaklon's absence.

Mrs. Clara Caffery Pancoast, for many years society editor of the *San Antonio Express*, has resigned to become society and club editor of the *San Antonio Light*, succeeding Miss Ray Baldus, resigned.

Miss Tess Slesinger is now assisting Ruth Stuyvesant, fashion editor of the *New York Herald Tribune*.

Miss Eva Sullivan, former advertising manager for Myer Seigel & Co., Los Angeles, Cal., has resigned to accept a post in Portland, Ore.

HALL NEW PRESIDENT OF TRI-STATE EDITORS

South Dakota Man Elected at Sioux City Convention—Brown Asks For Stronger Editorial Leadership

Deloss Hall, publisher of the *Tyndall (S. D.) Register* was elected president of the Tri-State Editorial Association at its annual meeting held in Sioux City, Ia., last week. More than 100 editors and publishers from Nebraska, Iowa and South Dakota attended the meeting.

H. N. Wagner, publisher of the *Homer (Neb.) Star* was named vice-president; C. C. Sturgess, publisher of the *Correctionville (Ia.) News*, secretary; and Mrs. Katherine Hunt James, Sioux City, treasurer.

Herman Roe, publisher of the *Northfield (Minn.) News*, president of the National Editorial Association, who was speaker at the banquet discussed the relation and co-operation of the press and the fair associations throughout the country as the "greatest visual educators" of the age. Wright A. Patterson, Chicago, editor-in-chief of the Western Newspaper Union, also discussed scope and influence of the fair in community life mentioning the manner in which the press joined in their success. R. C. Cook, chairman of the Sioux City Chamber of Commerce Committee, welcomed the editors and Miss Mae Hamilton, editor of the *Marcus (Ia.) News* responded. U. S. Senator David Stewart, Sioux City, lately appointed successor to the late A. B. Cummins, as senator from Iowa, spoke briefly.

E. C. Tucker, managing director of the Iowa Press Association assailed the printing of return addresses on government envelopes, and urged members of the association to insist upon action upon the Cummins Bill now pending which would definitely put the government out of "private business."

W. A. Brown, editor of the *Friend (Neb.) Signal* urged the editors to greater community service, declaring that there was "an appalling lack of editorial leadership" in Nebraska, adding that the situation in other states was not much better. He said the claim that a united American press would insure world peace was not an idle one and that a strong country press would contribute great weight to such a movement.

The visiting editors attended the Interstate Fair as guests of the association.

Where the Cost Should Be Figured

The late Lord Northcliffe, whose London DAILY MAIL was a pioneer in the use of the dry mat process, when asked as to the relative cost of wet and dry mats, said:

"When the forms reach the foundry the wet mat is the cheaper but when the editions reach the street the dry mat is incomparably cheaper."

So it is that when the forms reach the foundry the dry mat which costs a few cents less is cheaper than the 20 cent METROPOLITAN DRY MAT. But when the editions reach the street—the point where costs should be figured—the METROPOLITAN is not only the cheapest to use but is more dependable than any other dry mat.

Installations of METROPOLITAN DRY MATS under the supervision of our experts may now be arranged for.

His attention having been called to this series of ads we have been running all summer on

EDITOR & PUBLISHER'S

MARKET GUIDE

the publisher of a nationally circulated MAGAZINE wrote in the other day asking for rates

WHAT DID WE REPLY?

There is but one reply we could give. Here it is:

"We fear that you have an entirely erroneous conception of the purpose of Editor & Publisher's MARKET GUIDE and the uses to which it is put by national advertisers and advertising agencies. And it is because of our conviction that you cannot use our service to advantage, that we must say "No" to your courteous request for rate card and contract blank. "Let us explain: Both the editorial content and the advertising columns of Editor & Publisher's MARKET GUIDE are so thoroughly steeped in the one idea of the DAILY NEWSPAPER as the one logical medium to use in covering

national markets that any announcements of any other kind of media would be distinctly out of place in its columns. The dominant note of the service of which the Market Guide is a part is the function of the DAILY NEWSPAPER in helping the manufacturer to get national distribution for his product. "We will very frankly say that this is the one idea, to the exclusion of all others, upon which our service to the national advertiser and his agency is predicated. In such an atmosphere, and in such a setting, your announcement would be an exotic."

A similar reply was sent, almost in the same mail, to a direct mail printing concern in Philadelphia, a billboard publicity organization in New York, and a street car advertising agency, also in New York, all of whom had asked for rates.

Do you get the significance of this, Mr. Daily Newspaper Publisher?

These concerns had heard of Editor & Publisher's MARKET GUIDE. They recognized its value in reaching the national advertiser and the advertising agency. They knew it was consulted and used by both in planning their publicity. But not being subscribers to EDITOR & PUBLISHER, and not being users of the book themselves, THEY DID NOT KNOW how supremely saturated our service is with THE NEWSPAPER IDEA. But YOU do! And YOU have every reason to take advantage of this opportunity to present your message in an atmosphere so thoroughly impregnated with the daily newspaper idea that neither advertiser nor agency can get away from it. Will you take advantage of it? NOW—before it is too late? The time is growing short. Forms will close in a few weeks. Full particulars on application—with no obligations. Won't you let us talk it over with you?

BUILDING NEWSPAPER CIRCULATION

**Tucson (Ariz.) Daily Star Runs "Happy Days" Column for Shut-Ins—
Carrier Contract Used in Canada—"Screenlines" in Chicago
Tribune's New Contest**

NOW and then an editor stumbles across a circulation holder—if not builder—which he would not trade for any other feature in his paper.

Under the title of "Happy Days" The Tucson (Ariz.) Daily Star is publishing one to two columns daily, and five to ten columns Sundays of letters from "shut-ins" whose only access to the outside world and friends is through the columns of the Star.

It started a year ago.

A reader wrote "I wish the shut-ins (who also are 'shut-outs') could have a wee corner all for themselves, where they could exchange letters—experiences and companionships."

To which the editor replied, "The space is yours. The 'wee corner' may be as lengthy as 20 inches a day."

Response was slow at first, although Theodosia—as she signed herself—became the guiding spirit of the new column, and built up interest in the column by her own letters—charming and interesting, containing personal views of life. Theodosia, a mother of a "shut-in," is known today among more than a hundred contributors to the column, as "the Happy Day mother."

Tucson is the home of many who have come here for their health, to fight tuberculosis; as a result there are many from eastern states who found the long hours of resting in the sunshine a tedious task with only loneliness for companionship.

The Happy Day Column has opened a way for new friendships: Hoosierite finds Hoosierite, Ohioan find Ohioan, etc. Those who are able to leave their homes visit the bedridden. The column has become a clearing house for friendship.

From a stick full of type every day or so the column has grown until one Sunday last month it reached ten columns.

If the column were read by "shut-ins" alone it would be worth the space, the Star believes; but it is read by others, by relatives and friends of "shut-ins" and by those who find diversion in just following the letters. Prose and poetry, short stories, unusual life experiences, contests of one form and another with prizes offered by the paper, have featured the first year of the column until it has taken a definite and needed place in the lives of many Tucsonans.

To round out the first year, the editor is planning a Happy Day Year Book, edited by one of the contributors, which will contain the most interesting contributions to the column during the past twelve months.

As a human interest feature, it cannot be equaled, the Star believes, because it comes from the readers, written by the readers, for the readers. The only rules the editor has insisted on, are that the real names shall accompany all communications, although fictitious names will be used in the paper.

The Canadian Daily Newspapers Association bulletin of this week carries a carrier boys' contract which reads as follows:

.....19....
I,.....agree to carry the News on the route to which I may be assigned, during the pleasure of either party hereto, for the weekly compensation of \$....., payable every week by the News Publishing Company. I also further agree that the compensation for the first two weeks may be withheld until I quit carrying, to be paid me only after teaching my successor the route. In case of neglect or refusal to teach another the route, the amount so withheld to be forfeited to the News Publishing Company. I also further agree to submit to the system of fines and rewards now practiced, in reference to carriers, as well as

any other regulations which may from time to time hereafter be adopted.

THE NEWS PUBLISHING CO.
I hereby ratify, confirm and agree to above agreement.

(Parent or Guardian)

"Screenlines" is the name the Chicago Tribune has given its latest contest, which carries a daily prize of \$100. Scenes from well known motion pictures are run, and readers are invited to contribute a screenline, which must be ten words or less.

"Circulation Guarantee—Virginia subscribers failing to receive paper, call Phone 690, Western Union, and a copy will be sent to address given, immediately."

This is the way Elbridge C. Smith, editor and manager of the Virginia (Minn.) Daily Enterprise, is cutting down "misses" and at the same time reducing the number of calls which usually run—"Stop the paper because I never get it anyway."

The Western Union charges the Enterprise 10 cents for each delivery. The first month the bill was \$30, then \$15 and then \$10. Half of the charges were paid by the paper and half by carrier boys making the errors in delivery.

"By this method no boy is very hard hit and it certainly encourages them to make certain of every delivery," says Mr. Smith.

The Portland (Ore.) Journal has raised its price on the streets from 2 to 3 cents.

The New York Daily Mirror is using billboards to exploit its coverage of the Halls-Mills murder case.

The Spokane (Wash.) Chronicle, has added a junior page called the Chronicle Tilakums which is published every Thursday. The Tilakums page is a regular newspaper in miniature for the pleasure of boys and girls. Besides news the page will have editorials, cartoons, pictures, poetry and short stories. Miss Abbie Tilsley, leader of the Tilakums, will be editor.

The Fall River (Mass.) Globe acted as host to its many newspaper carriers at the Bijou Theater in Fall River, Friday night, Sept. 24.

Two Philadelphia newspapers are conducting campaigns to encourage Sesqui-centennial visitors to visit their plants. The Inquirer and Public Ledger last week carried small ads on page 1 extending an invitation to Sesqui-centennial visitors to inspect the Elverson building, the home of the Inquirer, and the Public Ledger building.

Ralph D. M. Decker, circulation manager of the Rochester (N. Y.) Democrat & Chronicle is in charge of the program of the annual convention of the New York State Circulation Managers Association to be held at the Martinique Hotel, New York City, Oct. 19-20. Charles E. Blewer, Binghamton (N. Y.) Press, is association president, and Alfred W. Cockerill, Utica, (N. Y.) Press, is secretary-treasurer.

Newsboys welfare work is more and more considered a good investment by seeing publishers.

The Baltimore News in the formation of its News Zouaves is the most recent of the country's large newspapers to go into the field extensively.

This snappy organization of 100 boys dressed in their brilliant red and white

Zouave uniforms invariably attract much favorable attention when they parade down Baltimore's streets with drums and bugles sounding.

The Zouaves have 40 snare drums and a bugle section of 16 bugles in addition to the drill corps.

The Zouaves are led by a Drum Major—one of their number and are drilled by a regular army sergeant who is employed for the purpose.

In order to hold the Zouaves together during the school year a Zouave Social Club has been organized to hold meet-

ings one night each week. Honor Carriers from all News sub stations are permitted to hold membership in this Club. The Happy Hour meeting of the club each week furnishes a program of entertainment and business for the boys. Vaudeville acts are brought in from local theatres.

The idea originated with Walter Hoots, assistant circulation manager of the News, who supervises home delivery and all carrier activities. Mr. Hoots is Chairman of the Newsboys Welfare Committee of the I. C. M. last year.

CLASSIFIED ADVERTISING

Chicago Tribune Offers \$1,000 in Prizes for Want-Ad Letters—Jackson (Mich.) Citizen Patriot Issues "How to Say It," Classified Text Book—Shade Now With Oakland Tribune

EARL H. SHADE, for many years connected with the San Francisco Examiner and Los Angeles Herald, and latterly in charge of classified advertising for the San Francisco Examiner in the East Bay, is now assistant classified advertising manager on the Oakland Tribune.

Attractive office copy in the Chicago Tribune this week announced a \$1,000 cash prize contest for the best letters telling "What I Did With Tribune Want Ads."

Conditions require that the story must be an actual experience of what a reader did with a Tribune want ad. Prizes range from \$100 to \$5 for every letter published.

Text of one advertisement announcing the contest read in part:

"Here is a contest of interest to people in all walks of life. A lady on the Gold Coast has advertised to get a maid, and her husband has used Tribune Want Ads to sell his yacht. In the same great market place there are ads with offers to take in washing, to rent a store, to sell

a Ford, or a 2-flat. From the outlying districts come offers to sell fresh country eggs, or to hire farm or factory help.

"Nearly every human activity is reflected in the Want Ad Section—millions of people constantly find Tribune Want Ads a convenient way to convey a sales message to the other million Tribune readers."

A textbook on classified advertising entitled "How to Say It" has been prepared and published by the Jackson (Mich.) Citizen Patriot, of which J. D. Chron is classified advertising manager.

A lucid system of instruction for the prospective advertiser is followed throughout the book. Outlines for writing every variety of want ad are listed on the left hand pages of the book, while the right hand pages are devoted to examples of successful ads.

Writers of the book, their names are not disclosed, point out the classified ads fail to produce results usually only because they are "carelessly worded and thoroughly unequipped to tell a story which will prompt an action, and because they are not given a chance to produce."

EDITORIAL CARTOONIST

—well-known to publishers as a creative producer, formerly staff cartoonist on two New York papers, seeks opening, where his forceful individuality can win and hold circulation

This man may be relied upon to interpret the panorama of events so vividly and intelligently as to challenge national recognition of a paper's editorial policies.

More important than the salary is a place with an independent, progressive publication

HOTALING'S NEWS STAND

BROADWAY AND 43RD ST.
NORTH END THE TIMES BUILDING

"Perhaps the most cosmopolitan spot in New York City is Forty-third Street and Broadway . . . Here is a mammoth news stand which sells newspapers from every city in the world. . . . Every town has similar stands, but none as huge as this, and none as varied and as picturesque in its patronage."

—Boston Transcript, Oct. 29, 1921

HOTALING'S NEWS AGENCY, 308 WEST 40th STREET, NEW YORK

Facts about NEW ENGLAND-

THE GREATEST
WOOL MARKET
IN THE
U.S

Just as New England leads in Textiles, so does it also lead in the wool industry. From the beginning of manufacturing in the United States, New England has held first place as the first wool market in the country and turns out over half of the wool goods produced in the entire country.

The average annual receipt for the past 10 years has exceeded 412,000,000 pounds—more than the total wool clip of the United States and about one-seventh of the total wool production of the world.

Here is another great industry that affords steady employment to an army of workers. This is another substantial reason why New England is a good all year 'round market for the National Advertiser who can reach a great mass of buyers in a highly concentrated, industrial area where business is always good and gigantic industries hum day and night.

Get next to this market. Let these newspapers below tell you about it.

ATLANTA DAILY WINS STATE PRESS TROPHY

Award Made at Annual Meeting of Georgia Editors in Louisville—Ernest Camp of Walton Re-elected President

The Sutlive Trophy given annually to the newspaper accomplishing the most outstanding work for Georgia during the year was awarded to the *Atlanta Georgian* at the annual meeting of the Georgia Press Association held in Louisville, Thursday, Friday and Saturday of last week.

Ernest Camp of the *Walton Tribune* was re-elected president as were the other officers of the Association: Miss Emily Woodward, *Vienna News*, vice-president; J. J. Howell, *Cuthbert Leader*, treasurer; Hal M. Stanley, *Atlanta*, corresponding secretary; C. E. Bennis, *Butler Herald*, recording secretary.

The position of official photographer was created and Walter Winn, of the *Atlanta Journal* was elected to that office. The next meeting will be held in Eatonton, Ga.

Among the speakers at the final sessions were: O. W. Passavant, of the *Newman Herald*; Prof. W. E. Cooper, of Windsor, who discussed the "assistance which the editors may be to the Georgia Blind"; Jack Williams, *Waycross Journal Herald*; Roy Daniel, *Quitman Free Press*; Johnny Jones, *Fort Valley Leader Tribune*; John F. Shannon, editor, *Commerce News*; Louis L. Morris, editor *Hartwell Sun*, and Miss Marie Louise Horan, of the *Dalton Citizen*.

Saturday night was spent at Waynesboro as guests of the Rotary Club. Sunday was spent at Augusta, guests of the local commercial bodies. Sunday night there was an elaborate banquet at Augusta. Monday to Wednesday was spent at Asheville, the guests of Kenilworth Inn.

REVISED HALF-YEAR LINAGE

Some Leaders Shift Relative Positions in Various Groups

The following revisions should be made by advertising agencies and newspaper men keeping as permanent records the semi-annual linage figures printed in EDITOR & PUBLISHER last week:

Akron, Ohio, with 210,000 population (Chamber of Commerce estimate) should be transferred to 200,000-250,000 group of cities.

The *Akron Beacon-Journal* should be in twelfth place, with 5,462,152 lines, among "Leaders in Local Linage—Evening, Six-Day," printed on page 4 of the Sept. 25th issue.

The *Canton (Ohio) Repository* should be given tenth place in "Leaders in Local Linage, Evening and Sunday," with 5,245,176 lines, and in twelfth place in "Leaders in Classified Linage, Evening and Sunday," with 1,361,463 lines.

The *Kansas City Star* should have been shown as an "Evening and Sunday," rather than "Morning and Sunday," and its linage of 9,682,559 lines in that grouping would place it twentieth in the list of "Leaders in Total Linage." It also should be given seventh place in "Leaders in Classified Linage, Evening and Sunday," with 2,305,135 lines, and eighth place in "Leaders in Local Linage, Evening and Sunday," with 5,953,281 lines.

IOWA PAPERS MERGED

The *Clayton County Messenger*, established 34 years ago in Elkader, Ia., last week was merged with the *Elkader Register* by H. L. Griffith, editor and publisher of the Register. John K. Griebel, who purchased the Messenger five years ago, becomes associated with J. F. Widman & Sons, McGregor printers. C. L. Reineke, editor of the Messenger, will assume similar duty with the Register, succeeding E. F. Seifert, who becomes assistant cashier in the First National bank.

HUNTING WITH DAWES

Three Chicago newspapermen are included in the party of Vice-president Charles G. Dawes which left Sept. 29, for a week's hunting trip near Lincoln, Neb. They are John T. McCutcheon, cartoonist of the *Chicago Tribune*; Knowlton L. Ames, publisher of the *Chicago Journal of Commerce*, and Glen Griswold, managing editor of the *Chicago Journal of Commerce*. Also in the party are Gen. John J. Pershing and Rufus C. Dawes.

ATTORNEY LOSES LIBEL SUIT

Mack P. Spears, Hendersonville attorney, whose suit against the *Greenville (S. C.) News*, seeking \$100,000 damages, was begun in Greenville county court last week, lost the decision of the jury, which was out only 25 minutes. The suit followed the detention of Spears in jail pending the investigation of the finding of a baby in a clump of bushes in June, 1924, because of which he alleged great damage had been done to his reputation.

PLAN \$25,000 AD FUND

The Pacific International Photographers Association meeting in Seattle last week voted to raise an advertising fund of \$25,000. The action was taken following an address by L. Van Anderson, of Hall & Emory, Inc., advertising agency. He suggested newspapers as the best medium for the campaign.

NEW SUN PROMOTION

The *New York Sun* has just issued a handsome promotion booklet, "Guide Posts That Point the Way to Greater Sales," containing many full pages in color. The book shows the Sun's linage record for the twelve months ending June 30, 1926.

"FOR SAFETY'S SAKE"

Members of the Garage Owners' Association of Rochester, N. Y., co-operating with automobile dealers and the local chamber of commerce, recently purchased a special page in the *Rochester (N. Y.) Times-Union*, headed "For Safety's Sake," in which the association advised close attention to brakes, and offered to test brakes free during "Safety Week."

NEW SHOPPING NEWS

The *Compton (Cal.) Shopping News* has started publishing as a four-page weekly, exclusively an advertising paper. It is published on Thursday for Friday for Saturday buying. Practically every city in Los Angeles County now has a shopping news, including Los Angeles, Hollywood and Long Beach.

WATHEN JOINS ALCO-GRAVURE

E. Leslie Wathen, rotogravure editor of the *Buffalo (N. Y.) Courier-Express*, has resigned to become sales manager for Ohio for Alco-Gravure, Inc.

PARIS RECEPTION OF AMERICAN DELEGATES

Brilliant Official Dinner and Noon-Day Receptions Feature Delightful Week—Off for Brussels and London

(By Cable to EDITOR & PUBLISHER)

PARIS, Sept. 30.—American delegates to the Press Congress of the World were tendered a brilliant dinner at Hotel Continental on Wednesday night, as guests of the Franco-American Committee of the French Press.

Louis Barthou, Minister of Justice and member of the French Academy, presided for the French Government at the request of Premier Poincaré. The speakers included R. C. Snyder, *Norwalk (O.) Reflector-Herald*; James Wright Brown, publisher of EDITOR & PUBLISHER; P. Selig, of Christ Church, New Zealand, and Marcel Knecht, publisher of *Le Matin*, Paris.

The event closed a delightful week of receptions in Paris. On Monday the delegates were received at the City Hall by the President of the Municipal Council and the Prefect of the Seine Department. In the afternoon the delegates visited the tomb of the Unknown Soldier, where a wreath was placed. At noon on Tuesday the delegation was given a buffet reception by the Agence Havas, and on Wednesday at noon the vice-presidents of the Congress and J. W. Brown were speakers at a meeting of the Anglo-American Correspondents' Association, with Wilbur Forrest of the *New York Herald Tribune* presiding.

The delegates left for Brussels on Thursday and will arrive in London Oct. 3.

WILLIAM PUNCH RESIGNS

William J. Punch this week resigned as manager of the Statistical Department of the *New York Evening Post*.

The World

These two newspapers offer the most powerful all-day service in New York available as a unit under a single contact. The 600,000 DAILY WORLD—EVENING WORLD readers constitute a highly concentrated force to be reckoned with in any campaign designed to effect distribution in Greater New York.

The Evening World

NEW FINNISH PAPER

The *Fitchburg (Mass.) American Soumalainen*, or *Finnish American*, now printing three issues a week, instead of daily as was first contemplated. The paper takes the place of the *North Star* recently published under the direction of August Kangas, editor. The *Finnish American* is published by the Eastern Publishing Company, incorporated in \$100,000.

AD POSTERS TORN DOWN

Advertising posters at stations of the North Western railroad at villages near Chicago were torn down at order of George B. Vilas, general manager of the road, on complaint of residents of Elmhurst, Melrose Park, Ravenwood, Clybourn and Mayfair.

INSURANCE DRIVE URGED

Agents Meeting at Atlantic City Recommend Newspapers in Resolution

Five hundred members of the National Association of Insurance Agents, meeting at Atlantic City last week, adopted a resolution recommending a national campaign of newspaper advertising.

The resolution follows:

"Insurance is suffering from a lack of public understanding of its functions and service, and this association believes that a national campaign of newspaper advertising to inform the public of the work of stock, fire and casualty companies will be of great benefit to both companies and agents."

It was the first time in the 30 years' history of the association that it has gone on record favoring advertising. A plea for a newspaper campaign was made by Charles H. Holland, president of the Independence Indemnity Company of Philadelphia, and reported in last week's *Editor & Publisher*.

KELLY WITH ST. MAURICE

Raymond Kelly, formerly general sales manager of the Kimberly-Clarke Paper Company of Neenah, Wis., has been appointed a director and vice-president of Maurice Valley Sales, Ltd., and will have headquarters at the general offices of the company in the Canada Cement Building, Montreal.

FIRE DAMAGES TEXAS PLANT

Damage estimated at \$5,000 was suffered by the *Orange (Tex.) Daily Leader* when fire swept the Stark building, in which the *Leader* is housed. Practically all damage to the newspaper was in the composing room, according to H. C. Conally, general manager. The *Leader* was forced to suspend publication for two days.

Dodge Brothers places 76 per cent of its advertising appropriation in newspaper space.

FORCEFUL PROMOTION

A striking full-page advertisement was placed by the *Philadelphia Bulletin* in New York newspapers Friday, Sept. 24, the day after the Dempsey-Tunney fight. "How Many Are 533,169 People?" the caption asked in white letters cut out on a photograph of the crowded Yale Bowl. Photographs of five other crowded stadiums, the Sesqui-Centennial stadium, Shibe Baseball Park, Franklin Field, Phillies Ball Park, Princeton stadium, New Baltimore stadium, and New York Polo Grounds were used on the page to show that their combined seating capacity was less than the daily circulation of the *Bulletin*.

JOHN EVANS REJOINS A. P.

John Evans, who resigned from the Paris staff of the Associated Press a year ago to become managing editor of the *Des Moines (Ia.) Daily Capital*, has resigned from the *Capital* to rejoin the A. P. at Paris. Carl K. Stuart, city editor of the *Capital*, has been named managing editor.

ISSUES TRANSPORT EDITION

The *Columbus (O.) Dispatch* issued a 60-page special edition devoted to highway and transport interests, Sept. 28. The edition was in charge of R. R. Schenk, promotion manager, who was assisted by Glen Harris. The issue carried \$17,000 worth of advertising, Harvey Young, advertising director, stated.

A. N. P. A. COMMITTEE TO MEET

Members of the committee in charge of the Bureau of Advertising of the American Newspaper Publishers Association will meet, Oct. 20, in the bureau's new Chicago office.

PRINTS MARKET SURVEY

The *Port Huron (Mich.) Times-Herald* has just issued a market manual covering the Thumb district of Michigan.

A Market Where Adverse Selling Seasons Are Unknown

Indiana has always been a desirable market for the national advertiser. Its strategic location in the very heart of the industrial and agricultural middle-west with its fertile lands and mineral resources has created a wide diversity of business activity, insuring stability and prosperity.

Indiana is a market whose adverse selling seasons due to fluctuation in prosperity are unknown, because practically every city has its solid group of industrial wage earners, and every rural community its group of modern prosperous farms.

The great majority of the people of Indiana are native born of native parents. They follow the newspapers very closely.

If you want to reach one of the great buying powers of the United States the papers listed below will show you the way.

SALAMANCA DAILY FORMALLY OPENS ITS NEW \$90,000 BUILDING

THE Salamanca (N. Y.) *Republican-Press*, evening daily, this week formally opened its new \$90,000 home to the public.

The building is of fireproof construction—brick, stone, steel, concrete and tile. It is 126 feet long, 40 feet wide for 100 feet back from the front, and 52 feet wide from the rear 26 feet. The floor level is the same throughout the entire structure—two steps up from the sidewalk.

BLANCHARD B. WEBER

Concrete for the floor was laid directly on the ground except for one section over the furnace room and coal bunkers, which are in a basement 17 by 52 feet, extending 12 feet beyond the 40-foot section, so that coal trucks may drive directly over the coal bunkers and dump their loads, the coal running down to within a few feet of the furnaces.

MATTHEW WEBER

The front 30 feet of the building, which has the appearance of being two stories in height, contains only one floor for the present. This section has a 17-foot ceiling, and is lighted by two sets of windows, one above the other, which will permit installation of a mezzanine floor whenever more room is needed.

In the southeast corner of the building is the pressroom, and large plate glass windows in the front and east side give a full view from the street of the rotary press.

The rest of this front section contains the business office, news and editorial rooms.

In the rear of the business office, and opening off the pressroom is the stereotyping room. This room also has a glass partition in front, so that visitors may see the plate-making processes as well as the actual printing.

At the rear of the pressroom is a side door to which trucks can drive, to receive the papers as they come from the press.

The center section of the building, 70 feet long and 40 feet wide, is a single, large room, with 13-foot ceiling. This is the composing room. The north end of this room contains the commercial printing department, including platen and cylinder presses, cutting machine and other equipment.

The rear section, 26 feet deep and 52 feet wide, is used as a warehouse, for paper storage, etc.

Entrance to the building is through double swing doors sheltered by a marquise. The entry is tiled with marble. As

one comes in from the street, the business office is on the right, and the newsroom on the left. The partitions separating the business office from the pressroom and stereotyping room are of glass, so that the operations in these departments are in full view from inside as well as outside the building.

Blanchard B. Weber, senior publisher of the *Republican-Press*, and dean of the newspaper men of Cattaraugus county, is 78 years old and has been a publisher since 1873. Matthew Weber is junior publisher and managing editor.

ST. LOUIS LOCAL OUSTED

The St. Louis Web Pressmen's Union was one of three local pressmen's unions which were forced to give up their seats Sept. 26 in the Central Trades and Labor Union Council. The ouster was on the demand of George L. Berry, president of the International Pressmen's Union, backed by Frank Morrison, secretary of the American Federation of Labor. These locals withdrew from the International Union, together with locals from Chicago, Milwaukee, Cincinnati, Pittsburgh and elsewhere, in 1918, following a controversy with Berry, but have been recognized by the Central Trades and Labor Union until now. The St. Louis newspapers have a contract with the St. Louis Web Pressmen's Union, which is in nowise affected by the action of the Council.

NEW ORLEANS

FORMER PUBLISHER OF NEW YORK TIMES DIES

F. Spinney Published Paper Until Ochs Took Control in 1896—Was Deputy Court Clerk at His Death on Sept. 27

George Franklin Spinney, 73, publisher of the *New York Times* before that newspaper was taken over by Adolph S. Ochs in 1896, died at his home in Rockville Centre, L. I., Sept. 27. For the past 25 years he was deputy clerk of the Court of General Sessions in New York. Born in Great Falls, now Somersworth, N. H., Mr. Spinney received a high school education at Lawrence, Mass., and moved to Boston where he learned the printer's trade. He came to New York in 1872 and became police reporter for the *Brooklyn Daily Argus* two years later. After the dissolution of the *Daily Argus*, shortly after, Mr. Spinney was made successor to Jacob A. Riis as manager of the *South Brooklyn News*. He was also associated with Joseph C. Hendon, Brooklyn editor of the *New York Times*. Mr. Spinney joined the staff of the *New York Times* in 1879 as a reporter. He was Albany correspondent for that paper for seven years. From 1888 until 1896 he was managing editor and later publisher until he resigned in 1896. At this time he was a director of the United Press. He was city editor of the *Brooklyn Daily Eagle* under St. Clair Kelway before being named to the city clerkship. Mr. Spinney and Assemblyman John McManus were awarded medals for their heroic rescue work in the Spuyten Duyvil railroad wreck in 1881.

COL. J. E. COOKE

Former Waynesboro, Va., Publisher Dies After Long Illness

Col. J. E. Cooke, 69, long prominent in newspaper circles in Virginia and formerly editor and owner of the *Waynesboro Valley Virginian*, died last Friday morning after a protracted illness. Col. Cooke went to Waynesboro in the early nineties and engaged in the newspaper business, first with his father, J. T. Cooke, and later established the *Valley Virginian*, which he edited from 1896 until a year ago, when, because of ill health, he sold the plant and paper to Louis C. Jordan. For sometime before selling the paper, Col. Cooke's daughter, Miss Marion Cooke, at present associated with the *Virginian* as city editor, practically ran the paper.

CHARLES T. DONNELLY

Charles T. Donnelly, 58, prominent in advertising man and member of the firm of John Donnelly & Sons, outside advertising, died suddenly, Tuesday morning at his summer home in Winthrop, Mass. He was one of the pioneer outdoor advertising men of the United States. Born in Boston, he was educated from Harvard in 1891. Shortly after graduation he entered into business with his brother Edward in the

above firm. He was a member of the home there Sept. 25. Mr. McKinney Boston Advertising and Harvard clubs with the late Col. C. L. Smith established and other civic and fraternal organizations.

JAMES H. POTTS

James H. Potts, editor of the *Troy Times* (N. Y.), died Wednesday at the home of his daughter at Rockford, Ill., where he had been passing his vacation. He was 71 years old. Mr. Potts became assistant city editor of the *Troy Times* in 1881, and city editor two years later. In 1896 he became editor.

Obituary

NILS GILLGREN, editor of the *Svenska Pacific Tribune* at Seattle, Wash., died at the Swedish Hospital, Sept. 16, after an illness of two months. Gillgren was born in Sweden, in 1860, coming to America in 1904.

L. P. MITCHELL, a pioneer publisher of the San Fernando Valley, Cal., died at his home in Corcoran, recently. Mr. Mitchell at one time owned the *Azusa Pomotrophic*, and later the *Owensmouth Gazette*, which he published for six years. He then moved to Corcoran where he purchased the *Journal*.

LEONARD W. KIDD, 77, known as "Captain" Kidd in the composing room of the *Seattle Post Intelligencer*, where he was employed for 30 years, died Sept. 20 at his home.

MRS. THOMAS STIVERS, 76, mother of George A. Stivers, publisher of the *Burlington (Ia.) Gazette*, died Sept. 25 after an illness of two months.

ROBERT HOWARD RUSSELL, for several years editor and publisher of *The Cosmopolitan*, resident of Stratford, Conn., died there Sept. 21 following a prolonged illness. He was born in Stratford, August 16, 1865.

CAPT. JAMES SAYERS, 81, a veteran of the Civil War and for many years editor and manager of the *Waynesburg (Pa.) Republican*, died at his home there Sept. 26. His son, Judge A. H. Sayers and one daughter, Miss Jane Sayers survive.

HUGH HEALY, 54, editor of the *Arcola (Ill.) Arcolan*, was found dead in his bed Sept. 22. He entered the newspaper field 28 years ago with Dr. C. C. Lewis, publishing the *Arcolan*, and four years later assumed full control of the weekly. Two sisters and a brother survive.

DANIEL F. FITZGERALD of Belmont, Mass., a member of the advertising staff of the *Boston Herald* for 10 years died Sept. 22. For many years he was New England representative of Payne, Burns & Smith, New York, special representatives.

FRED L. MCENROE, 27, reporter on the *Bridgeport (Conn.) Sunday Herald*, died in Hartford on Sept. 17 after a lingering illness. He had worked on Hartford and New Britain papers as well.

OWEN S. MCKINNEY, for more than 40 years engaged in the newspaper business at Fairmont, W. Va., died at his

home there Sept. 25. Mr. McKinney Boston Advertising and Harvard clubs with the late Col. C. L. Smith established the *Fairmont Times* and previous to that he was editor of the *Fairmont Index*. He served as a member of the West Virginia Legislature and was speaker of the house.

WILLIAM MEEKIN, 68, editor and publisher of the *Galva (Ill.) Standard* 25 years until 1909, and in recent years postmaster, died Sept. 23 at his home. The widow, two sisters and six brothers survive.

ALFRED H. DAVIS, former owner and publisher of the *Ventura (Cal.) Daily Post*, died recently in a Glendale, Cal., hospital.

HARRY L. HILTON, 42, for 14 years a *San Francisco Examiner* pressman, died suddenly Sept. 15.

CHARITY WORK EXTENDED

The care that has been devoted to the sick babies of Chicago for 40 summers by the *Chicago Daily News* Fresh-Air Fund sanitarium has been extended throughout the full 12 months, according to an announcement by the *Daily News*. On Oct. 4, the sanitarium will be opened again for the winter months. The sanitarium was started by Victor F. Lawson, late publisher of the *Daily News*, at the suggestion of his wife.

N. Y. TIMES PRINTS SURVEY

The *New York Times* has just issued a "Study of the New York Market," a reprint of ten tabular statistical pages of New York's population and merchandising distribution which appeared in "A Study of 81 Principal American Markets," published by the 100,000 Group of American Cities.

GARLAND AIDED LABOR PRESS

The Federated Press, a labor press service, and *Labor Age*, a monthly magazine, were aided by the \$1,674,000 American Fund for Public Service, established in 1921 by Charles Garland, the young

millionaire Socialist, according to a report made public this week. The fund has now been entirely disposed of.

DAILY STARTS CRIME PROBE

Following disclosures published by the *New York Evening World*, the State Crime Commission has determined upon a definite program for an inquiry into the methods of criminal lawyers.

ICE CREAM AD PLANS

Report of the advertising committee will be an important feature of the convention of the National Association of Ice Cream to be held in Detroit, Oct. 11-16. An active advocate of newspaper advertising among members is L. J. Wilhoite of the George K. Brown Company, Inc., Chattanooga. Members of the staff of the Bureau of Advertising of the American Newspaper Publishers Association will attend the convention to outline the advantages of newspaper space.

WHAT OUR READERS SAY

COMMERCIAL ATHLETICS

To EDITOR & PUBLISHER: William J. McNulty's article in your issue of September 4th, cynically stating that in his opinion at least sixty per cent of the leading college athletes of America receive financial rewards for their participation in college and university sports, strikes me as being slanderous. Since Mr. McNulty's article is largely an expression of his personal opinions, unsupported by evidence, I may perhaps be forgiven for my personal testimony that during three years of participation in college athletics, I saw none of the commercialism to which he alludes in cynical fashion. Doubtless, while to a certain extent the dollar-sign does appear in amateur contests, the percentage of athletes accepting money or other compensation for their services does not exceed one-half of one per cent.

From the angle of the advertising department, I can add another personal testimonial to the fact that in my seven years' experience as the owner of a small town paper in a community where both professional and amateur sports are popular, I have never received a dollar from advertisements for professional contests but have received a revenue of many hundreds of dollars from amateur matches.

It seems to me that if this matter of the comparative merits of amateur and professional athletes is to be fought out on the sordid basis of the comparative revenues, the amateurs, so far as the newspapers are concerned, have much the better side of the argument.

Very truly yours,

TELFORD WORK,

Director of Public Relations, Pacific Palisades Association, Pacific Palisades, Calif.

FLORIDA ADVERTISING PLAN

To EDITOR & PUBLISHER: Please tell me what you think of my idea to raise \$3,000,000 to offset the black eye given us by last week's hurricane with a national advertising campaign funded by the simple expedient of diverting one penny of our four-cent gasoline tax to bringing in more motorists whose additional fuel purchases will more than repay the diverted penny?

At the present rate of consumption this penny-ad plan will entail no additional burden upon the taxpayer, will be borne equitably and without murmur by every gasoline consumer in the state, will bring in at least a million dollars a year more for highway construction and maintenance, and yet will help every individual and every invested dollar in the entire commonwealth.

I am taking the matter up with the Governor, the State Highway Commissioner, members of the state legislature, and various other officials; and judging from the enthusiasm engendered, I am confident that ultimately I shall be successful.

What do you think?

ROBERT SCALES CLARY,

SHORT COURSE FOR EDITORS

Annual Iowa State College Meet Oct. 19-20—Roe a Speaker

The annual Iowa State college short-course for country newspapermen will be held at the university in Ames, Iowa, Nov. 19-20. F. W. Beckman, head of the journalism school of the college, is preparing a program for the two-day meeting. As in previous years emphasis will be placed on problem of fitting rural newspapers into changing rural conditions.

Among the speakers secured for the event are: Herman Roe, Northfield (Minn.) News and president, National Editorial Association; W. C. Jarnigan, Storm Lake Pilot-Tribune, president, United Newspapers of Iowa; G. L. Caswell, Iowa Press Association; and E. C. Tucker of the Iowa Press Association.

A "little gridiron" dinner will be a social event for the visitors, sponsored by the Iowa State chapter of Sigma Delta Chi, national journalism fraternity of the college.

A paper with the people

The public decides the progress of a newspaper.

The continuous rising circulation of the New York Evening Graphic vividly demonstrates popular acceptance of this newspaper as a medium of unusual reader interest.

Advertisers daily realize the benefit of this power through achieved results from the advertising columns of the New York Evening Graphic.

With a constantly increasing circulation, plus a constant growth in advertising lineage, the New York Evening Graphic offers the advertiser an extremely profitable opportunity. Published by BERNARD MACFADDEN

STORY, BROOKS & FINLEY

Do you know what percentage of errors are made in your Composing Room?

We suggest you go there and take fifty original proofs. Count up the number of lines and the number of errors. Get the percentage of errors to lines.

It takes twice as long to correct an error as it does to make it, so multiply this percentage by three.

Take this resultant percentage and apply it to your total Composing Room payroll for the year. See how much money errors are costing you.

When you find out what they cost you write and tell us the amount. We will show you a source of profit you have never heard of.

OUR OWN WORLD OF LETTERS

By JAMES MELVIN LEE

BOOKS on publicity are flowing from the presses of American publishers out as rapidly as books on newspaper editing and making. These manuals on how to get matter into the newspapers are becoming specialized: the latest "Publicity" (J. H. Sears & Co.) by Roger William Riis and Charles W. Bonner, concerns itself primarily with getting industrial news into the press. The introduction is contributed by the well-known sport story writer, Richard Washburn Child.

The text on the flap of the jacket thus describes the volume:

This book tells how the public opinion of a nation has been made to veer sharply, even reverse itself, under the powerful force of a well-directed publicity campaign. It describes how public utilities, by such publicity, have come over to them the friendly attitude of the people. This volume tells how large corporations and industries have been saved by means of news publicity.

Carping critics who tell magazine readers that the American press has lost its influence would do well to re-read the quotation just given. The editorial page may have declined in influence, the editorial writer may be only a highly paid office boy, the newspaper itself may be published just to meet conditions of advertising contracts that call for position alongside reading matter, the publisher may have sold his soul for a mess of pottage—in spite of all the critics say, they have evidently overlooked one field where the newspaper still has some influence, if only it has the help of the highly paid expert of publicity.

Richard Washburn Child, whose fiction always has such grace and charm, thus says in his introduction the case for publicity:

No other land has developed the art, the science and, indeed, the ethics of publicity to the extent we have seen under our noses in America; but, in spite of this, there is lacking in our current literature any substantial treatment of publicity and its effect upon our civilization.

Evidently Mr. Child is not a reader of EDITOR & PUBLISHER, for if he were, he would know that the shelf for books on publicity is already so crowded that space can only be found for new ones by laying them flatwise on top of other texts. At even now this little space between the row of books and the shelf above is fairly well filled.

What is the function of the reputable expert in publicity? Mr. Child answers that question when he says in his introduction, "The function of good publicity experts may be to counsel silence as often as to counsel outspokenness." This assertion may be true, but the experts whom I know have always presented their case quite differently. They have said, "Give the press all the facts! Speak out, don't keep silent."

Because of the high place held by Mr. Riis and Mr. Bonner in the field of industrial publicity, it is interesting to note in whom they give credit for being "the greatest publicity man on earth." Without any qualifications whatsoever they award this distinction to William Jennings

Bryan (page 16). The reasons why they give first place to Mr. Bryan are (1) because he knew the value of news applied to and in the interest of a private cause, (2) because he knew how to make a private cause look like a public cause, and, (3) because he knew how, by subtle apocryphal processes, to create of a public cause a public duty. In other words, Mr. Bryan, to use the illustration given in the book, made a good many people believe that it was their public duty to go to Florida. The Florida boom, according to page 19, "became the most consistent, the most engaging story in the American press for two years."

To show what one industrial concern can accomplish in one year in one newspaper the authors mention in a list the news stories of the General Electric Company which appeared in the *New York Times* from September, 1924, to September, 1925 (pages 35-38). That imposing list of news stories, however, does not say how many of them came from the publicity department of the General Electric and how many were dug up by those who work for the Times. This fact must be known before a logical deduction can be reached.

In speaking of a single issue of another New York newspaper the authors on page 39 print the following:

The *New York Sun* of Jan. 14, 1926, contained 162 items of news. Examining each one of these, we can fairly conclude that no fewer than 75 of them were either publicity releases or, at least, of distinctly interested origin. That leaves 87 items of general news nature, obviously not obtained from publicity sources.

Earlier in the volume the proprietor of a large newspaper syndicate which had requested all general releases from publicity agencies is quoted as saying:

"We would rather have material from news publicity agencies than from free-lance writers, not because we wish to save the money we have to pay the latter, but for the reason that the news publicity man, offering frankly prejudiced material, is under the necessity of preparing his stories so carefully and having them so replete with interesting information that we find the publicity output usually of a far higher order than the other material, judged as news and real information."

The volume frankly is an excellent text on industrial publicity. It is full of meat for those who have charge of sending out the news from industrial plants. It gets down to brass tacks with actual cases. The chapter, "Public Relations in Industry," deserves the thoughtful consideration of those who edit and make American newspapers. Throughout the volume the material has been well organized and presented in an attractive way.

It is because the authors seem to speak with so much authority that their words raise grave doubts about the future freedom

of the American newspaper. Is the reporter to become merely a copy runner between the industrial plant, for example, and the news room? Is the real power of the press to move from the editor's office to the one presided over by the publicity expert? Is the newspaper reader to get only "frankly prejudiced material"? Several times I have expressed the opinion that the reporter was hanging his hat too far down the line in the newspaper office.

IN recent years *The Nation* has been extremely critical of the *New York Times*. On several occasions it has said some rather sharp things both about the paper and its owner, Adolph S. Ochs. But in the issue for September 29 *The Nation* has an editorial about the Times which it calls "The Greatest Newspaper in the World." It puts in italics, however, the "news" of newspaper—to show where the Times puts the emphasis.

From the editorial the following quotation is made:

The criticism which *The Nation* and others have heaped upon it is in a measure a tribute, for it has made itself the standard by which news-gathering is judged. As a record of current history it might be but it is not surpassed. There are newspapers in Japan and France and Great Britain, and tabloids in America, with twice or three times its circulation, but these journals of vast distribution are today amusement-sheets rather than chronicles of the world, and in its chosen field the *New York Times* has risen steadily to the top. The *London Times*, which was once indispensable to men who watched history boiling in far-off corners of the earth, has fallen sadly; the *Manchester Guardian*, a greater force as a maker of world opinion, can hardly compete with the *New York Times*'s worldwide telegraphic news service; and no other American newspaper begins to rival it in amount or quality of daily news. It "covers" the world.

The editorial continues with a personal tribute to Mr. Ochs and then proceeds to give reasons why it regards the editorial page of the Times as "one of the dullest" in America.

WHAT of the tabloids? That is the question which Richard G. deRochemont discusses in *The American Mercury* for October. Here is a quotation:

The future of the tabloid press in America is a matter of dispute. It has been predicted recently by Carr V. Van Anda of the *New York Times*, that in a few years all the daily newspapers will be forced to adopt the tabloid form. Undoubtedly the increase in the cost of newsprint and the convenience of the new size in production and distribution point to its further proliferation. But many advertisers do not believe that it affords sufficient room on its pages for effective display advertising, and say that they thus find its space more expensive than the results justify. Careless make-up and slipshod printing have been deterrents to profitable advertising accounts in many cases.

PSYCHOANALYSIS MADE PLAIN

BY SIGMUND The Father of Psychoanalysis 25 Daily Releases

Here at last, in simple language, the famous father of Psychoanalysis tells what it is. In a series of twenty-five short articles of 500 words each, Dr. Sigmund Freud, of Vienna, makes clear his system of discovering, exploring and explaining the dark nooks and corners of our innermost selves, generally referred to as "the soul." He shows how to lay the ghost of fear and build up confidence.

TOKIO PUBLISHER ARRIVES IN U. S.

**B. W. Fleisher of Japan Advertiser
Comes to New York for Medical
Treatment—Morris in Charge**

B. W. Fleisher, publisher and editor of the *Japan Advertiser*, Tokio, arrived at Vancouver on the steamer *Empress of Canada*, Sept. 20, and came at once to New York where he is to receive the treatment of specialists for phlebitis from which he has been suffering for almost a year. Mrs. Fleisher accompanied him on the journey.

B. W. FLEISHER

During Mr. Fleisher's absence from Japan, his interests there will be represented by John R. Morris, general manager of the *Advertiser Publishing Company*, which publishes both the *Japan Advertiser* and *The Trans-Pacific* and conducts the largest foreign commercial printing organization in the Far East, the *Japan Advertiser Press*. Mr. Fleisher is also proprietor and president of the *Trans-Pacific Advertising & Service Bureau*, which handles much of the American advertising placed in Japanese newspapers and magazines.

Frank H. Hedges, managing editor of the *Japan Advertiser* since the earthquake of September, 1923, has resigned and on Oct. 15 is to be succeeded by Hugh Byas, who was managing editor from 1914 to 1922 and who for the last four years has been the paper's staff correspondent in London. Mr. Hedges will continue to be contributing editor of the *Advertiser*, in which capacity he is to leave Japan in October on a trip around the world through China, India, Europe and the United States. He will return to Japan in about one year. Mr. Byas, who has already sailed for Japan, was succeeded in London by F. A. MacKenzie, for many years with the *London Daily Mail* and *London Times Weekly*, but more recently the correspondent of the *Chicago Daily News* at Moscow.

D. H. Lawson, formerly manager of the *Manila (P. I.) Daily Bulletin*, the *Shanghai (China) China Press* and, until three months ago general manager of the *Long Beach (Cal.) Sun*, is business manager and director of advertising of the *Japan Advertiser*. Irwin A. Vladimir, formerly production manager of the *Sales Producing Circular Company*, New York, is advertising manager.

The news editor of the *Advertiser* is Hugh J. Schuck, who joined the paper soon after the earthquake and was promoted to his present post last summer on the departure of J. Hamilton Johnson, who resigned to become news editor of the *Manila Daily Bulletin*. Others in the news room include H. Francis Misselwitz, former *St. Louis Post-Dispatch* reporter who also served for some time as instructor in news writing at the School of Journalism, University of Missouri; Burton Crane, formerly of the Philadelphia bureau of the *Associated Press*; Edward Hunter, until a few weeks ago with the *San Francisco Bulletin*.

Oland D. Russell, who has worked during the last 10 years on the *St. Joseph (Mo.) Gazette*, *Philadelphia Public Ledger* and *New York Evening Post*, also is in the news room but is famous in Japan chiefly for his daily "colym" on the editorial page called "Achi-Kochi," which in Japanese means "There and Here."

The Tokio manager of the *Trans-Pacific Advertising & Service Bureau* is David S. Tait, formerly advertising manager of the *Advertiser*. J. P. Barry,

who was in Tokio as general manager of the *Advertiser* from 1919 to 1921, is in charge of the New York office of the service bureau as vice-president and general manager of that organization.

F. M. Flynn, formerly with the Stephens Publishing Company of Columbia, Mo., is manager of the *Japan Advertiser Press*.

EDITOR'S SLAYER CAUGHT

**John Owen Says He and Companion
Killed Dovere During Hold-Up**

The mystery of the slaying of Thomas Dovere, editor of the *Kelso (Wash.) Corvilitz County News*, on the night of June 19, 1925, was cleared last week with

the confession of John W. Owen, paroled convict, that he and another paroled convict had killed the editor during an attempted hold-up.

Owen said that his companion struck the editor over the head with a revolver the impact causing it to be discharged. The bullet entered Dovere's body killing him instantly.

CONSOLIDATION

The merging of newspaper interests is a subject that has received special study and investigation by this firm for nearly 17 years. It is a big subject and requires considerable technical knowledge, both as to valuation and operating methods. When properly organized, the results are never disappointing.

We have been factors in many important consolidations, sales and appraisals.

The facts

about the New York evening newspaper situation and certain important and little-known phases of the New York Market, have been gathered by *The New York Telegram*, after several months of extensive research, and set down just as they were found.

They present an interesting study to advertisers and advertising agents who demand concise, accurate and impartial data before investing the advertising dollar.

A free copy of "Facts & Figures" will be mailed with pleasure. Please use your business letter-head.

THE only newspaper
in America that has
more than a million
daily circulation—

THE NEWS *New York's Picture Newspaper*

The net paid circulations of the News as required for government statement, for the six months ending September 30, 1926 are 1,082,976 copies daily only and 1,244,316 copies Sunday only. The average net paid circulations for the month of September 1926 were daily—1,140,710; Sunday—1,312,774.

—and the strongest advertising
medium in New York today!

3 9 1, 4 6 5

A Gain of 9,460 Copies

THE AVERAGE net paid daily and Sunday circulation of The New York Times, as reported to the Post Office Department for the six months ended September 30, 1926, was 391,465 copies—the highest figure ever reported by The Times for a corresponding period of any year.

The circulation, as compared with the corresponding period of last year, shows a gain of 9,460 copies.

SIX MONTHS ENDED SEPTEMBER 30, 1926 . . .	391,465
SIX MONTHS ENDED SEPTEMBER 30, 1925 . . .	382,005
GAIN	<u>9,460</u>

Even more significant than the fact that the average daily and Sunday circulation of The New York Times is greater than that of any other standard sized New York morning newspaper is the unsurpassed high quality of The Times readers.

The accuracy, the completeness and the impartiality of its news have established The Times as the preferred newspaper of intelligent and thinking readers.

The Times is advertising leader among newspapers in the greatest market in the world. In nine months of 1926 The Times published 21,821,052 agate lines of advertising, a new high record, a gain of 1,906,182 lines over the corresponding period of 1925, and an excess of 8,132,480 lines over the second New York newspaper. This great volume of advertising is of the highest quality, for the censorship exercised by The New York Times over the advertising submitted for its columns excludes fraudulent and misleading announcements.

The New York Times

Yes, They Really Buy

EXPERIENCED merchandisers measure an advertising medium by the way in which it is able to answer one question: Do its readers really buy?

The thing that counts is volume of sales—not mere bulk of readers.

Advertisers who get results, look at the *character* of a newspaper's circulation before leaping into its columns.

The deliberate appeal of the Herald Tribune is to intelligent energetic readers, people of substance. The entire paper, from the unusual scope of its general news to the sparkling quality of its sporting pages, from its unique Sunday magazine section, to "Books", its famous literary review, is aimed at, and is welcomed by, the prosperous and progressive.

Furthermore, throughout the residential suburbs of the metropolis, where thirty-two percent of the men listed in the Directory of Directors have their homes, the Herald Tribune is the preferred standard-size morning paper on weekdays.

Advertisements in the Herald Tribune are *effective*—they reach actual buyers, readers who really have money to spend.

NEW YORK
Herald Tribune

Circulation	{	Week-days Net paid exceeds	290,000
		Sunday's Net paid exceeds	340,000

Scripps-Howard

227,856. Breaking all records for daily newspapers in the state of Ohio, the *Cleveland Press* now has 227,856 average daily circulation. A gain of 5,219 in *six* months, a gain of 16,646 in *twelve* months, a gain of 26,492 in *eighteen* months.

Never in the history of Cleveland has any other newspaper had a daily circulation to compare with this, never have advertisers had so powerful a selling force. In Greater Cleveland alone the *Press* now has a daily circulation of 183,759—a coverage of one newspaper to every English-reading family in the city.

Truly, “the *Press* is the first advertising buy in Cleveland.”

Society's Head Urges Members to Support Prohibition and Immigration Bill

(By Associated Press.) A rallying call to the support of the 18th Amendment and the Johnson Immigration Bill of May, 1924, was sounded today in Independence Hall at the opening session of the 37th Annual Congress of the Sons of the American Revolution.

The also was made by Harvey F. Remond, president general of the society and a former municipal judge of Rochester, N. Y., speaking from the balcony of the Supreme Court room in the State House.

WOMEN FUGITIVES CAUGHT

Two Who Fled Reformatory, Dressed as Men, Arrested in Station

(By Associated Press.) Philadelphia, June 7.—Two women, who fled from the Vermont State Reformatory for Women, at Rutland, Vt., were arrested in Broad Street Station last night by Detective and McIntyre, Department of Justice agents.

The prisoners, who fled the Vermont institution May 29 by sliding down an improvised rope of sheets and climbing a large front stoop, are Helen Keahr, eighteen, known as the "Texas Queen of Automobile Thieves," and "Billie" Walsh, forty-eight, Nashville, Tenn. Both are married. Mrs. Keahr's husband, it is said, is serving a term in the Atlanta Federal Penitentiary for conspiracy with his wife to transport stolen automobiles between States. The older woman was serving a three-year term for holding "dupe" in a house.

SAYS GAMING HOUSE IS WITHIN 2 BLOCKS OF POLICE STATION

Magistrate Beaton, at Raid Hearing, Hints Gambling Evidence is Being Covered Up—Liar, Replies Captain Wagner, Demanding Names and Addresses—Asserts Girl, Fifteen, Acted as Lookout

(By Associated Press.) Philadelphia, June 7.—Magistrate Beaton, at a hearing today in the 10th and Buttonwood st. station, started a fireworks display by declaring there was "a big game going on" within two blocks of the station house.

Two defendants out of seventeen arrested before the magistrate were held for court in \$400 bail.

They were arrested Saturday in a raid on a restaurant at 823 N. Marshall st., Captain George Wagner, commander of the district, a red-headed, square-jawed man, was leaning against the rail in front of the magistrate's desk when Beaton made his charge against the end of the hearing.

SENATE CO UPHOLDS

Declares President Entirely Within in Issuing

(By Associated Press.) Washington, June 7.—The Senate today upheld the President's action in issuing a proclamation suspending the operation of the White House rule, which was the subject of a resolution introduced by Senator Charles McNary, of Oregon.

The resolution, which was passed by a vote of 74 to 16, declared that the President's action was "entirely within his constitutional powers."

BENEDICTS LONGEST LIVED

Chicago Official Shows Their Advantage Over Divorced and Single Men

(By Associated Press.) Chicago, June 7.—The man who asked "why do married men live longer than single men?" and then answered "they don't, it only seems longer," was wrong in only one respect, they do.

Dr. Herman M. Hildreth, chief health commissioner, made public records of the health department for 1925 showing that for each age period, married men have lower death rates than single men.

BRINGS CANNIBALISM TALE

Trading Ship Captain Tells of Starvation Along Siberia Coast

(By Associated Press.) Nome, Alaska, June 7.—Bringing a tale of cannibalism and starvation among the natives of Indian Point, Siberia, across Bering Strait from Alaska, Captain Ira Rank, of the motorship Thruster, has just returned from a trading cruise to islands near the Siberian coast.

Three hundred natives died of starvation last winter, Captain Rank said, and those who survived were reduced to the state of cannibals, eating the flesh of their comrades, relatives and dogs.

MEYER LONDON KIDNAP

New York Socialist Leader Held in Limb of Automobile

(By Associated Press.) New York, June 7.—The first Socialist leader to be kidnapped in the United States since 1921, Meyer London, was held in the limb of an automobile today, according to reports from New York.

London, a prominent Socialist leader, was kidnapped by a group of men who were disguised as police officers.

If you were to ask most any Philadelphian how to make your advertising do you the most good in Philadelphia, the answer would undoubtedly be:—

Put it in
The Evening Bulletin

DEEN WILLS IMPROVES
American to Participate in Forest Hills Golf Contest

(By Associated Press.) Paris, June 7.—Miss Helen Wills, American tennis champion, who underwent an operation for appendicitis Friday night, will leave the American Hospital Sunday, her mother said today.

Miss Wills had a comfortable night and her condition was satisfactory this morning, her mother said.

CHURCHILL IN MOTOR CAR British Chancellor's Car Wrecked in Collision With Van

(By Associated Press.) Westminster, England, June 7.—Winston Churchill, Chancellor of the Exchequer, had a narrow escape this afternoon when his motor car collided with a motor van.

Both machines were badly smashed. The Chancellor was uninjured, but the van driver suffered a broken rib and other injuries.

NIBBLES AT THE NEWS

Berlin—Stiles and food, two falling sources of interest. Herby Guppers have threatened out with sole fattened parsnips dyed in Berlin.

Moscow—American styles in particularly American styles in Russia, where war has caused feet in the corridors of power and Japanese. More of pairs of American shoes are being sent to Russia, are more of their large size, narrow and extremely high heels.

Big Papers Drive Expenses Up 12 Per Cent; Ten Per Cent Increase In Revenues

Production Costs Unparalleled in Newspaper History—How the Newspaper Dollar Is Apportioned
Under Prevailing Conditions—Many Heavy Capital Expenditures

By ARTHUR ROBB

TWO newspaper men of long experience and knowledge of present-day newspaper conditions in all parts of the country met in a New York lobby this week.

"How's business?" asked the Editor. "Never better," responded the Publisher. Our October 1st statement shows a nice increase over last year in circulation. Advertising since Labor Day is about 8 per cent ahead of last fall, and I tell you, it's keeping our paper storage pretty nearly full."

"It's about the same with us. Revenues are up about 10 per cent, but expenses are running about 12 per cent higher, all due to production costs on the big paper. We just can't hold it any more tightly, and as a matter of fact, I guess we're glad to spend the extra money to get the increased business."

The talk turned elsewhere—radio, the World Series, the new American opera, perhaps—but one of the pair recalled it with sufficient impression to retell it to the Editor & Publisher. Was the common experience of these two newspapers generally paralleled by that of the daily press across the country during the past year, he wanted to know.

The question as put is unanswerable until the correct answer is "Yes" is indicated by information which has come to his office from numerous publishers, of large and of small organizations, during the course of the present advertising drive.

Newspaper publishers like men in every other line of business like to look upon increased business as all net—until they find that their percentage of expense has risen at a higher ratio than their income, leaving a larger money balance, perhaps, but nevertheless a smaller proportion of the entire revenue than their books had shown the year before.

Advertising linage has increased the country over during the past nine months about 8 per cent over the same period last year. Advertising revenues have shown a slightly higher rate of gain—about 10 per cent average.

But expenses refuse to be bound by these figures. With a linage increase shown by figures covering all the larger cities to be about 8 per cent, the newspaper consumption has risen about 15 per cent. The last statement should be qualified. The amount of newsprint available for consumption is about 15 per cent greater than the total for this period in 1925, and it has all—or almost all—been taken from the production points. Mill reserves have seldom been smaller.

The daily and weekly press of the United States and Canada will have consumed at the end of 1926 about 3,500,000 tons of newsprint, having a value in the publisher's cellar of \$225,000,000. The daily and Sunday paper will be responsible for about 2,500,000 tons of this consumption, weeklies and other smaller uses taking the rest. The major proportion of news tonnage has gone to the daily and Sunday press.

EDITOR & PUBLISHER estimates the advertising income of this group for 1926 at \$840,000,000. Circulation will produce another \$300,000,000, giving the collective newspaper publisher of 1926 a gross revenue of \$1,140,000,000, a little more or a little less.

Last year, the authorities agree, advertising revenue was a trifle less than \$750,000,000. Circulation revenues were probably about \$275,000,000, giving a total income of slightly more than \$1,000,000,000. The indicated gain for 1926 over 1925 in gross revenue is about 11 per cent.

Print paper's price has remained unchanged, but the rate of consumption is apparently up about 15 per cent. The paper manufacturers will receive about \$162,500,000 from the daily newspaper publishers. About \$10,000,000 additional will go to the railroads for transportation of the paper—an item which increases, of course, in direct ratio to the tonnage consumed.

Costs in the composing room, foundry and pressroom will also rise at a higher

rate than the growth of business, unless the management keeps a tight rein. An eight per cent increase in advertising volume after a relatively dull period might not be immediately reflected in larger mechanical cost figures. Many newspaper shops maintain a composing room force even in slack periods to be able to cope with the sudden "peaks" which characterize newspaper operation. The staff could absorb a considerable volume of new work without undue overtime or increase in tools or personnel.

The present increase, however, comes on top of a record year which followed two years that were hardly "slack." Expansion has been the word since 1923 and an 8 per cent increase in advertising has meant the addition of new machines to the battery, overtime several days a week on both ad and news machines, possibly an entire new composing room layout.

Wages, too, have continued to rise. No up-to-date figures for the entire country are now available, but the average increase over the 1925 scale is not less

than 5 per cent—over and above the increase in regular and overtime worked.

Similar conditions prevail in the foundry and in the pressroom, both of which have been taxed to capacity and beyond by the gigantic editions of recent months. New stereotype and press equipment, designed to save minutes and seconds between the deadline and the street have been ordered lavishly.

Interest charges and tremendous capital outlay are plus items that the advertising boom have brought, in addition to higher payrolls, to the mechanical departments' budget.

Upstairs, where the managing editor used to order "boil to bone" to get his news and features into 100 columns in a 28 page paper, the expansion giant has also waved his big stick.

One hundred columns would be "lost" in the 40- and 48-page editions of Autumn, 1926. For every column of new advertising, a column and a half of news and feature has been added.

The reader of many newspapers finds local news coverage little changed in volume. Reporting staffs and copy desks have a larger personnel than they had at the end of the paper shortage scare. They were then, speaking generally, at an irreducible minimum. Their pay, as a rule is higher than it was a few years ago, as newspapers are finding merit in the unwritten rule that a good reporter ought to get at least as much as a compositor.

Press association wire service is steadily expanding. One sees newspapers in a city of 25,000 with four leased wires running into the news room—with added wires for special occasions. Papers of that size and smaller are taking special service on baseball, football, racing, Wall Street, often over special wires, leaving the main lines clear for an ever-growing volume of general news.

Hardly any important newspaper regards itself as complete without a daily page of news pictures—and the price of news pictures has almost doubled in the past year. "Exclusive" pictures of an important event will bring sums that no publisher would have considered paying a few years ago.

Sports in the early post-war years were begrudged two pages of news space daily and four or six pages Sunday was regarded as bordering on indecency. In 1926 metropolitan papers give four or six pages daily and a whole Sunday section to sports. And the cry is for more! Advertising representatives ask for another sport page to give position to a new tobacco account and they often get both! The circulation manager calls for reports of amateur games in the suburbs and he gets his page of agate box scores or summaries. He urges a new sporting edition between Wall Street and the "Seventh Race" and the forthcoming "Peach" or "Green" goes after the pennies of those who quit work early.

Circulation is the publisher's great

(Continued on page 71)

SPLITTING A BILLION DOLLARS

ONE billion dollars, plus \$140,000,000, will be the approximate gross income to the daily newspaper publishers of the country from advertising and circulation for this year—provided that dark spots on the advertising map do not become large or frequent. Of that huge sum, only the part that is spelled in figures represents what will be entered in the net profits column. Possibly some of it will not get that far. The remainder will go back whence it came into the various channels of commerce.

The paper manufacturer will get \$162,500,000.

Railroads which move the white newsprint and the returned cores will receive more than \$10,000,000.

The ink makers will take more than \$1,500,000.

Compositors, pressmen, stereotypers and other mechanics will receive about \$175,000,000.

Editors, copy-readers, reporters, and correspondents will draw as their share about \$160,000,000.

Editorial department expenses, including press service, special leased wires, features, telegraph and telephone, car-fare, taxis and other incidentals of the expense account—it will take checks totalling \$70,000,000 to pay these bills.

The go-getters of the advertising staff and the special national representatives will account for another draft of \$75,000,000.

Commissions paid to advertising agencies will this year approximate \$45,000,000, plus another \$6,000,000 for cash discounts.

Expense of getting, distributing and holding circulation, including the operation of motor vehicles and interest on the purchase of new equipment, will dip into the till to the extent of \$160,000,000.

General administration, including for the purposes of this survey, taxes, all promotion work and interest on the construction of new buildings and the purchase of new equipment, will account for another \$160,000,000.

What remains—about \$115,000,000—represents the profit to the 2,000 daily newspaper publishers before Federal taxes. It is about 10 per cent on the turnover for the biggest year's business in history!

PUBLIC READY TO AID FIGHTING EDITORS

Will Defend Men Who Battle Political Corruptionists, Carl Magee Tells N. Y. Advertising Club Members

Advertising men of New York gave Carl C. Magee, fighting editor of the *Albuquerque* (N. M.) *State Tribune*, a rousing reception when he appeared as an honor guest at a noon-day luncheon at the Advertising Club of New York on Friday. The main dining-room of the big club house was filled to overflowing and Magee reviewed his adventures amid applause.

Since Magee's talk before the advertising men of the metropolis a year ago, the tragic climax had come in his bitter warfare against local political corruption. He told with tears in his eyes of his frightful misfortune to shoot and kill a man who was defending him when his arch-enemy, former Judge Leahy, was beating and kicking him with murderous intent in the lobby of a hotel.

The editor told the story of his adventures in the newspaper field of the Southwest, explaining step by step how the forces of corruption in public life had met his opposition to their methods by all known means, from social and economic oppression to personal violence. He stressed the fact that Don Mellett's assassination at Canton, O., was but another instance of the same diabolical defense of the corruptionists when they encounter a free newspaper which attempts to keep faith with its readers by telling them what they have a right to know concerning their public business.

"The Mellett case," said Magee, "illustrates the fact that there are no geographical boundaries for this menace to the free press. An editor who speaks out concerning protected vice and crime and corruption in public office takes his life in his hands. Do not be deceived—no part of this country is immune from that danger."

The speaker held that free press is the greatest single bulwark of human freedom and progress. Its great trust is to assail public wrongs, being careful not to confuse with this function the exploitation of private scandal.

"The best kind of government that man has been able to devise does not, and cannot, operate successfully if it is in the hands of crooks," he said, illustrating the point that the trouble in the United States is not with public institutions but with the maladministration of them by dishonest men. He had no nostrum, no cure, for public evils except to whip out of public office men who dishonored them by misconduct.

"We think that liberty is a fact, in this country," he said, "but is it a fact if the press is gagged?" He asserted that when he went to New Mexico he found the newspapers "controlled by a corrupt gang, and public sentiment dead." The crookedness was bi-partisan, he being a Republican, and Albert C. Fall, who he claimed was the master mind of New Mexico political corruption, had been a "Kentucky Democrat, turned Republican for what he could get out of it." He told of Fall's threats against him and of his discovery of the link between Fall, then Secretary of the Interior, and Harry Sinclair, which led to the Teapot Dome revelations.

The editor urged his audience to believe that the people of this country will "rise up in their might" and defend any honest editor who gives battle to political corruptionists, and gave instances of how his fight has been sustained by the common people of New Mexico throughout the campaign.

"Such is the love of the principles of our government," he said, "that the people will fight when they are at stake, providing the newspapers make the issue clear."

Mr. Magee was introduced by Charles C. Green, president of the club, and thanked and invited to come again by G. T. Hodges, the vice-president. Among the guests at the speaker's table were

Cyrus H. K. Curtis, Roy W. Howard, E. S. Friendly, William H. Dodge, W. W. Hawkins, S. S. Schuyler and Karl Bickel.

LIBEL APPEAL ARGUED

Case of Newburgh (N. Y.) Plaindealer Editor Heard in Albany

The appeal of Charles F. McKenzie, editor of the *Newburgh* (N. Y.) *Plaindealer*, from the affirmation by the Appellate Division, Second Department, of his conviction in Orange County of criminal libel, was argued before the Court of Appeals, Albany, N. Y., Oct. 1.

In the Newburgh mayoralty campaign of 1923, McKenzie was an independent candidate, opposing Roy W. Spencer, the Republican, and John Rothery, the Democratic candidates. The alleged libel was published Nov. 5, the day before election, and was contained in a special campaign edition of the *Plaindealer*, of which 3,000 copies were distributed free.

Spencer was elected and instituted a criminal proceeding against McKenzie, who was found guilty at a trial before Justice Morschauser and a jury and fined \$250.

PULITZER BAGS RARE GAME

N. Y. World Editor Reaches Paris After Three Months in Africa

Ralph Pulitzer, editor of the *New York World*, emerged from the jungles of East Africa this week, arriving in Paris with 15 varieties of big game bagged during a three months' hunt with Paul Dougherty, the painter.

Among the trophies Mr. Pulitzer brought back with him was the rare kudu, rare even in Africa's darkest spots, and specimens of the impalla, eland, wildebeeste, kongoni, warthog and bat-eared fox. Besides these Mr. Pulitzer had with him a fine lion's head. He also shot several gazelles, a rhinoceros, a water buffalo, and a buffalo. While passing many elephant herds, Mr. Pulitzer saw none with long enough tusks to justify shooting.

Mr. Pulitzer will sail for New York on Oct. 13, on the S. S. *Olympic*.

NEW YORK CIRCULATIONS SHOW 10 PER CENT INCREASE IN OCTOBER STATEMENTS

NEW YORK newspaper circulations increased from 4,292,472 copies daily to 4,774,639 copies daily for the six months period ending Sept. 30, 1926, over the same period in 1925, according to semi-annual post office statements filed this week. The increase is 462,167 copies, or 10.5 per cent.

Evening newspaper circulation increased from 1,746,686 copies to 1,959,023 copies—a gain of 212,337 copies, or 12.1 per cent.

Morning newspaper circulation increased from 2,545,786 copies to 2,815,616 copies—a gain of 269,830 copies, or 10.6 per cent.

Gains over the Oct., 1925, statement are shown by 11 of the 15 newspapers listed, two morning and two evening papers failing to show an advance.

Gains by the three tabloids—the *News* and the *Mirror* in the morning, and the *Graphic* in the evening, total 437,277 copies, or 94.5 per cent of the total gain.

Comparative figures follow:

AVERAGE NET PAID CIRCULATION FOR SIX MONTHS ENDING				
Newspaper	Sept. 30, 1926	Mar. 31, 1926	Sept. 30, 1925	Mar. 31, 1925

Total Daily	4,774,639	4,509,893	4,292,472	4,177,545

New York World increased city circulation price from 2 to 3 cents Jan. 1, 1925. Brooklyn Times increased price from 1 to 3 cents Feb., 1926.

Brooklyn Standard Union decreased price from 2 cents to 1 cent March, 1926.

New York Evening Post decreased price from 5 cents to 3 cents, daily except Saturday, August, 1926.

#No Sunday edition.

FINAL OFFER TO TYPOS BY N. Y. PUBLISHERS

Lynch's Visit Followed by New Offer of 3-Year Contract, \$5 Increase—Owners Demand Arbitration If Offer Is Rejected

Renewed efforts were made this week by the Publishers' Association of New York City, with the assistance of President Lynch of the International Typographical Union, to reach an agreement on the wage scale and contract with Typographical Union No. 6. The result of conferences which ended Wednesday night was an agreement to resubmit to the union the publishers' proposal which the union rejected a few weeks ago, coupled with the publishers' offer to arbitrate, and with the understanding that if the proposal is rejected, it will be definitely withdrawn and the publishers will insist upon immediate arbitration.

The union will vote Oct. 17 on the proposal, the terms of which are as follows:

A three-year contract, with an increase of \$3 per week effective as soon as the contract goes into operation, and further increases of \$1 in 1927 and 1928. This proposal, which was endorsed by the scale committee, was rejected at a union meeting Aug. 29. The publishers' earlier proposal, calling for elimination of the reproduction clause and a three-year contract, with annual increases of \$3, \$2, and \$1, was also rejected by the union.

The old contract, which expired July 1, provided wages of \$60 day, \$63 night, 45 hours a week, and \$63 for a 42-hour lobster shift.

PRINTERS HONOR EILERT

Frederick Eilert, president of the New York Employing Printers' Association, was given a "surprise party" Oct. 2 by 200 associates in honor of his 60th birthday anniversary and his long service in the organization. Speakers included, John Clyde Oswald, managing director of the association, and Frank B. Berry, vice-president of the American Type Founders' Company.

EDITOR & PUBLISHER CALENDAR

- Oct. 13—New England Daily Newspaper Assn., fall meeting, Springfield, Mass.
- Oct. 17-20—Graphic Arts Assn., annual convention, Detroit.
- Oct. 18-19—Insurance Advertising Conference, fall meeting, Tuller Hotel, Detroit.
- Oct. 18-19—Carolinas' Circulation Managers Assn., 7th annual conference, Spartanburg, S. C.
- Oct. 19-22—Outdoor Advertising Assn., annual convention, Biltmore Hotel, Atlanta, Ga.
- Oct. 19-20—Inland Daily Press Assn., October meeting, Sherman Hotel, Chicago.
- Oct. 19-20—New York State Circulation Managers Assn., annual convention, Martinique Hotel, New York.
- Oct. 21—Assn. of Newspaper Advertising Executives, directors' meeting, Morrison Hotel, Chicago.
- Oct. 21-22—Audit Bureau of Circulations, annual convention, La Salle Hotel, Chicago.
- Oct. 21-22—Agricultural Publishers Assn., annual convention, Chicago.
- Oct. 21-22—American Society of Sales Executives, annual convention, White Sulphur Springs.
- Oct. 21-23—University of Michigan Press Club, 8th annual conference, Ann Arbor, Mich.
- Oct. 24—Fortnightly Forum, Debate on Publicity, Park Lane Hotel, New York.
- Oct. 25-26—International Advertising Assn., 10th District, annual convention, Beaumont, Tex.
- Oct. 27-28—American Association of Advertising Agencies, annual convention, Mayflower Hotel, Washington, D. C.

\$50,000 LIBEL APPEAL ARGUED IN ALBANY

N. Y. American Article Concerning Assemblyman Evans Was Fair Comment and Criticism, Lawyer Contends

The appeal of The Star Company, publisher of the *New York American*, from a judgment of \$50,000 damages for an alleged libel in favor of former Assemblyman W. S. Evans, of New York, was argued before the Court of Appeals in Albany, Oct. 5. The verdict of the jury in the New York supreme court was for \$100,000 compensatory and \$25,000 punitive damages, which the appellate division, first department, reduced to \$50,000.

The alleged libel was contained in an article telegraphed by J. E. Watson, Albany staff correspondent, to the *American*, to the effect that Assemblyman Evans had been bribed to absent himself from a meeting of the Assembly judicial committee, April 16, 1920, when the so-called Jenks bills, enabling transportation corporations throughout the state to raise fares, was under consideration. The vote of Evans, if cast against the bills, would have caused their defeat.

The *American* was conducting a campaign against the bills and later published articles regarding an alleged "slush fund" to promote the passage of the bills and attacking Assemblyman Evans. At the trial the other causes of action, except the bribery charge, were withdrawn, but the articles were admitted in evidence by Justice Proskauer for the purpose of showing malice and on the question of punitive damages.

Clarence J. Shean, appearing for the Star Company, contended the article was a fair criticism and comment of a member of Assembly in the performance of public duties, and that it was reversible error to permit the jury to consider damages in his professional capacity as a lawyer. Martin Conboy, representing Evans on the argument.

CLEVELAND NEWS OCCUPIES \$2,000,000 PLANT

Five-Story Limestone Structure Houses Complete New Mechanical Equipment — Large Community Auditorium on Fifth Floor — Twenty-Eight Press Units Extend in 210 Foot Line

THE new \$2,000,000 home of the *Cleveland News*, now completed and open for inspection of the public, is generally conceded to be one of the most modern newspaper plants in the country.

It is an imposing five-story structure of Indiana limestone, extending 127 feet on Superior avenue, 281 feet on East 18th street, and 127 feet on Rockwell avenue. Construction work was started in the spring of 1925.

The interior finish of the new building is of great beauty. The main lobby walls are of Rose Tavernelle marble, brought from Italy, and the floor is of pink Tennessee marble.

On the left and immediately beyond the wrought iron entrance to the display advertising department are the two passenger elevators. In the rear is the entrance to the spacious press room and to the right is the stairway and the entrance to the classified advertising department. On the Superior front of the second floor are offices occupied by the foreign advertising and Martha Lee departments, drama, motion picture and political editors, the advertising art department and the automobile department. To the rear of the comparatively small motor lobby is the door entering upon a balcony overlooking the press room, from which visitors may watch completed copies of the *News* being delivered from the superspeed presses at the rate of more than 2,000 per minute.

Although the second floor offices, like the main lobby, are separated by only a few feet from the din of roaring presses, sound-proof walls and ingenious engineering methods were employed successfully to eliminate all possible vibration and noise from the machinery.

On the third floor along the Superior avenue front are the offices of the chairman of the board of directors, the president and vice-president and the executive conference room. Immediately beyond the office of the president and facing East 18th street, is the editorial conference room and beyond that the office of the managing editor.

To the rear of the city room are the offices of the Associated Press, also sound proof. Beyond these is the accounting department, and on the Rockwell avenue side of the building is the circulation department. Crossing the narrow hallway which bisects the second floor one comes upon the telephone switchboard, and walking toward the front of the building one passes successfully the first-aid room, the classified advertising telephone board, the *Cleveland News* postoffice, the editorial writers' office, the telegraph room, the conference room, the editorial artists, and finally the Sunday department.

The front of the fourth floor of the building is occupied by the photographic studio, the barber shop, the stock ticker room, the promotion department, the mechanical superintendent and the engraving room. Beyond is the composing room and the stereotype room. The fifth floor is given over exclusively to the *Cleveland News* cafeteria, open to the public, as is the barber shop, and the *Cleveland News* auditorium, completely equipped with motion picture projection machines, a motion picture screen and stage paraphernalia and having a seating capacity of approximately 425. The auditorium is the *Cleveland News*' gift

to the public, for it may be used without cost by social bodies, civic organizations or worthy individuals for any mode of entertainment in keeping with the standards of the *News*.

While the new building is so spacious that in itself it provides ample latitude, the plans for expansion do not limit themselves to the structure as it stands. The vacant lot to the east of the building, now used as a parking space for employees' automobiles, belongs to the *News*, and if necessity requires the building can be extended over this property as well as upward.

Entirely new mechanical equipment was placed in the building.

The layout of the floors is for progression downward from copy to press, the composing, engraving and stereotype rooms being on the third floor with the press and delivery rooms on the ground, thus providing a steady course for all material. News matter is sent from the news room on the second floor to the composing room through compressed air tubes.

The linotype battery occupies the entire length of the east side of the composing room, the machines numbering 33. They are arranged in two groups, ten across the aisle from the advertising frames being used exclusively for advertising copy, and 23 machines in the news section for setting news material in type. Directly in back of the copy-cutter's desk and immediately adjacent to the correction bank is a linotype used almost exclusively for corrections. There is scarcely a lost motion in getting corrected proofs to this machine, as it is directly in line with the automatic conveyor which carries rough proofs to and corrected proof from the proofreading department.

The use of electric melting pots on the linotype machines does away with any foul odors which might arise from the use of gas or coal. This, coupled with the natural ventilation, does away with the necessity of using automatic blowers, fans or any other artificial means of ventilation, and the air in the composing room is always fresh and invigorating.

At the end of the long line of linotypes is the machinists' quarters, completely equipped. Beyond this is the stereotype room.

The press room, flooded with natural light from both sides and above, offers a spectacular view to visitors from the raised gallery which runs along both ends and permits spectators to look down on the entire area and see the presses operating, both in detail and in bird's-eye view

of the whole. The press battery consists of five superspeed presses, made up of twenty-eight units and capable of being operated in almost any combination that can be needed in modern newspaper practice.

The presses have been arranged in a straight line extending 210 feet back from the rear of the main lobby. This, according to R. Hoe & Co., the manufacturers, is the second largest single line

of paper are moved to storage or to presses without requiring labor other than to swing them to the individual transport trucks. The incoming paper supply is brought to the reel room direct from the motor trucks by a lowerator. The regular normal paper storage is close to 15,000 tons.

D. R. Hanna, Jr., is president and general manager of the *News*. The *News* came into the possession of the Hanna

A view of the press room, showing the long line of giant superspeed presses 210 feet in length

installation in the world. In addition to the five black and white presses there is a 15-cylinder color press on which the Sunday magazine and comic supplements are printed.

For supply of ink to the news presses there is an installation of three huge tanks, each holding 2,500 gallons of ink and two compression tanks, each holding 600 gallons of ink, which they feed to the presses. The roller wash oil and commercial zylol is stored in other tanks and drawn as wanted by pumps in the respective departments that use it.

In the reel and paper storage room beneath the press room the floors are grooved into tracks and provided with innumerable turntables, so that the rolls

interests in 1912, through purchase of the paper from Charles A. Otis.

Other officers of the company are: George F. Moran, chairman of the board; Mark A. Hanna, vice-president; J. J. Levins, treasurer. These, in addition to Carl H. Hanna, compose the board of directors.

T. A. Robertson is managing editor of the *News*.

NORWEGIAN STRIKE SETTLED

Caused Large Loss in Pulp and Paper Exports

The strike, which has completely tied up the Norwegian pulp and paper industry since Aug. 15, has been settled, according to a cablegram received in New York this week, but no information as to terms is yet available.

It is estimated that the strike caused a loss in Norwegian exports of approximately 45,000 tons of groundwood, 40,000 tons of chemical pulp, 24,000 tons of news print and 20,000 tons of other grades of paper.

Norwegian exports of pulp and printing paper from January to July, 1926, inclusive, were in round numbers as shown below, the figures being converted to 2,000-lb. tons:

To	Groundwood	Chemical Pulp	Printing Paper
United States	1,000	50,000	2,000
Great Britain	150,000	63,000	33,000
France	13,000	9,000	18,000
South America			18,000
Russia			22,000
Other countries	17,000	35,000	41,000
Total	180,000	157,000	133,000

Note: The "Printing Paper" classification is composed of about three-fourths news print paper.

NEW FLORIDA NEWS BUREAU

The Tallahassee (Fla.) News Bureau has been organized, with Robert S. Dawe as owner and manager.

New equipment from basement to roof was installed in this palatial new \$2,000,000 home of the *Cleveland News*.

WALL STREET'S ANNUAL ADVERTISING BILL IS ESTIMATED AT \$16,000,000

National Prosperity Is the Return on This Big Investment, Says Rudolph Guenther, New York Financial Advertising Agent—Daily Press Produces Millions

Rudolph Guenther

INCREASED financial advertising in newspapers was this week declared to be one of the chief causes of the present national prosperity.

The assertion was made by Rudolph Guenther, president of Rudolph Guenther-Russell Law, New York financial agency, who, in an exclusive interview with **EDITOR & PUBLISHER**, supported it in such a brilliant manner that it became more plausible than the usual "interpretations" of the increase in the public's present-day purchasing power.

Meet Mr. Guenther in his plant at 133 Cedar street, New York—a five-story building devoted to financial advertising in "Wall street's backyard" and he will rush you off your feet with his cheerful enthusiasm and aggressiveness. After 29 years of pioneering, he has built up a business symbolic of the current "golden era" in America's business. More than in most cases the compact, busy, speedy agency plant directed by Mr. Guenther is the shadow of the man responsible for its creation. But this is a story of national, rather than personal prosperity, and it is on a subject about which Mr. Guenther talks easily.

"Today," he declared, "millions of dollars are being raised by responsible investment houses through the power of the press. That surplus capital of the American people is developing our great industries, is furnishing more money for commercial advertising, is rounding out the economic cycle that means prosperity.

"There has been an 80 per cent increase in financial advertising since the war. Our own agency is now handling more than a thousand different accounts, placing a total of advertising valued at between \$4,000,000 and \$5,000,000 a year.

"And once financial advertising was considered a mysterious thing, impossible to understand, much less to use effectively. Now the leading investment houses have learned that merchandising support is as important a function for finance as it is in the marketing of any commodity.

"The Liberty Loan campaigns educated the bankers, brokers and investment houses to the value of newspaper space.

"Today newspapers are giving more and more space to financial news, and

with this increase has come a concomitant increase in financial advertising.

"It is estimated that Wall Street's advertising bill last year ran into many millions. It is impossible to figure the exact amount. Anywhere from \$12,000,000 to \$16,000,000 is a safe guess.

"Our agency alone paid bills to three newspapers amounting to more than \$1,000,000. Our business, however, takes in hundreds of newspapers and magazines."

Mr. Guenther wanted it understood that he didn't favor one medium over any other. Each separate case required its own treatment—"just like a doctor treating an ailment," he said.

"But," he continued, "and a survey of the plant bore him out, 'speed and accuracy are the chief essentials of efficient financial advertising. Bankers bid for securities. They want to move them quickly. They need to have their advertisements placed within two or three hours in the newspapers. Currencies may fluctuate meanwhile. They must get the story of their securities into the newspapers quickly to get them sold.

Mr. Guenther praised newspapers and certain magazines for their encouragement of investment education and presentation of unbiased fact, entailing heavy expenditures by these publications in supplying more and more news of domestic and foreign markets.

"In all probability we would not have today such widespread prosperity—industrial and otherwise—had it not been for the development in the last few years of what must now be considered as a distinct field in advertising," he said.

"By this is meant the recent evolution of the financial advertisement in its educational aspects; its increasing use by both corporations and bankers in raising the necessary capital for industrial refunding, expansion of operations, creation of new and better products, and better markets for securities at home and abroad. More than any other factor, this dissemination of information has been responsible for the enormous increase in numbers of investors. These investors are the backbone of our large-scale industrial operations.

"I believe that financial advertising, with its careful and accurate presentation of constructive fact, is pointing the way to still greater developments and the essential financing to carry them through. The thought and research given to the preparation of the present-day financial advertisement are creating a high degree of standardization in investment policy which is extremely helpful to the individual corporation in marketing its securities. The degree of service these corporations can render depends naturally upon their ability to market their capital issues. The so-called institutional or educational advertisement is designed primarily, of course, to arouse interest in a given company's securities or good will for individual banking houses. These campaigns often contain the results of long and patient research pertinent to entire industries and of great value to the public's store of information."

Speed was mentioned earlier in this interview. It is the atmosphere that greets you the moment you enter this financial advertising agency. The ground floor space, with the exception of the private office of Mr. Guenther, is given over to a telegraphic office. The plant runs the full 24 hours.

Often advertisements are telegraphed to distant newspapers. Telephoto is also frequently used.

FOREIGN CORPS HONORS REUTER'S CHIEF

Sir Roderick Jones Tendered Luncheon at Banker's Club in New York—President Noyes of A. P. Speaks

Sir Roderick Jones, chairman of Reuter's, visiting New York on his way to England from Australia, was the guest of the Association of Foreign Press Correspondents at luncheon at the Banker's Club on Thursday. The occasion was marked by the attendance of the board of the Associated Press which is now meeting in New York.

Dr. A. M. Nawench, of *Czas*, Warsaw, president of the association, welcoming the guests, referred to this unique assembly of "brothers in arms" united in a community of aims and ideas.

"Our common daily task," he said, "never grows monotonous not so much because of the variety of news passing through our hands—not even because of the element of the unexpected and of surprise—but because of the consciousness we have of human ideas of enlightenment, peace and progress, which are the moral aims of our profession."

Percy S. Bullen, dean of the correspondents, for 21 years representative of the *London Daily Telegraph*, introduced Sir Roderick on behalf of the Association but more particularly on behalf of the British members.

Sir Roderick Jones spoke of the power reposing in the profession of journalism.

"The more I travel about the world," he said, "and the more I see of the journalists of other races, the more I am impressed by the power they have for the dissemination of information that shall establish better understanding among the nations of the world. Those of us who have seen the results of the terrible war must feel that we can do no greater thing than strive so as to disseminate the truth that misunderstandings will be removed, and possible causes of another conflict prevented—at all events in our time."

He went on to show the tremendous effect of improved mechanical communication. Never in the history of mankind he declared, had the dissemination of news been so organized and systematized.

"There is a hunger for facts, for information," he said. "And I believe that that hunger for facts and the satisfying of that hunger will increase at an enormous rate."

Because of this widespread demand for news he showed that there was room nowadays for both the agency and the special correspondent. They were no longer rivals; they could co-operate.

"There used to be a feeling on the part of the correspondent," he observed amid laughter, "of—well, confound the fellow Reuter, he's a damned nuisance. But that feeling no longer exists. The agency gathers news that it might be rather boring for the special correspondent to have to gather; while the special correspondent has a freedom that is not allowed to the agency. Consequently the agency's business is to deliver the heavy goods, and the special correspondent supplies the exposition and the explanation which the agency is not in position to deliver."

Frank B. Noyes, hailed by President Nawench as a "commanding figure of American journalism" also spoke.

ASSOCIATES HONOR MacDONALD

Give Farewell Party to Veteran Who Leaves for New Post

A testimonial dinner to James MacDonald, who has severed his connection of 20 years' standing with the *Newark Evening News*, was tendered Saturday evening, Oct. 2, by his associates of the Orange bureau office of that publication. Mr. MacDonald has been editor of the Orange branch of the News for the past few years.

He has resigned to become associate editor of the new *Daily Courier* of the Oranges and Maplewood, and will formulate editorial policies of the new paper with G. Clifford Jones, editor. He is succeeded by Joseph A. Rush, who has been connected with the *Newark Star-Eagle* for the past 12 years and who has headed that paper's Orange branch for more than five years. Anard W. Littman and James P. Copeland have been appointed by the Star to succeed Mr. Rush.

HOPWOOD TO ADDRESS MICHIGAN PRESS

President of A. S. N. E. to Speak Eighth Annual Club Conference in Ann Arbor, Oct. 21-23—Other Speakers Announced

Erie C. Hopwood, editor of the *Cleveland Plain Dealer* and president of the American Society of Newspaper Editors and David Lawrence, president of the Consolidated Press Association, will be speakers at the annual banquet given by the press of Michigan during the eighth annual conference of the University of Michigan Press club in association with the University's school of journalism. The conference will be held in Ann Arbor, Oct. 21, 22 and 23.

Other speakers during the conference include Prof. E. A. Frayer, James M. Murfin, of Detroit, a regent of the University, and Prof. W. D. Henderson, who will be speakers at the Thursday night banquet, when the visiting newspapermen will be guests of the University.

Other speakers on the conference program include Prof. John B. Waite, Prof. Thomas H. Reed and Dean W. R. Humphreys of the University staff, Lee Worthington of the *Grand Rapids Press*, Ben Conger, formerly Associated Press correspondent at Berlin, George Adams, 52 years editor of the *Fowlerville (Mich.) Review*, Virgil V. McNitt, president, M. Naught Syndicate, New York, Miss G. Vin of Oxford, England, and well-known Michigan newspapermen.

The committee arranging this year's program includes A. R. Treanor, editor of the *Saginaw News-Courier*, president of the Michigan Press Club; Louis W. of Port Huron, George R. Averill, Birmingham, and Frank J. Russell, Iron Mountain, vice-presidents, and P. John R. Brumm of University of Michigan, secretary and treasurer.

ADDRESSES WANTED

George L. Bird
B. S. Brown

The Significance of Detroit News Advertising Leadership of the World

In a city one-sixth of New York's size, The Detroit News nevertheless carries 3,269,208 lines more advertising the first 8 months of 1926 than New York's outstanding advertising medium—The New York Times.

TO comprehend fully the relative strength of The Detroit News among the great newspapers of the world, compare the population of Detroit and suburbs with that of the great metropolitan area of New York. Detroit's population is one and a half million; New York's is six times as great.

Nevertheless The Detroit News advertising for the first eight months of 1926 exceeds that of The New York Times, generally conceded America's outstanding newspaper, by 3,269,208 lines for the first eight months of 1926.

The Detroit News
furthermore tops the

list of all great American newspapers in the matter of advertising patronage not only weekdays but weekdays and Sundays combined, carrying 22,447,362 lines during the first 8 months of 1926.

The net paid combined weekday and Sunday average circulation of The Detroit News exceeds 335,000 (350,000 Sundays and 320,000 weekdays) and is larger than that of any other Michigan newspaper. In fact no other city of Detroit's size or larger is so thoroughly covered by one newspaper as Detroit is by The News.

You also can profit through such coverage

The Detroit News

Detroit's HOME Newspaper

A. P. DIRECTORS HOLD OCTOBER MEETING

Plan for Picture Service Presented—
Anthony Succeeds Clark on Executive Committee—Heavy Docket Considered

A plan for establishment of a news picture distributing service by the Associated Press was this week presented before the A. P. directorate, meeting in New York.

The directors went into executive session Oct. 5, at New York headquarters and were not expected to adjourn until late Friday, Oct. 8.

The news picture proposal was only one item on an unusually heavy October docket. Sessions, called early and extending late into the afternoon of three days, were presided over by Frank B. Noyes, *Washington Star*, A. P. president, and assisted by J. N. Heiskell, *Little Rock (Ark.) Gazette*, second vice-president.

Col. R. R. McCormick, *Chicago Tribune*, first vice-president of the A. P., and Walter A. Strong, *Chicago Daily News* were the only directors absent.

Kent Cooper, general manager, and customary spokesman for the directors, declined to issue any official statement on the board meeting when interviewed by EDITOR & PUBLISHER, Thursday afternoon.

EDITOR & PUBLISHER learned, however, that an application of the *Huntington (W. Va.) Advertiser* for a Sunday morning membership presented by J. H. Long, business manager, was denied by the directors on the opposition of Dave Gideon, who holds that membership for the *Huntington Herald-Dispatch*.

B. H. Anthony, publisher of the *New Bedford (Mass.) Standard*, was elected to the A. P. executive committee, succeeding the late Charles Hopkins Clark, publisher of the *Hartford (Conn.) Courant*.

Sir Roderick Jones, managing director of Reuters Limited, the British ally of the A. P., attended the board meetings.

The directors expressed satisfaction with a new series of A. P. advertisements being distributed in mat form free for publication by member newspapers.

The series consists of 52 different advertisements all written under the general heading of "Human Progress Through the Ages." In text and art the past and present of newspaper history are linked together in the copy, which is prepared by N. A. Huse, with Terry Gilkerson, a New York artist, drawing the illustrations.

HELD ON MURDER CHARGE

Brooklyn Eagle Man Confesses He Shot Former Friend

Gerald Dwyer, copyreader on the *Brooklyn Eagle*, is under arrest in New York on a homicide charge in connection with the killing of Joseph Ruffner, copyreader on the *Bronx Home News*, last Sunday night in the lobby of the latter's apartment house following a quarrel which involved Ruffner's wife.

Ruffner was shot three times and died a few hours later in a hospital. Dwyer was caught while running from the scene and later made a confession.

The trouble between the two men started following a practical joke played on Dwyer by Ruffner, Mrs. Ruffner, and several members of the *Washington Post* staff several months ago, Mrs. Ruffner told police.

She said that her husband arranged a joke in Washington whereby she was to call Dwyer by telephone and make him believe that a strange woman was making an appointment with him. Dwyer kept the appointment. Then she was introduced to him as Mrs. Ruffner and the assembled newspaper men had a laugh at Dwyer's expense.

Dwyer was graduated from Technical High School in Springfield, Mass., in 1918 and joined the staff of the *Republi-*

can, in that city, later doing newspaper work in Providence and Baltimore.

NEW PLANT FOR S. C. DAILIES

Negotiations have been completed by the *Spartanburg (S. C.) Herald and Journal* for the purchase of property upon which will be erected a modern fire-proof newspaper plant. A railroad siding adjacent to the property obviates the necessity for using trucks in newsprint, coal, and other supplies.

NEWSPAPER LIBRARIANS REELECT ALCOTT

Boston Globe Man Again Honored at Atlantic City Convention—Committee on Standard Classification Formed

The Newspaper Group of the Special Libraries Association held its fourth annual conference at the Hotel Chelsea, Atlantic City, this week.

Paul P. Foster, director of the reference department of the *Philadelphia Inquirer*, addressed the group on "Co-operation Among Newspaper Librarians."

Maurice Symonds, librarian for the *New York Daily News*, led a round table conference on "Handling Photos" during which he described the system used by the pioneer tabloid picture newspaper.

Another address of particular interest was given by Joseph F. Kwapil, librarian of the *Philadelphia Public Ledger*, on "Standard Classification For Newspaper Libraries," a problem confronting the newspaper group. A committee has been appointed to handle this problem and it is estimated that it will take two or three years to complete the work. Miss Jennie Welland, editor of the *Times Index*, led a discussion on classification and her excellent suggestions served to pave the way for the work of the classification committee.

Mrs. Stella M. Champney, editor of the *Michigan News Index*, Adrian, Mich., was present and described methods and classifications used in compiling her publication.

Richard Meyer, librarian of the *New York Daily Mirror*, spoke on "Efficiency in the Newspaper Library."

The following officers were reelected: William Alcott, librarian, *Boston Globe*, chairman; John Miller, librarian, *King Features Syndicate*, New York, vice-chairman; Maurice Symonds, librarian, *New York Daily News*, secretary-treasurer.

The resignation of Miss Agnes J. Petersen, librarian of the *Milwaukee Journal*, as secretary was accepted with regrets and it was voted to combine the office of secretary and treasurer.

Joseph F. Kwapil, librarian of the *Public Ledger*, first chairman and creator of the newspaper group, was made an honorary member as a slight token of appreciation for services rendered.

The conference closed with a dinner meeting at the Penn Athletic Club, Philadelphia. Chairman Alcott gave an address on the "Aims of the Newspaper Group." Daniel N. Handy, president of the Special Libraries Association, was honor guest.

Dr. George W. Douglas of the *Philadelphia Evening Public Ledger*, addressed the meeting on "The Newspaper Library and the Editor."

Frank H. Chase, reference librarian of the Boston Public Library, read a paper on "Important Reference Books of the Past Two Years."

Robert Hunt Lyman, editor of the *World Almanac*, spoke on "Saving Time in Research."

N. J. DAILY CELEBRATES 100TH ANNIVERSARY

Morristown Jerseyman Prints 100-Page Special Edition to Mark Event—Offered Prize for Oldest Copy

The *Morristown (N. J.) Jerseyman*, on Oct. 4, celebrated its 100th anniversary of continuous publication, with the issuance of a special historical edition of 100 pages. The edition gave a complete survey of the history of Morristown and Morris County, dating back to the time of the Indians in that section, through the subsequent settlement under the English monarchs, on to the Revolution and up to the present day.

The issue was the largest ever published in the county, it was stated. It contained intimate stories of the residence in Morristown of Washington, Alexander Hamilton and other great figures of Colonial days, and of Alfred Vail and F. B. Morse, inventors of the electric telegraph; Theodore N. Vail, and the late President Theodore Roosevelt.

Congratulatory letters on the Jerseyman centennial were received from President Calvin Coolidge and Governor A. Harry Moore of New Jersey.

The first issue of the *Jerseyman* appeared on Oct. 4, 1826. For the oldest copy turned into the office, the *Jerseyman* offered an award of \$100. Several hundred entries were made. An issue of Oct.

18, 1826, the third published (the *Jerseyman* at that time being a weekly), was the winner. The *Jerseyman* has complete files covering a period of 73 years.

Samuel H. Gillespie is president of the *Jerseyman*, Inc.; Alva E. Lamberton, treasurer and general manager; Ernest Henry Smith, editor; Philip L. Meyer, advertising manager; and Joseph M. Crimmins, circulation manager.

PUBLISHERS AT BILLBOARD MEET

Newspapermen to Speak at Outdoor Advertising Association Convention

Supporters of billboard advertising will be told the power of newspaper space at the 36th annual convention of the Outdoor Advertising Association of America, Inc., to be held in Atlanta, Ga., Oct. 18-23.

F. A. Wilson-Lawrenson, publisher of the *Atlanta Georgian*, will discuss "The Relationship Between Advertising Media"; Clark Howell, publisher of the *Atlanta Constitution*, will talk on "The Newspaper as an Indicator of Business Trends"; and Maj. John S. Cohen, publisher of the *Atlanta Journal*, on "The Newspaper and Its Place In Modern Business."

Kerwin H. Fulton, chairman of the Association's directorate, will preside at the meetings.

REPORTER TRIES PRISON LIFE

George Snell, reporter for the *New York Sun*, spent some time in Sing Sing recently to write a series on convict life, now being published by his paper.

Gentlemen:—

It is a pleasure to learn from your letter of August 23rd that Mr. Ehrnstrom reports our Pony Autoplate in splendid shape.

Your interest in the machine which you sold us has been really unusual for any one who has been paid in full, and we want you to know that it has been a pleasing experience to deal with a company who have been as ready to look after our interests as you have been.

Very truly yours,
THE WILLIAMSPORT SUN.

E. M. CASE,
Business Manager.

PIONEERS OF FREEDOM

AMONG the notable contributions to the great movement for a world-wide free press and concomitant public benefits is the code of principles and objectives adopted by the Press Congress of the World in its third session at Geneva-Lausanne, published in detail in other columns of this issue of EDITOR & PUBLISHER.

This vital document cries out for action based on practical intelligence among men and a true spirit of progress, reaching for better things, safer international relationships, higher ideals in politics and commerce, freedom among men, not through privilege or compulsion, but through the right of a man to understand and to proceed with the affairs of life on the basis of his knowledge.

The Press Congress of the World, starting from a small nucleus of idealistic and earnest men in the United States, has become a power. Its recent session was attended by delegates which represented more than 10,000 newspapers in 24 countries, some of which work under extremely unsatisfactory press conditions. It is rendering a magnificent service to the world's journalism. It is paving the way for newspaper work that will more truly represent the interests of the peoples of the world. In a high sense it is a pioneer of freedom.

The wills of four great publishers, Scripps, Lawson, Nelson and Munsey, give living publishers an interesting study of methods of finally disposing of newspaper properties.

DOWNRIGHT LOW

THAT persistent critic of the daily newspaper and publisher of his own magazine, H. L. Mencken, tells newspaper readers through the *Baltimore Evening Sun* that the job the reporters did on the Miami hurricane story was about the worst on record. He cannot understand why a "coherent report" of what had happened on Friday could not have been published right off the reel and asserts that the newspapers of the North handed their readers a "vast bath of bilge" for at least four days. With customary acid cynicism Mr. Mencken suggests that maybe the reporters were inhibited from telling what they knew by the Florida booster spirit, or perhaps it was merely what might have been expected from "local incompetence." At any rate, the gentleman thinks there should be an investigation and that the newspapers should "do some salubrious muck-raking in their own house."

At five a. m. on Saturday morning of the hurricane period the last wire from Miami went down and Miami was cut off from wire communication until Wednesday. That, Mr. Mencken, had a little to do with the case. The Tropical Radio station was blown to the ground. That added to the communications difficulty. Hurricanes are queer things—they do not lend themselves to organized thought or action and Mr. Mencken in his palmist reporter days might have found it difficult to write a "coherent report" of what had happened to half a state when everything that was loose was in the act of flying through the air, if he had been in Miami. His editorial is an insult to the men who risked their lives a hundred times to give him, safe at his breakfast table at Baltimore, the news of a great disaster. He says he has never seen a "big story worse handled in the field." From our reports of what the reporters did we have felt that the work was excellently done, considering the maddening handicaps. Mr. Mencken's suggestion that "Florida boosterism got in the way" is downright low. If "boosters" had been handling that story, would they have overestimated the dead, injured and property loss?

John Barton Payne, Chairman of the Red Cross, later made a criticism which appeared to have some basis in fact. He said that Florida officials, in their public statements, had attempted to minimize the disaster, thereby interfering with the work of the Red Cross. He did not say that newspaper men were responsible for suppression of the news, much less that they were incompetent. There is a legitimate dispute between Chairman Payne and Governor Martin, but Mr. Mencken's charges are not at issue.

O Lord, how manifold are thy works; in wisdom hast thou made them all; the earth is full of thy riches.—Psalms; CIV, 24.

RICKARD'S SECRET OIL

IT goes without saying that Mr. Tex Rickard is an authority on that entrancing subject, easy money. Every now and then we stand in wonder and awe before his widely heralded profits. His economic philosophy, therefore, becomes a contribution to the modern American success series in importance as the ace is to the pack. It is not often that an astute manipulator of golden combinations reveals to the world the hidden secret of his success, but Mr. Rickard is the exception. He speaks right out concerning his fabulous art of piling up "jack" with minimum outlay of physical energy or agitation of the cerebellum.

Mr. Rickard's success formula is extremely simple. He tells all those who yearn for miraculous accumulation (and who in America does not?) that the sure-fire way of realizing the dream is to "get your name and your proposition in the papers, and then sit back and take life easy."

The truth of this assertion is readily apparent and the rule, thus simply stated, stamps Mr. Rickard as a conspicuous genius of the age. He has practiced his system within plain view of the whole world for years and years, yet until now our slow wits have failed to comprehend it, much less to apply it to our own uphill fortunes. Mr. Rickard's magic publicity grease works. He declares he has recently discovered that it doesn't make any difference whether the newspapers praise him or damn him, the grist will be rich if only they will keep "Rickard" standing in their columns. Indeed, it is his opinion that unfavorable or contentious mention of his name and his "proposition" may be more valuable than flattery. This philosophy rather smacks of Barnum and while we are sure that Mr. Rickard has not failed to read the celebrated Bridgeportian's autobiography with interest and profit, still his methods are so great an improvement over Barnum's that we shall not discredit him with a comparison. For instance, Mr. Barnum actually bought advertising in newspapers whether or not they took editorial notice of his bunkum. Mr. Rickard apparently knows nothing of advertising. It is a commodity that is not in his life. He pays his way with passes to press stands for hundreds who do not write and occasionally "throws" sumptuous dinners, soup to nuts, for the few who can and do write.

Sports writers and their publishers will continue to keep Mr. Rickard's wheels well oiled, while he reclines, now with the consciousness that should they denounce his business and methods they would but add to his fortunes.

The old axiom about the peril of a divided house applies to "upstairs" and "downstairs" newspaper staffs that cannot synchronize, but seek to dominate each other.

ILLUSTRATING CIRCULATION

IN its advertisement in EDITOR & PUBLISHER last week *Philadelphia Bulletin* dramatized its immense circulation figures in copy of singular merit.

It was shown, by use of pictures and statistics, that the combined seating capacity of eight great American sporting fields, including Yale Bowl, Franklin Field and the Philadelphia Sesqui Stadium, is 527,065. With this figure thus accurately pictured the copy drew a sharp comparison with the Bulletin's 533,065 net paid daily average.

Nothing is more difficult to describe than a vast assembly of people, but the Bulletin's advertisement made the reader actually see its huge reading family.

ORDER OF BATTLE

WHAT are the steps that corrupt men and institutions take to silence the voice of a free newspaper when it is in their way? Carl Magee, fighting editor of *Albuquerque* (N. M. *State Tribune*), answered the question before several hundred members of the Advertising Club of New York at a noonday luncheon given in his honor today this week. In his thrilling narrative of his newspaper career in New Mexico he gave the following as the progressive defense methods of the intrenched politico-commercial clique when attacked:

The social weapon: When Magee started to be "irregular" and tell his readers what he thought they should know about public affairs, sly things were done to make his wife and family uncomfortable.

The economic weapon: Magee at one time owed \$60,000 to banks which suddenly began calling loans, though there had been an agreement that notes were to be extended. Attempts were made to throw him into receivership. He carried the case to his readers and like magic the common people of his city subscribed to a \$60,000 loan in amounts of \$250 each all cash, since no one was willing to write checks which would pass through the banks. Magee says that when an editor is defending American institutions the people, through love of the basic principle of our government, will sustain him, but he must be candid and tell his whole story.

Advertising boycott: It was when Magee's political enemies started to demand that merchants withdraw advertising from his newspaper that he met his most serious difficulty. He sold his paper to his enemies learned that they were fighting an institution with the money thus obtained he started another paper. It was then that the Scripps-Howard organization, knowing Magee only by reputation, came to him and volunteered financial aid.

"It was a different story," said Magee, "when enemies learned that they were fighting an institution that had more money to spend than they had. The audience cheered when Magee told of the remarkable circulation success of his newspaper."

Civil libel: Every time Magee "said anything" his enemies would sue him, and although it was a severe harassment and expensive they obtained only two judgments, each for \$1, and in both instances the verdicts were ordered by the courts.

Criminal libel: Finally, an attempt to jail Magee for his utterances was started in a distant county, where most of the people spoke Spanish and lived under the practical dictatorship of a political autocrat. It was the customary thing in that county for recalcitrant newspaper men to be dragged before the brutal judge of the district, one Leahy, and given the option of going to the penitentiary or abandoning newspaper work. Magee declined to make a choice and Leahy proceeded to railroad him. He spent 40 days in jail, but 4,010 telegrams poured into the Governor's office and Magee was pardoned.

Contempt of court: It was when Magee defied the power of the corrupt judge and repudiated the court that he was charged with contempt and then the farcical proceeding was entered into of trying the case before the offended judge. "Our task was to prove to Leahy that he was corrupt," said Magee, "and he ruled against us." Ultimately, after a long fight, it was demonstrated that the Governor had the power to pardon in a contempt case.

Personal violence: It was when all of these cover and "legal" lynch methods had been exhausted that Leahy, now retired to private life through Magee's personal campaign against him in his own county attempted to murder Magee in the lobby of a hotel, a story well known to every newspaper man. Magee fought for his life and, with tears in his eyes, told his audience of the great tragedy of the whole bitter business, the accidental shooting of a man who had sought to defend Magee.

Such are the menaces, and Magee is a living proof that they are real. He cited the case of Don Mellett as showing that "no part of this country is immune." The editor who candidly attacks protected crime and vice may pay with his life's blood. Fight on with courage and honor and tell your readers what they need to know to perfect their government, says Carl C. Magee. Free press is the greatest single bulwark of the nation and therefore worth sacrifices.

PERSONAL

WILLIAM RANDOLPH HEARST and Arthur Brisbane returned to New York this week from a trip to the east.

H. Campbell Jones, managing editor of the *Sydney* (Australia) *Sun*, will arrive New York Oct. 25, from London, en route to Sydney.

Dan R. Anthony, Jr., owner and editor of the *Leavenworth* (Kan.) *Times* and member of Congress from the First Kansas District, is ill at the Trinity Lutheran hospital, Kansas City.

Olin W. Kennedy, managing editor of the *Miami Herald*, has taken a three months' leave of absence from his duties that paper for a trip to Jamaica, Colombia and Costa Rica. In his absence J. D. Kuykendall, editorial writer, will have charge of his desk.

James Thompson, publisher of the *New Orleans Item-Tribune*, accompanied the Palm-to-Pine Tour from New Orleans to Winnipeg last week over the Jefferson highway.

J. Sherman McDowell, publisher of the *Alameda* (Cal.) *Times-Star*, has been appointed by Gov. Friend W. Richardson of California as a member of the State Harbor Commission.

IN THE BUSINESS OFFICE

D. BRANHAM has joined the business staff of the *Little Rock* (Ark.) *Arkansas Democrat*. For the last six years he has been with the advertising department of the Capper Publications.

Victor R. Blackledge, advertising manager of the *Sheridan* (Wyo.) *Post-Enterprise*, has been named managing editor of the Wyoming state organ of the American Legion, which is published in the Post-Enterprise plant.

B. M. Bryant, formerly with the *St. Paul Pioneer Press* and the *Minneapolis* *Star*, is now advertising manager of the *Seattle Star*.

IN THE EDITORIAL ROOMS

AROLD SCARBOROUGH, head of the London bureau of the *New York Herald Tribune* will accompany Queen Marie of Roumania to this country. He has been traveling with her party since her departure from Bucharest.

Carl E. Brazier has been appointed managing editor of the *Seattle* (Wash.) *Times*.

R. E. Fiske and Hugh O'Donnell of the *Boston* (Mass.) *Globe* sailed from Boston last week for a vacation at Bermuda.

James J. Montague, columnist and editorial writer for the *New York Herald Tribune*, returned on Friday from a vacation in Maine.

Thomas J. O'Neil, for the last two years on the copy desk of the *Springfield* (Mass.) *Union*, has been made city editor, succeeding Norman MacDonald, who has been transferred to the copy desk of the *Evening Union*.

Henry Cabot Lodge, son of the late senator, and a member of the *New York Herald Tribune's* Washington Bureau, has been loaned to the Republican Campaign Committee to help with the campaign of Senator William M. Butler in Massachusetts.

Forest Lowry, city editor, the *Salt Lake Tribune* and Mrs. Lowry, have returned from three weeks' vacation in California.

Joseph Butler, a member of the news staff of the *Scranton* (Pa.) *Times*, has been named a deputy boxing commissioner in Pennsylvania.

Harvey White, city editor of the *Buffalo Times*, has resigned and is doing political publicity. Marshall Taylor, former city editor of the *Buffalo Star*, will fill the desk of the *Times*.

Viatt McConnell has resigned from the city staff of the *Buffalo Evening* *Star*.

Jerry Walsh, formerly of the *Wilkes-Barre Times-Leader*, has joined the news staff of the *Scranton* (Pa.) *Sun*.

Theodore Stearns has returned as music critic of the *New York Morning Telegraph* after an absence of two years. During that time he had an opera accepted for presentation in Munich—the first time that an American opera was performed in Germany.

James White has been named night copy reader for the *Toledo Blade*.

Edward J. Bruen, former newspaperman and art critic, who writes under the penname of Don J. O'Byrne, has resigned as assistant editor of *Cartoons* magazine, to return to newspaper work.

R. E. Roberts, formerly of the *Sandusky* (O.) *Register*, and Russell Hogin, formerly with the *Oklahoma City Daily Oklahoman*, have joined the *Toledo Blade* copy desk.

Claude Griswold, formerly financial editor of the *Toledo Times*, is now with the United States Advertising Corporation, Toledo.

Miss Helen Murphy has been named church editor of the *Toledo Blade*.

Charles C. Cohan, managing editor of the *Butte* (Mont.) *Miner* and a member of the *Miner* editorial staff for more than 23 years, has resigned and will leave soon for Los Angeles where he will continue in newspaper work. He will be succeeded by A. B. Keith, former assistant managing editor.

Cleo O'Donnell, football coach at Holy Cross College, Worcester, Mass., has joined the staff of the *Worcester Post* and will write a series of football articles.

W. E. Smith of Wilmington, Del., has joined the local staff of the *Every Evening* of that city.

Allan J. Finn, Charles W. Lipscomb and Milton V. Snyder are new men on the copy desk of the *New York Herald Tribune*.

Henry C. Haskell, of the *Wichita* (Kan.) *Beacon* staff has joined the staff of the *Baltimore Sun*. Haskell is a son of Henry J. Haskell associate editor of the *Kansas City Star*.

J. B. Phillips of the staff, *New York Herald Tribune*, has returned from Florida, where he went by plane to cover the hurricane.

A. H. Gill is back at the sport desk of the *Scranton* (Pa.) *Times* after a long illness.

A. J. Maxwell, formerly on the staff of the *Bay City* (Mich.) *Tribune* will join the city staff of the *Ann Arbor Times News*, Nov. 1.

Ephraim R. Gomberg, Ann Arbor correspondent of the *Detroit Times*, has returned from abroad.

Paul Deland, city editor of the *Christian Science Monitor*, Boston, and Mrs.

FOLKS WORTH KNOWING

A. E. SANSOUCY, owner and publisher of the *Ogdensburg* (N. Y.) *Republican-Journal*, who recently purchased the subscription list of the *Ogdensburg Daily Advance*, is a man of recognized ability as a newspaper manager.

A. E. SANSOUCY

As a youth, Mr. Sansoucy had ambitions of becoming a printer. He learned the printing trade while still in his teens, and since then has had a wide practical experience in all its many branches.

In 1909, he assumed the management of the *Glens Falls* (N. Y.) *Morning Post*. During the same year, he was instrumental in bringing about the consolidation of the *Glens Falls Morning Star* and the *Morning Post*.

He then successfully conducted the *Post-Star* until 1918, when he went to Ogdensburg to take control of the *Republican-Journal*. This morning paper is now the only daily published in St. Lawrence County.

Deland, have returned from a motor trip through the White Mountains.

Frederick R. Sykes is now covering ship news for the *New York World*.

Archibald R. Johnstone, a sub-editor on the *London* (Eng.) *Daily Sketch*, has been spending a vacation in the United States and Canada.

Beverly Smith of the *New York Herald Tribune* is now assisting Percy N. Stone in covering ship news.

Merris Taylor, editor emeritus of the *Wilmington* (Del.) *Every Evening*, has returned from a vacation trip to Canada.

Carl Adamschick of the *Toledo News-Bee* staff is on an extended wedding trip in Europe with his bride, formerly Miss Mary Sloan.

E. John Long of the editorial staff of the *McKeesport* (Pa.) *Daily News*, sailed from New York, Saturday, Oct. 2, for England, where he plans to enter Oxford, Oct. 11. Long is a graduate of Columbia University and the Pulitzer School of Journalism. For the past year he has conducted a column on the editorial page of the *McKeesport Daily News*.

"Derry" Dixon, has been named managing editor of the *Jamaica* (N. Y.) *Long Island Daily Press*.

Metropolitan Newspaper Service

Maximilian Elser, Jr. Earl J. Hadley
General Manager Associate
150 Nassau Street, New York City

The Publisher's Best Buy

Fifteen years ago we first said what we now repeat: "Your dollar buys more value in Central Press service than when expended for any other commodity used in publishing a newspaper."

Our client list is twice as large now as it was two or three years ago. As our income has increased we have put every dollar we could spare into the improvement of our illustrated news and general feature service. Yet our prices are still moderate.

Let us tell you all about it, in person.

The Central Press Association

ADDRESS BOX A-963

c/o EDITOR & PUBLISHER

The Evening Star.

WITH SUNDAY MORNING EDITION

WASHINGTON, D. C.

Regular Issue 78 Pages 500 Columns of Advertising SEPTEMBER 30, 1926

With the issue of September 30 of 78 pages, The Star established a new record, with one or two exceptions, for all regular daily issues of American newspapers.

Furthermore, it presents this phenomenal issue without effort other than to serve its regular readers and advertisers. Indeed, The Star did not "make" this tremendous issue at all. Washington made it. It is a measure not of The Star's selling power, but of its drawing power. It reflects not what merchants were persuaded to do, but what they themselves wanted to do on their own behalf and on behalf of their city. It presents a newspaper in its highest aspects—not merely as a mirror held up to the life of a great community, but as the very heart and voice of that community, through which the vast energies and aspirations of all the people throb and make themselves vocal.

Thus viewed, how intimately is the newspaper bound up with the community! It brings, of course, the everchanging story of the outside world by telegraph and cable. It reflects the vivid local happenings — (tragical, startling or merely "run-of-the-mill") in its columns. But a great newspaper typifies more than simply the unfolding of the day's news. It is an economic necessity, as well as a medium of information and entertainment.

Through such a medium the vast economic life of a people finds expression. Without it that economic life would be seriously crippled, if not permanently impaired.

In this issue, for instance, business in all its phases finds expression—expression essential to its welfare. The merchants, large and small, present their seasonal offerings. The classified advertiser (whose name, in truth, is legion) is here with his insistent, brief, but highly personal and important messages. The national advertiser puts his goods on display in this universal shop window.

And why should they not? The Star, reaching into more than 90 per cent of the desirable homes of the Nation's Capital and its environs, is the obvious, ideal, inevitable medium of communication between those who have things to sell and those who are able and ready to buy. It reaches all, is trusted by all, serves all.

NEW THREE-STORY PLANT OF SPRINGFIELD (MO.) LEADER IS COMPLETED

New Springfield (Mo.) Leader plant.

THE Springfield (Mo.) Leader, evening and Sunday, has greatly enlarged its quarters by moving into a handsome new three-story fire-proof building at the corner of Jefferson Avenue and McDaniel street. The new building was erected on a part of the site of an older structure, which was the home of the Leader for 20 years, and was torn down a year ago to make way for the widening of the street. With the new structure the Leader's buildings occupy a plot 60 by 160 feet. The total floor space is 22,500 square feet.

The Springfield Leader was established in 1867, and is one of the oldest business institutions in the city. H. S. Jewell has owned the paper since May 27, 1895.

In connection with the expansion movement, the Leader has added another Linotype, making a total of eight. For the stereotype department, complete new equipment has been installed for making both type-high and shell plates, and a change has been made from wet to dry mats. A new Cutler-Hammer conveyor for the delivery of papers to the basement for carriers, and to the mail room has been added.

T. W. Duvall is assistant to the publisher and business manager; R. L. Kennedy, editor; F. M. Sullivan, city editor; J. M. Acuff, advertising manager and Bert Dunham, classified manager.

DAILY FIGHTS MERGER

Worcester (Mass.) Post Publisher Obtains Delay in Utility Case

Declaring that city officials of Worcester, Mass., were permitting a merger of the local gas and electric light companies to be rushed through, forming a light and power monopoly without giving the public an opportunity to learn what it was all about, the Worcester Post has started a drive to delay the action.

As a result of a campaign directed by John H. Fahey, publisher, with only 48 hours to accomplish his purpose, the merger has been delayed pending investigation of details. At a hearing before the Massachusetts Public Utilities Commission at Boston on Sept. 16, action on whether the forming of a single company was to be permitted was postponed until Oct. 19. Mr. Fahey appeared personally before the board and declared that hasty action should not be taken.

In its campaign the Post openly scored the city council for failing to vote to request a continuance of the public utilities hearing. The council had voted against asking the commission to delay action.

A recent EDITOR & PUBLISHER libel article which pointed out that newspaper campaigns for public good were less dangerous than careless mistakes in news columns, was pinned on the Post bulletin board as the drive opened.

The Post freely criticized Mayor O'Hara for refusing to take any action at the time of the hearing, and also offered to pay expenses if the mayor would engage an expert to inquire into the possible results of the big combine. Mayor O'Hara refused the Post's offer.

AUSTRALIAN WRITER HONORED

Dr. S. C. Lazarus, an Australian newspaper man, has been appointed political secretary to Stanley Melbourne Bruce, the present Prime Minister of the United

States of Australia. Dr. Lazarus was the Victorian Rhodes Scholar in 1919 and took the degree of Doctor of Philosophy at Oxford where he spent several years. On his return to Australia Dr. Lazarus was appointed to the Melbourne University as senior lecturer of Philosophy. After resigning this work he took up special duties on the staff of the Melbourne Herald.

SCHULTZ WITH N. Y. ENQUIRER

Sydney Schultz, formerly with the New York Evening Graphic, has been appointed advertising manager of the New York Enquirer, new Sunday evening newspaper. Before joining the Graphic, Mr. Schultz was associated with the New York American.

ASSOCIATIONS

DETROIT ADCRAFT CLUB, which will be host to the visitors attending the ninth annual convention of the Direct Mail Advertising Association, is making preparations for more than 10,000 persons from all parts of the world. The convention will be held Oct. 20, 21, 22.

Dates for the annual convention of the PACIFIC COAST ADVERTISING CLUBS ASSOCIATION have been set as June 19 to June 22, 1927. It will be held in Portland and the dates were selected for the convenience of delegates who may wish to attend the next world advertising convention which is to open in Denver on June 26.

Fortieth annual convention of the UNITED TYPOTHETAE OF AMERICA will be held in Detroit, Oct. 16 to 20, inclusive.

More than 200 persons have enrolled in the public speaking school to be conducted this fall by the ADVERTISING CLUB OF KANSAS CITY, Mo.

Under the auspices of the VIRGINIA PRESS ASSOCIATION, a newspaper institute will be held next summer, probably early in July, at the College of William and Mary, at Williamsburg, Va. Newspaper editors of national prominence and distinguished authorities on journalism will be invited to address the institute. Preliminary plans were discussed at a meeting of the executive committee of the association at Richmond, when it was decided to hold the mid-winter session of the association in Petersburg.

Members of the CONNECTICUT EDITORIAL ASSOCIATION will be the guests of the city of Willimantic and the Connecticut Agricultural College on Saturday, Oct. 23. Newspaper workers in general and their guests are invited, according to John E. Hersam, president, and Everett G. Hill, secretary, and the entire expense will be borne by the hosts.

WOMEN IN ADVERTISING AND JOURNALISM

Mrs. Bell M. Costello Edits Houston Chronicle's Society Page—New Company Publishing the Woman Citizen—Winners of Advertising Fellowships Named

PLENTY of opportunity for writing real feature stories is afforded society editors, according to Mrs. Bell M. Costello, who edits the society page of the *Houston (Tex.) Chronicle*.

"Doing society work is generally re-

presented of the International Advertising Association and president of the Dictaphone Company.

Sarah Uhr and Ruth Moore have won two-year scholarships at the Charles Morris Price School of Advertising and Journalism for writing the best themes on the subject "Better English in Business" in a contest sponsored by the Philadelphia Club of Advertising Women. The presentation was made recently by Mrs. Ellen Patton, of the *Philadelphia Inquirer*, and club president. The school is conducted under the direction of the Poor Richard Club of Philadelphia.

Ishbel Ross, who has been covering the Hall-Mills investigation for the *New York Herald Tribune*, is spending a vacation in Montreal.

The New York Newspaper Women's Club held its first reunion for the season at the club rooms at the Hotel Iroquois on Sunday evening, Oct. 2. Louella O. Parsons, a former president of the club, motion picture editor of the *New York American*, stationed in Hollywood, was the guest of honor. Miss Parsons came out of the west to attend the Dempsey-Tunney fight.

The dinner was a farewell also to Mabelle Burbridge, the former "Prudence Penny" of the *New York American*, who has recently married and will live in Chicago. Her husband, Leon C. Gray, is in the radio business.

Tributes were paid by Martha Coman and Helen Rowland, to the memory of Theodora Bean, president of the club, who died on Aug. 5.

At a meeting of the directors, Emma Bugbee of the staff of the *New York Herald Tribune* was elected president to complete the unfilled term of Miss Bean. Jane Grant of the *New York Times* was elected third vice-president, the other two vice-presidents being Josephine Ober of the *World*, and Helen Rowland of the King Features Syndicate. Other officers of the club are Martha Coman, *Scarsdale Inquirer*, treasurer; Mabelle Burbridge, correspondent secretary; Dorothy Herzog, *Daily Mirror*, recording secretary; Deborah Corle, *Herald Tribune*, chairman membership committee; Elsie McCormick, *Sunday World*, chairman house committee; Amy Hogeboom, chairman associate members.

Miss Laura Mount, formerly an advertising writer, has been added to the editorial staff of the *New York Evening Post*.

Miriam Rosenthal, formerly on the editorial staff of the *Dayton (O.) News*, was elected president of the Woman's Press club, of Dayton, at the first fall meeting. Other officers are Mrs. Ednor M. Rossiter, vice-president; Doris Orrill, secretary, and Annette McMahon, treasurer.

Mrs. Vera McEntee, of Centralia, has joined the editorial staff of the *Eatonville (Wash.) Pierce County Journal*.

Miss Mildred Fisher, formerly of the *Emporia (Kan.) Gazette* staff, has joined the staff of the *Lyons (Kan.) Daily News* as a reporter.

Miss Edna Tims has returned after a few months spent in Mexico and again is in charge of the *San Antonio Express-Evening News* reference department.

Miss Mary Frances Adams has become Highland society reporter for the *Leesburg, (O.) Citizen*.

Miss Eleanor Meade, formerly of the *Worcester (Mass.) Telegram*, has joined the city staff of the *Springfield (Mass.) Union*.

WHAT'S WHAT IN THE FEATURE FIELD

Will Rogers to Wire Daily Wisecracks to Newspapers from New York—Carey Orr, Cartoonist, Makes Debut as Fiction Writer—"Ritzey Rosey" Is Title of New Fashion Service

STARTING Oct. 11, Will Rogers will wire a list of newspapers one "wisecrack" daily from New York based on current news. The telegraph feature, an innovation in the syndicate field, is handled by the McNaught Syndicate, New York. During the summer, Rogers was under contract with the *New York Times* to furnish that newspaper with a similar feature cabled from the Continent and England.

Carey Orr, cartoonist with the Chicago Tribune Newspapers Syndicate, has made his debut as a fiction writer, with a serial story entitled "Borrowed Glory."

"Ritzey Rosey" is the title of a new one-column fashion service being offered by the O'Dell Newspaper Service, New York. Faith Burrows, creator, is a fashion artist on the staff of the *Dayton News*.

Eugene MacLean Newspaper Features. San Francisco, this week announced a new photo-strip serial entitled "Love for a Million," by Sally Johns.

Dr. Frank Crane, editorial writer for the McClure Newspaper Syndicate, New York, will return to New York, Oct. 20, from a summer vacation spent in Paris. He will spend the winter in California.

Material in the new Sunday magazine section of the *New York Herald Tribune* is being offered newspapers in proof form by the New York Herald Tribune Syndicate. The section is edited by Mrs. William Brown Meloney.

The New York office of the Yale University Press is offering a historical feature called "The Background of the First Thanksgiving."

Clare Victor Dwiggin, creator of "School Days," a cartoon handled by the McClure Newspaper Syndicate, left New York this week on a motor trip to the Pacific Coast, where he will spend the winter.

W. T. Hornaday, naturalist, is author of "Wild Animal Interviews," a weekly feature being distributed by McNaught Syndicate, Inc., New York. Mr. Hornaday recently retired from the curatorship of the New York Zoological Park (Bronx Park Zoo.)

Howard White has joined the London staff of the North American Newspaper Alliance under Hayden Church the London editor and correspondent. H. J. J. Sargent is foreign editor of the N. A. N. A. in London.

Miss Betty Brainerd editor of the Women's Department of the Associated Newspapers, New York, and daughter of Erastus Brainerd, former editor of the *Seattle Post-Intelligence*, before it was purchased by William Randolph Hearst, is visiting in Seattle.

When Knute Rockne, Notre Dame football coach, takes his team to the Coast to meet the University of Southern California, Dec. 5, he will be accompanied by Tad Jones and Pop Warner, coaches at Yale and Stanford University, respectively. All three men write for the Christy Walsh Syndicate.

Ads That Sell Goods Sell Space

PICK up any newspaper with Ludlow-set ads and heads—you will see many reasons for the favorable comments being made by advertisers regarding the cleaner typography noticeable in scores of leading newspapers.

You will see—ads and heads printed clear and sharp from sparkling new type in sluglines cast on the Ludlow from six-point condensed to full-width sixty-point, and larger—page after page of advertisements set in distinctive Ludlow faces—a new beauty, a new effectiveness subtly, yet powerfully influencing sales—the sale of products—the sale of more space.

Put more sparkle into your advertisements. Make them sell more goods. Make them sell more space. To investigate is to own the Ludlow.

Statement of the Ownership, Management CIRCULATION

Etc., required by the Act of Congress of August 24, 1912, of

THE DETROIT TIMES

Published Daily and Sunday at Detroit, Michigan, for October 1st, 1926

State of Michigan, County of Wayne—ss.

Before me, a notary in and for the State and County aforesaid, personally appeared Clarence R. Lindner, who, having been duly sworn according to law, deposes and says that he is the General Manager of The Detroit Times, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management and circulation, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in Section 411, Postal Laws and Regulations, to wit:

1.—That the names and addresses of the publisher, editor, managing editor, and business managers are:

Publisher, The Times Publishing Co., Detroit, Michigan.
Editor, Harry M. Bitner, Detroit, Michigan.
Managing Editor, Henry A. Montgomery, Detroit, Michigan.
General Manager, Clarence R. Lindner, Detroit, Michigan.

2.—That the owner is William Randolph Hearst.

3.—That the known bondholders, mortgagees and other security holders owning or holding 1 per cent or more of total

amount of bonds, mortgages, or other securities, are: William Randolph Hearst.

4.—That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company, but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5.—That the average number of copies of each issue of this publication sold or distributed through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is

SUNDAY	- - - - -	308,522
WEEKDAYS (Except Saturdays)	-	289,244
SATURDAY	- - - - -	210,091

—Clarence R. Lindner, *General Manager*

Sworn to and subscribed before me this second day of October, 1926.

G. O. Markuson, Notary Public (My Commission Expires March 9, 1930)

In comparison with the corresponding six months' period ended September 30, 1925, the average net circulation of the Detroit Times shows an

INCREASE of 49,277 Sundays

AND AN

INCREASE of 60,608 Weekdays (Except Saturdays)

AND AN

INCREASE of 40,849 Saturdays

The net paid averages for SEPTEMBER ONLY

SUNDAY	- - - - -	308,738
WEEKDAYS (Except Saturdays)	-	307,389
SATURDAY	- - - - -	214,718

BUILDING NEWSPAPER CIRCULATION

Richmond Times-Dispatch Lists Eight Rules to Keep Down Complaints
—Carolina's Circulation Managers to Meet Oct. 18-19—
Training Road Men Important Job

TO keep down the number of complaints from subscribers, William G. Morris, circulation manager of the *Richmond (Va.) Times-Dispatch* has drawn up the following eight rules for his carrier boys:

1. When you get a start, put it in your route book—in the proper place—IMMEDIATELY.

2. When you have a stop, mark it out of your route book—IMMEDIATELY.

3. Put the paper in the vestibule, where there is one—unless otherwise instructed by the subscriber.

4. Put the paper on the porch if there is no vestibule—unless otherwise instructed by the subscriber.

5. In individual cases, where subscribers want the papers in certain place—PUT them there.

6. Don't THROW the paper ANYWHERE. You are not a "thrower"—you are a "carrier." CARRY it where it belongs and PUT it there.

7. When TWO or MORE papers go to one house, office or store—show the exact number on your route book opposite the address.

8. Do not leave anything to memory. A substitute or a new carrier taking over your route cannot read your mind.

Will X. Coley, circulation manager of the *Raleigh News & Observer*, will preside at the seventh annual convention of the Carolinas' Circulation Managers Association to be held in Spartanburg, S. C., Oct. 18 and 19. Mr. Coley is vice-president of the group. A. F. Carrere, *Charleston News & Courier*, was elected president at last year's conference, but since then has been transferred to the advertising department of his paper.

Other association officers are: S. D. Bagwell, *Charlotte News*, second vice-president; C. C. Council, *Durham Herald*, secretary-treasurer; with the following directors: A. F. Ballentine, *Greenville (S. C.) News*; J. M. Blalock, *Spartanburg (S. C.) Herald*; V. L. T. Cooper, *Charleston (S. C.) Post*; C. R. Goodrich, *Charlotte (N. C.) News*; H. L. Strickland, *Charlotte (N. C.) Observer*; and H. E. Stafford, *Asheville (N. C.) Citizen*.

Steps in training a road man have been outlined by B. C. Still, circulation manager of the *Baltimore Sun*. His "formula" follows:

"After selecting the man he should be kept in the office for at least a week and should be instructed as to office rules and office routine and made to understand just why these rules are important and necessary. During this week, he should read all letters and reports from men on the road and also letters and instructions sent them.

"The second week he should be sent to the field with the best road man on the force with instructions to observe how the work is done, but cautioned not to try to imitate his instructor. At the end of each day he will make out reports and write a short letter as a supplement to reports and mail them after they have been ok'd by his instructor.

"He will stay with his instructor the third week but will handle the work himself. After visiting each agent the instructor will either compliment him on the way the situation was handled or will point out to him in a very friendly manner any mistakes he may have made.

"At the beginning of the fourth week he should be able to work alone but should not be sent on a long trip or assigned to a regular territory. Short trips of a day each are to be mapped out, and in addition to a written report a verbal report as to sales condition should be required.

"If at the beginning of the fifth week the man is sufficiently advanced to assign to a territory, send him out.

"It may seem that too much time has been given to training this man but when it is remembered that his salary and expense will run from \$75 to \$100 a week and that a road man properly trained and properly handled will produce from two to three times as much business as one improperly trained and improperly handled it can be seen that too much care and importance can not be giving to his training.

"Up to this time the office has a considerable investment in the man and should be patient in order to save the investment, but if he does not turn from a liability to an asset in a short time it will be necessary to acknowledge the mistake and start all over again with his successor."

J. H. Theobald, formerly of the *Indianapolis (Ind.) Times*, has been transferred to the *Cleveland (O.) Times* as circulation manager, effective Oct. 1. Mr. Theobald has spent 24 years in circulation work for the Scripps-Howard Newspapers. For 13 years he was with M. J. Levy on the *Cincinnati Post*. During this time he covered circulation assignments on the *Oklahoma News*, *Akron (O.) Press* and *Chicago Day Book*. Later he served the *Cleveland Press* under J. J. Lynch and later T. J. Dowling. In October, 1924, he was transferred to the *Indianapolis Times*.

Elimination of one edition, the Night, Latest, together with the speeding up of some of the other editions, has been made by the *Boston Evening American*. Editions are as follows now: 9 a. m. Home: 10:30 a. m. Night; 12:15 p. m. Merimack; 2:05 p. m. Closing Stocks, and 4:05 p. m. Complete Sports.

Between 400 and 450 carriers and newsboys and members of the circulation department of the *Fall River (Mass.) Herald News* were the guests of honor at the Bijou Theatre, Fall River, Oct. 1, Circulation Manager James Hennessey directing the party.

Hundreds of boys in Lawrence were the guests of the *Lawrence (Mass.) Eagle-Tribune* at the Lawrence Boys' Club, Oct. 2.

The *Santa Ana (Cal.) Register* is writing up different communities in its territory, publishing a different story with art every Thursday. On the day the layout appears, the circulation department samples the town featured, and claims to have gained many new subscriptions as a result.

"If you have a dog loose in your yard

246,171

was the average net paid daily circulation of The Baltimore Sun (morning and evening issues) for the month of

September, 1926

The average net paid circulation of THE SUNDAY SUN per Sunday for the month of September, 1926, was 189,672.

Everything in Baltimore
Revolves Around

THE  SUN

Morning Evening Sunday

don't complain if your paper is not properly delivered," the *Gastonia (N. C.) Gazette* counsels its readers.

The announcement of the publisher states that he does not require his carrier boys to enter yards where dogs are running loose, but would permit them to throw the papers on the premises as best they can.

There is a city ordinance forbidding owners to allow their dogs to run at large.

Several carrier boys are said to have been attacked and bitten by dogs during the summer.

R. C. Bishop has joined the *Concord (N. H.) Monitor and Patriot* as circulation manager. He formerly worked on the *Halifax (N. S.) Herald & Mail*, *Halifax Chronicle*, *St. John (N. B.) Telegraph Journal* and the *New Orleans Times-Picayune*.

Phil Gerdinger, foreman of the *New York World's* delivery department, was given a dinner by his former associates on the *Evening World* recently. J. M. Clare, of the *Evening World's* circulation department, was toastmaster. Speakers included, N. R. Hoover, director of circulation for the World; Frank J. Schlosser, press room superintendent; H. H. Irish, circulation manager of the *Evening World*; and Frank Brosnan, foreman of evening delivery.

The ball team representing Branch 108 of the *Chicago Evening American* Junior Carriers' league recently won the championship of the league and then defeated the inter-state champion team of the Milwaukee newsies.

For the fourth successive year, the *Chicago Daily News* is furnishing book covers to school children in Chicago and Cook county. The News will pass out a supply of 3,000,000 covers this year to public and parochial schools of the county. The paper provides three types of adjustable covers so that all sizes of books will be fitted.

DRY GOODS MEN STRESS TRUTH IN STORE COPY

Advertising Should Create Confidence and Sell Goods, Lew Hahn Tells Chicago Convention

"The truth, the whole truth, and nothing but the truth" in retail store advertising was the keynote of the second fall convention of the Sales Promotion Division of the National Retail Dry Goods Association, held in Chicago last week.

Lew Hahn, managing director of the Association, in an address on "What's Wrong With Advertising?" said:

"There is too little appreciation of the fact that advertising in itself is not an end, but a means.

"The end, in retail advertising, should be classed under two heads," he declared. "First, to create confidence in the store, and second, to sell goods."

The use of advertising in newspapers to tell the public only of low end stocks was the wrong method, Mr. Hahn said. "Advertising is the voice of the store," he stated. "If it is shrill and raucous it will create that impression of the firm it advertises. It is my belief that retail advertising, done in a simple, direct way and telling a confidence-inspiring story of substantial, clean merchandise, will reap the largest returns."

TO WAR ON BILLBOARDS

Following the example set by Maine last year, the state of New Hampshire, with Governor John A. Winant at the head, has declared war upon unsightly billboards and roadside advertising signs. As weapons in its fight to exterminate them the state plans to use prohibitive legislation and high taxation. The movement was inaugurated by New Hampshire members of the New England Council composed of prominent business and professional men.

The INDIANAPOLIS

There are larger markets than the Indianapolis Radius, with its 2,000,000 consumers, but there is no market in America where volume sales are as easily won, or where sales costs are lower. Ask the national advertisers. They have increased their investments this year in The Indianapolis News 45.6% over the same period last year.

NO STANDARDIZED INTERTYPE HAS EVER BECOME OBSOLETE

There is profit for YOU in INTERTYPE STANDARDIZATION

*The Intertype
"Mixer"*

Protection against obsolescence—

Any Standardized Intertype now in service, no matter how long ago it was purchased, can be equipped with all improvements since developed.

Minimum initial investment—

Buy only what you need right now. Add more equipment units (interchangeable) when you need them.

Low cost of upkeep—

"Parts which do not exist cannot wear out"—910 fewer moving parts (on 3-magazine machines) in the escapement mechanism alone.

Interchangeable equipment—

Interchangeable magazines, including "Mixer" magazines; interchangeable mold caps; interchangeable replacement parts.

Maximum production—

Thirty improvements and simplifications to increase speed, save time, and prevent delays.

*Write for "Profit-Making Intertype Features" and other Intertype literature.
If you wish to see our local sales representative, please so state.*

ADVERTISING AGENCY AFFAIRS

Research Listed as Important A. A. A. Topic—Coutlee Resigns from Charles C. Green Advertising Agency—Gardner Appoints Orchard Executive in St. Louis—Martin-Gessner Moves

RESEARCH is listed as an important subject for discussion on the program for the annual convention of the American Association of Advertising Agencies to be held at the Mayflower Hotel, Washington, D. C., Oct. 27-28. Edgar D. Mason, vice-president of the Albert P. Hill Company, Inc., Pittsburgh, Pa., advertising agency, is chairman of the committee on convention plans.

E. D. MASON

Prof. Daniel Starch, who is in charge of the A.A.A.A. Research bureau will make an important report on the surveys he has completed determining the buying power behind the circulation figures listed by various national magazines.

Mr. Mason has announced an important departure in this year's convention. All sessions will not be executive as heretofore. Prominent agency men will address one day's meeting which will be thrown open to the general public.

The convention will be preceded by a meeting of the national executive board, Tuesday, Oct. 26. The session of Wednesday afternoon, beginning at two o'clock, Oct. 27, will be open to all publishing and advertising interest. The day following the convention, Friday, Oct. 29, will be devoted to golf and sight-seeing.

Martin-Gessner Advertising, Inc., New Orleans agency, has opened new offices on the 12th floor of the Pere Marquette Building, New Orleans. Mrs. Dora Francis has been appointed production manager. For the past six years Mrs. Francis has held a similar position with the Ferry-Hanly Advertising Company, New Orleans and Atlanta.

Douglas Wakefield Coutlee, formerly business manager and a director of Charles C. Green Advertising Agency, Inc., has resigned as an officer of that corporation and will devote his time to special advisory and creative work in advertising. He will also be associated with the copy and plan department of that agency.

The Van Sam Studio, an advertising art service, has been organized with offices at 152 Madison avenue, New York. The studio is being directed by Miss Margaretta Van Rensselaer Schuyler and Miss H. Fern Shook. Miss Shook has been a free lance advertising artist in New York for about 15 years, specializing on fashion drawings. Miss Schuyler has had considerable experience as a copy writer. The studio will furnish art for copy for advertising agencies and retail stores.

Cap La Roe, of the Columbus (Ohio) Citizen, has joined the copy writing staff of the Miller-Knopf Advertising Agency at Columbus.

Francis W. Orchard, for the past six years with the Western advertising department of the Butterick Publishing Company, has joined the Gardner Advertising Company, St. Louis, Mo., in an executive capacity.

The Sando Advertising Company, formerly located in the Bobbs-Merrill Building, Indianapolis, Ind., has moved its quarters to 960 North Meridian street, Indianapolis.

F. J. Ross Company, New York advertising agency, this week announced

the appointment of six new members to its staff. They are: Kane Campbell, formerly of Barton, Durstine & Osborn; Robert T. Gebler, from Patterson-Andrew Company; Everett T. Irwin, from the Thresher Service, Inc.; Herbert F. Chase, and Robert J. Engel from Andrew Cone General Advertising Agency; and Dorothy G. Long, from Cross & Le Beaume, Inc.

George H. Mills, treasurer of the Millsco Agency, has returned to New York from a brief trip to England and the Continent.

The Acorn Agency, Inc., has moved to new offices at 67 West 44th street, New York.

The Charles W. Hoyt Company, Inc., has been appointed to direct the advertising campaign of the No-Rad Rust Corporation of Lancaster, Pa., manufacturers of "W. J.," a boiler-cleaning compound.

Leonard G. Needles has started the Needles Advertising Service, Inc., with offices in the Public Ledger Building, Philadelphia, Pa.

Norman H. Clemence has been transferred from the New York to the London office of Lord & Thomas & Logan.

Paul M. Bryant has become associated with the G. Lynn Sumner Company, New York advertising agency, as vice-president. For nine years he was with Buckley, Dement & Co., Chicago.

Frank A. Whipple has been appointed Western New England manager for the Charles W. Hoyt Company, Inc. He will make his headquarters in Springfield. Arthur E. Hobbs, vice-president of the same agency, former manager of the Western New England district, has been transferred to New York.

Carl L. Bixby and J. H. Whitely, of the Richmond office of Cecil, Barreto & Cecil, have been transferred to the New York office.

RICHMOND EDITOR RESIGNS

Robert D. Ford Leaves Times-Dispatch to Do Masonic Work

Robert D. Ford, editor of the Richmond (Va.) Times-Dispatch, has resigned that position to become secretary of the coordinated Scottish Rite bodies of Richmond. He will assume his new duties about the middle of this month.

Mr. Ford has been with the Times-Dispatch for nearly 20 years, about half of which he served as managing editor and editor of that paper.

Coming from Newport News to Richmond when the Times-Dispatch and the News-Leader were under the same ownership, Mr. Ford has been state editor, telegraph editor, managing editor and, finally, editor of the city's morning paper.

Mr. Ford's capacity for making friends, coupled with his knowledge of Masonry and his interest in it, have led many of the Scottish Rite to feel that he should devote his recognized abilities to Masonic work.

Mr. Ford's successor on the Times-Dispatch has not yet been named.

ROBERT D. FORD

7TH DISTRICT MEET OCT. 10-12

Advertising Men From Five States To Gather In Tulsa

Plans are complete for the annual convention of the Seventh District Advertising Clubs to be held in Tulsa, Oct. 10, 11 and 12. Three hundred advertising men and women from Kansas, Missouri, Oklahoma, Arkansas and Louisiana are expected.

Delegates are expected to begin arriving Sunday morning. They will be taken on a tour of the city Sunday afternoon.

Governor M. E. Trapp and Mayor Newblock will extend the welcome of the State and city to the visitors. A formal dinner will be held at the Mayo Hotel, Monday evening.

Morning and afternoon sessions will be devoted to business meetings and departmental gatherings and discussions. Special luncheons will be held each day.

JOINS SCRIPPS COAST GROUP

Robert J. Davis, who four years ago opened the Pacific Coast headquarters of Gilman, Nicoll & Ruthman, newspaper representatives in San Francisco, is leaving that organization Oct. 15, to become advertising director of the Seattle Star, Portland News, Spokane Press, Tacoma Times and Boise Capital News.

JAPANESE EDITOR IN U. S.

Yoshihide Hara, editor of the Fukuoka Nichi Nichi Shimbun (the Fukuoka Daily News), is making a tour of this country to study American newspapers. He will later go to England and the continent for the same purpose. He is representing a group of other Japanese newspapers, as well as his own, and on his return to Japan will head the Tokio college of journalism.

MURDER CHARGE DISMISSED

A murder charge filed against the Rev. George E. Seely, pastor, and editor of the Orting (Wash.) Oracle, and three Federal prohibition agents, after the killing of a Japanese during a liquor raid, was dismissed by the Pierce County prosecuting attorney after he had found the evidence against them "too flimsy." The editor and prohibition agents had been arrested Aug. 30.

NEWS MEN WRITE LONDON SHOW

John L. Balderston, London correspondent of the New York World, is co-author with J. C. Squire, editor of the London Mercury, of "Berkeley Square," which had its premiere Oct. 6 at St. Martin's theatre in London. At the final curtain the two newspaper men were called to the footlights.

However storms may interfere with travel, telephone operators are at their posts

An Unfailing Service

AMERICANS rely upon quick communication and prove it by using the telephone seventy million times every twenty-four hours. In each case some one person of a hundred million has been called for by some other person and connected with him by means of telephone wires.

So commonly used is the telephone that it has come to be taken for granted. Like the air they breathe, people do not think of it except when in rare instances they feel the lack of it.

Imagine the seventeen million American telephones dumb, and the wires dead. Many of the every-day activities would be paralyzed.

Mails, telegraphs and every means of communication and transportation would be overburdened. The streets and elevators would be crowded with messengers. Newspaper men, doctors, policemen, firemen and business men would find themselves facing conditions more difficult than those of fifty years ago, before the telephone had been invented.

To prevent such a catastrophe is the daily work of three hundred thousand telephone men and women. To maintain an uninterrupted and dependable telephone service is the purpose of the Bell System, and to that purpose all its energy and resources are devoted.

AMERICAN TELEPHONE AND TELEGRAPH COMPANY
AND ASSOCIATED COMPANIES

IN ITS SEMI-CENTENNIAL YEAR THE BELL SYSTEM LOOKS FORWARD TO CONTINUED PROGRESS IN TELEPHONE COMMUNICATION

This "Iowa plan" is endorsed by the leading jobbers of the state. Uniform marketing help is offered by these 28 leading Iowa daily newspapers.

The way to cover Iowa

Combined Circulation of these dailies 571,151
Total number of families in Iowa 550,000

Now this exceptional market is easier than ever for you to reach—with the help of this association.

Deal with these 28 leading Iowa daily newspapers as with *one* publication, if you wish. One order, one plate, one billing.

And remember that these dailies offer *uniform merchandising help*, throughout the state, adapted to suit *your* specific need.

You already know the importance of this Iowa market. Always prosperous and progressive, it is one of the most responsive sales areas in existence.

The prospects for fall and winter business are growing brighter all the time. Smaller *world* production of crops this year places Iowa in a better economic position than in 1925.

* * *

Now, with coverage and merchandising so simplified, Iowa is *doubly* desirable—either for lines already established there, or for new ventures.

We will gladly furnish any information you want, upon request.

IOWA—WHERE EVERY FAMILY READS A DAILY NEWSPAPER

American Business RE-DISCOVERS *the* ADVANCING SOUTH

POPULATION and Prosperity are trending Southward.

Business, ever alert to steady, significant mass-movements, is nowadays looking below the Mason-Dixon line for its greatest Gains.

The impetus has but begun. The relatively great strides already made will be looked upon during the next few years as "low level" figures.

This is not a "boom" condition—
emphatically not! It is the logical, inevitable, response to a fundamental sectional supremacy that, frankly, has been a bit slow in gaining recognition.

The South is solid! It acts and

reacts a little cautiously, perhaps, but when it moves it "stays put."

Its ascendancy, then, has been gradual—not hectic—and having its foundation in Soil Superiority will live on forever.

The South has just started upward! In the area pictured above live 31,193,840 people.

As a group, they are more prosperous today than ever before. Their future outlook is brighter than that which faces the citizenry in any other section of the country.

Manufacturers, sales managers, business economists, advertising agents—students of the flow of

merchandise—this is the time to **tell** the South—and **sell** the South.

Advertising in Southern Newspapers moves the bulk of merchandise sold in this section. Southerners take their newspapers seriously, read them thoroughly and respond to their appeal.

Capable space-buyers have long realized that the most effective and cheapest method of reaching the majority of Southern buyers is **through the newspapers.**

The combined circulations in these Southern States, for example, of the outputs of two of the largest magazine publishing houses is slightly over a million and a half.

The combined **newspaper** circulations in this same area reaches **one out of every six persons**; there is practically a newspaper in every home.

Sales prospects are perhaps more easily reachable in the South than in any other section of the nation. Not alone is it easy to get to prospects; but advertising space is relatively low-priced.

You can cover the entire South with a smaller outlay than would be required to reach any other area of like population, and when once sold, we repeat, the South **stays sold.**

Southern publishers are ever alert to aid manufacturers and advertisers in obtaining adequate distribution to justify advertising investments. Correspondence to that end is invited.

Place your Fall and Winter campaigns so as to gain and grow with the South. Ask any recognized Advertising Agency for facts and figures.

LONDON DAILY EXPRESS WILL INSTALL U. S. PRESS ROOM INVENTIONS

Long and Trotter of Lord Beaverbrook's Daily Inspected American Plants for Ideas to Be Used in New Seven-Story Annex—Will Use Reel Systems and Conveyors

(Left to right): Martin W. Brueshaber, Sydney W. H. Long, Edwin Trotter and Harvey D. Bell.

SEVERAL American inventions speeding up newspaper production will probably be installed in a new annex of the *London Daily Express*, now in process of construction, according to Sydney W. H. Long, superintendent and a director of Lord Beaverbrook's morning paper.

Mr. Long, with Edwin Trotter, chief of the mechanical department, this week completed an extensive tour of American cities, inspecting newspaper plants to obtain ideas for incorporation in the new seven-story addition to the home of the *Daily Express*. Prior to their sailing date, Oct. 9, they were interviewed in New York by EDITOR & PUBLISHER.

"We will recommend, among other things, adoption of the sub-basement reel-changing system as it has been developed in American press rooms," Mr. Long said.

"We also hope to install American automatic conveyors in our foundry and mailing rooms, an innovation we expect will speed up our production materially. We still move our plates by hand and we expect to do away with this by using mechanical conveyors in the American manner.

"Air-conditioning ventilation has also been developed in the United States on a scale far beyond London."

Excavation has been started on the plot adjoining the present plant of the *Express*, and it is expected the new addition will be completed within 18 months. The *Express* added to its premises only two and a half years ago, but has already outgrown its quarters. Capacity will be increased 60 per cent by the new addition, according to Mr. Long.

Mr. Long said the outstanding features of the new annex would be the press room and the mailing room. Lord Beaverbrook, realizing America's progress in newspaper mechanics, sent Mr. Long and Mr. Trotter to this country to study systems in use here.

Accompanied by Martin W. Brueshaber, second vice-president, and Harvey D. Bell, manager of the New York office of the Goss Printing Press Company, the two executives of the *Express* spent nearly a month visiting more than 12 American newspaper plants, including those of the *Milwaukee Journal*, *Detroit Free Press*, *Detroit News*, *Buffalo Times*, *Buffalo News*, *Chicago Tribune*, *New York Times*, *New York Herald Tribune*, *New York Evening Post*, *New York Daily News*, *Philadelphia Inquirer*, *Philadelphia Bulletin*, and *Philadelphia Public Ledger*.

Both Mr. Long and Mr. Trotter expressed amazement at the magnitude of American newspaper plants. Despite the greater circulations in Great Britain, there is nothing to compare with them in that country, they said.

"American development of newspaper production by machine units is far beyond our level," Mr. Long declared. "In consequence, your labor units stand in a ratio of our of about one to two.

"Tremendous capital investment is apparently involved in American mechanical lay-outs. I should say the ratio was two and a half to one over British newspapers in plant capitalization."

While English newspapers are sending men to this country on educational trips Mr. Long maintained there is much that Americans could learn by visiting London papers.

"London dailies are far ahead of their American contemporaries in processes which have been developed in stereotyping and half-tone printing," Mr. Long claimed. "That is due in a measure to the fact that a majority of American papers has not yet taken up the dry flong process and are still using wet flongs."

"During the last four years in London there has been almost razor-like competition among the papers in the printing of pictures. As a result methods have been perfected which far surpass anything in the United States. All London papers now make-ready their pictures, either by overlay, underlay or metallic interlay. Each one has developed its own secret method of rapid make-ready. It has been possible to make a half-tone with make-ready in 25 minutes from the time the print is brought into the newspaper office."

Mr. Long laughed over a friendly argument he had with one American publisher over a comparison of news-writing methods in the two countries.

"I will not tell you the publisher's name," he said. "But he was the proprietor of one of at least six American newspapers we visited which claimed to be the largest in the world. As we were inspecting the building, I noticed a letter the proprietor had written to his staff and had posted in the various departments. The last paragraph was to the effect that American reporting standards were far superior to the British."

"I will argue that point with anybody. In my opinion American reporters murder the English language, and cannot compare in style to the British writers."

During the British general strike, Mr. Long and Mr. Trotter, with H. R. Evans, machine-room overseer performed invaluable service in helping to issue the *British Gazette*.

A story written in London shortly after the strike reads:

"The Chancellor of the Exchequer had rung up Lord Beaverbrook to ask what help he could give; and Lord Beaverbrook responded by lending for the service of the *British Gazette* the one man without whom it is not too much to say the situation could not have been saved. This was Sydney W. H. Long, the night superintendent of the *Daily Express*—a man of great experience and rare skill on the technical side of printing. After working for years as a linotype operator, he had become master-printer and then night superintendent of Lord Beaverbrook's paper. He was also a stout trade unionist and had played a leading part in getting the Compositors' Union

LONDON STANDARD ADDS EIGHT PAGES

THE *London Evening Standard*, owned by Lord Beaverbrook, last week increased its daily edition from 16 to 24 pages. The *Standard*, for many years the property of Sir Edward Hulton before it passed to the Beaverbrook group, was once edited by Sir Arthur Pearson. In recent years it has absorbed the *St. James Gazette*, the *Globe*, and the *Pall Mall Gazette*.

The *Westminster Gazette* was later suspended, leaving the *Standard* practically alone in the "serious" evening paper field.

The new size will permit expansion of several cramped editorial features, addition of a picture page, and more sporting news.

their present charter. It was in his hands alone that the setting of the *British Gazette* depended. But five columns of the 14 in the first number were set. The rest Mr. Long did with his own hands, except for the little brought in from the outside by the Stationery Office."

New Form of Municipal Advertising Tried by Clarksburg (W. Va.) Tele.

A new form of municipal advertising, sponsored by the *Clarksburg (W. Va.) Evening Telegram* and the Chamber of Commerce of that city, was tried out in New York this week.

The Greater Clarksburg Exposition opened in the Waldorf Astoria Hotel, Oct. 4, and continued throughout the week. More than 100 delegates came to New York from Clarksburg by special train to boost their city in person at the Exposition.

The Exposition includes information on the coal, natural oil, gas, chemical and pottery products, carbon and brick industries and water power of the district.

PARIS GETS FIGHT NEWS IN RECORD TIME

Round-by-Round Account Locked Forms 13 Minutes After Beginning
Cabled from New York to Paris Herald

What is considered a record in transmission of news to Europe was by the *Paris Herald*, European edition of the *New York Herald Tribune*, in report of the Dempsey-Tunney fight and the general lead was locked the forms 13 minutes after it had been written in New York, and the paper's special edition announcing the result giving complete detail was being distributed on the boulevards of Paris almost as quickly as the news was being given Broadway, 3,000 miles away.

The detailed description, written for the account of Harry Cross, was filed in the office of the *Herald Tribune*. From there it was relayed to the cable office and was received in Paris five minutes after being written.

Sitting in the cable office in Paris, J. Coggeshall, assistant sporting editor of the *Paris Herald*, indicated the message by telephone to the publishing office on the rue du Louvre. There they were rushed into type so rapidly that the forms were closed thirteen minutes after the last message and a few minutes later the paper with its seven-column ribbon "Tunney Wins Title From Dempsey Decision," was ready for the street.

In addition to the detailed round-by-round description, set in two-column measure, the special fight extra carried general lead and color story from the side. There was also a description of preliminary bouts, a crowd story, and account of Tunney airplane trip.

BAKING POWDER HEARING ORDERED

The Federal Trade Commission ordered the Royal Baking Powder Company to appear before it Oct. 8, to show cause why an order re-opening the case against it should not be made and entered by the commission.

When the Publisher of a daily newspaper

Puts his advertisement in Editor & Publisher's MARKET GUIDE

he makes a PERMANENT tie-up between his newspaper and the trading area which it covers.

For this incomparable Guide to daily newspaper markets is not a pamphlet which is glanced at, admired for a moment or two, and then carefully tucked away in a file that seldom sees a resurrection morn.

Quite to the contrary, it is a BOOK—a *reference* book—a *service*—which the campaign planners and space buyers of every Advertising Agency and every national advertiser using newspaper lineage of any consequence in the country *keep by them on their desks*, for constant use, day in and day out, all through the year—until the next Guide comes out.

Ask any of them where they keep their Editor & Publisher's Market Guide, and to what splendid uses they put it.

THEN ask yourself if this is not a tie-up between your paper and your paper's market that is going to help you tremendously in building up your national lineage to the figures you are most ambitious to show.

Have you made your reservation yet? The time is growing short—a week or so more, and then it will be too late.

WITH THE GENERAL ADVERTISERS

Oil Burner Manufacturers Active—Apples for Health, Inc., Planning National Campaign—Edge New Manager for Portland Cement Association

NEWSPAPER advertising is rapidly selling the reading public on the slogan "Fuel Oil for Heat and Power."

An official of a large oil company has informed *Fuel Oil*, a trade journal, that domestic oil burners are being installed in New York state and Connecticut at an average rate of 100 a day. A similar high rate of installations is being made in many other eastern states, particularly those in the New England and Middle Atlantic groups.

Exceptional sales activity during August and September is reported by the Williams Oil-O-Matic Corporation, Bloomington, Ill., a big user of newspaper space. This concern expects sales to exceed their 1926 production.

Makers of the Quiet May are assisting their dealers in co-operative campaigns now running in newspapers in Philadelphia, Washington, D. C., Baltimore, New York City, New Orleans, Boston, and St. Louis.

Nearly the full quota of \$20,000 being solicited by the Chicago Oil Burner Association to finance an advertising campaign to further the burning of fuel oil in that locality has been raised. To insure increased sales and a longer sales season, the association believes it is necessary that the public be as well informed on oil burning as they are on gas and coal burning. Members of the association's publicity committee are: E. P. Fahey, Homer R. Linn, and J. E. Owens.

Final plans for a nation-wide advertising campaign to increase consumption of apples will be laid at the joint meeting of the Michigan State Horticultural and the American Pomological societies, to be held at East Lansing, Mich., Nov. 30 to Dec. 3. The advertising campaign will be under the direction of a new organization, Apples For Health, Inc., of which Paul Stark, of Louisiana, Missouri, is president. Headquarters of the new organization is in Chicago, in charge of Lawrence H. Whiting, who is treasurer of the association. Present plans call for the raising of an advertising fund by assessing each bushel of apples one-half cent, and also by a contribution of 50 cents from the growers for each carload of apples handled by them. The campaign is to be conducted in newspapers and magazines.

C. R. Edge has been appointed advertising manager of the Portland Cement Association to succeed Colin Campbell, resigned. After Nov. 1, this account will be handled by the Austin F. Bement Advertising Agency, Detroit.

Carbide & Carbon Chemicals Corporation, New York, has appointed N. W. Ayer & Son to direct its advertising. The same agency is arranging a newspaper advertising campaign for Gerber & Co., Inc., Switzerland, makers of Knight brand Gruyere cheese. The campaign may be extended to magazines later.

Federal Telegraph Company, makers of Kolster Radio is investing more than \$200,000 in newspaper advertising this year. This was an exclusive magazine account in 1925.

W. C. Sproull, advertising manager of the Burroughs Adding Machine Company spoke on advertising problems at a conference of agency managers at Kansas City last week. Representatives from Missouri, Kansas, Oklahoma, Iowa and Nebraska attended the conference.

"More Than You Expect—Or Pay For" is the slogan adopted by the Auto-Owners' Insurance Company, of Lansing, Michigan, in its new campaign to increase its business of insuring motor cars. In addition

to affording the usual indemnities offered by all automobile insurance companies, Auto-Owners' Insurance Company in a series of full page newspaper advertisements in Michigan dailies, is offering free road service to policy holders. This includes towing, tire service, gasoline service and through an arrangement with affiliated dealers, policy owners are given substantial discounts on tires and accessories.

Philip C. Pack advertising agency of Ann Arbor, Mich., released page advertisements last week and will follow with half and quarter pages. In certain instances, local dealers and agents, with the co-operation of newspapers, are running special advertisements hooking up with the campaign of the home office.

Plans for a national advertising campaign in behalf of the Lake Chautauque, N. Y., region, are in preparation. Mayor Harry C. Hequembourg of Dunkirk, N. Y., is sponsoring the endeavor. The plans are now being prepared by Dennis F. Howe, secretary of the Jamestown, N. Y., Chamber of Commerce. Committee chairmen and other executives are soon to be named. The plan is to obtain pledges for a five year period.

The Berkshire Hills publicity campaign conducted by a conference organized last spring with advertising in 22 newspapers and 15 magazines, has proved its worth, according to the results of a canvas conducted among the hotels and boarding houses in the Hills. A total of 5,306 inquiries were brought in by the advertising at a cost of 26 cents each, much less than the cost of \$1 each reported by the Maine bureau for 1925. Replies came from 33 states, Germany, Africa and Japan. The advertising was run from May 12 to Aug. 18 and booklets were sent in response to all inquiries.

S. Chester Lyons, secretary of the conference, found that 42 hotels and boarding houses reported increased business, 18 reported unchanged business and 18 reported a loss for the season. A total of 75 said the campaign should be continued, against six who voted against continuance. The conference, with its object, the booming of the Berkshires as a summer resort, was supported by hotels, boarding houses and garages, principally, with additional support, from merchants and bankers.

S. E. Carter has been appointed advertising manager for the Rice-Stix Dry Goods Company, St. Louis, to succeed George B. Whitson, resigned. Mr. Carter has been operating his own agency, the Continental Advertising Company, Denver, Col., and previously was advertising manager of Ely & Walker Dry Goods Company, St. Louis.

TEACHING ADVERTISING ART

In addition to its regular art course, Boston University is offering a new course this Fall in commercial art. This includes advertising art, reproduction, lettering, design, layout, dummy, broadsides, composition and general commercial art. Charles Donelan is in charge.

WHITE HEADS YUKON PRESS

Ralph E. White, newspaperman of Kamloops, British Columbia, is the new president of the Alberta, British Columbia, and Yukon Press Association, as the result of the recent election of officers of this newspaper society in Victoria, B. C., Canada.

The *Casper* (Wyo.) *Tribune* published serially recently a history of the development and influence of the daily newspaper in the United States.

NEW \$300,000 HOME OF POTTSTOWN NEWS FORMALLY DEDICATED, OCT. 2

THE new \$300,000 home of the Pottstown (Pa.) *Daily News*, pictured above, was dedicated on Oct. 2.

E. S. Fretz, president of the Pottstown Chamber of Commerce, presided at the exercises. The dedicatory address was delivered by John K. Klink, chief Burgess, and the principal address of the celebration was delivered by J. H. Zerbey, publisher of the *Pottsville Re-*

publican and *Pottsville Morning Paper*.

The new building is fitted with every modern appliance for the speeding of newspaper publication and is considered one of the finest small town publishing plants in the country.

It was erected under the direction of William L. Binder, president of the *Daily News* and former president of the Pennsylvania Publishers' Association.

After several years of investigation and experimentation, the Mergenthaler Linotype Company announces the introduction of a new newspaper type face. The openness of the new Ionic is an extraordinary feature. The height of the letters is lower than the old type, and the fullness of the strokes is more marked. The first paper to adopt the new face was the *Evening News* of Newark, N. J. After a trial of several weeks, the management of the paper more enthusiastically than ever about it, and readers to send in words of praise. One of the most prominent optometrists, Dr. Joseph H. Salov, a member of the American Association of Optometric Physicians, addressing the editor of the *Evening News*: "It would be for me or any one else who has accumulated a large amount of good that will result from a recent change in the style of the paper. The new type is not recognized, appreciated, or so readily accepted by every class of eyes, due to the extremely small type used in many newspapers. This lessens the day when artificial aid must be used."

TRADE LINOTYPE MARK

BETTER THAN GLASSES for your readers

Isn't it about time to give your subscribers a dress of type they can read easily and comfortably and save their eyesight?

The new Linotype 6½ Point Ionic No. 5 is a face especially designed to meet modern newspaper printing conditions. Its strong lines and sturdy serifs always reproduce clearly; its round, open counters will not clog up with ink. It gives the word count of 6 point with the legibility of 8 point.

concentrate your efforts on NEW YORK STATE

As a market, New York State is recognized and accepted as the greatest in the country—important enough to be the first consideration for any manufacturer seeking the greatest volume of sales.

Advertisers can reach over eleven million buyers in this state alone—almost 10% of the country's total population, living in a small compact area, whose wealth, industry, agriculture and commerce are the envy of the world.

A concentrated newspaper campaign in this great buying and trading area will reach every possible class and mass of buyer.

New York State is the greatest market for every meritorious product manufactured today.

These newspapers listed below will show you how to conquer it. Write to them today.

ADVERTISING EXPANSION IN ENGLAND FORESEEN BY LORD BEAVERBROOK

Newspapers, Now Deriving Smaller Part of Their Revenues from Advertising, Prepare to Add Pages for More Paid Space, He Says

LORD BEAVERBROOK, proprietor of the *London Daily Express*, whose representatives have just finished a tour of American newspaper plants, this week told the Publicity Club of London that several London dailies, including his own, are preparing to increase their sizes in order to carry a larger volume of advertising.

This departure from the traditional British newspaper limitation on number of pages and volume of advertising apparently anticipates an expected development of newspaper advertising in Great Britain not dissimilar to that which the United States has experienced since the war. That British newspaper proprietors have been watching American newspaper currents with intense interest is evidenced by this extract from Lord Beaverbrook's address before the London advertising men:

"I never try to persuade the public that the advertiser is of no importance to the newspapers which I control. On the contrary, I look upon him as a man of immense importance and I am prepared to deal with him on that basis.

"Further, I never deny that advertising is the chief sinew of newspaper production. I admit that in one of the newspapers I control the advertiser furnishes nearly 50 per cent. of the revenue and that in another he actually furnishes 60 per cent. of the revenue.

"I was looking only today at the revenue figures of the *New York Times*, a paper probably about twice the size in gross revenue of the *Daily Mail*. The *New York Times* has about £5,000,000 of revenue per annum. The *Daily Mail* has perhaps £2,500,000 per annum.

"Of course I can only estimate the revenue of the *Daily Mail*, because that paper is associated in its accounts with the *Evening News* and the *Weekly Dispatch*.

"The *New York Times* has published detailed figures. The net income from the sale of the paper is about £500,000 a year. The net income of the *Daily Mail* from the sale of the paper is more than £1,500,000 a year so that the *Daily Mail* has three times the revenue from sales that the *New York Times* enjoys.

"But the *New York Times* on the other hand has a net revenue from advertising of £4,500,000 against a net revenue of the *Daily Mail* of something less than £2,000,000 a year.

"The comparison, if applied to the *Daily Express* or to the *Daily Chronicle*, is still more startlingly in favor of the *New York Times*. The *Daily Express* and the *Daily Chronicle* have much larger revenues from net sales than the *New York Times*, but both these newspapers have much less revenue from advertising.

"So much is the revenue of these newspapers derived from advertising below the level attained by the *New York Times* that if there is development in advertising in England on lines similar to those in *New York*, the advertising revenue of the *Daily Mail* will in time amount to £12,000,000 a year, and the advertising revenue of the *Daily Express* and the *Daily Chronicle* will amount to something between £6,000,000 and £8,000,000 a year each."

Lord Beaverbrook referred to the preparations which several London papers, including the *Daily Express*, are making

to increase their size in order to admit more advertising matter, and then concluded:

"Huge profits are being made by some newspapers. I am not jealous of them. I regard them with equanimity while they distribute these immense sums to shareholders. I never have been very good at paying dividends myself.

"I am somewhat encouraged in the policy, I pursue, at any rate by the experience of the *New York Times*. That newspaper has made huge sums of money for a long period, over many years. But the statement has just been made by those responsible for its direction that so much as 95 per cent of their net revenue has been put back again into their business. That seems to me to be sound policy.

"Long-established journals, well founded in the confidence of the people and popular to a degree, can show huge profits and distribute them to their shareholders. I do not think it is a possibility for a new and growing property. Any newspaper that is building up its sales must be prepared to forego the distribution of profits to shareholders for a long time."

EIGHTH DISTRICT CLUBS MEET IN LANCASTER

Municipal Advertising Builds City, Henderson of Lesan Agency Tells Convention—C. King Woodbridge a Speaker

Advantages of municipal advertising were explained this week by D. W. Henderson, of the H. E. Lesan Advertising Agency, addressing the annual convention of the second district of the International Advertising Association, which opened at Lancaster, Pa., Oct. 6, and was scheduled to close Oct. 8.

"If a permanent organization of spirited citizens is formed and the thing goes through in the right way, results will repay the community one hundred fold for the money expended," Mr. Henderson declared.

The convention was opened by C. K. Woodbridge, president of the International Advertising Association, who stressed the value of advertising to the nation at large.

"Advertising has greatly advanced the standards of living in America," Mr. Woodbridge said, explaining how it has been instrumental in bringing the automobile, the radio and other devices into general use and how it has taken into the homes of the nation ideas that have resulted in better living conditions.

"Present civilization is the result of interchange of ideas, goods and money," he stated. "To live intellectually we must accept big business and international advertising as one of its important factors."

George W. Norris, governor of the Federal Reserve Bank of Philadelphia, stressed the need for good morals in the preparation of advertising copy. He said that he sees no alarm in the widespread

use of the installment system of selling and expressed the belief that should a period of general unemployment occur no widespread loss or trouble would result from this system.

The convention was attended by delegates from Pennsylvania, New York, New Jersey and Delaware.

USES GREASE GUN TO INK PROOF PRESS

Device Perfected by Henry M. Barney, Springfield Union Machinist, Saves Time and Labor, Printers Say

Utilization of the grease gun principle to apply printers' ink to the inking board of a machine for rolling proofs, an idea worked out by Henry M. Barney, machinist in the composing room of the *Springfield (Mass.) Union*, has attracted favorable comment from printers who have inspected the device.

The simplicity of the device, coupled with its efficiency in everyday use, has resulted in a marked saving of time and labor. Since the printers' ink is too heavy for painting, a brush can not practically be used in applying it. Ordinarily a stick has to be freely wielded to daub the ink on the board. Then it is spread out smoothly with a rubber roller.

Mr. Barney has attached something like the barrel of a common grease gun to the under part of the inking board. A screw cap, deeply threaded along the barrel, is filled with ink and screwed onto the "gun." A small hole, drilled through the inking board at the center of the ink-containing apparatus, provides an opening through which the ink is squeezed up onto the table as the screw cap is turned up.

A few turns of the cap bring a quantity of ink to the table surface, and with a dash or two of the rubber roller the whole is smoothed out ready for the printer to roll his proof.

CLARKE SELLS INTEREST IN LITTLE ROCK DAILY

Publisher of Arkansas Democrat to Retire—Engel, Manager, and Sitlington, Managing Editor, Buy His Shares

Elmer E. Clarke, for 15 years publisher of the *Little Rock (Ark.) Democrat*, has retired, to devote his time to his personal interests and to travel.

In retiring, Clarke disposed of his interests in the *Arkansas Democrat*, the majority of his stock being acquired by K. A. Engel, manager of the company, and the balance by W. T. Sitlington, managing editor.

Mr. Engel becomes president, general manager and treasurer, and Mr. Sitlington continues as managing editor and becomes secretary of the company. Mr. Clarke, now with his family on a European tour, expects to devote most of his time to travel.

Mr. Clarke assumed the direction of the *Arkansas Democrat* in June, 1911, coming from New Orleans, where he had been manager of the *New Orleans Item*. Prior to that he had been manager of newspapers at San Antonio, Tex., and Evansville, Ind.

GRIMES BUYS IN BOONEVILLE

P. T. Grimes has purchased the *Booneville (Mo.) Daily Republican* from C. M. Harrison. The name of the paper has been changed to the *Central Missourian*.

in investments—everyone wants to make
money. Real estate provides the home
and the profits which often run into for-
tunes. Through newspaper advertising
the realtor proves his right to serve the
public. His 'copy' indicates his knowl-
edge of the community. My belief is
that everybody will read advertisements
and I believe that such advertisements
can be made interesting and appealing
enough to command daily attention."

Mr. Heaton pointed out that since
women were usually the ultimate buyers
of homes, it might be well for adver-
tisers with homes to sell to send out a
woman to inspect the house and describe
its advantages in the want ad.

To increase its classified advertising
patronage, the *Janesville (Wis.) Gazette*
has prepared "Ad-o-gram" blanks, which
are distributed by the carriers and printed
in the paper each evening. These blanks
may be returned to the carrier, who
brings them into the Gazette office for
publication.

Edward M. Frink has been appointed
classified advertising manager of the
Houston (Tex.) Press. Mr. Frink was
formerly connected with the *Lansing*
(Mich.) *Capital News*, and more recent-
ly with the *Lansing State Journal*.

L. B. Bradley, classified advertising
manager of the *Reading (Pa.) Times-
Tribune* for the past three years, is now
connected with the same department on
the *Wilmington (Del.) Every Evening*.

PRESS URGED TO FORM
RADIO RESEARCH BODY

Capt. Wood, N. Y. World, Says Work-
ing Agreement Between Broadcasters
and Newspapers Needed—Competi-
tion Growing, He Finds

Organization of a radio research coun-
cil by newspaper publishers to discover
ways and means to meet the growing
competition between radio broadcasting
and the newspapers was urged this week
by Capt. Robert Scofield Wood, radio
expert of the *New York Evening World*.

"Radio broadcasting is certainly now
in the field to stay as a distinct rival
to the newspapers," Capt. Wood main-
tained in an interview. "Newspapers can-
not fight it, but, by study and research
they should be able to find some working
agreement beneficial to both parties. A
thorough survey should result in the for-
mation of some common course of action
on the part of the press at least.

"Radio could be made, and in many
cases has been made, an ally of the press,
rather than its competitor. Take, for
instance, the newspapers which are op-
erating broadcasting stations of their
own. They have been able to show big
increases in circulation, because they have
found it possible to exploit features and
services to their own advantage. No-
table cases are the *St. Louis Post-Dis-
patch* and the *Atlanta Journal*.

"In England the newspapers have been
able to sew up broadcasting so that it
does not interfere with them. Broadcast-
ing of sports events are not permitted
on the air in detail in England, until
the last paper that could possibly carry
the news is on the streets. Microphones
were on the field when the Derby was
run; but no information regarding results
was given. All that was broadcast was
local color."

Capt. Scofield insisted that chaotic con-
ditions on the air continued despite the
emphatic denials of radio interests.

Not Only For the
Big Fellows

It is a mistake to think the MET-
ROPOLITAN DRY MAT is solely
for the use of big metropolitan
plants and would be a luxury for the
smaller ones.

The best dry mat is the cheapest
—as with everything else. The
METROPOLITAN DRY MAT
saves the plant more than its greater
original cost. Therefore it costs
less than inferior mats.

Publishers of the smaller city
dailies want quality and class in
everything they use. Were this not
true they would yet be using hand-
boxes instead of Autoplates, which
even the smallest plants now have.

The METROPOLITAN is be-
yond question the class of all dry
mats and is just as valuable to the
two and three press office as it is to
the big metropolitan plant. It
eliminates all dry mat troubles.

WOOD FLONG CORPORATION

501 Fifth Avenue, New York City

OCHS VISITS ONTARIO PAPER MILL SITE

Publisher With Party of N. Y. Times Executives Spends Week On Trip—His Daily Has Interest in \$25,000,000 Project

Adolph S. Ochs, publisher of the *New York Times*, with a party of associates, returned last week from a seven-day trip to the site of the new pulp and paper mills of the Spruce Falls Power & Paper Company, Ltd., at Kapuskasing and Smoky Falls, in the province of Ontario, Canada, 665 miles north of Toronto.

The Spruce Falls Power & Paper Company has acquired extensive timber cutting leases and power development rights and is financing the enterprise to the extent of \$25,000,000. The *New York Times* Company has extensive interest in the new industry with the Kimberly Clark Company of Wisconsin, manufacturers especially of paper for rotogravure printing. The new mills are expected to produce daily 550 tons of newsprint and more than 200 tons of sulphite, and will begin producing in 1928.

The power for the operation of the plant is to be obtained from Smoky Falls, which lies approximately 50 miles from Kapuskasing. A railway connecting with a main line of the Canadian National Railway System at Kapuskasing, linking the mill with the Falls, on which construction was begun last April, is within 8 miles of completion.

With Mr. Ochs on the two days' tour of inspection of the property at Kapuskasing and Smoky Falls were Carr V. Van Anda, managing editor of the *New York Times*; Louis Wiley, business manager; Arthur Hays Sulzberger, vice-president, and J. H. Black, vice-president and general manager of the Spruce Falls Power & Paper Company, Ltd., as well as several officials of the Kimberly Clark Company.

The new mills will supply all newsprint required by the *Times*, estimated to be at present one-third of the maximum production of the mills. There are 75,000 horsepower available at Smoky Falls, with two or three other water power sites in the 4,500 square miles of timber leases controlled by the company. It is estimated that upward of 5,000 persons will be employed by this industry. Plans are under way to make Kapuskasing a model manufacturing town. The development will include construction of a hospital and an employees' club building.

REPORTS MOTHER DEAD THEN COLLAPSES

Girl Writer on Athens (O.) Messenger Tells Her Paper of Accident in Which Mother Drowns and She Is Rescued

Even after she had seen her mother swoon and sink in the Ohio River near Mason City, W. Va., and was saved herself only by the barest chance, Martha Foulk Thompson, 18, reporter from Pomeroy, O., for the *Athens (O.) Messenger*, remained true to the best traditions of her profession.

When the first shock of the tragedy in which her mother and four other excursionists including a young baby were drowned when a skiff capsized, Mrs. Thompson stood beside her sister at a telephone and transmitted the story to her paper. Then she collapsed.

The tragedy occurred about 2:30 on the morning of Sept. 27, when a party of 30 had returned to Mason City from an excursion to Pittsburgh, Pa. The regular ferry from that city to Pomeroy does not operate all night, and the party was divided into three groups to be transported across the turbulent Ohio, muddy and high because of recent rains.

Filled with happy thoughts of the day spent in Pittsburgh, the first boat load of 10 persons and a baby, had gone only a short distance from the landing when the high waters of the Ohio caused it

to capsize. The swollen stream claimed the lives of four mothers and the infant. Nineteen children were left motherless by the drownings.

The newspaper woman, of athletic type, succeeded in pulling herself onto the overturned skiff from which she was rescued after she had seen her mother struggling desperately in the water, swoon and sink.

RAID FOLLOWS DAILY'S EXPOSE

As the result of a "feature story" published in the magazine section of the *Sunday Milwaukee Journal* on the "tenderloin" district in northern Wisconsin near the border, the state prohibition force this week conducted a series of raids upon the area. Several resorts were padlocked and proprietors arrested.

CRIMINAL LIBEL SUIT FOLLOWS FIST FIGHT

Ex-Mayor Curley Sues Enwright, Publisher of Boston Telegraph—New Tabloid Appears Following Bankruptcy Petition Against Telegram

James M. Curley, former Mayor of Boston, filed suit Wednesday for criminal libel against Frederick W. Enwright, publisher of the *Boston Telegraph*, a new tabloid. Application for the warrant was made on that day, but since it was impossible to reach Mr. Enwright before court closed for the day, action was delayed until Thursday morning. The suit was the result of a quarrel between the two men which culminated in a fist fight on State St. in Boston, Monday.

The *Telegram* appeared on the streets in tabloid form for the first time on that day.

Following publication in the tabloid of a news item concerning the ex-Mayor's alleged stock market deals, Curley struck and knocked down the publisher, according to a statement by Curley. Although Enwright admitted that there was an altercation, he claimed it was Curley who went down under his blow.

According to Curley's statement which was carried in all Boston papers, he met Enwright on the street and took him to task for printing an alleged untrue story about the ex-city official. The publisher, according to Curley, put out his arm and attempted to thrust Curley aside. The latter then struck at Enwright and the publisher fell to the sidewalk.

Enwright's version of the affair was that while reading a newspaper on State St., he was struck from behind. Turning, he found it was Curley, he said, and struck at him, hitting him under the eye. Enwright claims that he was next hit by someone accompanying Curley, and fell to the ground.

The following day the *Telegram* came out with a full page caricature on page one of the ex-mayor in prison garb behind bars, bearing the caption "Curley the Thug."

The unfriendliness between Curley and Enwright dates back to the days shortly after the former's election as mayor. Enwright and the *Telegram* supported Curley's candidacy, but shortly after he was elected the paper switched over and opposed him.

Legal action was started against the *Telegram* on Sept. 27, by three former employees of the paper, who made a claim for unpaid salaries, totaling \$14,002. They were: Matthew J. De Viney, of Brookline, former business manager of the *Telegram*, \$11,000; Peter H. Desmond, of Watertown, formerly in the advertising department, \$2,360, and Stephen S. Dalton, of Brockton, formerly managing editor, \$642.

The *Telegram* was in its sixth year. Enwright has two other papers, the *Lawrence Telegram* and the *Lynn Telegram-News*.

In court Enwright claimed "truth as justification" of the cartoon. The judge expressed the opinion that the publication was malicious revenge. The hearing was postponed.

LEADING ADVERTISERS TO TEACH CLASSES

Thirty-Three Leaders in Field Will Deliver Lectures at Course Being Conducted by Advertising Club of New York—To Start Oct. 14

Thirty-three leaders in the field will deliver lectures during the advertising and selling course being conducted this

year by the Advertising Club of New York. The course will be opened by Bruce Barton, president of Barton, Durstine & Osborn, on Oct. 14. Miss Grace Walton, advertising manager of Julius Kayser & Co., is the only woman on the list of lecturers.

Under the direction of Paul L. Cornell, vice-president of Hommann, Tarcher and Cornell, the committee which has organized the course is composed of the following: Norman M. Markwell, vice-chairman, C. W. Bonner, Jr., Harry Carroll, D. J. Crimmins, Harold Palmer and Ben J. Sweetland.

The lectures will be delivered on Tuesday and Thursday evenings throughout the winter, terminating March 8. Following is a list of speakers and their lecture subjects in the order in which they will be delivered:

Bruce Barton, of Barton, Durstine & Osborn, "The Vital Need for Sales and Advertising Executives"; G. Lynn Sumner, president of G. Lynn Sumner Company, "Effective Copy"; Raymond Rubicam, vice-president and treasurer of Young & Rubicam Company, "Finding the Selling Appeal"; Charles W. Hoyt, president of Charles W. Hoyt Company, "The Advertising Agency"; Theodore E. Damm, assistant to general manager, Devoe & Reynolds Company, "Market Analysis"; George B. Hendrick, director of advertising and sales, W. L. Douglas Shoe Company, "Building the Advertising Campaign"; John Allen Murphy, contributing editor, *Printer's Ink*, "Where Shall We Advertise?"

Arthur Freeman, general manager, Gimbel Brothers, "Advertising in Newspapers"; John C. Sterling, vice-president of the McCall Company, "Timeliness in Advertising and Selling"; William Beatty, vice-president of Newell-Emmett Company, "Advertising to Industries"; John Howie Wright, publisher of *Postage*, "Direct Mail Advertising"; Charles R. Weirs, president of Direct Mail Association of United States, "Business Correspondence"; Heyworth Campbell, art director of the Conde Nast Publications, "Art in Advertising"; Gilbert F. Farrar, director of typography, Patterson-Andrews Company, "Typography and Layout"; Lee Bristol, advertising manager Bristol-Myers, "Window and Store Display"; Francis Sisson, vice-president of Guaranty Trust Company, "A Banker Appraises Advertising."

Henry Morgenthau, Sr., former U. S. Ambassador to Turkey, "The Opportunity for American Business to Follow American Diplomacy"; C. W. Bonner, Jr., of Riis and Bonner, "Publicity"; A. T. Fowers, president of Powers Reproduction Corporation, "Reproducing Illustrations—A Study of a Modern Engraving Plant and Its Methods"; Marquis Regan, president of Marquis Regan, Inc., sales counsellors, "Sales Channels"; Bernard Lichtenberg, assistant

BRUCE BARTON

advertising and sales director, Alexander Hamilton Institute, "Magazine Advertising"; Nelson R. Ferry, advertising managing manager of *Liberty Magazine*, "Selling the Idea of Advertising"; George F. McClelland, vice-president and general manager of National Broadcasting Company, "Radio Broadcasting the New Advertising Medium"; Grace Walton, advertising manager of Julius Kayser & Company, "Sales as it Pertains to Advertising"; R. D. K. director and general sales manager of E. Squibb & Sons, "Sales Management"; S. Conybeare, advertising manager of Armstrong Cork Company, "Sales and Advertising Departments."

Saunders Norvell, chairman of the Boston McKesson and Robbins, Inc., "Selling Through the Wholesaler"; William Nelson Taft, editor of *Rail Ledger*, "Retail Sales Methods"; R. R. Smith, advertising manager, Fuller Company, "Selling the Consumer Direct"; W. Hine, vice-president of I. Newman & Co., "Selling the Retailer"; A. W. Sullivan, general manager of Tidewater Oil Company, "Outdoor Advertising"; Albert Leffingwell, vice-president of Olmstead, Perrin & Leffingwell, "Advertising the Creator of New Markets"; Sir Charles Higham, president of Charles Higham, Ltd., "How I Intend to Use This Course."

ATLANTA JOURNAL HAS FIRST MIAMI PHOTOS

Printed Three Storm Scenes Monday Morning—Received Nine Dozen Negatives on First Train Out of City

The *Atlanta Journal*, as far as is to be ascertained, published the first photographs of the Miami disaster appearing in any newspaper in the United States.

In spite of the confusion, the uncertain telegraph service, lack of railway and airplane facilities, which hamper newspaper men and photographers, the *Journal* was on the street with an extra carrying three photographs of the storm-struck area by 9:00 P. M. Monday night, Sept. 20.

On Tuesday morning, another extra carrying a complete storm story and two pages of photographs, was issued. The Wednesday rotogravure section appeared with a page of Miami storm pictures, and the devastated regions were again featured in the front page layout of the Sunday rotogravure section of the paper.

At 6:45 Monday evening, the photographic department received, by special courier, on the first train to leave Miami, nine dozen negatives from Eric V. Glavin, a Miami photographer. Some of the photographs had actually been taken at the height of the hurricane, and showed streets under water and palm trees blowing. Others were taken after the storm had subsided, showing wreckage along the river front, yachts and schooners washed high and dry up the streets and parks of the city, and houses torn from their moorings and scattered.

In collecting a Relief fund, the *Atlanta Journal WSB* radio station conducted a continuous program on Monday, from twelve noon until twelve midnight, broadcasting an appeal for contributions between each number. During this time more than \$20,000 was subscribed, the rate of one subscription a minute.

TO CORRECT

a misleading statement of the Playograph Co. in the Sept. 4th issue of Editor & Publisher to the effect that their patents fully protect Playograph users, and that our suit against them had been dismissed, it should be explained that the suit was not dismissed, but was tried; though the decision was against this company, the same Judge who rendered the decision has granted an appeal to the Circuit Court of Appeals.

STAR BALL PLAYER CO.

KIRKWOOD GIVES SITE FOR ART MUSEUM

Twenty Acre Tract to Be Sold and Proceeds Spent in Erecting Building to House Art Works

The Oak Hall tract of approximately 20 acres, formerly the home of William Rockhill Nelson, founder of the *Kansas Star*, was this week offered as a gift to the city of Kansas City for a site for the gallery to house the art collection created by the William R. Nelson trust.

The offer was made to H. F. Elroy, city manager, by Irwin R. Kirkwood, son of the life estate in Oak Hill and husband of Laura Nelson Kirkwood, daughter of Colonel and Mrs. Nelson. Judge McElroy made the suggestion to Mr. Kirkwood who formally accepted the project in a letter to the city manager.

If the city should buy the property, Mr. Kirkwood said he would turn the tract back into a building fund. This tract, added to the \$800,000 left by Mrs. R. Nelson and of approximately \$100,000 left by the late Frank F. Rozelle for the erection of a building to house the works of art, would make possible the immediate construction of the first unit.

Mr. Kirkwood's letter to Judge McElroy making the offer follows:

My Dear Judge: some days ago you were good enough to advise me that you thought it important that an immediate effort be made to provide a place to house the works of art that are provided for in the income of the William Rockhill Nelson trust. In this I heartily concurred for even with great diligence it is going to take considerable time to work out plans for a building which will in time to time have to be expanded. You further gave your reasons why the property known as Oak Hall was a logical site for the art gallery and seemed most sound and fitting to me. The ground was selected on account of its sightliness by Mr. Nelson forty years ago. Here he built his one and only home in Kansas City. Here he effected the unusual residential development that has spread until it has made Kansas City famous throughout the country. Here he lived while building the newspaper. Here he died. Nothing, I believe, could be more fitting than that this ground that was identified with his life should be taken for the site for the buildings that are to house the great art collection which he endowed.

It is natural, too, that the city should desire to have a hand in providing a permanent home for this collection. In fact, this thought was in Mr. Nelson's mind. He expressed the hope in his will that the public would furnish the buildings for the exhibits.

At the time we discussed the matter I said that you were going to communicate your idea to the common council. I do not know when you propose to do this but I have been giving the subject much consideration and before I do make any recommendations I thought you to have this letter explaining my purposes.

There is no question of the need of prompt action. With the sale of the trust the university trustees of the William Rockhill Nelson Trust now have a large income to be devoted to the purchase of art works. No building is ready for their display. Mrs. Nelson's estate, amounting to approximately \$1,000,000, is to go toward erecting a building and is now available. This amount, however, is not enough to construct the first unit of the gallery on a scale that is required.

Virtually the estate of Mrs. Kirkwood will be added. But what is needed is to supplement Mrs. Nelson's estate with sufficient funds to make possible the immediate building of the first unit. The plan for the city to acquire the Oak Hall property seems to me to be the way to accomplish this object.

"If the plan is adopted it is my purpose to turn over at once to the building fund the proceeds from the sale of the property. I would be glad if you would inform the council of this intention. The amount realized from the sale would be sufficient when added to Mrs. Nelson's estate to build immediately the first unit of what should become one of the great art buildings of America.

"The Oak Hall property is a considerable part of the Laura Nelson Kirkwood estate. What I propose to do, then, is to devote this portion of her estate at once to the purpose to which the entire estate ultimately will go. As you know, this is not a requirement of Mrs. Kirkwood's will, but it is consistent with the provisions of the will and with her purposes because it makes possible the right sort of start on the art gallery. My only duty as trustee of her estate requires that a fair sum be realized so that the purposes of the testator be fulfilled.

"Your plan appeals to me especially because it opens the way by which the people now living in Kansas City may get the fullest benefit from the William Rockhill Nelson Trust.

SALISBURY SUCCEEDS WILLINGS

Named Assistant to President Swartz of Intertype Corporation

D. R. Salisbury has been appointed assistant to President H. R. Swartz, of the Intertype Corporation, and will succeed to the duties of G. C. Willings, former vice-president and sales manager of that organization, who resigned Oct. 1.

Mr. Salisbury was born in Marshalltown, Ia., in 1886. He was graduated from the Massachusetts Institute of Technology in 1918 and was shortly thereafter appointed to the

office of sales manager of the Allied Machinery Company of America. He remained with this company until 1925, most of his time being spent with its subsidiaries in England and Japan in the capacity of administrative and sales manager. He returned to the United States in 1925 and became identified with the American Laundry Machinery Company.

ENGLISH ART EDITOR HERE

H. G. Bartholomew, art editor and a director of the *London Daily Mirror*, arrived in New York from England Oct. 5, for a two weeks' visit to study American tabloid methods. He was accompanied by Mrs. Bartholomew, and will make a trip to Montreal and Toronto before returning.

INLAND A.B.C. WEEK PROGRAM READY

Palmer, Thomason, O'Shaughnessy Named Among Speakers for Chicago Convention Oct. 19-20—V. E. Joy to Preside

The program has been completed for the autumn meeting of the Inland Daily Press Association at the Hotel Sherman, Tuesday and Wednesday, Oct. 19 and 20. Vice-president Verne E. Joy of the *Centralia* (Ill.) *Sentinel*, is acting president and will preside in the absence of President Southern, who is attending the Third World Press Congress in Switzerland.

Speakers on Tuesday afternoon's program are: Frank Lovell of the *Racine* (Wis.) *Times-Call*, on "Reader Confidence and Editorial Management"; C. C. Marquis of the *Bloomington* (Ill.) *Panagraph*, on "The Farm Page: Its Contents, How Operated, Its Cash Register Results"; Prof. H. F. Harrington, director of the Medill School of Journalism, Northwestern University, on "What the Newspaper Does for Children"; Stephen Bolles of the *Janesville* (Wis.) *Gazette*, on "When Is a Newspaper a News Paper?"; C. E. Broughton of the *Sheboygan* (Wis.) *Press*, on "Composing Room Deadlines and How to Make Them Stick."

Wednesday morning's speakers for the general session are: D. W. Stevick of the *Champaign* (Ill.) *News-Gazette*, and A. O. Lindsay of the *Quincy* (Ill.) *Herald-Whig*, on "Consolidating a Newspaper Field: Does It Pay and How"; Lincoln B. Palmer, manager, American Newspaper Publishers' Association, on "Our Mutual Interests"; S. E. Thomason of the *Chicago Tribune*, and former president of the A. N. P. A., on "Why Inland Members Should Belong to the A. N. P. A."; John Camlin, president of the Illinois State Chamber of Commerce, on

NEWSPAPERS NEED BETTER BALANCE HUMAN INTEREST AND SCIENCE

Former Over-Done in Dailies, Under-Done in Schools—Knowledge Can Be Clothed With Interest Says President of Science Service

By WILLIAM E. RITTER
President, Science Service, Inc.

THE question, consequently, of how all mankind may become beneficiaries in the highest measure of the great accumulations of special knowledges possessed by these little, isolated groups of investigators is one that has long received more or less attention by those who concern themselves seriously with problems of general human welfare. But it is only recently that the question has come to be recognized as hardly secondary in importance to any other whatever.

It is recognized among advanced peoples that one of the chief means of accomplishing this is formal education, public and private, lower and higher. No mean part of the total work of schools and colleges must be devoted, it is now widely conceded, to instructing the young in what the special students in all fields of knowledge are doing. Youths must be given opportunity to learn what major factual discoveries are being made and something of how they are made. They must also be helped to learn something of the way the veterans in research find new meanings in old facts and make hypotheses which lead on and on in the discovery of new facts.

But what about such education after the youthful period, short indeed in the school sense, is ended? For surely scientific discovery is under no bond to cease at the point at which youthful education leaves it.

In some respects popular education in science is more important for the individual's post-school period than for his school period.

Hence the vast efforts made today wherever on the earth man is using his abilities and realizing his desires and hopes in fullest measure, to help the rank and file to keep up with—to keep in touch with—scientific discovery.

The special purpose of this communication is to glance at the response newspapers are making and may make to the desire on the part of the public for scientific information.

My contention is that while an investigation of what American newspapers have done in this way during the last two decades would almost certainly show a great increase in the quantity of scientific matter printed and a very substantial improvement in the quality of that matter, the possibilities here open to journalism for advantage to themselves and good to the public are very imperfectly understood and but little exploited.

I am quite sure that any newspaper which should adopt a policy of utilizing as far as possible the matter available from all the main fields of scientific research would soon find its policy registering to its satisfaction in its circulation, *provided this policy were carried out in accordance with what psycho-biology now knows about the functions and inseparableness of emotion and reason in each human life.* Emanuel Kant's testimony as to how he was affected by contemplating the starry heavens above him and the moral law within him is surely not evidence of experience peculiar to the tiny class of great philosophers. Under some form and measure the same experience is common to all mankind. High-brow learning has usually gone wide of the mark in its interpretation of, and attitude toward "thrills."

Although these activities are of fundamental importance to all living beings, since the continuance of life depends on them, it nevertheless has come about that in organisms occupying so high a place in the scale of life as that which we ourselves occupy, certain of these activities have become so highly elaborated and intensified that they tend ever to run

wild and get us into all manner of trouble.

The elements of our conscious lives which are con-comitant to these elaborated and intensified activities are what in common language we call our *emotions*.

The trouble-making tendencies of these activities nature has provided us an antidote for. This antidote is that element of our conscious lives which we call our *reason*. These last statements are rankly dogmatic. They can not be made otherwise here because the psycho-biological facts and principles on which they rest are too complicated for presentation in such a brief communication as this must be.

Beyond a question emotion is appealed to too much and reason too little in newspaperdom as a whole. But equally beyond question, in my judgment, emotion is appealed to too little and reason too much in formal schooling.

Almost the same way of saying the same thing is to say that the "human interest" idea is over-done in newspapers and under-done in schools, especially in higher schools.

This of course is a mere touch-and-go treatment of a vast subject. On the school side of it, not a single word farther do I say. On the newspaper side, the only thing I add is a little in the direction of replying to the everlastingly reiterated statement from editorial offices that such floods of more interesting copy flow in upon them as to leave only a little space in attic and cellar for scientific stuff.

Let us look at the matter, merely abstractly if you choose, in this way: Human interest; yes, all right. We agree heartily that no newspaper could or should survive a year whose pages were not warm and glowing with matters of interest to many, many people. But then the question, Is it really true that science contains little or nothing of such matters?

If we could only believe, truly, what almost everybody knows after a fashion, that Science is just knowledge at its best, hardly anyone could hesitate long for an answer to this question.

Who, no matter how high or how low his brow, can deny that the most interesting, and the most important knowledge to every human being is self-knowledge? And where may one best turn for help in his terrible task of getting reliable knowledge of himself? If he wants to know himself sexually for instance, where is he likely to get the most dependable help, from filmdom or perhaps the divorce court; or from the sciences of anatomy, physiology and psychology?

Suppose further he wants honor-bright knowledge as to the meaning of the starry heavens for his own life. Where is his best chance of getting such knowledge? Is it from some newsstand pamphlet on astrology or some newspaper's horoscope for his birthday? Or is it the technical publications of astronomical observers viewed in their bearing on what is known about the physical, the esthetic, and the imaginative natures of man?

If a teacher or musician has a few hundred dollars to invest, where is she likely to get the most trustworthy advice as to what stocks, let us say, are safest, from some spiritualistic medium, or from experts in engineering, in economics, and in finance?

What I am driving at is not by any means point-blank opposition to murders, scandals, comics, and so on, in the papers. These things certainly are parts-and-parcels of the life (and death) of the com-

munity; and due regard for truth and its meaning for human welfare requires that they shall be so recorded that all who wish to can learn something about them.

It is the great disproportionate quantity of attention and space given to these forms of human interest as contrasted with what are given to other and far more vital forms of such interest that needs prayerful and scientific consideration.

"Katzenjammer Kids" are all right. Youngsters surely do many funny things—and some that are not so funny—from the grown-up's standpoint. But they get too many pages in the Sunday papers in proportion to the space which nursery school kids get. The significance for us moderns of the fact that our remote human ancestors communicated with one another by hand-made pictures through whole milleniums before they knew anything about writing in our modern sense—to say nothing about machine printing—has not received a quarter of the attention by anybody that it deserves.

My meaning is that the "human interest" in much that scientific research has learned and is learning, for instance about children, is so much more real and so much greater than is that in the kind of things about children exploited by newspaper comics that to discerning eyes the ludicrousness of the matters themselves is exceeded by the ludicrous spectacle of newspaper managements as to what kinds of things are of greatest human interest.

But I hasten to admit that the ludicrousness of this situation does not rest upon the newspaper managements alone. I am aware that it is quite impossible for newspapers to get hold of those results of scientific discovery which are richest in human interest without the co-operation of the discoverers themselves. And here we reach the kernel of this communication.

To me it seems certain that, could newspaper men and scientific men join heads and hands seriously in the task of extracting for newspaper use the quintessence of what is most humanly interesting and significant in scientific discovery, especially as to man himself, the problem of space in the papers would take care of itself in that matters of the greater interest from science would automatically replace much of those of lesser interest to which so much space is now given.

It is a problem of finding a balance between the lighter, less permanent, less far-reaching but more easily noticed and garnered human interests, and the more weighty, more enduring, more far-reaching, but less easily perceived and garnered, human interests.

Nothing in the realm of human knowledge is too difficult for anybody to tackle if only he can see that his own personal welfare is involved. Let the silliest flapper become convinced that her own precious happiness is wholly dependent on the calculus and some knowledge of this branch of mathematics she will be bent upon getting it.

Highly Significant

is the fact that as soon as a new daily newspaper is in the formative stage, one of the first things the publisher does is to

Subscribe for one or more copies of

EDITOR & PUBLISHER

THE DAILY NEWSPAPER ADVOCATE

The publisher instinctively knows that its many-sided service is as necessary a part of his equipment as newsprint or presses—and often he subscribes to EDITOR & PUBLISHER before he buys either.

*Is EDITOR & PUBLISHER a part
of YOUR equipment?*

If not, make it so, before the next issue appears. You can put to many splendid uses its "spot" news of the field—its authoritative compilations analyzing current trends—its frequent special numbers—its great Annuals—all for the one subscription price.

The use of this coupon will start the service at once.

Editor & Publisher,
Times Bldg., New York.

Put me down as a subscriber, including with my annual subscription, at no extra cost, the International Year Book and the Market Guide, as they are issued during the term of my subscription. Attached is my check for \$..... (Or, if you prefer, send me your bill.)

HEAVY PAPERS DRIVE EXPENSES UP 12 PER CENT

(Continued from page 27)

blem, now as always, but the 1926 edition is expensive as well as effective. Even small city evening newspapers are coming from mail-train and bus to their own vehicles for movement of editions. Motorcycles with specially-designed side-cars rumble and jolt through small, but ambitious cities into the surrounding territory, putting late editions into far distant homes by supper-time. The slow and high-priced postal service is gradually giving place to the fast and efficient, but more costly, private delivery. Invaluable papers are operating their own fleets of trucks, some morning papers covering a 150-mile stretch on their own transportation. That speed cannot be bought for 10 per cent more than the cost of postal service.

These circulation developments represent a sizable volume of new capital investment, as do the various machines and presses which many newspapers have installed in their mailing and delivery rooms to speed the handling of large and bulky editions. The deft hand and strong arms of the mailer are still needed, but many papers have found human skill inadequate for the speedy movement of 40-page dailies and jumbo Sunday papers. Conveyors are now almost commonplace in newspaper shops where they would have been an unjustifiable luxury a few years ago. Stuffing machines belonged only to New York and Chicago at the beginning of the present decade, but they dot the nation today.

In the advertising department, new capital investment has not been required and a small degree, but the cost of doing business grows with little restraint. Not every publisher gives some "merchandising service" now, and some of them spend thousands of dollars on the strength of their business-getting force. Promotion of every kind is at an unprecedented pitch of activity—the advertising newspaper publishers in New York papers during the first six months of 1926 increased 124 per cent over the same period last year. Rate market surveys in colors that those of Joseph's coat are deposited almost every mail in advertising agencies and national advertisers' offices. Ideas will be rejected because of expense if they give promise of adding circulation or of bringing a new local national account. Promotion was until recently a recognized legitimate part of a few newspapers' operations. Only a few shops did it have a regular personnel and a budget to accomplish design objectives. This year scores of newspapers have brought their banners to the front of the battle for business. Not only have they yet shaken their activity down to a budget and a schedule, but they appear to be indulging at last in a long-dreamed desire to exhibit their light which has been hidden under the bushel of poverty for many years. It is reasonable to suppose, however, that the experience of newspaper publishers in advertising they are buying will offer materially from that of merchants and manufacturers who have not what newspaper space can do for proper management. Promotion, a new element in many newspaper budgets, is emerging as a permanent part of the publisher's organization table.

The question in the minds of the two publishers who started this discussion was answered by the statement that newspaper publishers are not taking for granted the profits produced by advertising. Much of the increased cost is being turned back into the publisher, tightening its hold upon the field, and its sphere of influence, giving increased measure of service to an increasing number of advertisers, improving physical appearance and tone of paper. That kind of investment cuts the 10 or 15 per cent of gross revenue

enues that publishers like to call their just profits, but it will do much to insure the continuance of the return on their total investment when advertising is not so flush and expenses have to be trimmed. There may be some looseness and folly in the free spending, some expenditure upon which there is little present and no future recompense, but for the most part, the newspaper expansion of 1925-1926 has been wise and well-controlled.

HOBART NEW PRESIDENT OF MISSOURI PRESS

Publisher of Holden Progress Honored at Cape Girardeau Convention—Outline "Score Card" for Contest Use

C. L. Hobart, publisher of the *Holden* (Mo.) *Progress*, was elected president of the Missouri Press Association at the closing business session of the fall meeting in Cape Girardeau recently.

Other officers chosen were: Frank W. Taylor, *St. Louis Star*, vice-president; Mrs. William Midgett, *Mt. Washington News*, recording secretary; Maxfield Jones, *Platte City Landmark*, treasurer. Directors for three years: E. K. Lyles, *Houston Herald*, and Herbert Steinbeck, *Union Republican*.

In an effort to base judging of country newspapers on something more definite than the judges' likes and dislikes, the Association endorsed a "score card" drawn up by a special committee.

Whenever a newspaper exhibit is held in Missouri, the new score card is to be used in the placing of awards, it was agreed, and passed upon in a resolution.

The score card, which will also pertain to semi-weeklies and tri-weeklies, divides the 100 per cent. or perfect score a newspaper can make into various features. The maximum score on ads to reading matter is 5 points; local to non-local matter, 5; volume, 5; presswork and print stock, 5; front page, 15; other news columns, 15; editorial columns, 15; display advertising columns, 12; classified advertising, 3; advertising rates, 5; circulation, 5; typography, 10.

It was also decided to hold an exhibit for weekly newspapers at the next meeting of the Association. An award in the form of a cup or other recognition of the executive secretary is to be provided.

Official representatives to the unveiling of the stone lantern presented to the school of journalism by the princes of Japan were named as follows: Will H. Zorn, *West Plains Gazette*; E. Lansing Ray, *St. Louis Globe-Democrat*; Miss Pearl Peters, *Monett Times*; Mrs. Frances Jacobi Omera, *Martinsburg Monitor*; B. Ray Franklin, *Jefferson City Capital-News*.

The trip to Cape Girardeau was made by boat on the Mississippi River. After seeing the cotton fields at Morley and attending a dinner at Benton in the county community house, the party left by special train for St. Louis. Karl Bickel, president of the United Press Association, made the address at the dinner Friday night.

SPECIALS PLAY GOLF

J. N. Morency Low Net Winner in Chicago Tournament

The Newspaper Representatives' Association of Chicago held its second golf tournament of the season, Oct. 4, at the Wilmette Country Club.

The winners follow: Low cross, J. N. Morency; low net, H. K. Clark; low putts, J. N. Morency; blind bogey, George Noe; first flight, Guy Davis; second flight, John Driscoll; third flight, Fred Levings; fourth flight, C. A. Kinners. Runners-up were: first, F. E. Crawford, Jr.; second, A. J. Irvine; third, H. K. Clark, and fourth, A. H. Hogg.

The association plans to run three or four tournaments next year, as a result of the success of this year's contests.

Illinois

the center of the Nations Agricultural Commerce

ILLINOIS is on top as an agricultural state—although in size it ranks twenty-third, yet in farm crop value it is second among the 48 states—(1924 crops value \$520,429,000). The main reason for its great crop wealth is diversification in farming. Illinois grows everything from cotton to truck crops—and its ranking among the states in volume of crops is as follows: Corn—2nd; Oats—3rd; Rye—8th; Wheat—7th; Barley—9th; Cotton—18th; Potatoes—9th; Hay—5th; Clover Seed—2nd; Fruits—11th; Truck Crops—9th. Stack all these together and you have the answer to Illinois' great agricultural wealth.

If any national advertiser wants to reach a class of rich farmers in a small territory he cannot select a better state than Illinois. They live like the city folks, with their palatial homes, town cars—pianos, radios—and all the other comforts and luxuries of the rich city dweller.

The daily newspapers listed below enter the homes of these people—your message directed to them in these papers go to these homes—they are all great believers in advertised products. Let these papers carry your message.

AD TIPS

Aspitz, Lee & Harvey, 360 North Michigan avenue, Chicago. Issuing 1,000 line copy orders on Sampson Electric Company, Chicago, to newspapers in the middle west.

G. M. Basford Company, 17 East 42nd street, New York. Placing account of the United Filters Corporation, Hazleton, Pa., manufacturers of industrial filters.

Blackett and Sample, 58 East Washington street, Chicago. Now placing the account of Northern Paper Mills, Green Bay, Wis.

Buchen Company, 28 East Jackson Boulevard, Chicago. Placing account of the Reo Motor Car Company, Lansing, Michigan.

The Coolidge Advertising Co., Insurance Exchange Bldg., Des Moines, Ia., is preparing a list on Chamberlain Medicine Company, Des Moines, Ia.

Critchfield & Co., 14 East Jackson boulevard, Chicago. Preparing a list on Firestone Footwear.

Albert Frank & Co., 14 Stone street, New York. Has secured account of the De Jur Products Company, manufacturers of variable condensers, grid leaks, resistance coupled amplifiers and other radio accessories.

J. J. Fuller Advertising Counselor, Buffalo, N. Y. Placing accounts for the Amcoinc System, Inc., Buffalo, and the Standard Business Training Institute, Buffalo.

Grant & Wadsworth, Inc., 342 Madison avenue, New York. Has secured the following accounts. The Slicker Metal Radiator Furniture Corporation, Phinney-Walker Company, New York, importers and distributors of automobile clocks, and Hydro Insured Tires, Pottstown, Pa.

Gundlach Advertising Company, 400 North Michigan avenue, Chicago. Now handling Vitamin Food Co., Westfield, Mass. (Vegex.)

Hawes-Campbell Company, Tribune Tower, Chicago. Sending out copy schedules to a list of newspapers in the middle west on Thomas Welch Co., Chicago (Coffee).

John L. Jones Company, 332 South Michigan Boulevard, Chicago. Preparing fall schedules on A. J. Musselman Radio Company, Chicago. Also placing the advertising of Karas Electric Manufacturing Company, Chicago (Radio).

Klau-Van Pietersom-Dunlap-Younggreen, Inc., 417 Sycamore street, Milwaukee. Now handling account for the Lakeside Packing Company, Manitowisc, Wis., canners of Lakeside brand of peas, beans and other vegetables.

Kling-Gibson Company, 310 South Michigan boulevard, Chicago. Has prepared a list on Trimm Radio Company, Chicago.

Koch Company, Inc., 432 Broadway, Milwaukee. Placing account of the Walker Mfg. Company, Racine, Wisconsin, manufacturers, jacks.

Lewis H. Mertz Company, 400 North Michigan avenue, Chicago. Sending out copy schedules on King Radio, King Quality Products Co., Buffalo, N. Y., to a few small town papers in the middle west.

Lord & Thomas and Logan, 400 North Michigan ave., Chicago, is preparing a list on Pines Winterfront Co., Chicago.

Matteson-Fogarty-Jordan Company, 307 North Michigan avenue, Chicago. Will issue 16,000 line schedules on Kellogg Switchboard & Supply Company, Chicago. (Radio)

Mitchell Advertising Company, 1018 Nicollet avenue, Minneapolis. Sending copy schedules to papers in Montana and Iowa on Nash Coffee Company, Minneapolis.

Nelson Chesman & Co., 1127 Pine street, St. Louis, Mo. Issuing contracts to newspapers generally on Tencel Co., Canton, O.

Pickus-Weiss Company, 307 North Michigan avenue, Chicago. Will probably have some advertising this fall on Sonatron Tube Company, Chicago.

Pickus-Weiss Company, 307 North Michigan avenue, Chicago. Now placing the account of Stuart Products Company, Chicago, radio batteries.

Procter and Collier, McMillan street at Reading Road. Preparing a list on U. S. Playing Card Company, Cincinnati.

Reardon Advertising Company, Quincy building, Denver, Colo. Is sending copy schedules on American Beet Sugar Co., Denver, to Iowa papers.

Reincke-Ellis Company, 215 North Michigan avenue, Chicago. Reported to be preparing a list of newspapers this fall on American Chain Co. (Weed Chains.)

R. G. B. F. Advertising Company, Chicago. Will probably handle the advertising of the W. J. Dennis Company, Chicago, manufacturers of weatherstrips, in about six metropolitan cities in the middle west.

Ross Advertising Company, Fort Wayne, Ind. Is preparing a small list of newspapers for the advertising of Ovelmo Company, Fort Wayne, Ind.

Sims Malt-O-Wheat is making a small test campaign, directly through the company, in the northwest.

Southern Advertising Agency, Inc., Randolph Building, Memphis. Now handling account of the Plough Chemical Company, Memphis, manufacturers "Black and White" beauty creations and "St. Joseph's family medicines."

St. Paul Advertising Company, 100 South Wabash street, St. Paul, Minn. Issuing large copy to newspapers generally on Ad-Ler-Ika Co., St. Paul.

Storey-Bellack Company, Wausau, Wis. Sending copy schedules to Wisconsin papers on Marathon Battery Co., Wausau, Wis.

Sweeney & James Company, Inc., 1632 Euclid avenue, Cleveland. Placing account of the Swartwout Company, Cleveland, manufacturers of ventilators, ovens and power plant equipment.

J. Walter Thompson Company, 410 North Michigan boulevard Chicago. Issuing 16,000

line contracts on Chartex Company, Des Moines, Iowa.

Frank B. White Company, 33 S. Clark street, Chicago. To handle the advertising for the Sterilac Company, North Chicago, Ill.

Winston & Sullivan, Inc., 25 West 44th street, New York. Now handling account of De Marinis & Lorie, Inc., New York, manufacturers of ladies' hats.

INSURANCE AD CONFERENCE

Building Agents' Business Theme of Detroit Meet, Oct. 18-19

"Helping Our Agents to Produce More Business," will be the theme of the Fall meeting of the Insurance Advertising Conference to be held at the Tuller Hotel, Detroit, Oct. 18-19. Possibilities of national and local advertising will be discussed.

Speakers at the general session will be: W. W. Ellis, sales promotion manager, Commercial Union Assurance Co., New York, president of the conference; W. J. Reineke, president Michigan Insurance Agents Association; C. E. Rickerd, Standard Accident Insurance Co.; George Cox, direct mail specialist of Cox & Downey, Detroit; E. S. Raymond, S. S. Glass Corporation, Detroit; and S. C. Doolittle, Fidelity Deposit Co., Baltimore.

PLANS NEW TEXAS DAILY

Establishment of the *Borger* (Tex.) *Daily Telegram* by E. G. Albright, former Ponca City, Okla., publisher, has been announced. Mr. Albright has begun construction of a new building and has ordered the mechanical equipment. Borger is a new town and has a large population drawn by the oil fields. The Borger Publishing Company will be publishers of the Telegram.

OGLE BUYS INTO S. C. DAILY

J. T. Fain, publisher of the *Hendersonville* (N. C.) *Daily Times*, has sold an interest in the business to C. M. Ogle, formerly managing editor of the *Kokomo* (Ind.) *Dispatch*. Eugene G. Denham, who came to Hendersonville from the *Philadelphia Public Ledger*, will continue as managing editor.

KANSAS A. P. GROUP MEETS

Associated Press members of Kansas met at the A. P. office in Kansas City last week to prepare plans for covering the November election. Hugh J. Powell of the Coffeyville Journal was unanimously re-elected a member of the advisory board of the A. P. Editors present were guests of the *Kansas City Star* at a dinner following the meeting.

DAILY BUILDS \$125,000 GARAGE

The *Milwaukee Journal* has opened a new garage at Sixth and Poplar Streets for the storage and service of its fleet of newspaper trucks. The building is 150x150 feet, constructed of concrete, steel and brick, and cost \$125,000. It provides space immediately for 90 cars and is so constructed that it can be enlarged to house twice that number.

WHAT OUR READERS SAY

"GHOULISH REPORTERS"

TO EDITOR AND PUBLISHER: Mr. Mencken cannot understand why the Northern newspapers so grossly reported the Florida hurricane. If he had been here it would have been plain.

Practically every Northern reporter came with the ghoulish idea of reporting deaths and human misery. The largest estimate of deaths in Dade County, a territory sixty miles square, was 114—less than one to each two thousand population.

If these reporters had turned their minds away from death long enough to obtain facts about the effects of the storm, Northern readers would have been better informed.

I am wondering how long the American public will have to endure ghoulish reporters and editors.

OLIN W. KENNEDY,
Miami (Fla.) *Herald*.

MERCURY WRITER MISTAKEN

TO EDITOR AND PUBLISHER: I observe in your issue of October 2, the following quotation from the *American Mercury*: "It has been predicted recently by Carr V. Van Anda, of *The New York Times*, that in a few years all the daily newspapers will be forced to adopt the tabloid form."

Will you permit me to say that I have never held or expressed such an opinion?

C. V. VAN ANDA.

B. M. PHELPS TRANSFERRED

Bruce M. Phelps, who has been the Eastern representative of the Duplex Printing Press Company, with headquarters in Boston, has been transferred to Southern territory, with headquarters in Miami, Fla.

A paper with the people

The public decides the progress of a newspaper.

The continuous rising circulation of the New York Evening Graphic vividly demonstrates popular acceptance of this newspaper as a medium of unusual reader interest.

Advertisers daily realize the benefit of this power through achieved results from the advertising columns of the New York Evening Graphic.

With a constantly increasing circulation, plus a constant growth in advertising lineage, the New York Evening Graphic offers the advertiser an extremely profitable opportunity.

WOMEN ON MIAMI DAILY NEWS COOKED FOR STAFF DURING HURRICANE

"Sob-Sisters" Are "18-Karat Sisters Now," Men Declare—
Aileen Blanford Heroine of Moore Haven Flood Tragedy
—Aided in Rescue and Identified Bodies

ONLY 'sob sisters' before the storm but honest-to-goodness, 18-karat sisters now." This simple sentence pasted to the bottom of a photograph of the *Miami Daily News* "rations squad" on the news room bulletin board tells the story of male appreciation for the splendid work done by

prejudices might have existed in the minds of newspaper men for women members of the staff.

At Moore Haven, Fla., where the waters of Lake Okeechobee swept over the dikes and brought death and destruction to the surrounding country, a newspaper woman, Miss Aileen Blanford, of

the bodies, for in her newspaper work she had built a wide acquaintance in every section of the town. She did this gruesome task for 12 hours until she was forced to rest.

But after a few hours of troubled sleep she again returned to relief work, and took charge of distributing clothing and supplies.

After the state troops arrived she continued to aid. She was on the verge of exhaustion, and when assured that ample food had been received for the survivors, she consented to leave the scene, and was taken in an automobile to Fort Myers.

Later, her heroic work was told in a column story in the *Fort Myers Press*. Valuable service to Florida newspapers was rendered by the *Atlantic City* (N. J.) *Press-Union* through the municipal radio station WPG. Both Associated Press and United Press news reports were broadcast by the *Press-Union*.

UTAH PRESS MAY HIRE FIELD SECRETARY

Advisability of Move to Be Discussed at Annual Meeting in Salt Lake City Oct. 10-11

Members of the Utah State Press association will consider the advisability of employing a field secretary or manager at the annual meeting in Salt Lake City, Oct. 10 and 11. The discussion on the subject will be led by A. B. Gibson, publisher of the *Nephi Times-News*.

The program follows:

Oct. 10.—Committee report on International Press Foundation, Burke McArthur, *Mt. Pleasant Pyramid*.

Report on conditions for awards for excellency in newspaper makeup and subject matter, Dr. M. Markus, *Richfield Reeper*.

Secretary's report and president's address.

Oct. 11.—Address of welcome, Malcolm A. Keyser, president, Salt Lake Chamber of Commerce.

Response, Charles England, *Logan Journal*.

"How to Build Up a Classified Page," H. W. Cherry, *Gunnison Valley News*.

"Building Circulation," L. W. Gaisford, *American Fork Citizen*.

"The Editorial Page," H. E. Blake, *Monticello Record*.

"Should Political Advertising Carry Extra Charge," W. P. Epperson, *Kaysville Reflex*.

"Co-operating with Advertisers," Dr. M. Markus, *Richfield Reeper*.

Luncheon by courtesy Western Newspaper Union.

"Are Taxpayers Entitled to Know Where their Money Goes?" John E. Holden, state auditor.

"Education and the Press," Dr. C. N. Jensen, state superintendent public instruction.

"Saving Taxes and Federal Aid," A. C. Rees, Utah Taxpayers association. Election of officers.

The "rations squad": (left to right) Mrs. Truman Felt, wife of real estate broker; Miss Norma Davis, reporter; Miss Clara Davis, reporter; Miss Mary Shrow, society reporter; Mrs. Carson Adams Arnold, society writer; Mrs. Ross A. Reeder, wife of publisher; Mrs. Hal Leyshon, wife of news editor; Mrs. May Brenz Meranda, society editor and Howard Reeder, son of publisher. Others who led the rations squad were: Mrs. J. J. McDermott, assistant librarian; Miss Emma Wickert, classified department, and Mrs. C. F. McInyre, wife of staff artist.

sob sisters," society writers and wives of newspapermen, who, by day and by candlelight, fed *Daily News* employees as they worked for long hours to "cover" the recent storm story in the Miami district.

Hands that jot down society notes at teas will be red for many a week from the effects of hot dishwater. For two days and nights the "women-ks" who dispensed cheer and a smile with each cup of coffee slaved in an emergency kitchen rigged up in the basement of the News Tower. Hundreds of meals were served. All *Daily News* employees, from carrier boys to high executives, were prompt, efficient service.

The men of the news room who were gazing away for 36 and 48 hours at a stretch without sleep now they never could have kept going without the aid of the "rations squad." They will never forget them. Among other things the hurricane wiped away are whatever

the weekly *Glade County News* is being proclaimed the outstanding heroine of the hurricane.

Miss Blanford doggedly refused to leave when the town was flooded under seven feet of water within 40 minutes. For four hours she aided in rescuing the townspeople, going from house to house, sometimes swimming, sometimes wading up to her shoulders in the flood. She rescued hysterical women and frightened children from partially submerged dwellings, helped them into boats, and saw them taken to safety.

After the rescue parties had done their work, she refused to quit, and assisted in recovering the bodies of the dead. Her next important work was in identifying

RISING TIDE OF LUNCHEON CLUBS IS CITY EDITORS' CHIEF MENACE

What to Do With a Staff of Six and a List of Ten Luncheon Meetings on Thursday Noon Giving Small Town Afternoon Newspaper Executives Pause

By JAMES R. HAWORTH

WHAT is the problem of the city editor today?

It is not national or local politics; it is not the good advertiser who wants stories in or out; it is not baseball or bathing beauties. These are grievous problems, as is the question of the raise in pay, but it is not the most grievous.

The biggest and most forbidding problem before the city editor today is The Luncheon Club.

I mean to say, for instance, the city editor has a staff of five men and a girl. All right. Along comes Thursday. On the schedule are these items:

Kiwanis club, noon. Exchange club, noon. Rotary club, noon. Fire prevention bureau of the Chamber of Commerce, noon. Civitan club, noon.

See prosecuting Attorney McSquirt about the Dillberry Axe murder. He will be at the Civitan club meeting, noon.

Crippled Taxi-drivers' Hospital executive board meeting, noon.

American Business Club, noon. Industrial Bureau of the Chamber of Commerce, noon. Fourth Ward Republican Marching Club, Mayor Glue to speak, noon.

Real Estate Board, noon. Lions club, noon. American Association of Engineers, noon. Altrusa club, noon. Business and Professional Women's club, noon.

Booster Tour from Pickleseimersburg, Kentucky, arrives noon.

The city editor pauses between interruptions to ponder.

It is 11:50. The deadline is 2 o'clock.

Cub Reporter Smith has almost finished calling the hospitals and undertakers; Cub Reporter Jones will have checked up the magistrates' courts pretty soon now; Mabel, the girl reporter, formally listed as the chief drawback of the reportorial force, is out debauching on a Coca Cola—

"Old Man Groggie, of Glen Alfalfa, will be in on the noon train," comes the voice of the Big Money on the telephone. "Have a man out at the train to meet him. Get his picture and an interview. I'm going over to the Rotary club. Be sure and give the meeting a good play. Old Man Aaronsonstein is going to make a speech on something. He's the best advertiser we've got. Good bye."

Then the city editor hums a merry stave and bawls the staff out one at a time with corroding zeal.

By use of a great deal of ingenuity and bitterness the city editor drives his staff so that it has gathered by telephone the stories of all but one of the noon meetings.

The result of an agglutination of rather bland and tasteless encomium on one thing and another of miscellaneous sort.

The meeting he fails to get is, say, the American Association of Engineers. At this meeting the president resigns after having invited the mayor of the city, the governor of the state, the President of the United States and the chairman of the entertainment committee to a duel with broadswords.

The opposition plays it up big.

I speak, of course, from the point of view of the afternoon paper in the relatively small town. For the morning paper city editor the problem is not so much one of time; it is a problem of space.

When the luncheon club first bobbed up, it was good stuff. It got columns and columns. Whether anything happened worth printing was aside from the point. It was a civic enterprise, and the paper, whose merit, by the way, is generally gauged in the small town by the volume of space and not the quality

of comment it devotes to popular causes, had to print drivel like this:

"Kiwanian Smiv stated in his brilliant and patriotic address that he thought the club ought to go on record as unalterably opposed to the brand of weather we have been having lately. His remarks got a big laugh. Kiwanian Smiv is one of the most, etc. etc. etc. etc."

I note in the metropolitan papers that luncheon clubs are apparently all but taboo.

How do they do it?

I know a small town paper which took on a roving reporter from Cleveland, I think he was. He was assigned to cover luncheon clubs.

He told me he was bored stiff:

"I confess that a good many luncheon club speakers have voices which carry all over the dining room. But one speech may be set up in type and used every noon they have a club meeting. They all say the same thing and its always about co-operation."

"Occasionally a good singer or an artist of some kind is somebody's guest at the luncheon. He gets up and sings for the boys and the president afterwards passes it off as, 'we-were-glad-to-have-you-with-us-now -we-have -with-us-today -a-speaker- who-needs -no-introduction.'"

"Still they tell me they have to be covered."

The only solution of the problem is to arrange with the secretaries so that the meetings can be covered by telephone. Assignment of a reporter to each luncheon club meeting is a downright imposition on any afternoon newspaper, and ought to be cut out.

TABLOID INCORPORATED

Employees to Have \$50,000 Interest in St. Petersburg Daily News

The *St. Petersburg Daily News*, established by Frank F. Pulver, has been incorporated. Fifty thousand dollars' worth of stock has been offered to employees. The present board of directors consists of: Frank F. Pulver, president; Bainbridge Hayward, Ralph M. Dillon, and Major Alfred Birdsall, all of whom own considerable stock in the paper.

Major Birdsall is publisher, Ralph M. Dillon, general manager, and R. H. Armstrong, managing editor.

TO DEBATE ON PUBLICITY

First of a series of Sunday evening meetings to be held during the fall and winter season at the Park Lane Hotel, New York, is scheduled for Oct. 24, with "Publicity" announced as the subject. Leaders of the discussion will be Bruce Barton, president of Barton, Durstine & Osborn, New York advertising agency; Louis Wiley, business manager, *New York Times*; Ivy L. Lee, press agent; Mrs. Ida Clyde Clarke, Jesse Lasky, Horace Liveright, and David Sarnoff.

WHAT AN AMERICAN EDITOR SAW IN EUROPE

(Continued from page 29)

work at the other end of a 3,000 mile cable.

"During the third week in September of this year the Berlin correspondent of one of America's leading news agencies received the following cable from his home office: 'Curtailed drastically.'"

"It worried him. He had not been sending over much. A little while before that he had received an equally curt in-

junction "Too much politics," and had taken that as a hint that perhaps he had sent too much of everything. Was he losing his news sense, he asked himself. Had he lost touch with American taste? He spent a miserable evening going over his despatches, trying to separate the wheat from the chaff on the basis of some new criterion which he sought in a helpless, uncertain sort of way to establish. He went to bed tired out, completely disgusted with himself and his job.

"The next morning's Berlin papers brought him the first news he had of the Florida storm and its disastrous consequences. Then he understood. But he could not help feeling just a little resentment against an editor who had failed to show sufficient regard for the man in the field to make his despatch read: 'Florida disaster reduce drastically.'"

"How to keep the correspondent abroad in close touch with the home office is a problem in itself. The *Chicago Tribune* wires each of its more important correspondents a daily summary of the Tribune's first page. Thus he knows just what is going on at home. Follow-up stories in his own field occur to him. He knows what stories are likely to attract particular attention and can play up or curtail with almost the same intelligent appreciation of the news situation of the day as the editor in charge at home.

"Of course this is an expensive procedure and in many cases unnecessary. But how many editors make a regular practice of dropping their correspondent a few lines each month giving him the home office reaction to the work he has done in the preceding weeks?

"Without exception foreign correspondents complain of a lack of intelligence on the part of the cable desk. Discounting some of this comment as due to the same happy cynicism in 'passing the buck' that marks the relations between newsroom and composing room there is still some merit in this universal criticism. There is too great a difference in the salaries of the men at opposite ends of the cable. The deskman is often not an expert in foreign news or personalities.

"One prominent foreign correspondent said to me: 'Unless I characterize and identify even the Premier and Foreign Minister in every despatch they are sure to get things twisted at home. I cannot depend upon their knowing anybody or anything. I am cabling my office hundreds of words each month that reasonably intelligent handling at the other end would enable me to omit.'

"The cable editor of every large newspaper ought to make the rounds of the principal foreign capitals at least once every two years. Many of them might be glad to go "on their own" if the home office gave them a long enough vacation. In the same way foreign correspondents ought to be brought home more often than they are. Few of them get home as often as once in two years, and some have been away so long they are almost afraid to go back.

"But even when it is impracticable bring a correspondent home the executive can keep him from going stale by giving him an occasional assignment outside his own capital. Most helpful in connection is an opportunity to cover Council and Assembly meetings of League of Nations at Geneva. For American newspapers have a regular at Geneva throughout the year and it usually the Paris correspondent who sent down for the big meetings.

"How about giving the man in Berlin or in Rome a chance at this assignment? He can meet more big people in a week than he can encounter in his own capital in a year. There is also a happy international atmosphere about Lac Leman that is a delightful change from the one-capital point of view. There is more optimism at Geneva than can be found anywhere outside of the United States and a little optimism will not hurt the average foreign correspondent."

"One other point. Newspaper owners and editors might ask their foreign correspondents how they are getting on with the American embassy or legation. They will be surprised to learn that some American diplomats consider it necessary to treat foreign correspondents as though they were cub reporters.

"There are no press attaches at American embassies and the private secretaries who deal with the press often lack taste and talent for this particular frequently there is a distinct feeling of hospitality between the American diplomats and the American correspondents in a particular capital. This is a disadvantage to American interests. The home office might exercise a media influence and perhaps the State Department itself might be persuaded to operate in creating a better modus vivendi. Some of our inexperienced diplomats should be made to realize that they are far less to fear from indiscretion than from inopportune silence."

HUNTSVILLE (ALA.) TIMES TO ERECT 10-STORY PLANT AND OFFICE BUILDING

state and city news departments and Mrs. Pierce's private office will be on the second floor. The composing room and type setting department will be conveniently located also on the second floor.

All of the modern conveniences in the best newspaper offices will be combined into the improvements being installed in the new home of the Daily Times.

There will be eight floors for commercial use in addition to several shops on the main floor. The building is being so erected to take care of any further expansion the publishers may need for a good many years.

MRS. J. E. PIERCE

CONTRACT has been let for the erection of a new 10-story \$200,000 office building for the Huntsville (Ala.) Daily Times.

In addition to the new building the Times has placed its closing orders for more than \$100,000 worth of new equipment.

The Times started publication on March 23, 1910. J. E. Pierce, editor and general manager, while his wife, Mrs. Nannie H. Pierce is president of the publishing company.

In 1916, the Times was first forced to move to larger quarters, which it has again outgrown. When the Times was established it was on the same property where the new building is going up, the newspaper having owned the property all that while.

The basement of the building will be one of the largest in Alabama, the dimensions being 164.5 feet by 91.2 feet. All of the heavy machinery, including the press will be on the first floor level. There will be the counting rooms, business office, circulation and advertising departments. Mr. Pierce's private offices, library, directors' room, Associated Press,

COMFORT FOR SPORT WRITERS

Press Box at U. of Missouri Stadium Enclosed in Glass

Sound-proof telephone booths, radio broadcasting booths, a plate glass front, electric lights, and contrivances making it possible to close the box entirely are among the features of the press box in the new University of Missouri athletic stadium dedicated Oct. 2.

Fifty telegraph lines run directly to the stand and 25 individual connections are possible for correspondents. Telephone wires from both teams run to the press box, in order that substitutions may be verified.

READING WEEKLY SUSPENDS

After having been published continuously for nearly 90 years, the *Reading (Pa.) Weekly Eagle* has been discontinued. The first copy of the *Reading Gazette*, the *Reading Weekly Eagle*'s progenitor, was issued May 9, 1840, by Jacob Knabb and J. Lawrence Getz.

IDAHO STATE JOURNAL NOW REORGANIZED

James A. Ettinge Named Business Manager and Frank W. Brown Editor of Pocatello Daily—New Corporation Formed

Reorganization of the *Pocatello (Idaho) State Tribune*, now published by Bannock Publishers, Inc., a new corporation, was announced this week.

James A. Ettinge has been appointed business manager and advertising director of the company, while Frank W. Brown will take complete charge of the editorial activities of the newspaper.

Mr. Ettinge assumes a substantial interest in the corporation and will have complete charge of its production.

For two years he was advertising director of the *Dayton (O.) News*, and earlier in his career was foreign advertising manager for the *Washington (D. C.) Post*, and he has been general manager of newspapers at Portsmouth, O., and Springfield, Ill.

For six years he was with J. J. Gibbons, Ltd., Montreal, advertising agency.

PRINTING FIGHT CONTINUES

Another Injunction Granted in Missouri Action Over Legal Copy

Judge Henry J. Westhues has issued a second temporary injunction against Charles G. Becker, secretary of state of Missouri, restraining him from letting contracts to county newspapers for the publication of the referendum and initiative petitions to be submitted to Missouri voters for approval in the November election. Earlier in the day the supreme court knocked out the first injunction on the ground that Judge Westhues had exceeded his jurisdiction in failing to require bond of Rev. John Fugel, editor and publisher of the *Vienna Home Ad-*

viser, a weekly. The second order restrains Becker from auditing the contracts already let, thereby tying up payment of those papers which have already received their contracts until the case is settled.

The state is to let contracts amounting to approximately \$1,700 per county for all counties in Missouri and the city of St. Louis. The total amount of the contracts is expected to approximate \$175,000. One paper in each county will receive the contract. The maximum rate is 60 cents a column inch.

Rev. Fugel seeks to have the contracts let to the lowest bidder in each county and to prevent contracts being made at more than the maximum rate.

OUR OWN WORLD OF LETTERS

By JAMES MELVIN LEE

TEXT books on journalism are becoming more practical as they become more specialized. In this respect no recent text surpasses "Graded Exercises in News Editing" (The Macmillan Company) by George C. Bastian, who was for many years a copy reader on the *Chicago Tribune*.

In "Graded Exercises in News Editing" may be found a course in newspaper methods and standards of copy reading both for news and feature stories. An introduction is contributed by H. F. Harrington, director of the Medill School of Journalism at Northwestern University, and John C. Carroll, a member of the editorial staff of the *Tribune*.

Perforated pages make it possible to tear out the exercises so that they become copy to be handled as in a regular news room. Professional copy readers may find this text useful by way of reference.

* * *

HARPER & BROTHERS announce for early publication "How to Draw Cartoons" by Clare Briggs.

* * *

FRED NEWTON SCOTT, Professor of Rhetoric at the University of Michigan and a pioneer teacher of Journalism, is the author of "The Standard of American Speech and Other Papers" (Allyn & Bacon).

* * *

THE best story in *The Trib* for September—the house organ of the *Chicago Tribune*—is "The Testimonial Benefit to 'Lame Johnny'" by John Kelley.

In this story Kelley paints a word picture of the old levee district. Especially vivid is his description of those sordid places which afforded material to that great English journalist, William T. Stead, for his book "If Christ Came to Chicago."

* * *

EDITORS of sixteen important magazines were asked by the *New York World* to select five of the stories they published during the year that they liked best. From the 80 stories thus submitted by the magazines a committee of newspaper editors headed by John O'Hara Cosgrave, Sunday editor of the *World*, selected the best in their opinion for each group of five.

Associated with the *World* in publishing these short stories were such newspapers as the *Atlanta Journal*, *Baltimore Sun*, *Birmingham News*, *Boston Post*, *Buffalo Times*, *Chicago Journal*, *Detroit News*, *Kansas City Star*, *Lancaster Intelligencer*, *Little Rock Democrat*, *Los Angeles Times*, *Memphis Commercial Appeal*, *Milwaukee Journal*, *Pittsburgh Sun*, *San Francisco Bulletin*, *Washington Star*, *Winnipeg Tribune*, etc.

These stories have now been put between board covers and a foreword has been contributed by William Johnston, idea editor of the *World*. An appendix gives biographical data about each author and the remarks of the magazine editor about the stories selected for insertion.

The authors represented in the volume include Booth Tarkington, Peter B. Kyne, Wilbur Daniel Steele, Achmed Abdullah, Mary Raymond Shipman Andrews, Maxwell Struthers Burt, Lois Montross, F. Tennyson Jesse, W. C. Tuttle, F. Scott Fitzgerald, Charles Saxby, Benjamin Richard Sher, Edgar Wallace, Richard Connell, Raymond S. Spears, and Honore Willies Morrow.

The magazine editors who cooperated in this anthology—called "The World's Best Short Stories of 1926" (Doran)—are Arthur Sullivan Hoffman of *Adventure*, Merle Crowell of *The American*, Anna Lord Strauss of *Century*, Grant Overton of *Collier's*, Ray Long-

of *The Cosmopolitan* and *Hearst's International*, Mrs. William Brown Meloney of *The Delineator*, Mrs. Gabrielle Allard Griswold of *The Designer*, Frank Quinn of *Everybody's*, William Frederick Bigelow of *Good Housekeeping*, Thomas B. Wells of *Harper's*, Harry P. Burton of *McCall's*, Arthur T. Vance of *Pictorial Review*, Charles Agnew Maclean of *Popular*, Karl E. Harriman and Edgar E. Sisson of *Red Book*, Harry E. Maule of *Short Stories*, and Gertrude B. Lane of *The Woman's Home Companion*.

Mr. Johnston in his foreword assured the reader that the volume excels any other selection of current fiction in at least two ways (a) Authority of judgment, (b) Variety of taste. The volume is in striking contrast to some anthologies compiled by academic and pedantic critics who indicate only their personal preferences. The anthology fathered by the *World*, however, has the endorsement of both magazine and newspaper editors.

Which is the best of the 16 stories no one can say, because each is in a different field from its competitor. The volume should be extremely helpful to those who teach short story writing in American universities. Members of the working press who dabble in short fiction may find that a study of this volume will aid to decrease the number of "dejection" slips and increase the number of checks sent in payment for manuscripts accepted. The chats by magazine editors printed in the appendix shed considerable light upon individual preferences in fiction fashions.

* * *

WHEN the Intercollegiate Newspaper Association of the Middle Atlantic States had a regional conference at the Newspaper Club of New York City one of the speakers was Harold deWolf Fuller. His address on that occasion, "Opportunities for College Editors," has now been issued in pamphlet form.

This pamphlet has interest not only for college editors, but also for those in other fields. Indeed, almost one-half of the pamphlet is devoted to tracing the history and background of the editorial.

Professor Fuller is sneaking of the historical background when he says:

Like any other literary type, the editorial has a history. Always it has been a vehicle for interpretation of life. But as other literary types are that, too, such a definition does not get far. It is valuable, though, as showing that the editorial did not spring suddenly into being, but is bound up with a great body of literary tradition. With the novel, the essay, the play, it grew out of a desire to take, and to enforce, a position on current happenings. The editorial being a short composition, its effect on its audience is direct and immediate. Its purpose—to influence or create opinion, and to lead it to action—is usually more definite than that of other literary types.

This suggestion, though offered to college editors, is not a bad tip for the professional editorial writer:

Manners and customs furnish as good subjects now as they did in the time of Steele and Addison. I herewith present editors with a promising lead:

By baby hunting,
Daddy's gone a-hunting,
To get a little racoon skin
To wrap the little freshman in.

The point is, to whom does the coat rightfully belong—the threadbare, under-salaried professor or the student who, on the average, pays about half the cost of his tuition?

Many will regret the passing of the short editorial which receives the following comment from Professor Fuller:

A successful short editorial—what used to be called the editorial paragraph—gives the impression of good talk—sublimated talk. There's the rub. Its art is concealed. It isn't really talk, in spite of its seeming spontaneity. It is the earnest of journalism, starting often with a striking thought, playing with various phases of it, gathering them together, and closing with a snan. It isn't talk, but good talk can easily be turned into an editorial. And this leads me to say that if college editors could write as they talk, they would be world heaters. Not that their talk as a whole is good, but it has bright

spots and a freshness which in editorial form would get the same large following that college humor has.

Copies of this pamphlet may be obtained upon application to J. Gordon Ridsdale, President of The Intercollegiate Newspaper Association, Lehigh University, Bethlehem, Penn.

* * *

IN the field of religious journalism the *Christian Advocate* is one of the oldest. On Sept. 9 it celebrated its one hundredth anniversary with a special issue of about 200 pages. This issue contains a facsimile of the first page of the first number, greetings from the various editors of the religious press of today, sketches of the thirteen editors who have conducted the *Christian Advocate* during the past century, and typical editorials written by these editors.

The first editor was Nathan Bangs, though Barber Badger had the title. He was the grandfather of John Kendrick Bangs who at different times edited *Harper's Weekly*, *Life*, *Puck*, and other periodicals. The man who sat in the editorial chair the longest was the late Dr. James M. Buckley. Of those who have conducted the *Advocate* none has made it wield a greater power in the religious field than the present editor—a layman, by the way—James R. Joy. Proof of his editorial ability may be found in the special anniversary number.

* * *

IN *The Outlook* for Sept. 15 may be found an appreciation of Charles Hopkins Clark, who until his death was the editor of the oldest newspaper to be published continuously in America—the *Hartford Courant*.

One of his characteristics is thus described:

Personally, he was a man of charm, with special turns for belaboring the memory of Dr. Samuel Johnson and going a-fishing.

* * *

REMINISCENCES of newspaper editors have, comparatively speaking, been rather frequent in recent years.

Magazine editors, however, have not the urge to take the reading public their confidence and to relate the experiences that have broken the monotony of the day's work. Consequently a certain interest attaches itself to "Adventure Editing" (D. Appleton & Co.) by Charles Hanson Towne who has been connected with the *Smart Set*, *The Delineator*, *McClure's Magazine*, etc. Recently was appointed editor of *Harper's Bazar*. This volume will be mentioned more in detail in an early issue of *EDITOR & PUBLISHER*.

* * *

A SPECIAL supplement commemorating the seventy-fifth anniversary of the founding of the *New York Times* a part of the Sunday issue for Sept.

The supplement stressed the growth and development of the *Times* and contained a sketch of the various editors who have molded the *Times* during the years of its existence. Many illustrations added to the interest of the supplement—especially those showing the homes in which the *Times* has housed from 1851 to 1926.

Valuable statistics were given about the present production of the *Times*. Annual gross income, for example, is down at \$25,000,000. The weekly roll amounts to \$135,000. The paper's assumption for the year ending August 1926, amounted to 180,746,000 lbs. (\$6,965,421.03.) Employees number 733.75. Taxes paid in 1925 amounted to \$733.75.

The supplement, however, says little about the present publisher of the *Times*—Adolph S. Ochs. Such omission need not concern the readers of *EDITOR & PUBLISHER*, as a sketch of Mr. Ochs was printed in this paper last week.

It may be noted in passing that advertisements in the supplement are from firms who had been in business 75 years or more. All those who are interested in the history of American newspapers will want to preserve this special supplement.

STATE PRESS GROUPS SHOULD HANDLE NATIONAL COPY FOR WEEKLIES

ing Burden of Forwarding Mats, Checking, and Billing From Agencies Would Promote More Business Publisher Declares

By A. EUGENE BOLLES

Publisher, Newark (N. Y.) Courier and Commercial

TE ASSOCIATIONS of country weeklies have, in my opinion, over-looked the one matter in which they can render the greatest possible service to their members.

Inventions of those associations fill programs with discussions on ways means of bettering publishing conditions "walk by on the other side" from the means within their hands regarding about the improvements, con-ting which they talk so much.

ing aside for the moment the short-ings of some country publishers in the r of producing readable papers, the ing they all need is more national ising.

ng side of that, it is a fact that al advertisers are coming more and to appreciate the unusual influence well-managed country weekly has g its readers. These advertisers to use the country weekly but it seem that the publishers of country s are following a course that tends ke the use of their papers by such isers a difficult matter.

e average country publisher is a salesman. He may know his readers ir front names, may carry 100 per of his local advertising prospects, but is miserably when it comes to the r of selling space to the far away tiser.

failure is due to his total lack of eration of the buyer.

's look on the other side a moment; at are the needs of the advertising ?

must have, first of all, truthful nts concerning the newspapers' cir-on, its territory, and its market's. After he has all that, there is still stumbling block standing in his way d buying space in that paper,—and is the expense of clearing the large r of orders required to cover any r territory with papers of small cir-on.

the advertiser, for instance, wants to is message right into the midst of the families of New York State by using ry weeklies, he must use space in thing like 100 newspapers. That s a hundred orders, a hundred mats ates, and the same number of check-copies to examine, bills to audit and tances to mail. Each one of these red orders, mats, etc. costs the ad-er or agency just as much when sent newspaper with a rate of 20 cents an as to one with a rate of \$1 an inch. e ease of the small paper the agency's mission is three cents an inch and in arger paper five times as much.

my opinion that is the crux of the e matter, and it will never be solved publishers of country weeklies be-awake to the difficulty of the buyer. ily newspapers have solved the situa- through special agencies handling of newspapers, but the solution of the ly situation, at least until such special cies are organized to handle weeklies, ithin the power of the state associa-

tions. I am even of the opinion that the associations can handle the matter in a more satisfactory manner than could any special agent.

Let the state association, first of all, make as an imperative qualification for membership, the acceptance and actual adoption of a creed of truth and clean business methods. Let it educate its mem-bers concerning the kind of information the advertising buyer must have. Then there should be compiled, in each associa-tion's central office, complete market and circulation data in all the counties covered by member papers. This information should be made available to all national advertisers and to all advertising agencies.

Then the association should say to the advertising buyer: "Pick the papers you want to use, send us one order and sufficient mats or plates for the lot. We will place the business, check the insertions and send you one bill for the whole busi-ness."

The association should not act as a salesman, but merely as a source of in-formation and a clearing house for orders and payments. A nominal clearing charge would be deducted by the association from each remittance sent to the newspaper.

Such a plan would compel the country publisher to clean house, and to furnish the needed information concerning his newspaper and its field,—or be deprived of national advertising. It would act as a constant stimulant to the publisher and a great convenience to the advertiser, be-cause it would save materially in their clearing expense and furnish them with a source for reliable information.

Maybe I am looking for the millennium in publishing, but I believe that the plan is entirely practical and would be wel-come by both publishers and advertisers.

OLD BOSTON PAPER FOUND

A well preserved copy of the *Colum-bian Sentinel*, dated Sept. 2, 1795, pub-lished "on Wednesdays and Saturdays by Benjamin Russell, in State street, Bos-ton," was placed on exhibition in Seattle, Wash., this week. The newspaper was salvaged when an old house was dis-mantled in Seattle. George Washington contributed a letter to the paper, com-plimenting certain tradesmen in the mat-ter of a treaty. William Coolidge, be-lieved to be an ancestor of the President, offered a reward for the arrest of a person, who "stole sundry pieces of calico" from his stock of merchandise. A full third of the four-page issue con-sisted of advertisements.

CHANGES IN TOLEDO

Staff Shake-Up on News-Bee—Ray E. Garrison New Managing Editor

General reorganization of the *Toledo News-Bee* staff has been effected by Harold C. Place, who recently succeeded Frank M. Heller as editor.

Fred L. Mollenkopf, managing editor, has joined the *Toledo Blade* staff. In his place Ray E. Garrison, formerly publicity representative of the Illinois Bankers' Association and previously of the *Chicago Tribune* and *Chicago Daily News*, is occupying the managing editor's desk.

Ralph O. Snyder, city editor, is now with the *Toledo Times*. Terrence Walsh, of South Bend, is the new city editor. Campbell Goldrick has joined the staff of the United States Advertising Corporation.

John Wing is doing suburban for the *News-Bee*. John Shields, formerly of the *Adrian (Mich) Telegram*, is super-visor of suburban bureaus.

The Rev. Jesse Smith is the new *News-Bee* church editor. He is also pastor of the Miami Church of Christ, Maumee, O. Paul Smith has been named night city editor. Bob Stanton, of Chicago, has replaced Earl Aiken as sports editor. Aiken remains with the *News-Bee*.

Ray Williams has been transferred to the night police beat.

TO DISCUSS FARM NEWS

Kansas Editors to Meet at State College October 14-16

Agricultural news will be discussed by Kansas newspapermen and county agents at a conference at the Kansas State Agricultural College, Manhattan, Oct. 14, 15 and 16. The editors and agents, numbering so far about 200, will be the guests of the industrial journalism department of the college.

On Thursday, Oct. 14, the county agents will confer. On Friday the edi-

tors will meet. Saturday both groups will hold a joint conference.

Friday night the editors and agents will be guests of the journalism depart-ment and the Manhattan Chamber of Commerce. Saturday afternoon they will attend the annual University of Kansas K. S. A. C., football game.

Speakers at the conference include: O. W. Little, *Alma Enterprise*, field secretary of the State Press Association; J. S. Bird, editor, *Hays Ellis County News*; George W. Marble, editor, *Fort Scott Monitor-Tribune*, former president, National Editorial Association; E. L. Hubbard, Kingman; Nelson A. Crawford, Washington, director of informa-tion, U. S. Department of Agriculture; W. E. Blackburn, editor *Herington Sun*; Maynard W. Brown, head of department of journalism, K. S. A. C.

HUCKLE LEAVES YPSILANTI

T. O. Huckle, business manager of the *Ypsilanti (Mich.) Daily Ypsilantian-Press*, has resigned and will move with his family this week to Cadillac, Mich., where he will assume management of the

Cadillac Evening News, recently purchased by Huckle from F. M. Church, publisher of the *News* for the past ten years. Mr. Church plans to re-enter the daily field after a vacation of a few months.

WEEKLIES TO CO-OPERATE

L. B. Yale of the *North East (Pa.) Breeze*, is preparing plans whereby the rural newspapers of Erie and Crawford, Pa., counties may have joint representation in the solicitation of national copy.

COMPLETING RADIO STUDIO

WEBC, Owned by Two Dailies, to Enter New Quarters Oct. 10

Work is rapidly being completed on the new studio in Duluth of WEBC, a radio station owned and operated by the *Duluth News Tribune* and the *Superior Telegram*. The studio will be opened Oct. 10.

WEBC is the only radio station in the twin-ports of Duluth, Minn., and Superior, Wis., which have a combined population of 155,000.

Through arrangements made by newspapers, Herbert Hoover, Secretary of Commerce, will deliver an address from WEBC on Oct. 23. The *News Tribune* is installing amplifiers in the lobby to insure Mr. Hoover the largest possible audience.

Reed Taft Bayne is president of the *News Tribune*.

TO REPORT ON NEWSPRINT

Reports on the current newspaper situation will be made at the fall meeting of the News Print Service Bureau, to be held at the Hotel Commodore, New York, Oct. 20. Following the usual luncheon there will be talks on "Newspaper Advertising Tendencies," by Arthur Robb, Jr., managing editor of the *Editor & Publisher*, and "The Business Situation," by Byron W. Holt, economist, Goodbody & Co.

COOKING SCHOOL REPEATED

The *Kansas City Journal-Post* Cooking and Homemakers' school, conducted with success last spring under direction of Mrs. Jessie M. DeBoth, was repeated Oct. 6 and 7 in Convention hall in Kansas City.

Bankrupt Sale—I have for private sale the following machinery: 1 Cutler-Hammer Electric Control; 1 Skinner Gas Making Machine. Communicate with Frank Chapman, trustee, Box 2363, West Palm Beach, Fla.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912, OF EDITOR & PUBLISHER

published weekly at New York, N. Y., for October 1, 1926

State of New York, County of New York, ss.: Before me, a Notary Public in and for the State and County aforesaid, personally appeared Charles B. Groomes, who having been duly sworn according to law, deposes and says that he is the Business Manager of the EDITOR & PUBLISHER and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers, are:

Publisher, James W. Brown, 234 Valentine Lane, Yonkers, N. Y. Editor, Marlen E. Pew, Wading River, L. I., N. Y.

Managing Editor, Arthur T. Robb, Jr., 175 Linden St., Rockville Centre, L. I., N. Y. Business Manager, Charles B. Groomes, 343 Rye Beach Ave., Rye, N. Y.

2. That the owners are: James W. Brown, 234 Valentine Lane, Yonkers, N. Y.; Marlen E. Pew, Wading River, L. I., N. Y.

3. That the known bond holders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities, are: None.

4. That the two paragraphs next above, giving the names of the owners, stockholders and security holders, if any, contain not only the list of stockholders and security holders but also appear upon the books of the company, but also in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom the trust is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which the stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona-fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest, direct or indirect in the said stock, bonds, or other securities than as so stated by him.

CHARLES B. GROOMES, Business Manager.

Sworn to and subscribed before me this 29th day of September, 1926.

MARY E. SANTAMORINA, Notary Public,

Westchester County, Certificate filed in New York Co. No. 648, New York Co., Reg. No. 8661. Term expires March 30, 1928.

IN some cities the demand for back page position is so heavy that it is frequently the cause of much trouble with some advertisers. The *Columbus* (Ind.) *Republican* is now charging 25 per cent extra for back page position. Usually between 100 and 125 inches are carried on the back page in each edition. The *Franklin* (Ind.) *Star* doubles its rate for special position on the back page.—Davis O. Vandivier, Franklin, Ind.

Now is the time when owners of open automobiles would like to own closed cars. It might be a good plan to run a page or spread devoted to the ads of concerns that specialize in fixing open cars so that they can be practically all closed during cold weather.—Frank H. Williams.

Get a hairdressing, marcelling and permanent wave shop to run a series of ads in the paper. These ads depict ancient and modern styles in hair dress from early Chinese, Egyptian, etc., on up to the present time. On the last ad of the series, showing the latest style, run a coupon good for \$1 or \$2 or any amount the shop owner wishes. The coupon is to be good for its face value on any permanent wave purchased at the shop for the period of three days after the last ad appears. In a smaller city, where there is possibly only one such shop, and where the newspaper handles job printing, the material from the series of ads makes an attractive booklet for distribution from the shop and through the mail. Data on the hairdressing may be obtained from any good encyclopedia. Zincs made from pen and ink sketches give inexpensive illustrations of the various forms and styles of hairdressing.—A. L. Golay, Oak Park, Ill.

Newspapers might get more advertising support from sporting goods houses, especially in the matter of winter playthings, such as snow shoes, skis, skates, toboggans, etc., if they would get up a page on the first approach of winter entitled "WHEN THE SNOW FLIES." It could have a clever winter poem, a winter scene, and a little story about the joys of winter sports and their contribution to health. Then could follow advertisements of sporting goods houses. Of course, there are other articles beside those listed that could be offered, such as guns and ammunition, outdoor clothing, sweaters, and even indoor sports equipment.—Fred L. W. Bennett.

It's not too early to start making some layouts with headlines for Halloween! Take some of your advertisers (groceries, clothing, candy, book and novelty) and plan a series of several ads for each of them. Then sell the whole series at one time, starting the insertions a good week in advance. You'll find a series planned in this way will increase the space you sell, and it will lighten the work of calling each day during that season for a new

ad.—Ralph Gibler, Huntington, Ind.

A "Home Builders Clinic" is the special department of one Western paper that groups under this heading ads of lumber and building material dealers, paint men, roofers, shade and interior decorating stores, electric equipment dealers, and those handling house furnishings. The ads form a thick border about the page, while inside is interesting reading matter, architectural designs of houses, sketches and advice to home builders and owners, given by experts.—C. M. L., Seattle.

GOVERNORS TALK FOR DAILY

Chicago Daily News Linking Photogravure With Radio Addresses

The *Chicago Daily News* and its broadcasting station WMAQ has inaugurated a unique venture to acquaint America with its 48 states. Using the combined mediums of newspaper and radio, the governors of all the 48 states will describe the beauties of their own states and the commercial and industrial importance and the historic background upon which each state has built its power. The talks of the governors are being broadcast over WMAQ on Saturday evenings, on the same day that the photogravure section of the *Daily News* is printed containing a full page of pictures illustrating the address of the governor speaking that evening.

Invitations sent to the governors have already been accepted by 27 state executives. Gov. Alfred E. Smith of New York opened the series with a talk about his state and its vast resources, Saturday evening, Oct. 2.

have a good heart interest yarn.—Roy F. Hendrickson.

City editors in need of suggestions for local stories should make it a daily task to look over the legal ads carried in the newspapers of the city or have, some member of the staff assigned to the job. More than once good tips on local stories can be obtained in these legal ads, some of which mean little in their classified advertisement form, but which furnish reporters with leads on stories. Many

times they lead to news items on important building projects.—T. J. B. Scranton.

Three little boys came in the *Asheville Times* one day and registered a complaint because the Asheville park zone didn't have an elephant in it. Everybody got a laugh but the M. E. also got an idea. He started an Elephant Fund, explaining just what inspired it. The kids in town ate the idea alive and then the grown-ups got enthusiastic. Contributions flowed in. Business houses donated heavily. Two circuses showing in Asheville help boost the project with the elephants and donated 5 per cent of the gate receipts. A fine young elephant was found available for \$2,700. The Elephant Fund mounted to more than \$2,000—the City and the Chamber of Commerce subscribed the rest and the deal was closed. Maybe your park needs an elephant, lion, or something? If so, here's the way to get it.—W. S. A.

The South's Prosperity

Third— The TEXTILE INDUSTRY

Cotton, the most widely used fibre in the world, with its constant broadening demand—and the South with its monopoly in producing the world's supply—has probably been the greatest factor in the South's prosperity and industrial development.

With cotton in its back yard, capital has created a great textile center through the entire South—today Southern textiles of every grade and quality are competing in all the world markets. So great has been this growth that some of the largest mills in the world producing special grades of cloths—fabrics—knitted goods have sprung up almost as if by the wave of a magic wand.

With the raw product at its door—with intelligent and satisfied labor plentiful, this industry is creating a greater and richer South—a greater buying power.

Can any advertiser stay away from this prosperous territory? Let these papers listed below send you additional detailed facts.

To The Financial Advertiser

So you may have noticed, they don't build Service Stations on bridle-paths. Paved highways are preferred.

The paved highway that is jammed with the Fords and Rolls-Royces of the investment world leads straight up to the financial pages of the newspapers serving their readers with the dispatches of The Consolidated Press.

These newspapers pioneered the field.

They were first to give their readers *clear-cut, understandable* dispatches that lifted their financial reports out of the rut of dry-as-dust routine.

They were first to substitute for cryptic technicalities, *complete, comprehensive financial news* that told the man in the street what he wanted to know, clearly, understandingly and helpfully.

These pages give their readers what they can get in no other paper in their city.

Today, the newspapers of The Consolidated Press stand, *dominant and efficient*, squarely on the paved highway where they give exclusive, comprehensive and helpful service to the "new ten million" investors whose needs they were *first* to meet.

POSTSCRIPT TO THE PUBLISHER:

In the last few weeks half a dozen new members have been granted exclusive Consolidated Press franchises thus leaving only a few important cities which are dominant market centers where this service is still available.

Only one newspaper in each city can secure this service.
A telegram will reserve your option pending negotiations.

Rich in Food Values

"Canned SALMON has an energy value equal to the popular hearty foods such as veal, milk, sirloin steak and baked beans."
—U.S. Bureau of Fisheries (Dept. of Commerce) Document No. 1000

CANNED PINK SALMON
"King of Food Fish"

"SALMON is the most important sea food canned. . . . The protein percentage makes it valuable." states this government bulletin. Canned PINK SALMON is available for shipment into any part of the world where fresh fish are not available. As the cooking has already been done the product can be eaten cold, as a salad, if desired. Canned PINK SALMON provides the essential food stuff—protein—at a REASONABLE COST.

For a really delicious treat—try Canned PINK SALMON mixed hot in creamed, baked or fried dishes. Ask your nearest food grocer to send you a few cans at once. ALL GOODNESS—NO WASTE!

Another Great Campaign

Exclusively in The Daily News in Chicago

THE Daily News is the only Chicago newspaper carrying the advertising of the Associated Salmon Packers, which is appearing in leading newspapers of about twenty-five American cities.

The campaign has resulted in the sale of more than 1,100,000 cases of salmon this year, as compared with 205,000 cases in the same period last year.

The advertising is placed by the Strang & Prosser Advertising Agency of Seattle.

SCOTT MEZZANINE-TYPE "MULTI-UNIT" DOUBLE-OCTUPLE PRESS

With Magazine Paper Feed from Paper Floor Below Press Floor
Composed of 8 Underfed Units and 4 "Heavy Duty" 64 Page Folders with Four Drives—End Folder Style

Two Sets of Knives Increase Production

Scott Folders are equipped with double size knife cylinders to carry two sets of knives.

This not only doubles the number of papers which can be cut with one adjustment, but allows a variation in the cut-off. By setting the knives off center, the cutting of "ribbons" is eliminated and a long and a short sheet may be cut while the sections are being collected.

The Scott Knife Cylinder is mounted in sliding boxes held by heavy steel springs. They are strong enough to stand up under any required work but will yield readily in case of a "choke."

For maximum production with greatest ease in operation use Scott High-Speed, Heavy-Duty Folders with—

Scott

"Multi-Unit" or "Straight-Unit" Presses

Cylinder Speed—400 r. p. m.

Outraged G. O. P. Editorial Conscience Tore Mask From Indiana Politics

en Picture of Fiery Thomas H. Adams, Hoosier Editor Who Claims He Has "The Goods"—Correspondents Flock to Report Events Which May Lead to Major Scandal

By DUDLEY NICHOLS

New York World Staff Correspondent Writing for EDITOR & PUBLISHER by Request

INDIANAPOLIS, Oct. 13.—Two years ago Thomas H. Adams, owner and editor of the *Vincennes (Ind.) Commercial*, was appointed chairman of the transportation committee of the Republican Editorial Association in Indiana. From that unctacular event leads a long and slowly uttering fuse to the present political scandal in the Hoosier G. O. P. which, whether time will prove it a squib or can a cracker, belongs in the category of major fireworks.

In consequence of that forgotten incident twenty out-of-town correspondents have already invaded this city and more are reported on the way, all armed for a game, which is s'healthy in this state. The writer took the following poll of first-coming correspondents today:

Paul Y. Anderson, *St. Louis Post-Dispatch*; Robert Barry, *New York Evening World*; Richard Oulahan, *New York Times*; G. Gould Lincoln, *Washington Star*; Alfred H. Kirchhofer, *Buffalo News*; Theodore G. Joslin, *Boston Transcript*; Robert M. Choate, *Boston Herald*; Henry Suydam, *Brooklyn Eagle*; D. L. Bartley, *Kansas City Star*; Paul R. Beach, *Chicago Daily News*; W. A. S. Douglas, *Baltimore Sun*; Robert Seltzer, *Cleveland Times*; A. J. Lorenz and Sam Fair, *Chicago Herald & Examiner*; Orville Dwyer and Philip Kinsley, *Chicago Tribune*; Garland Ashcraft, *Cleveland Press*; Ned Doyle, *Cleveland Press*; and Albert F. Baenziger, *Chicago American*; Forrest Davis, *New York Herald Tribune*.

Tom Adams is old in the ways of the typewriter and printer's ink is to him like powder smoke to a war horse, but never in his career has he instigated such a march of the newspaper craft as this.

Vincennes is the seat of Knox County, down in the southwest corner of the state. It sums something more than 15,000 and has more than 20,000 people. It was the location of a famous old fort and is rich in Indiana, French and British history. And the *Commercial* is one of the oldest papers in all Indiana. By report it has been a money-maker and Adams, while no man of wealth, has been free to fight the Ku Klux Klan and barge around in behalf of reform when he pleased.

But it was not as reformer that he became transportation chairman of the Editorial Association. Many country publishers had trouble getting proper circulation distribution and Adams had an idea that trucks might be used to great advantage, the publishers themselves building up a state-wide delivery service. In his investigations Adams became friendly with John D. Williams, director of the state Highway Commission, a political job which controlled the disbursement of about \$15,000,000 yearly, a nice plum.

Williams confided that he had certain enemies. Presently Williams was indicted on a paltry charge, the sale of \$173 worth of anvils or something like that, and Williams alleged he had been framed. The indictment is still pending and unpressed.

Thomas H. Adams

Contrary to expectation the indictment did not force Williams' resignation—"and that's when I got on the job," Tom Adams told the writer.

Adams' investigations led him into strange byways. He brought up a year later at Muncie, Ind., and fell in with George Dale, a fiery editor, who had been in hot water with the Ku Klux Klan and is even now appealing from a conviction for contempt of court for his editorial opinions.

"Dale's story amazed me," said Adams. "Through him I met Court Asher, who had been thick with D. C. Stephenson when he built up his super-government in Indiana. Asher made shocking revelations to me. I found out about the framing of Williams. Step by step I cor-

roborated these stories by nearly 50 men who had been in with Stephenson. We got the man's chauffeur, his butler, housekeeper, secretary, stenographer, his lieutenants and trustees."

Adams said he determined to houseclean his own party and set about it with quiet determination. He alleges he was rebuffed by every official from Governor Ed Jackson on down.

He says he then requested an investigating committee of the Republican Editorial Association which complied by simply converting the transportation committee as it stood.

From now on the story grows controversial and will be omitted as it has been amply reported in the country's press. But it is not treading prejudiced

ground to explain that for nearly four years graft and corruption have furnished topics for by-talk, rather cynical and caloused, in Indiana.

Now and again voices had been raised in arraignment. Evidently nobody could shout like Tom Adams. Finding his overtures rejected he went to his own medium.

The *Indianapolis Times*, a Scripps-Howard paper, backed him up.

Politicians laughed up their sleeves.

Old Tom kept shouting. Whether he had "the goods," as he claimed, remains to be proven. But everybody in Indiana seemed ready to admit the situation was just as bad as Adams painted it or a good deal worse and presently outlying papers began to catch the echoes of Tom Adams' roaring.

If there is one thing the old Vincennes editor can do it is roar. It may be that his polish, his perfection, his form in the decadent art of cussing exceeds his ability to roar, but that is debatable. He has twenty inflections for every oath to express twenty degrees of passion and he can permutate these infinitely by smacking the right fist into the left hand or the left fist into the right. When the "old man" (he is 66) cusses corruption in seven colors, the plaster falls upon the floor and the air goes splintering out the windows.

Yes, as indicated at the commencement of this report, Mr. Adams has drummed up some business. But if he proves more the ballyhoo than a showman the boys will only stand in front of his tent for a while and then move on back to Washington and their home cities.

Mr. Adams is a strapping, grizzled, deep-chested man whose temper bristles like his clipped gray moustache. He must have been a two-fisted editor in his day—and that day is not done. He talks as St. Paul must have talked when somebody stood up for Pontius Pilate. He denounces the "mad dogs of hell," and when his enemies attack him he is being "crucified," nothing less.

People admire him, not for his rural inascibility but for his downright honesty and impassioned desire for clean government. One would say not even his enemies can condemn him however much they damn him. His is a hard row to hoe. All has not been clear sailing even in the Republican Editorial Association. Five of the nineteen members tried to block him by getting together and announcing he was not authorized to conduct the investigation. This dissension has not been aired, but subsequently President J. Frank McDermond of the Association publicly backed him up.

Already Editor Adams has precipitated seven \$1,000,000 suits, with Mayor John L. Duvall of Indianapolis as plaintiff and the *Indianapolis Times* and the *Chicago Tribune* among defendants. These ensued from publication of photographs furnished by Mr. Adams which purported to represent pre-election promises made by Mayor Duvall to Stephenson in return for Klan support at the polls.

A. P. DIRECTORS ELECT SAN ANTONIO NEWS TO EVENING MEMBERSHIP

Admitted Over Objections of Hearst Paper—Express Holds Only Legal Protest Right—Two New Members in Lawrence, Mass.—Anthony Succeeds Clark

ASSOCIATED PRESS directors meeting in New York last week elected the *San Antonio News*, an evening paper, to membership, over the objections of the *San Antonio Light*, a Hearst evening and Sunday newspaper.

B. H. ANTHONY

The *Light*, according to Kent Cooper, A. P. general manager, holds no legal protest right. This right is held by the *San Antonio Express*, which owns the *News*, and was consequently waived.

No Hearst representative voicing the *Light's* objections appeared in person before the board when final action was taken last week. Bradford Merrill, general manager of the Hearst newspapers, and Victor Polachek both attended on other matters, but neither were instructed to speak on the *San Antonio* affair. A hearing on the case was first held a year ago, when objections were filed by D. E. Town of the Hearst general management.

No comment for publication was made either by officials of the Associated Press or by Hearst executives. It is understood that the objections raised last year by Mr. Town on behalf of the *San Antonio Light* were based on the lack of precedent for election of a new member to the A. P. in a territory and field already occupied.

The *San Antonio* situation differs radically from those in Baltimore and Rochester, where Hearst newspapers have successfully opposed election of opposition newspapers to A. P. membership. In Baltimore the *News* and in Rochester the *Journal* (through its purchase of the old *Post-Express*) possess protest rights dating from the Illinois charter under which the A. P. was operated prior to 1900.

No such right is vested in the membership held by the *San Antonio Light* nor in those of several hundred other A. P. members elected under the present charter and by-laws. Section 6 of Article III of the by-laws provides that by a seven-eighths vote of all the members, a member may be given a right of protest against the admission of new members by the board of directors and empowering the member holding it to demand a vote of the members of the corporation on all applications for the admission of new members within the district for which the right is conferred. This section has never been invoked.

The *Lawrence* (Mass.) *Tribune*, evening, and the *Lawrence Eagle*, morning, were elected to membership, an election held of considerable importance in New England. The *Lawrence Telegram* already holds an A. P. membership.

Plans for establishment of a picture distributing service by the A. P. was discussed by the directors and action postponed until the next meeting to be held on the fourth Wednesday in January.

Date for the next meeting of the A. P. executive committee was set for Nov. 29. B. H. Anthony, publisher of the *New Bedford* (Mass.) *Standard*, was elected to the executive committee, succeeding the late Charles Hopkins Clark, publisher of the *Hartford* (Conn.) *Courant*. The directors passed the following resolution paying tribute to Mr. Clark's memory: "The board of directors of the Associated Press records with deep sorrow the death of Charles Hopkins Clark, in continued service as a member since 1910. During that period Mr. Clark has been one of the most highly esteemed members

of this board, lending the wisdom of his counsel to all its deliberations in a measure of inestimable value, in that his active newspaper connection of more than half a century imparted an experience that gave unusual weight to his judgment.

"Born in Hartford, Conn., April 1, 1848, he was the patriarch of the Board. "Graduating from Yale in 1871 he entered the service of the *Hartford Courant*, steadily rising to the control of that great newspaper over which he presided for many years, until his death, and in which service he acquired a national reputation, as an editor, a statesman, and a patriot.

"Honored many times by the political party with which he was associated, and by the national administrations reflected in its success, he was at all times tolerant, fair minded and patriotic in his attitude on men and measures, placing country above party and the public welfare above expediency.

"In every section of the country he was esteemed for his virtues, respected for his ability, and honored for the eminent sense of fairness that characterized his attitude in all matters.

"As a member of this board his lovable disposition endeared him to all his associates. Until the past few months, when prevented by the affliction that resulted in his death, he attended every meeting of the board, and of its executive committee on which he served as a member since his election to the board. He was keenly interested in these meetings, and in the welfare of The Associated Press, with which he was connected since its organization, and for the development of which he largely shared the credit.

"The board directs that a page of its minutes be inscribed to his memory, and that a copy of this action be forwarded to his family and to the *Hartford Courant*."

Appointment of a successor to M. E. Foster, former editor of the *Houston* (Tex.) *Chronicle*, as chairman of the auditing committee was referred to the other committee members. They are E. E. Smith, *Meriden* (Conn.) *Record*; C. A. Morden, *Portland* (Ore.) *Oregonian*; and E. J. Fehn, *Evansville Journal*.

The directors commended the general management for the recent series of exclusive interviews, including those with President Coolidge and Bobby Jones. Installation of the new high-speed printer circuit from New York to Kansas City was approved.

The following employees were retired on half-pay: H. C. Milholland, former manager of the New York office; E. H. Wagner, for 36 years cashier in New York; A. A. McDonell, operator in Denver; and Eugene McCarthy, operator in Cleveland.

NEW SCRANTON SCALE

The newspaper printers of Scranton, Pa., have just signed a new scale with the publishers which is to run for a year and calls for a wage advance of \$1 a week. The union's demands had been for a \$6 a week advance, two weeks' vacation at pay and 7 hours a day.

FEARING HOST TO SALES STAFF

Joseph Fearing, vice-president of the International Paper Company, was host to the firm's sales agents over last weekend at Quogue, L. I. General business conditions were discussed. Mr. Fearing declared International's 1927 newsprint prices would be announced "in the near future." He declined to give the exact date or forecast whether there would be any revision in the present price charge of \$65 a ton.

- Oct. 24—Fornightly Forum, Debate on Publicity, Park Lane Hotel, New York.
- Oct. 24-26—International Advertising Assn., 10th District annual convention, Beaumont, Tex.
- Oct. 26-27—American Assn. of Advertising Agencies, annual convention, Mayflower Hotel, Washington, D. C.

NEWSPRINT CONSUMPTION UP

Consumption 15 Per Cent Ahead of Last Year, Says A. R. Graustein

Newsprint consumption in the United States and Canada is running at least 15 per cent ahead of last year. A. R. Graustein, president of the International Paper Company, announced last week in connection with a call for a special meeting, Oct. 28, to authorize the issue of \$25,000,000 of six per cent debentures.

The new plant at Three Rivers, Quebec, will be producing at full capacity of 700 tons of newsprint daily in 1927, Mr. Graustein said. The new mill on the Gatineau River, near Ottawa, Ontario, should be at full capacity of 600 tons daily by July. Since October of last year the company has acquired more than 10,000,000 cords of pulpwood.

FLEES BANDITS; CAR OVERTURNS

Bloor Schleppey, secretary of the Chicago local of the American Newspaper Publishers' Association, figured in an automobile accident near Thornton, Ind., last week, in which Mrs. Schleppey was seriously injured. Schleppey was headed for Chicago when three bandits stepped out into the road, with revolvers drawn, and ordered him to stop. Instead he increased his speed and kept on his way despite the shots fired at him by the bandits. At a curve in the road his car overturned in the ditch and his wife was seriously hurt. She is now in a hospital in Indianapolis.

COSTS FORCE ADVANCE IN UTICA PRICES

Press, Observer-Dispatch and Rome Sentinel Raise Circulation Rates 33 1/3% After Printers Win Increased Wages

Stating the move was necessitated by rising production costs, the *Utica* (N. Y.) *Press*, *Utica Observer-Dispatch* and the *Rome* (N. Y.) *Sentinel* this week increased their subscription rates.

All three papers moved their price from two cents a copy, 50 cents a month and \$6 a year to three cents a copy, 18 cents a week, 75 cents a month and \$9 a year.

In its announcement the *Utica Press* laid particular stress on advances in composing room wages, explaining the situation as follows:

"Before the war printers were content with \$22.50 for day and \$25.50 for night work, for 48 hours a week. Under the spur of increased living costs * * * they got advances which eventually increased the scale to \$43 and \$46 a week. In 1924 they asked for a substantial increase. The evidence was submitted local arbitration and the printers were awarded an advance of \$2 a week. The *Utica* publishers appealed to a committee representing the printers and publisher hearing appeals at Indianapolis. The award to the printers was set aside and the existing wage scale continued, it being held that no increase was justified. Almost a year was consumed in the proceedings.

"Immediately the printers started another movement for more pay, as they had the right to do under their contract with the publishers. This was late 1925. Another local arbitrator awarded them an increase of \$2 a week, effective May 1, 1926. Not considering this satisfactory, the printers appealed to the headquarters at Indianapolis and on August 31, 1926, its decision confirmed the local arbitrator's increase but made it retroactive to Nov. 15, 1925, instead of May 1, 1926. The back pay thus handed over to the printers on the two *Utica* newspapers amounted to more than \$8,000. Their current wages were fixed at \$48 for day and \$48 for night work per week of 48 hours, with overtime at price of a half per hour.

"Within two weeks after this decision was received the printers' union, on September 15, submitted another demand for a further increase in pay and a reduction in working hours. This demand is now under consideration and discussion. As has been peaceful and pleasant, but cost for the *Utica* publishers. Adjustment with the stereotypers and pressmen is yet to be made."

The *Sentinel* said: "The cost of newspaper production today, on account of increased prices, enlargement of service, is three times what it was 10 years ago. The expansion through added service, through augmented features, through enlargements, and increased value to the public has been and continues to be a constant growth."

ACTION AT CANTON

Mellett Defendants Must Stand Trial Home City and Gangster Goes to Prison

An attempt to obtain a change of venue for the two men Ben Rudner and Louis Mazer, charged with the first degree murder of Don Mellett, editor of the *Canton* (O.) *News*, failed this week as their trials will start on November 8.

Carl Studer, former associate of Rudner and Mazer, pleaded guilty to charge of keeping a disorderly house and on Wednesday was sentenced to the penitentiary for a year to three years.

EDITOR & PUBLISHER appreciatively acknowledges receipt of \$5.00 for the George R. Dale Defense Fund from the Brenham Banner Publishing Company, Brenham, Tex.

A. B. C. MEMBERS LINE UP FOR PROXY BATTLE

Chicago Will Witness Lively Contest Next Week—Clague's Eleventh Hour Letter Says Theory of Bureau's Foundation at Stake—New York Publishers Organize Opposition

THE "battle of the proxies" on questions of policy of the Audit Bureau of Circulations will enter its final phase with the annual meeting of the Bureau Oct. 21 and 22 in Chicago. New York City newspaper publishers, whose spokesmen are J. F. Bresnahan, business manager of the *New York World*, and F. A. Walker, managing director of the *New York Telegram*, have gathered many proxies, unofficially spoken of as "several hundred," among publishers all over the country in support of their opposition to publication of rate cards on circulation statements, and in advocacy of representation for newspaper publishers on the bureau's board proportionate to the amount of dues paid, and also for readjustment of the dues schedule.

In addition to the proxies, which have been gathered also by Stanley Clague, managing director of the Bureau, from members who favor the Bureau's present organization plan and policies, both parties to the dispute have received assurances of personal attendance from an unprecedented number of members. The meeting of 1926, unlike most of those since 1920, when the newspaper publishers last protested against "taxation without representation," promises to provide plenty of vigorous and thorough discussion of fundamental questions.

While the New York City publishers have been active in support of their proposals, their campaign has been made by personal letters. Publicity has been a little-used weapon.

It has been employed without stint, however, by Mr. Clague, who last week announced a 7½ per cent rebate on 1926 dues to all members, emphasizing that the board had been considering the action for many months, and had authorized it at this time not because of any movement by members for reduction of dues, but because the annual audit of the Bureau's funds for the fiscal year ending Aug. 31, 1926, showed the possibility of the remission.

This week Mr. Clague, utilizing the Napoleonic advantage of interior lines, issued a long statement "re-selling" the A. B. C. idea to the membership. Some members, several of the New York committee included, the statement broadly hints, disclose ignorance of the Bureau's concept and purposes by their proposal of a larger representation for newspaper publishers on the controlling body. Such a step, the statement implies, would either mean domination of the board by the newspaper publishers or, by giving increased representation to all classes of membership, would make the body unwieldy if not impracticable.

The New York publishers declared that no answer would be made to Mr. Clague's letter prior to the meeting.

Mr. Clague's statement in full follows: On the eve of his departure for Europe in September, Walter A. Strong, publisher of the *Chicago Daily News*, in an interview reported in EDITOR & PUBLISHER, made some plain and wholesome statements regarding the proposed plan of a small group of metropolitan newspaper publishers seeking larger newspaper representation on the Board of Directors of the A. B. C.

"The theory of the Bureau's foundation is at stake," he stated. "The original conception of the Bureau provided that majority control of the Bureau be in the hands of the advertisers. Let the publishers gain 51 per cent of control if they wish to destroy the A. B. C."

"The A. B. C.," continued Mr. Strong, "has entered a new decade, during which it must be resold to the newspaper publishing field. A new generation of newspaper executives has grown up who do

not understand the fundamental purposes of the Bureau. Frank discussion is needed to resell them and opportunity for such discussion will be afforded at the annual A. B. C. convention to be held in Chicago Oct. 21 and 22. I have no doubt in the world that those objecting to the A. B. C. theory will be convinced at this convention that they are wrong."

In order that all members of the Bureau shall have complete information on which to base consideration of this subject, the following is an outline of why and how the A. B. C. was founded.

In the fall of 1913 it became evident that the various attempts to form a substantial organization for the purpose of

circulation verification had failed. The Association of American Advertisers had made a valiant effort to establish such an organization, but the national advertisers who had previously been willing to bear the burden were obliged to admit that through lack of sufficient funds the service was wholly inadequate.

The advertising agents felt that they could not assume the responsibility.

Prior to that time the comparatively few reports issued by the Association of American Advertisers were confined to its members and were available only to advertising agents who, through very confidential relationship with one of their clients who was a member of the A. A. A.

could secure such meager information as was then available.

Then came the suggestion that all three factors—Advertisers, Advertising Agents and Publishers—get together and form an association which would accomplish what each factor individually desired.

It was said that the theory was ideal, but impossible of attainment.

In a prospectus issued at that time it was stated:

"All are agreed that a plan should be evolved whereby the advertiser shall be able to know, when he buys space in a publication, exactly what he is buying. And the honest publisher desires to be able to demonstrate to the satisfaction of all of his customers, exactly what he is selling.

"This being the genuine desire on the part of the Advertisers, Advertising Agents and Publishers, quibbling as to methods of procedure to determine results will not bar the way to the consummation of this desired end, because no one factor will seriously jeopardize the interests of the other, if all are sincere."

But the objection was raised—how can such a plan be successful if majority rule prevails—and majority rule would naturally rest with publishers. And majority rule in such an association would also naturally rest in the hands of newspaper publishers, for they would have the largest individual membership.

"Might just as well place bank examinations in the hands of an association controlled by votes of the banks themselves," said the objectors.

It is to the credit of those publishers who joined in the formation of the association that they recognized this possible weakness and they agreed unanimously that to be successful they must allow the ultimate control to rest in the hands of the advertiser members.

After many months of consideration it was decided that a board of control be formed in which the majority vote would rest in the hands of advertiser members; but for the purpose of securing advice in the consideration of the technical problems peculiar to their branch of the industry, there should also be on the board equal representation of Advertising Agents, Newspapers, Magazines, Farm Papers and Business Papers. Two representatives from the advertising agents and two representatives from each of the publishing divisions were decided upon, thus requiring eleven representatives from the advertiser division who would devote the time necessary to the successful evolution of the idea.

To carry out this plan it was provided in the original agreement that "the power to in any way alter the constitution of the association, shall be vested in the board of directors and this confirmed by Class A (advertiser) subscribers." This confirmation was obviously carried out by confirmation of the board of directors on which there was a majority of Class "A" members.

In June, 1914, this "theory" was enthusiastically confirmed at the first convention of the A. B. C. held in Chicago.

For over twelve years it has stood the test of experience and the association has become recognized as an important factor, not only in the success of publishers, but in the saving of an immense sum of money to advertisers. It has also been of substantial service to advertising agents through the elimination of controversies regarding circulation, thereby enabling agents to devote the time (heretofore wasted) to the interest of their clients and the study of fields for successful marketing.

Once before in the history of the
(Continued on page 46)

SEPTEMBER LINAGE GAIN 4.4% IN NEW YORK

NEWSPAPER advertising for September, 1926, in New York City newspapers increased 4.4 per cent over the total for September, 1925, the respective totals being 14,661,922 lines and 14,042,550 lines. Gains were made by 11 of the 15 newspapers listed in setting a new high record linage for the month. Total pages printed during the month increased from 15,434 to 16,070, or 4.1 per cent. The figures are compiled by the New York Evening Post Statistical Department, Inc.

According to analysis by classifications, foreign advertising in morning and morning and Sunday newspapers increased from 1,427,608 lines to 1,695,884 lines, or 18.7 per cent. Classified advertising in morning papers increased from 1,647,496 lines to 1,761,706 lines, or 6.9 per cent. Local display advertising in morning papers decreased from 4,434,412 lines to 4,306,384 lines, or 2.8 per cent. Three morning newspapers show total gains in local display advertising. All surpassed last year's figure on foreign advertising and classified advertising. Dry goods advertising, the largest single element in local display, shows a noticeable drop in all morning papers. The net gain in all morning advertising is 3.3 per cent.

Evening papers increased their foreign total from 1,175,378 lines to 1,454,000 lines, or 23.7 per cent. Local display

dropped from 4,275,244 lines to 4,215,660 lines, or 3.9 per cent. Classified advertising increased from 1,082,244 lines to 1,228,456 lines, or 13.5 per cent. The largest single element in the local display decrease results from a dispute over a rate increase between several local stores and the *Evening Telegram*, although gains in dry goods advertising are shown by only two of the nine evening papers listed. The *Telegram's* linage on women's specialty shops showed an increase for the month from 752 lines to 19,722 lines. The net gain on evening paper linage is 5.5 per cent.

Large gains in various classifications are noted as follows:

Morning and Morning & Sunday Newspapers

A. N. P. A. DIRECTORS COMPLETING PLANS FOR NEW MECHANICAL DEPARTMENT

George M. Rogers, Cleveland Plain Dealer, Expects Bureau in Operation Within 30 Days—Prof. Wines Probably in Charge—Arrangements Being Made for Fall Meet

ORGANIZATION of a mechanical department, second of two membership service plans of the American Newspaper

GEORGE M. ROGERS

will be given complete details of the two new service departments, traffic and mechanical. W. J. Mathey, formerly connected with the Erie Railroad, now heads the traffic department, organization of which was announced previously by Editor & Publisher.

While the chief of the mechanical department has not yet been named, the directors are favorably considering appointment of Prof. W. E. Wines, now with the extension department of the University of Wisconsin. Prof. Wines was at one time on the mechanical staff of the *New York Times*, and has also been connected with the *Chicago Tribune* and the *Minneapolis Tribune*.

"We hope to have the mechanical department formally set up within 30 days," George M. Rogers, *Cleveland Plain Dealer*, informed Editor & Publisher, following the directors meeting. Mr. Rogers is chairman of the A. N. P. A. mechanical committee. "The initial move of the new department will be in the direction of gathering and correlating all available mechanical statistics. Then we hope to be able to take steps toward standardization of newspaper press room equipment and be in a position to assist and advise A. N. P. A. members on mechanical problems.

"Above all the mechanical department, as well as the traffic department, will be a service station for the A. N. P. A. members. There has been a general re-awakening on the part of newspaper publishers to the importance and efficiency of the A. N. P. A. as an organization devoted to the services of its members. "We are adding to the present service facilities, because we want to serve our members better than we have hitherto. We have more than 500 newspaper members now, and we want about 1,000."

William B. Bryant, publisher of the *Paterson (N. J.) Press-Guardian*, and chairman of the program committee, presented plans for the French Lick convention, for consideration by the board. Speakers have not yet been named, but sufficient progress has been made by Mr. Bryant to show that this year's fall meeting will be every bit as interesting as last, which was proclaimed one of the most successful in the association's history.

The theme of this year's convention will be methods of increasing newspaper revenue and speakers will stress promotion, various phases of advertising, and the best methods of adding and maintaining cir-

ulation.

John Stewart Bryan, publisher of the *Richmond (Va.) News-Leader* will open the convention with an address of welcome. A member will also pay tribute to the late Frank G. Bell, *Savannah (Ga.) Morning News*, and an A. N. P. A. director. E. M. Antrim, of the *Chicago Tribune*, will introduce Mr. Mathey as head of the new traffic department, while Mr. Rogers will introduce whoever is chosen to take charge of the mechanical bureau.

As was the case last year, golf will be an important feature of the fall meet. Business sessions will be held in the morning, and the afternoons will be devoted to the playing of the A. N. P. A. annual tournament. Elzey Roberts, publisher of the *St. Louis Star*, is chairman of the golf committee.

Ways of co-ordinating the work of the postal committee and the traffic department will be outlined by Jerome Barnum, publisher of the *Syracuse Post-Standard*, and chairman of the postal committee, when he makes his annual report. Labor

conditions will be discussed by Harvey J. Kelly, chairman of the special standing committee.

On the motion of Mr. Rogers, the directors voted to permit representatives of the trade press to attend sessions, an innovation in A. N. P. A. history. Contrary to custom, presidents and secretaries of all inter-state press associations, whether or not they are A. N. P. A. members will be invited to attend the convention.

HARVEY SELLS REVIEW

Disposes of North American to Mahony After 28 Years as Editor

Col. George Harvey has sold the *North American Review*, which he has edited for 28 years, to Walter Butler Mahony.

Col. Harvey became editor of the *Review* in 1899. For many years he also edited and published *Harper's Weekly*. After giving up editorship of the latter magazine he founded *Harvey's Weekly*, a wartime publication.

The new proprietor of the *North American Review*, like his predecessor, is a Vermonter by descent. He was graduated, cum laude, from Amherst College at the age of 20, and since his graduation has practiced law, more particularly in the field of public utilities and plantation rubber companies. In 1909 he married Miss Mary Murray Butler, a sister of President Butler of Columbia University. He has written on economic subjects.

ADVERTISERS TO PROBE PRESS CIRCULATION

J. M. Schmid, Indianapolis News, to Represent Newspapers in Triangular Debate at Atlantic City Convention Set for Nov. 8-9-10

John M. Schmid, business manager of the *Indianapolis News*, will represent the newspaper point of view at a

JOHN M. SCHMID

circulation clinic, which will be a feature of the annual convention of the Association of National Advertisers to be held at the Ambassador Hotel, Atlantic City, Nov. 8-10. His subject will be "How Newspapers Get Circulation."

Representing the advertisers will be Verne Burnett, secretary of the advertising committee of the General Motors Corporation, while John H. Fahey, of John H. Fahey & Co., speaking on "Tendencies Good and Bad in Newspaper Circulation Methods," will complete the triangular debate on the newspaper topic.

The convention will open Nov. 8 with an address by Edward T. Hall, vice-president of the Ralston Purina Company, St. Louis, and association president, and by the report of Robert K. Leavitt, secretary-treasurer.

The first outside speaker will be L. D. H. Weld, recently manager of the Commercial Research Department of Swift & Co., now with the H. K. McCann Company, an advertising agency, who will discuss new tendencies in marketing.

During the afternoon session of Nov. 8, speakers will be William M. Zintl, director of sales, paint division, of the E. I. du Pont de Nemours & Co., on "National Distribution for a New Product in Ninety Days"; W. T. Grant, chairman of the board of the W. T. Grant chain stores on "Chain Store Distribution"; and O. B. Westpfal, vice-president and general sales manager of the Jewel Tea Company, Inc., on "Selling Direct to the Consumer."

There will be three talks on the psychology of advertising and selling, delivered on the morning of Nov. 9, the afternoon of the same day, and the morning of the 10th, by John B. Watson, Ph.D., vice-president of the J. Walter Thompson Company, New York advertising agency, and the author of "Behaviorism."

Other speakers on the last day will be N. S. Greensfelder, advertising manager of the Hercules Powder Company, on "New Tendencies in Industrial Selling"; P. B. Zimmerman, advertising manager, National Lamp Works, on "How We Sell Advertising to Salesmen"; and F. W. Lovejoy, sales manager, Vacuum Oil Company, on "Gaining Distribution by Overcoming Substitution."

Speakers at the annual dinner scheduled for Nov. 9 will be Dr. W. E. Lingelbach, chairman of the History department, University of Pennsylvania, and Robert C. Benchley, of *Life*.

FILIPINO PAPER IN HAWAII

The only Filipino language newspaper in the United States and its possessions is published at Hilo, Hawaii. *Ang Bituin* is its name and it is printed weekly by Bonifacio Balingat, as an eight-page tabloid. There are 50,000 Filipinos in the Hawaiian Islands. It is printed in the plant of the *Hilo Daily Tribune-Herald*. News of national and foreign interest is rewritten from the *Tribune-Herald* and translated into the two principal Filipino dialects.

CITY WATER AND LIGHT PLANT FLOODED

BATTLING RECORD HIGH WATER WITH SAND BAGS

With the city's electrical power shut off when flood waters poured into the plant of the Lincoln Water and Light Co., over a hundred workmen were fighting a desperate fight this afternoon to save the city's water supply.

Their weapons were sand bags, and working in water over waist deep they were piling tier on tier of bags on top of a coffer dam thrown up around the plant Saturday night.

The water at 9 o'clock this morning was over two feet higher than the record high water mark of 1913

Inside the plant, with two feet of water on the plant floor, doors and windows were barricaded with planking, clay and straw. C. E. Steinfort, superintendent and Ben Hallock, chief engineer,

were working side by side with scores of worn, water soaked men, calking up holes as the rising water broke through fresh loop holes. From time to time water spilled over the coffer dam.

Water will continue in the city's mains as long as the boilers can be fired. The flood was within inches of the boiler grates this forenoon. Pumps were busy every minute pumping water out of the inside of the plant, and only the I. T. S. tracks at the east side of the plant, acting as a dam, prevented another foot of water from sweeping in on the plant.

The plant's pumps, working submerged, handicapped the steam pressure.

A score of trucks and teams, the horses wading in water up to

WEATHER FORECAST

ILLINOIS—Cloudy and cooler tonight; Tuesday fair and cooler.

When flood waters deprived the *Lincoln (Ill.) Daily Courier* of its power for presses and linotypes, last week, it issued the above miniature hand-set newspaper to keep its readers informed on local conditions. The paper measured 6½ inches by 9. The *Lincoln Star*, the other local daily, also printed a miniature edition to keep its continuity of publication unbroken. Allyn V. Carpenter is publisher of the *Courier*. N. L. Gordon is editor of the *Star*.

RADIO MEN APPROVE PROGRAM PUBLICITY BAN

Stewart-Warner, Operating Chicago Station, Eliminate Trade Names From Its Time-Tables—Listeners' Interest Not Served by Publication of Detailed Distant Programs

By BENSON K. PRATT

FIFTEEN years of experience in the editorial departments of metropolitan newspapers leads me to applaud many of the conclusions and opinions in the article by Arthur Robb, published in *EDITOR & PUBLISHER* for Oct. 2, under the caption "Cutting Free Publicity from Radio Programs."

The net result of this article is that the next programs to be sent out by WBBM, the radio station controlled by the Stewart-Warner Speedometer Corporation, will contain no direct or indirect advertising in the form of advertising or trade names.

Nevertheless, I do believe that the argument as a whole, can be carried too far in some of its details. For instance, the thought was that radio stations could advertise as do theatres. This is impossible. Radio stations today are heard all over the United States. They are not local amusement enterprises. Consequently, to be consistent, if this thought were carried out, each radio station would be forced to advertise in thousands of papers scattered from California to Maine.

Personally, it is not my belief that there is a conflict between newspapers and the radio. On the contrary, I believe they are partners, not antagonists. At first it was anticipated that radio, which carries the story of many great events into the homes of millions of people, would have a tendency to cut down the circulation of newspapers.

As exhibit A in my argument, I would draw your attention to the recent Dempsey-Tunney fight. This fight, as you know, was broadcast through a large number of radio stations. The ringside account was heard on the night of the fight by millions of people all over the United States. I cannot speak generally, but here in Chicago, the *Chicago Tribune*, on the morning after the battle, had a circulation that neared the million mark, whereas its average circulation, according to this morning's issue, is between seven and eight hundred thousand. Advertising space in newspapers is today more valuable than ever before. Radio is merely another channel through which the attention of the public may be gained. That advertiser who would be foolish enough to believe that he can rely entirely on broadcast advertising, could soon find himself in the hands of the receiver.

It seems to me that these two mediums are intended to work side by side. Through the microphone a corporation enabled merely to stamp from time to time, the name of its brand or product, into the minds of the public. Such advertising, however, is wholly ineffective, and loses a great part of its value if it is not followed up by visual display in the paid advertising columns of newspapers.

As a concrete example, the Stewart-Warner Speedometer Corporation may mention through its station that it manufactures a matched-unit radio receiving set. This, however, will not result in any sales, unless this air advertising is followed up with space purchased in newspapers in which a more extended explanation of the qualities and claims, together with other information about the receiving set, is made.

The preacher who does not practice what he preaches, and I may say in passing, that this corporation practices what it preaches.

At the present time, we do call attention to our products over the air. In addition to that, we utilize newspaper space in some 55 or 60 cities in the United States, to follow this up. Insofar as indirect advertising is concerned, I am therefore of the belief that it should

Mr. Pratt is director of publicity of the Stewart-Warner Speedometer Corporation, Chicago. Mr. Felix has been associated for several years with various phases of the radio business. He has been connected with the publicity staff of WEAf and has also written advertising for receiving set accessories.

EDITOR & PUBLISHER presents their views as informed and reputable spokesmen for the radio industry. It should be said that their arguments in general were considered prior to publication of the article in the issue of Oct. 2.

not be included in the programs. On the other hand, I am thoroughly convinced that the radio studio has created and aroused as much interest in the minds of the public as have the theatres, motion pictures, baseball leagues, race tracks, and other forms of recreation and amusement.

Consequently, if we are to shape an editorial policy from the viewpoint of reader interest, I believe that every newspaper should conduct and maintain a radio department much more extensive than is found in many of our leading newspapers of today. By that I do not mean that it should devote a page or so to the usual hokum of the press agent, but I think that there are many actual news stories of public interest that find their origin in radio studios. * * *

Thus far I am inclined to believe that the managements of newspapers have not taken radio seriously enough. There are, of course, many exceptions to the opinion, but today how many newspapers in the United States provide for a column of constructive criticism of air programs? I am thoroughly convinced that one of the positions that is to become prominent in the newspaper world, is that of radio critic. Thus far, in many cases, this work has been delegated to someone who has no fundamental understanding, and in some instances, insufficient education, for the position. I believe that the position of radio critic will become as important a factor in newspaper life as the position of theatrical critic or music

critic. Certainly this will be the case if reader interest is to be considered.

When I use the phrase "radio critic," I am literal and not figurative. I do not believe that such a column should be filled with flamboyant praise or insincere flattery. Radio broadcasting is in its formative period. It needs help.

Insofar as revenue is concerned, it seems to me that radio will follow the general lines of the theatre. In the latter case, the newspapers have, to a certain extent, been the most important factors in the upbuilding of the stage as a business. As a result, revenue has accrued to the newspapers, but it came afterward, not before. So it will be with radio. If the newspapers will lend their assistance now, revenue from a number of sources is sure to follow.

We will have, first of all, the advertising inserted by the retail dealers in the various cities. This will be augmented by advertising on the part of the manufacturing companies, such as the Stewart-Warner Speedometer Corporation.

Today we find newspapers devoting millions of dollars worth of space to such things as prize fights, horse races, and other recreations and amusements, without hope of financial return. Referring again to the recent Dempsey-Tunney fight, I should like to ask, the various advertising managers of newspapers throughout the United States, how much money they received from Mr. Tex Rickard?

By EDGAR H. FELIX

TO newspaper publishers, radio is like a week-end guest who stayed for four years. Apprehension is natural, after previous experience with such overgrown parasites as baseball and automotive news. Like radio, they have their news value and an ability to attract a certain amount of advertising, but the news space which they demand has exceeded the advertising return. Is radio to grow into another Colossus, demanding valuable space and returning little revenue?

In the Oct. 2 issue of *EDITOR & PUBLISHER*, Arthur Robb presents some sound arguments against the publication of free publicity in connection with radio programs. One of his arguments is that, in 15 New York papers, during the first six months of 1926, a total of about 730 pages of radio advertising was carried as against 833 pages of editorial space in the form of programs, with an additional 200 pages of technical material and broadcasting station news.

If the acceptability of news must be judged on the basis of the advertising which it brings in, it may look bad for radio, but it is a lot worse for baseball, and still worse for politics and foreign news. Nevertheless, it is obvious from Mr. Robb's figures that a huge amount of newsprint is used to print radio programs.

The accepted basis for judging the amount of space which any subject deserves is its news value. If radio is worthy of 833 pages of space because of its news value, it deserves that space whether it brings in a single line of advertising or not. As a matter of fact, intelligent discrimination has not been used in the publication of radio programs. Mr. Robb is right in his charges that they take too much space in some of the metropolitan newspapers. Many smaller newspapers are serving their readers with apparent satisfaction and using considerably less space than some New York papers do. Some syndicated programs, for example, are models of brevity—consistent with completeness.

First, we must admit that there is news value in radio programs. Every attempt to leave them out has resulted in ample evidence that readers miss them. If all the New York papers cut out radio programs for a month, somebody with a radio program sheet would reap a fortune.

It's not a question of programs or no programs. There is something wrong, and it is the fact that a lot of program material published has no news value.

Most newspapers publish not only the detailed programs of local stations, including the insignificant tail-enders to which no one listens, but also the programs radiating from cities 200, 500 and 1,000 miles distant. The long distance hound does not care whether Abraham Jones, baritone soloist, is singing at Chicago or whether a symphony concert is going on in San Francisco or an announcer is sneezing at Honolulu; all he wants is to identify the station which he hears. It isn't *what* they are broadcasting, but *who* they are and *where*, which makes the distant program interesting.

The *New York Times* on October 8 devoted 50 inches of space to the publication of the programs of 55 stations, plus 3 inches of space to a box of outstanding features radiating from local stations. Other New York papers use even more space. I cite the *Times* merely because I happen to have a copy before me as I write. Just what the local stations are broadcasting interests the listener because he selects his eve-

Radio sports announcing, according to Will Johnstone in *New York World*, October 14.

NEWS MAN HELD FOR PLACING FAKE STORIES IN RIVAL'S ENVELOPE

H. B. Goode of Piqua Charged With Sending False Items to Dayton News to Discredit Piqua Call City Editor— Detective Unravels Plot

AN amazing story of newspaper faking was made public in Piqua, O., last week with the arrest on Friday of Harold B. Goode, Piqua correspondent of the Dayton Journal and Herald and former member of the Piqua Call staff, charged with "furnishing false news items," a misdemeanor punishable in Ohio by a \$500 fine or six months' imprisonment.

Goode was indicted by the grand jury, released on \$500 bond and on Wednesday of this week pleaded not guilty to the charge. He will be tried soon.

Goode, on Sept. 14, is alleged to have taken a news letter mailed to the Dayton Daily News by Ray H. Heater, city editor of the Piqua Daily Call and Piqua correspondent of the News, from the local traction office, inserted two false news items, and re-mailed it. Enmity for Heater was given by Goode as the motive for his act.

Both stories were printed by the Dayton News. The longer item purported to be a report of a damage suit filed in Xenia, O., by a Kenneth Burke against Charles B. Upton, prominent Piqua business man and member of the city council. No specific basis for the suit was carried in the story, but in its entirety it reflected seriously upon Mr. Upton's character. The second item, which appeared in the "Piqua Column" of the News quoted Contractor J. M. Hennessey to the effect that paving of Main street, Piqua, would be stopped at once, not to be resumed until next spring. Both stories, when read in Piqua, created much comment.

The Upton story, standing as it did without a vestige of truth, created, from a newspaper angle, one of the strangest situations in Ohio newspaper history. It dealt with an attempt to tamper with news in a way that had never been tried before, so far as there is any record. Aside from the malicious attempt to damage the character of Mr. Upton and discredit Mr. Heater, the story questioned the honor of newspaper men in Dayton.

Within a few hours of the appearance of the Upton story in the Dayton News, the falseness of both stories was proved.

It was found that no suit of any kind had been filed in Xenia naming Mr. Upton or any other man, such as quoted in the story.

The main street paving story was laughed at by city officials and Contractor J. M. Hennessey.

City Editor Heater, from whom the stories ostensibly came to the Dayton News was interviewed by Mr. Upton, but he could tell nothing of their origin. He declared he had seen the Upton story in the News but presumed it had been sent by the Xenia correspondent, and put in the Piqua column by the state editor of the News on the theory that it would be of more interest in Piqua than in Xenia.

A check was immediately made by Mr. Heater on his own initiative. He called the Xenia correspondent of the Dayton News and learned that that person had never heard of a man named Kenneth Burke, knew nothing of Mr. Upton, and had not sent in a story using their names.

This development threw a new angle on the case. Early the next morning the Dayton News state editor, Thomas Wilson was brought into the case. Informed that the News had printed a story without foundation, and that the story could be used as the basis of a libel action, Wilson said that he had received the articles on both Main street and on Mr. Upton, in the regular letter sent to Dayton by Heater. He further said that the articles as far as he could see, had been written in the regular way, on the same typewriter, and had come in with the rest of the Piqua news. Mr. Heater was dumbfounded at this revelation. He immediately asked that the original

copies of the articles be saved so that he could examine them.

Before noon on Sept. 15, a group met in Dayton at the office of the Dayton News and went over the facts unearthed so far. C. F. Ridenour, publisher of the Piqua Daily Call; Mr. Heater, city editor of that paper, Mr. Upton, George W. Berry, August Coluse, Mr. Wilson, state editor of the Dayton News and Dan Mahoney, son-in-law of former Governor Cox and business manager of the News, were those who began the investigation.

They found that the stories about Mr. Upton and the Main street paving had come in at the regular time, and as far as Mr. Wilson could state, in the regular letter. The stories were offered in support of this statement, and found to have been written on regular newspaper copy-paper, and on a typewriter almost exactly like that used by Heater. Even the style of the date lines leading the stories had been copied exactly.

To solve the mystery Detective Joe Wilcox, who aided in clearing up the Nesbitt murder in Ohio, was employed by the News, while Chief of Police Frank Gehle of Piqua entered the case for the Call.

The investigation centered upon the office of the traction company where the insertion of stories was believed to have taken place. It was the practice of the correspondents to send their items via the interurban line to Dayton, in the hands of the conductor. A conductor was found who remembered that Goode had delivered a news envelope to him on Sept. 14, a rather unusual proceeding, since mail was usually taken care of by a traction official.

Goode was immediately questioned but stoutly maintained his innocence, declaring that the envelope he had given the motorman was his own, addressed to the Dayton Journal and Herald.

Many days of fruitless search followed during which Goode maintained his composure. Then one evening he came to C. F. Ridenour, publisher of the Call, and after saying that he had written out his story of the case, proving his innocence, revealed that he had taken apart his typewriter and thrown it in the river. He had done this because he felt he was "being railroaded," he said, and wished to prevent anyone from getting into his

office and using it during his absence. When it became known that Goode had disposed of his machine, pressure upon him was redoubled, and the alleged confession followed.

Mr. Ridenour denied Goode's claim that he had been discharged from the Call by City Editor Heater two years ago.

"Goode quit on two days' notice to take another job," the publisher said. "He had my good-will and I offered him a recommendation. I cannot explain his attempt to discredit Mr. Heater by sending the faked story."

GRAPE GROWERS TURN TO ADVERTISING

Californians Seek to Revive Wine Industry with Judicious Newspaper Campaign—"Why Deprive Yourself?" A Slogan

California's wine grape industry, supposedly crippled by prohibition, is attempting to stage a come-back by judicious use of newspaper advertising.

"Why deprive yourself any longer?" a liberal display ad in the leading daily papers asks "Mr. and Mrs. Householder." "Avail yourself of the privilege granted you by the law. Italian, French and other people of foreign extraction are enjoying their grape juice daily with their meals. Why shouldn't you?"

Then follows the statement "that the vintage season" is in "full swing" and details of service, varieties and prices. The display closes with the statement that a "long, cold winter is ahead."

The reference in the advertisements to "privilege granted you by the law" is problematical, but probably is based upon the attitude of local judges in liquor violation cases. The householder is protected by the inability of enforcement officers to obtain a search warrant without evidence of a sale and by the dismissal of cases where officers have entered a private home without a warrant.

MEMORIAL TABLET FOR WATERS

County farm agents of Missouri will erect a bronze tablet to the late H. J. Waters, former editor of the Weekly Kansas City Star, according to John Howat, secretary of the agents' organization. The tablet will be 32 by 40 inches, and will be placed in Waters Hall, a building in the Missouri College of Agriculture at Columbia, Mo., where Mr. Waters was dean of agriculture at one time.

HOW MANY SOLICITORS DOES A PAPER NEED?

Ad Salesman Should Handle at Least 15 Different Accounts and 100 the Most, R. J. Breckinridge's Survey Shows

A newspaper advertising solicitor should handle at least 15 different accounts, according to a survey recently completed, Robert J. Breckinridge, general manager of the Lexington (Ky.) Herald. Sales on some papers handle as many as 20 different accounts.

The Breckinridge survey is confined to newspapers with circulation ranging from 15,000 to 25,000. Dailies of this class employ an average of five solicitors each. The largest sales staff in a list of 20 papers was one with a circulation of 23,784, which found it necessary to employ eight solicitors, and declared each of them should be able to handle 90 accounts.

The following table gives in detail the figures gathered by Mr. Breckinridge in his survey:

Circulation	Solicitors	Av. No. Ac. Per Solicitor

SARASOTA CLAIMS RECORD

Morning Herald Prints 108-Page Edition Without Adding to Staff

What is claimed to be a record established Sunday, Oct. 3, by the Sarasota (Fla.) Morning Herald when a 108-page Sunday paper was put out without augmenting the force of composing room, press room, editorial or advertising departments.

With a force of 10 men in the composing room, Charles Morgan as foreman, the paper was put out just 10 minutes late, although a battery of only 51 types was used. The regular daily edition had been put out during the week previous, for a total of 184 pages.

The advertising department, under the direction of A. W. Malone, obtained 10,000 inches of advertising for this issue, which was the Herald's birthday annual, celebrating one year in the newspaper field. Malone and his two assistants, Charles Bryant and Russell G. Gwyn, obtained this additional advertising in less than ten days' time.

The Herald composing room force is said to be the youngest in the United States, the average age being twenty-four years. The oldest man in the room is 32 years old and the youngest is 18.

The editorial department is supervised by Floyd L. Bell, managing editor, and Finley Tynes, city editor. A. W. Malone is circulation manager.

George D. Lindsay, owner and general manager of the Herald, is also one of the owners of the Marion (Ind.) Chronicle. His son, David Lindsay, is one of the publishers of the St. Petersburg Times.

Richard E. Lindsay, another son, is business manager of the Sarasota Herald.

COMBINES COMIC STRIP WITH SPORT CARTOON

DID HE CRACK? WOW!

Harold Russell, baseball and sport cartoonist of the Cincinnati Enquirer has developed a combination of the sport cartoon and the comic strip, as shown above. The strip introduces "Danny Dumm," while the upper space is used for current sport events.

RALPH STOUT, KANSAS CITY STAR M. E. DIES, ENDING 35 YEARS SERVICE

Passing of Veteran Editor Sudden—Long Active Career—Once Saved Nelson's Life, Hurling Armed Intruder Down Stairs

(Special to Editor and Publisher)

RALPH STOUT, a member of the Kansas City Star staff for 35 years and for 21 years managing editor, died unexpectedly early Sunday morning, Oct. 10, at Sni-A-Bar Farms just outside Kansas City. He had been in poor health for the last two years. In the winter of 1924-25 he went to Hawaii to recuperate. He returned much improved, but became ill again last fall and in the winter took a protracted journey to Japan, China and the Philippines.

Ralph Stout

After his return in April he was far from well, and in July his illness took an acute turn, with high blood pressure and an impaired heart. A few weeks ago he was removed to Sni-A-Bar Farms in the hope that the country air and the rest might help him.

He spent a good day Saturday and went to bed in a cheerful frame of mind after an evening of reading aloud by Mrs. Stout. She was awakened at 4:30 yesterday morning by the sound of running water in the bath room. Mr. Stout was lying on the floor. Apparently he had sunk down without a struggle. His physician who arrived within a half hour pronounced death due to a heart attack. He believed Mr. Stout had been dead for an hour when found.

Mr. Stout was the owner of 1,000 shares of stock in the Kansas City Star Company. Under the Kirkwood plan of operation, the holdings of Mr. Stout, par value \$100,000 must be sold back within the active members of the organization. Six months is allowed under the trust agreement for the stock to be purchased by the organization members. After that time it may be offered to outside buyers. The stock will be readily subscribed inside the organization since the original stock was greatly oversubscribed when the company was formed.

Mr. Stout was born in Adrian, Mich., July 11, 1866. He was the son of Jared Comstock and Mary Montgomery Stout. His parents moved to Wyandotte (now Kansas City, Kan.) in 1859. His father was master painter for the Kansas Pacific Railroad, now the Union Pacific, in charge of the local shops. As a young man Ralph worked in the shops in vacations. In later years he often spoke of this as one of the valuable experiences of his life.

"It gave me an insight into the feelings and viewpoint of the man who works with his hands, that I have never forgotten," he would say.

Jared Stout, his father, became one of

the substantial citizens of Kansas City, Kan. He was a member of the Board of Education, and its treasurer. Later he was elected treasurer of the city. He died in Horton, Kan., in 1910.

After two years at the University he became restive and anxious to get to work. He began on the Wyandotte bureau of Col. R. T. Van Horn's *Journal* and showing aptitude, attracted the attention of James A. Mann, managing editor, who gave him a place on the regular reporting staff. A few months later he joined the staff of the *Kansas City Times* as a reporter. A powerfully built, athletic young man, Ralph Stout was always interested in sports, especially baseball and boxing. Alfred Henry Lewis, author of the "Wolfville" Tales, was living in Kansas City at that time and they often put on the gloves together.

Mr. Stout naturally gravitated to the sports department of the Times and he became sports editor, and later city editor. His keen interest in affairs, his instinctive judgment of news values, his broad grasp of situations and his driving energy made the local news service of the Times stand out. And so in 1892, W. R. Nelson sent for him to come to the Star as city editor.

An incident that occurred shortly after Mr. Stout came to the Star cemented the friendship between the owner and his city editor. A disgruntled politician came up to the Star office one morning to "lick the editor." He found Mr. Nelson in the small office he used in the building on Wyandotte street, near Ninth. The visitor leaned over the desk and struck at the seated editor, who upset most of the things in the room as he struggled to his feet.

Mr. Stout heard the commotion, rushed into the room, seized the politician, who was carrying a revolver, and threw him down stairs. There was no more trouble from men wanting to lick the editor.

Mr. Stout's life was that of the active, energetic newspaper man. After 13 years service as city editor he became managing editor in 1905 in succession to T. W. Johnston. As a news man he showed unusual capacity. His handling of such outstanding events as the San Francisco earthquake, the Titanic disaster, the opening of the World War, the sinking of the Lusitania and the Armistice was a source of pride to the staff.

Politics was an absorbing subject to him. Nothing delighted him more than to supervise the handling of a national convention. He began attending conventions in 1900 and with the exception of the Democratic national convention of 1920 in San Francisco, he attended all the national conventions of both parties from 1900 through 1924.

But he was more than a news man, like Nelson, his chief, he regarded city and national problems in no neutral way. To him they were vital matters.

He saw clearly the nature of the problems and their importance. Always he measured them by high standards.

If he started a campaign for a better garbage system, for city improvements of any sort, for decency in policies, he was concerned with accomplishing things.

In the early part of the World War, he became especially concerned with the unpreparedness of the United States. The Middle West was pacifist. It wanted to keep out of the war. Preparedness was unpopular but Mr. Stout was convinced the United States would finally be dragged into the struggle and it must be ready. He would go over to the editorial department every few days and say:

"Don't you think we ought to have another editorial on preparedness? We've got to keep pounding to get this country in shape. Our readers may not like it, but it's our job."

Naturally he was a tremendous admirer of Theodore Roosevelt. When the arrangement was made for Roosevelt to contribute editorials to the Star during the early part of the war, he went to Oyster Bay to discuss plans with the Colonel and came back telling with much amusement how Colonel Roosevelt had introduced him to Mrs. Roosevelt:

"Edie, I want you to meet my boss."

After the war the Star published the Roosevelt editorials in a substantial volume, to which Mr. Stout contributed an elaborate introduction.

As an executive official he had no time for writing. But his visit to the Philippines last winter resulted in a series of articles on conditions there that attracted wide attention. They were written with that vigor and lucidity that characterized his thinking and conversation.

As he outgrew his early joy in active sports he found nothing to take its place, until a dozen years ago when he bought a 160-acre farm 30 miles east of Kansas City on the Sni-A-Bar road adjoining the Nelson farms. This became his one great recreation. He was especially interested in cattle and he made his place a live-stock farm. Nothing delighted him more than to drive out there for the weekend. Put on his old clothes, work around the place and fraternize with neighbors.

"When you fellows get to be old stiffs," he would say to his associates, "you will be glad to come out and hoe potatoes for Farmer Stout."

A driving managing editor, he was always kindly and sympathetic in his personal relations. Men went to him with their troubles and always found in him an understanding listener and a wise counselor.

One day at his desk he opened a letter and a check for \$10 fell out.

"That ends a pleasant surprise," he remarked to a man who was talking with him. "Years ago I knew this chap on the old Times. He wrote to me from San Francisco last year, with a hard luck story. He said he had to have \$100. I kissed it goodbye and sent it to him. But now he has paid up. He has helped my faith in human nature."

In 1898 he married Miss Mary McCabe, who was then in charge of the reprint department of the Star. Two children were born to them. Martha and David. Martha was married last year to Franklin Wright Gledhill of New York. David is in a New York School. A sister, Miss Helen Stout lives in Chicago.

Funeral services were held at 2:30 o'clock Tuesday afternoon at the home, Forty-fourth and Locust streets, and were conducted by the Rev. Robert Nelson Spencer. Burial was in Mount Washington Cemetery.

Pallbearers were: Irwin R. Kirkwood, A. F. Seested, George B. Longan, Henry J. Haskell, D. Austin Larschaw, Fred C. Trigg, H. L. Nicolet, Edwin G. Pinkham, John T. Barrons and Earl McCollom, all associated on the Star.

Hundreds of messages of condolence from all section of the United States were received by the family.

PRESS GROUP TO VISIT N. Y.

Alabama Editors to Hold Annual Outing in Gotham Next Summer

The Alabama Press Association, at a meeting held in Birmingham, Oct. 8, voted to hold the next summer meeting and annual outing in New York City. The decision for the outing lay between Cuba and New York and the majority voted for the latter place.

The meeting was called by F. W. Stanley of the *Greenville Advocate*, president of the association. Horace Hall of the *Dothan Eagle*, secretary, was appointed to make reservations and plans for the trip.

Under a plan adopted last year the Alabama Association holds its winter business session in two sections the one for North Alabama in Birmingham and the one for South Alabama in Montgomery. The Birmingham meeting will be held on Jan. 8 and the Montgomery meeting Jan. 22.

CANADIAN PRESS BOARD MEETS IN QUEBEC

Robinson Succeeds Ellis as Director—Daily Group Also Convenes—Pay Tribute to Marson

Directors of the Canadian Press held their semi-annual meeting at the Chateau Frontenac, Quebec, on Thursday, Oct. 7, under the chairmanship of J. H. Woods, *Calgary Herald*, president of the Association. Following the meeting, which was private, a statement was issued announcing that the *Progres-du-Saguenay* had been admitted to membership. It was also announced that F. B. Ellis, *St. John Globe*, second vice-president, had resigned from the directorate and that H. B. Robinson, *St. John Telegraph-Journal*, had been elected a director in his place. Henri Gagnon, *Le Soleil*, Quebec, representative on the directorate of the French-Canadian newspapers, was elected second vice-president.

J. H. Woods

The directors were entertained at luncheon at the Garrison Club, Quebec, by Mr. Gagnon.

On Friday, Oct. 8, directors of the Canadian Daily Newspapers Association held their semi-annual meeting in the Chateau Frontenac, under the chairmanship of Hon. Frank Carrel, president of the Association. Several reports were presented, all of which showed that the affairs of the Association were in a satisfactory condition.

To fill the vacancy created by the death of W. S. Marson, *Montreal Star*, V. E. Morrill, *Sherbrooke Record*, was elected to the directorate. A resolution of sympathy with the widow and family of Mr. Marson was adopted. It was decided that the next annual meeting of the Association would be held in Toronto in April, 1927.

Directors of the C. D. N. A. and also the directors of the Canadian Press were entertained at luncheon at the Garrison Club by Hon. Frank Carrel, while in the evening the three local members of the Canadian Press, *L'Evenement*, *Le Soleil* and the *Chronicle-Telegraph*, tendered a banquet to the visiting publishers in the Chateau Frontenac.

On Saturday evening, Oct. 9, a reunion of the surviving members of the Canadian Press expedition to the Western front in 1918 was held at the Chateau Frontenac, following which several of the visiting publishers left for the hunting camp in New Brunswick of T. F. Dummie and Howard P. Robinson, of the *St. John (N. B.) Telegraph-Journal*, where they spent several days.

UNION TO VOTE ON SCALE

Typographical Union No. 6 will meet Oct. 17 at the Star Casino, New York to vote on the scale proposed by the New York newspapers.

SEATTLE DRUGGIST INCREASED SALES BY BOOSTING DOCTORS IN HIS COPY

"Consult Your Physician" Slogan Stressed—\$1,250 "Thrown Away" in Goodwill Advertising Before Newspapers Were Used—\$2,000 Budget Increased Volume \$20,000

By MANDUS E. BRIDSTON

IT is generally assumed that one of the prerequisites of a successful prescription drug store is location in a doctors' building. Braley, Inc., prescription drug store in Seattle and Portland, has never been favored with such a location, but despite this handicap the firm's assets have increased from \$1,200 to more than \$50,000 since 1918. Most of this gain has been made during the past three years, or since Edward R. Braley, president, conceived and executed an advertising campaign, unique in its inception and methods, but remarkably effective, as results indicate. Though the idea back of it is particularly applicable to the drug business, it can readily be adapted to almost any line in the local field.

About 85 per cent of the volume of Braley, Inc., comes from the doctors, and since the number in the field is limited, it would seem that the best way to reach them would be through direct mail or personal solicitation. Braley decided that both were ineffective, because overdone and for various other reasons. Then he went into the daily newspapers with quarter-page ads, but not until he had almost exhausted his assets in other diverse forms of advertising. However, he did not address his message to the physician, but to the public at large, though only an insignificant minority of the people could be regarded as prospects.

Braley played a trump card; he did something for the doctors which they could not do for themselves—advertise their business, regarded by the medical profession as unethical. However, coming from a druggist it was well and proper and received official approval of the American Medical Association. The doctors, in turn, reciprocated in a definite way by extending patronage.

"When I started the business in 1918 with a broken down show case and a stock that could almost be put in a shirt," Mr. Braley put it, "I took it for granted that I would have to advertise in order to build a business. Like a good many other suckers, I went into every theatre program and women's club bulletin that came along—pirates on the sea of advertising, I now call them. One year I spent \$1,250 in this so-called 'goodwill' advertising, and at the end of the year discovered that my gain in volume was only \$870. Of course, I concluded that my advertising budget had been literally thrown away, for I had a right to assume that the meager gain was only the result of natural growth of a small business.

"Then I began to give the matter of advertising some serious thought. I must do something different—get out of the beaten path. I did not want to drop advertising and depend solely on personal solicitation, for doctors do not like to be interrupted during office hours. Even though they listen courteously, what you tell them goes in one ear and out the other, for their minds are on their waiting patients.

"I determined that I would find out if there is anything in advertising, if it broke me; and so I contracted for six quarter-page ads in a Seattle daily newspaper—enough to break me if the campaign didn't deliver the goods."

But it did, and the campaign has continued to date. The resulting chain of branch stores in the Pacific Northwest—the one in Portland, said to be the finest on the Pacific Coast—bear witness of the fact.

However, it was not the mere fact that Braley, Inc., used display space in the newspapers that turned the trick—it was the nature of the message.

One of the first quarter-page ads read as follows: "Your Physician will guide you from sickness to Health. Your

physician holds the key to your future. Upon him depends whether you are physically fit to compete with other men and women. Good health is the essence of every man's success. You should consult your physician regularly and have a thorough analysis of your physical condition. You may have some slight ailment, and through neglect might develop something serious. Safeguard your most sacred asset—your health. Consult your physician at first symptom of illness."

The ad was graphically illustrated by picturing a horde of people crawling on hands and knees from the dark valley of "sickness" to the bright hill-top called "health." This, like several ads, was in two colors.

Braley coined the slogan "Consult your Physician at the first symptom of illness," and featured it in all the advertisements; in fact the entire advertising program is built around this slogan.

"We sell only through your physician," explains an announcement, "as we have found that policy the best—for you to consult your physician before using or taking medicine. An examination by your physician often discloses contributing factors. You will always save yourself time, money and sometimes suffering if you only consult your physician at the first symptom of illness."

Another advertisement stated: "We will not carry patent medicines or 'cure-alls,' and, as many of you know, we will voluntarily sacrifice many sales rather than sell the public something we believe worthless." A convincing evidence of good faith, that appeals to the casual reader, and of course, pleases the doctors.

Note that in this institutional advertising there is no specific mention of the wares sold by Braley, Inc., and prices would be as out of place as fish out of water. But the ads sell merchandise!

But not all the ads are general. Some are specific. In August an ad was run concerning tonsils—a reminder that infected tonsils should be removed before the cold weather sets in, backed by "reason why copy" to the effect that infected tonsils cause many bodily ailments. Under a caption, "What are tonsils?" was an informative paragraph.

It would seem that this type of advertising strikes at the very heart of the prescription business, as Braley pointed out in the ad: "My business is filling prescriptions. The more diseased tonsils that are NOT removed, the more prescriptions I will have to fill this winter." But that's what makes it good advertising. Such obvious unselfishness is bound to have a favorable reaction.

And Braley is sincere in his altruistic propaganda in behalf of the public health, even though it has its financial reward. He feels that advertising of this character should certainly serve the public by distracting attention from the fraudulent pretenses of organized quackery, which spends large sums of money to sell services to prospective patrons. The medical profession is bound by tradition, but appreciate the benefits, none the less.

Braley's sincerity is again evidenced in his exploitation of Diphtheria-Toxin Antitoxin Mixture, a relatively cheap compound use to immunize against the disease.

"If I supplied all the Diphtheria-Toxin Antitoxin Mixture sold in this territory, my profits would not be as large as those on only my share of the Diphtheria Antitoxin sold. The former has a small margin of profit, due to its relative cheapness, while the latter runs into real money. But it is eminently better to encourage the public to guard against this dread disease than to wait until the disease has been contracted," Mr. Braley declared.

The merchant who can convince his

trade that he is sincere in promoting the customer's best interests, need not worry about increasing his volume. The other day the writer went into a haberdashery and inquired for a certain type of "slicker" introduced to the trade last year.

"Yes, we have some left, but I'm afraid we'll have to give them away—just a fad that didn't deliver the goods." He might have sold one, at least, at a profit, but he chose to be frank. This merchant sold me a top-coat, and he'll probably sell me several suits of clothes. But let's get back to the story.

The first year Braley, Inc., adopted this program of advertising the firm spent \$1,250 in eight months—the same amount that had been spent the previous year in haphazard program or "good-will" advertising. Whereas the gain in volume during the previous year was only \$870—about \$400 less than the amount spent for advertising—the following year showed a gain of approximately \$5,000 during the eight months. The next year, with the advertising appropriation doubled, the firm showed a gain in volume of approximately \$10,000, and last year with a slightly smaller advertising budget, the gross volume increased over \$20,000.

The exact figures follow:

	Adv'g. Appn.	Volume	Gain
Twelve month period "goodwill" advertising	\$1,254	\$39,564	\$870
Eight month period newspaper advertising	1,250	44,785	5,221
Following year of newspaper advertising.....	2,400	55,284	10,499
Last year (1925).....	2,224	75,957	20,673

These figures speak for themselves.

Do the physicians take kindly to this plan? Besides expressing their opinions by increased patronage, when the new Medical and Dental Building was opened in Seattle, Braley, Inc., received more than half the votes cast by the physicians to select a druggist to serve them in the building, among ten or more contestants. Through no fault of the doctors, the plan didn't materialize, and Braley is doing business at the same old stand.

As was said in the beginning of this article, the idea behind this campaign can be varied to fit almost any line. Lawyers, dentists, restaurateurs, realtors, and even ministers of the Gospel, would not object to having an enterprising haberdasher, furniture dealer, ad infinitum, tell their story to the public. Much business would result directly from these people, and by virtue of being "different," such a campaign would create considerable attention and interest from the general public. A haberdasher, for instance, might exploit a variety of professions and businesses, varying his copy from week to week.

A variation of this was the advertising campaign of Martin & Eckmann, Seattle haberdashers, who ran a series of "dress for success" ads, featuring the photographs of prominent Seattle businessmen, with signed statements from them relevant to the importance of dressing well.

"I'll scratch your back, if you'll scratch mine," may be a rather homely way of putting the idea—but very expressive. Particularly applicable to those, who, like the physician, can't "scratch their own backs."

SQUIRES RE-ELECTED

Second I. A. A. Clubs Again Name Correspondence Schools Man President

H. C. Squires of the International Correspondence Schools, Scranton, Pa., was re-elected chairman of the Second District of the International Advertising Association (New York, New Jersey, Pennsylvania, Delaware and Maryland) at the closing session of the annual district convention in Lancaster, Pa., last week. Schenectady was chosen for the 1927 meeting.

Other officers are S. Roland Hall, Easton, Pa., vice-chairman; Mrs. Florence Beidelman, Bethlehem, Pa., secretary-treasurer, and Mr. Squires, Lester Mueller, Baltimore; W. W. Heidelbaugh, Lancaster, and Miles R. Frisbie, Schenectady, representatives of the district on the Advertising Commission.

YOUR DOCTOR HOLDS THE KEY

TOUGHEST STREET" CLEANED UP BY ELMIRA EDITOR'S BRAVE FIGHT

Gambling and Vice Resorts on Railroad Avenue Closed When Public Realized Their Menace to Youth—Official Apathy Hindered Fight

By PAUL M. WILDRICK

RAILROAD AVENUE in Elmira, N. Y., has been termed "one of the toughest spots between New York and Chicago."

Gambling and vice flaunted openly there, until a fighting editor shocked the city with revelations of existing conditions and succeeded in enlisting the support of decent citizens and capable officials in removing the social menace.

Matthew D. Richardson, editor of the *Elmira Telegram*, a Gannett newspaper, is the man whose crusade made Elmira a safe place for young men and women. For several months he exposed conditions there, until at the same time many of the gambling houses and vice resorts are closed.

The *Sunday Telegram* conducted a stubborn fight before it was able to induce the officials in the sincerity of its efforts and the determination behind the crusade to clean up the town," he said. He asked to outline the conditions he encountered in his fight. "We invited the chief of the police department to join us in our work, but he declined with the statement, often repeated that he was doing his duty and would continue to do so. Thus we were compelled not only to wage war against the underworld, but to police as well.

Even the patrolmen, as a whole, were in sympathy with the movement, we said, and with their chief luke-warm and little heed to a really dangerous situation, a constant menace to the community.

However, due to the relentless newspaper attack the gamblers and proprietors of dives harboring girls and women became frightened and sought to clean up the premises before their trafficking involved them in criminal procedure."

Editor Richardson was sincere in his efforts to clean up Elmira's underworld. It took time for people of the better class to awake to the realization that his campaign was not "just a newspaper stunt." Churches of the city finally began to endorse his efforts. And then the police commission felt compelled to call a meeting to discuss the situation.

At the meeting of the police commission Corporation Counsel John J. Crowley came forth as a champion of the Telegram. He first quoted various laws concerning legal methods of suppressing gambling resorts and houses of ill fame. Then he delivered what the *Sunday Telegram* declared to be the "hottest tip" ever delivered the Elmira police department. He

said: "If the police department, from its position, desires to suppress gambling and vice, it can do it; and it can suppress disorderly houses as well. If I were the chief of police and I knew that a disorderly house existed in any part of the city and I did not comply with my command, I would station enough men around that particular place to suppress it, or until I was compelled by some court to do differently."

Even though the *Telegram* from then on made Corporation Counsel Crowley's campaign one of the big points of its campaign, it was some time before the paper was able to arouse public opinion sufficiently to get results from official sources. This was after it devoted even more space to

fighting the mild methods used by the city's police department. The staff of reporters was successful in obtaining inside facts which were used in articles. The only additional help necessary was furnished by a private detective who was hired for a time to aid in investigating underworld conditions.

And through it all an outstanding feature was that although the *Sunday Telegram* carried accusations galore, every accusation was apparently backed up by the truth. At no time were libel suits so much as threatened against the Richardson edited paper.

The charges made by the *Telegram* were greatly strengthened when at the height of its campaign a fire broke out in an "athletic club" managed by the self-styled Lackawanna Athletic Association. Photos of the partially destroyed structure were taken after the fire. These photos showed it to be entirely used as a gambling resort. The place was protected by the use of a heavy bar across the entrance and the installation of an electric bell on the exterior which must be rung before one might enter. The *Telegram* in the course of its investigation of the property found that the "club" was owned by an election commissioner, well known in local politics.

Railroad Avenue, the headquarters of vice in Elmira, is recognized as one of the toughest spots between New York and Chicago. Police were told by proprietors of so-called cafes on the avenue either to leave their joints alone or lose their jobs on the police force. Many proprietors reigned behind barred doors which were fitted with electric locks. Others threatened uniformed officers with civil actions if they inspected their places and boasted of their political contributions to obtain protection, so it was stated in the columns of the *Telegram*.

When the *Telegram* made its fight still stronger, the Railroad Avenue gang and others of the city's underworld became frightened at the exposures being made. Editor Richardson expresses it thus:

"Political interference was openly charged. And this class of politician was attacked by the *Telegram* with the result that places that had felt confident of protection up to that time, closed up shop and the girls disappeared from Railroad Avenue resorts, Elmira's underworld retreat.

"The battle continued until practically every public gambling resort was closed."

Previous to the *Telegram's* investigation, there seemed little hope of anyone attempting to buck the interests behind organized vice in Elmira. Perhaps the main reason was that it had been more than whispered that politics and vice were, to a certain extent, pulling together.

In a specific instance, the newspaper

outlined its stand by making a statement of the reason for the large amount of publicity given certain conditions, heading it with "What Is It All About?" The statement follows:

"A very well-meaning citizen suggests to the *Telegram* that the things that are being revealed in these columns every week are things that 'always have been and always will be.

"The *Telegram* wants to make one point definitely clear. This newspaper is in this task of throwing the light of day on some of the things which are taking place under the very nose of the police and the good people of the city for the single and sole purpose of protecting a rapidly increasing number of young people who think it is smart to go the way of the rioters.

"We know what we are talking about when we say that somebody just simply must take notice of these things—the tenth of which can never be printed. Somebody must make it unsafe for the situation to continue. Somebody must broadcast the truth that boys and girls will be afraid to take the chances that get them into such places and such habits.

"You can not know because you have not seen. You must not misjudge the motives of this newspaper. You owe your support to this job. You are not sure, maybe it is your own very boy or girl the *Telegram* is fighting for—anyway it is for thousands of them who are getting away with all manner of subterfuge which gets them free of the home ties long enough to meet the kind of men and boys or girls or women who do youth no good.

"Is it true that 'it always has been and always will be'? It is not! What used to be was nothing like this. What 'used to be' had some semblance of respect and responsibility for youth—mere children. This has not.

"For God's sake, parents, police, MEN don't just sit back, read and say 'interesting.' This situation is real."

Despite the statement that the newspaper's campaign was for the younger generation, it has been pointed out that it was a big aid to others. For it was necessary to drive out those gaining illegal spoils from the youngsters' parents in order to help the youngsters themselves. The object was to keep Elmira clean no matter who was affected and to make it a safe place for the present and future.

As many as 25 professional gamblers have been known to await outside the publication quarters of the *Telegram* in order to obtain copies of the paper from the newsboys when they first made their appearance on the streets. The gamblers never knew what was to come until they read the contents of that portion of the paper given over to vice conditions. It was thought by many that the charges of the *Telegram* would bring the Grand Jury into the case. Editor Richardson was in fact called before that body to testify as well as members of his reportorial staff. But although the Grand Jury started to investigate on two occasions, the huge expense necessary for carrying on an investigation, acted as a

barrier against such action. The Elmira case, with the exception that there was no actual bloodshed, offered fully as much to contend with as did that which brought about the murder of Editor Mellett in Canton, Ohio. In connection with the latter tragedy Mr. Richardson of the *Telegram* states:

"In the Mellett murder at Canton, I see there is much strategy, bickering, and dealing embroiling the press, bar, and political system in a quarrel as to who shall solve the murder. If they had quarreled before the murder as to who should take a hand in cleaning up the town, and then had united in the effort, the killing would have been averted. This laxity in Canton on the part of the police is an accurate example of what Elmira contended with in a similar cause. Those who have endeavored to clean up a community without the aid of men empowered with the authority and paid by the taxpayers to act, readily realize what Mellett was up against. Surely we do here in Elmira."

Like the late Editor Mellett, the staff of the *Telegram* has been threatened by underworld characters. Speaking of this phase of his struggle, the editor of the Elmira paper spoke as follows:

"In the midst of the crusade there came open threats from a prominent gambler through an underworld agency that the exposures must stop or there would be reprisals; reputations would be assailed and bodily harm result, too. These threats were printed in the next issue of the *Telegram* and served only to aggravate our attack."

Although it is owned by the Gannett group, the *Telegram* is edited as an independent newspaper. In fact Elmira's two dailies (morning and evening) are also controlled by the Gannett interests, yet they took no part in the *Sunday Telegram's* campaign.

Editor Richardson in speaking to the EDITOR & PUBLISHER correspondent was very emphatic in saying that circulation gain was a minor feature of the campaign. He declared that he and his staff were heart and soul in the task of making the city a safe place in which to live. The big object was to drive out gamblers and bootleggers who were a menace to the youth of Elmira. And now that this has been accomplished the *Telegram* is contenting itself with the job of seeing that its work remains permanent.

MEXICO EDITOR FREED ON COURT ORDER

Charge of Inciting Rebellion Dropped—Terrazas Allowed Bail Following Press Congress Protest

MEXICO CITY, Oct. 11.—Silvestre Terrazas, proprietor and editor of *El Correo de Chihuahua*, who was under charges of inciting rebellion against the Mexican government has been ordered freed by the Federal Circuit Court in Saltillo, Coahuila. Mr. Terrazas has made a public acknowledgment in his paper of the interest taken in his case by the Press Congress of the World, through James W. Brown, former secretary-treasurer.

Terrazas was arrested on order of the local authorities. The matter was called to the attention of the Mexican Federal Attorney General by Mr. Brown and the editor was released on bail. An appeal was then taken to the Third Circuit Court at Saltillo. The ruling of Judge Agustin Urdapilleta MacGregor says:

"First.—The order issued on Aug. 5 of this year by the supernumerary District Judge of Chihuahua in the prosecution of Silvestre Terrazas for the crime of openly inviting rebellion through the press, an order by virtue of which the accused was declared under arrest and presumably guilty of the aforesaid offense, is repealed.

"Second.—With the legal reservations, place Silvestre Terrazas in absolute liberty, cancelling the bond which he deposited when order for his release on bail was given."

REPORTER IS KEY-MAN OF THE PRESS

By William Preston Beazell

Assistant Managing Editor, *New York World*.

THE reporter is the key-man of the newspaper. His are the eyes, the ears, the mind, indeed, that fashion it. It is from his ranks that the executives are drawn. The editors, great or small, who did not begin as reporters are almost non-existent. What makes a reporter? Practice chiefly. He needs, first of all, curiosity, as the scientist must have it, for no "story" is complete that does not answer every question it provokes in the reader's mind. He must be a lover of truth and fairness for their own sakes; there is no excuse for inaccuracy or injustice that is purposely or carelessly permitted. He must have judgment, lest superficial estimates of men and facts lead him, and his newspaper, on to humiliation and disaster. He ought to have personality, though that lack may be overcome. He ought to take himself and his work seriously; the esteem in which he is held and the success he achieves will be determined chiefly by his own standards.

Lastly, and firstly, he must know how to write—too many newspapermen can't, or don't! He should know his tools as does the engraver. Writing is not merely the use of words. It is the sure, effective presentation of facts. It requires background and a sense of values as well as craftsmanship.

HARVEST OF LINAGE WAITS DAILIES AMONG SPORT GOODS STORES

**Publisher of Outdoor Magazines, Himself a Newspaper Advertiser, Says Sporting Equipment Under-advertised—
8,000,000 Hold Hunting Licenses**

By HAMMOND EDWARD FRANKLIN

AN opportunity to sell thousands of extra agate lines of space is being overlooked by newspapers as a whole, in the opinion of H. L. Tilton, veteran publisher of magazines for the sportsman, himself a user of many newspapers.

"Newspaper publishers do not realize the interest now being taken in the sports of hunting and fishing," Mr. Tilton declared with vigor. "At least, it would not seem so from my observation of their advertising columns.

"Latest figures show there are 8,000,000 men who have licenses to hunt and fish. Pennsylvania has 700,000 alone, California is second and other states follow with surprising numbers. These men are interested in all phases of the open and buy a huge quantity of equipment from sporting goods dealers. A newspaper can figure that at least 10 per cent of its readers are hunting and fishing enthusiasts.

"Right now the woods are calling. Many men are going or are about to leave on the annual trip they have looked forward to for a year. Whether or not they get any game, they are prospects for a thousand and one articles which their sporting goods store ought to be selling them."

Before I chronicle Mr. Tilton's views on how the newspaper can get more linage from the sporting goods store, a few words about his radical departure from the conventional in publishing are apropos.

After running several sporting goods stores, this Boston man nursed into life the *National Sportsman*, in those days a slender little sheet published monthly. It thrived and grew under the treatment, finally becoming one of the leaders among outdoor magazines.

Newsstands sales were handled through routine news company sources. Then a new magazine, designed to sell for 5 cents, was launched. This was known as *Hunting & Fishing*. This, too, was marketed in part in the routine news company way.

Mr. Tilton "cut loose" and formed his own independent magazine wholesaler connections. He also evolved the plan of selling magazines in the sporting goods field direct to sporting goods dealers. Today more than 2,100 dealers are selling *Hunting & Fishing* over the counter. They display and push it. The magazine helps sell merchandise advertised in it to and for the dealers. This magazine under the present development plan is growing in circulation every month.

In connection with circulation work for the magazine, Mr. Tilton has offered various premiums, such as knives, of appeal to the sportsman. Year before last he spent upwards of \$80,000 in compiling lists of hunters and fishermen in the various states and circulating direct mail material among them to get subscriptions. It produced a great many, but this past year newspaper advertising has "beaten it all hollow."

This past year these two magazines have used, in addition to certain large-circulation national farm papers, mail order magazines, boys' magazines and other outdoor publications, a total of 900 newspapers. The expenditure has been under \$30,000. Copy has been divided among many agencies.

"The thing about newspaper advertising which has appealed to me is its flexibility," Mr. Tilton stated. "Anywhere our subscription list needs additions we can get them by our controlled newspaper advertising. For every dollar we

put into space, we have to get back a certain predetermined amount from each insertion or we cross the paper off our list. All copy is keyed and a careful record is kept.

"This plan has brought in thousands of desirable subscriptions from readers who are unusually responsive to advertising because they answered our own. In addition to subscribers, we consider the advertising a decided boost to newsstand sales as we know we cannot bring *Hunting & Fishing* before practically every family in the country without making many want it. Newspaper advertising goes quickly into every nook and corner."

Space runs 100 lines, run of paper, sport page requested, in Saturday or Sunday issues when men have a chance to think about their week end trips. Evening papers are given the preference.

"Our advertising has been a liberal education as to the pulling power of newspapers," Mr. Tilton commented. "Dollars received are our basis for judgment. We keep all our advertisements in a big scrap book and credit all orders received. Usually the key number is given. Why one leading newspaper in a town will pay and another, supposedly equally good, is often a mystery. In some cities, every paper in the town pulls well for us—in other cases, in big cities near big game regions we have tried every paper without finding one which will do the job.

"Publishers lose a great deal of good will from the way they make up their papers. They pay fancy prices to star salesmen to go out and sell newspaper space. The copy comes in and falls into the hands of someone with no judgment on makeup. The result is he does not position copy at all to best advantage and this makes a big difference in pulling power. In the outdoor field of magazines, positioning is done with infinite care and the advertiser benefits.

"Another way the newspaper publisher hurts himself is in failing to follow directions to insert key number in the mat. Literally dozens of our advertisements have been inserted without the key number put in, and so the newspaper has lost its chance for a second insertion automatically. We can't give credit to the paper for returns when we can't trace 'em."

Because *Hunting & Fishing* is very friendly with the sporting goods retailer, it has made a study of his needs. It finds that the average dealer knows little of newspaper advertising, and is "too busy," but ought to be using it all the time, so the magazine is furnishing timely suggestions which already have encouraged many to go to their newspapers with orders for space.

A service of seasonable cuts at considerable less than cost of making originals has been prepared with the co-operation of a newspaper cartoonist. These cuts do not in any way advertise *Hunting & Fishing Magazine*, but show in a bright way sportsmen catching big fish, etc. The publishers state they will be glad to extend this service to many readers of *EDITOR & PUBLISHER*, who address *Hunting & Fishing*, 215 Newbury Street, Boston. Proofs of the cuts have been mailed to leading sporting goods stores.

"Whenever the newspaper prints an article on hunting and fishing or plans some special editorial feature on this subject, it ought to go out and sell dealers and local sporting goods manufacturers on using some display space.

"The space solicitor should help the sporting goods store become a weekly user of space. I believe Friday night is the best time, because of the approaching week end. The copy should be timely,

JUDGE ELBERT H. GARY AND THE NEWSPAPERS

PRAISE of the treatment accorded him by newspaper reporters was paid Oct. 8, by Judge Elbert H. Gary, when he was interviewed on his 80th birthday. He also linked newspaper reading with his success in life.

"Every morning of my life I get up at six o'clock, and, having dressed and shaved, I read thoroughly at least three morning newspapers," he declared.

"I might say that I am an omnivorous reader of the newspapers, reading at least three evening papers between late afternoon and bedtime."

chatty, even slangy. It can tell of specific merchandise as well. Some dealers put on contests, or offer to get licenses.

"I recall how a sporting goods store in Chicago used to advertise a cut-price leader every Friday and have hordes in Saturday to buy. The advertising appeared just when men's minds were turning toward where they would go and what they would do for week end fun.

"Newspapers could do considerably more with special pages devoted to sporting goods than they do. All the stores in town should be willing to go in on a special page proposition if it is the right kind."

DAILY SUES TO PREVENT RADIO INTERFERENCE

Chicago Tribune Gets Temporary Injunction Against Station Which Seized Unauthorized Wave Lengths

The *Chicago Tribune*, representing radio broadcasting stations WGN and WLIB, filed suit Oct. 9, in the Circuit Court, Chicago, against the Oak Leaf Broadcasting station, the Coyne Electrical School, and J. L. Guyon, owner of Guyon's Paradise ballroom, owners of Station WGES, charging that station was using a broadcasting wave length which interfered with WGN's and WLIB's broadcasting.

Circuit Judge Francis S. Wilson issued a temporary injunction after argument by Attorney Weymouth Kirkland. The order restrained the defendants from using any meter length which will interfere with the broadcasting by WGN and WLIB.

Last Sept. 7, the Guyon station began using a wave length which interfered with the complainants' broadcasting, their petition for an injunction charged. This caused a serious loss to the Tribune station, they declare, as listeners were unable to tune out WGES and listen to programs upon which the Tribune has spent \$135,000 since the first of the year according to the bill.

NEWSPAPER MAKERS AT WORK

By HAROLD EVERETT HUNT

MARSHALL N. DANA started out a quarter of a century ago to be a Baptist minister. The pulpit, however, lost him to the press, but his predilection to be a preacher never deserted him.

For most of that 25 years since his boyhood, Dana has preached daily to audiences that have reached into the 100,000 class; preached sermons founded on the great undeveloped West and its almost limitless possibilities.

Led by that urge to make known to the world what his chosen field of operations, the rich Pacific Northwest, had to offer to the worker, the homemaker and the man of wealth, Dana became a leader among those to whom advertising means more than mere displays, bought at so much the inch. Today, as a result of his years of persistent preaching, he stands at the head of one of the most potent organizations for the good of the commonwealth in the Western world.

At a recent convention in San Francisco, Dana was chosen president of the Pacific Coast Advertising clubs, a position coveted by men of many cities.

Dana, after a brief career at the Southern Baptist Theological seminary in Louisville, Ky., found the call of the news world stronger than the appeal of the church. He had tasted the joy of seeing his efforts in print as a child, contributing to the county paper, the *Matamoras Times*, in Washington county, Ohio, where he was born in 1885. After his college days he gained experience as a reporter on the *Dayton (O.) Herald*; the *Huntington, (W. Va.) Advertiser*, *Herald Dispatch*; the *Charleston Gazette* and the *Kansas City Star*.

In 1909 he decided to go West and become a reporter on the *Portland Oregon Daily Journal*.

His first assignment was to the railroad and federal court beat. It was about this time that a man made the statement that milk from his sick cows, which he was delivering to customers in Portland, killed his cats and he wondered if it would "hurt" children. He said that he had asked the then dairy and food commissioner, who replied that milk from cows suffering with tuberculosis would "kill pigs but fatten babies."

Wide publicity given this unusual state of affairs led to Dana's being taken from his "beat" and turned loose on the pure milk crusade which followed. The crusade became history and Portland's milk supply was cleaned up.

This ended Dana's career as an average reporter, for C. S. Jackson, late publisher of the *Journal*, and George M. Trowbridge, its late managing editor, soon recognized in the young reporter a trend in the very direction the *Journal* was seeking an outlet for its energies—the upbuilding of the Oregon country. Mr. Trowbridge also found in him an unusual bent; Dana actually enjoyed "covering" luncheon clubs. He also thrived on Chamber of Commerce junkets, the bane of the average reporter.

This trend of Dana's soon led to his specialization in the field of what might be termed "boost" news. Before long he began to be an authority about the office on questions of land settlement, power projects, irrigation, reclamation and the like.

Attending civic club luncheons regularly led naturally to Dana's taking an active part in the affairs of these organizations, for his abilities and his willingness to take much of the onerous work of such bodies on his own shoulders were soon recognized. His participation was not without its selfish side—selfish in the interests of his paper and his desire to spread the work in which he delighted—as he found that, by taking advantage of the opportunities thus offered, he could frequently create even greater news than those who originated the ideas and ideals for which the organizations stood ever dreamed.

Thus he became president of the Umatilla Rapids Association, vice-president of

Marshall N. Dana

the Oregon Reclamation Congress, trustee of the Columbia Basin Irrigation League, chairman of the hospitalization committee of the Portland Chamber of Commerce, member of the land settlement committee of the Oregon Development Fund, and an executive in many other projects.

During the World War he was made director of publicity for the War Loan drives in Oregon, for the Red Cross war aid appeals and for other drives.

While it has been Dana's typewriter and Dana's forceful work that have brought about many of the big things in the Pacific Northwest, he does not take to himself the undivided glory for his accomplishments.

"In all this I would have been wholly ineffective without the cordial backing of the *Journal*, and the leadership of men like C. S. Jackson, George Trowbridge, Frank Irvine, present editor; Donald Sterling, managing editor, and John L. Travis, former news editor," he said. "It has been, however, my discovery that if a thing is needed, if it will advance human welfare, and you keep at it long enough with organization outside and writing inside the office, it will come to pass."

As Dana's work grew, his place with the paper also advanced, first to that of special writer and then to an associate editorship. At present, in addition to his numerous articles along his chosen lines, he is writing many editorials each week.

An interesting campaign in which Dana took a leading role was Portland's fight for a veterans' hospital. This campaign led to appropriation of \$1,350,000 for the institution and donation of a splendid site near the new Multnomah county hospital and the University of Oregon medical school on the heights back of Portland.

While the written word has been largely his main *modus operandi* in years past, more recently his fame has grown as an interesting, forceful speaker, with the result that he is constantly in demand where men, woman and children gather. Thus he has been able to fulfill his early aim in life, for he has been called upon repeatedly to speak from pulpits throughout Oregon.

Speaking of his work, for it his voice that speaks through the columns of his paper, he said: "To serve public welfare through civic enterprise is a proper contribution and activity on the part of a newspaper, and to do that in a state which is, after all, merely completing the first chapter of its pioneer development, is especially logical. That is the *Journal's* policy."

Many of the new garages are being built with houses attached.—*Columbus Ohio State Journal*.

NEWSPAPER CAMPAIGN BOOSTED SHOE SALES

Volume of Business in Local Store Increased 45 Per Cent Following Drive

Prepared by J. M. Mead, of Columbus Dispatch

A newspaper campaign conducted by a local shoe company, resulting in a 45 per cent sales increase, won second place in the A. L. Shumann trophy contest for J. M. Mead, of the *Columbus Dispatch*. The trophy contest is conducted annually by the Association of Newspaper Advertising Executives. As made public this week, Mr. Mead's prize-winning campaign was described as follows:

"This is the story of how an advertising salesman and copy writer, by selling an idea to a shoe merchant, increased the merchant's business 45 per cent between Feb. 9 and April 3, 1926.

"The Petot Shoe Company of Columbus, retailers of \$5 shoes, had up until this time used small 10-inch copy written for all stores in the chain and, therefore, of a general nature.

"Firm in his belief that specially designed copy with 'Style' as the keynote would increase the Petot store's business, J. M. Mead, advertising salesman and copy writer on the *Columbus Dispatch*, suggested a pre-Easter campaign to start Feb. 9 and continue until Easter Saturday.

"To sell the idea he designed and wrote several ads in advance, which met with the approval of the Petot management.

"A week in advance of the campaign he used a clearance sale ad telling the public that every winter shoe would be sold at two pairs for \$5.

"This ad was for the double purpose of clearance and to 'get across' the idea that no old stocks would be offered during the coming campaign.

"Beginning Feb. 9, the quarter page advertisements a week were used dwelling on the exclusive styles of Petot shoes and calling the women's attention to the fact that they could buy two or three pairs of different colored shoes to match their various gowns for the usual price they had been paying in other stores for one pair.

"From the start the ads pulled, although the weather was cold and dreary this year and warm and bright in the same period of 1925—and, although the 1925 volume was a record-breaker, the campaign increased the business over 1925 to the extent of 45 per cent.

"Eight hundred and ten pairs of shoes were sold in one day, the Saturday before Easter, and more than 2,000 pairs during the week before Easter.

"So successful were the advertisements that the same schedule has been maintained since Easter with like results.

"Although handicapped by an institutionalized border and signature which do not lend themselves to the designing of good looking ads, Mr. Mead, through

careful type effects made the campaign remarkably successful.

"It is probable that at the beginning of the autumn season all Petot stores use the larger copy which will bring many newspapers throughout the country.

"The following letter, written to Mead by H. B. Zavitz of the Petot Shoe Company formed a part of the exhibit:

"Dear Mr. Mead: "This letter is written as an appreciation of the tremendously successful campaign you have prepared for us during the past eight weeks.

"Although our volume of sales before Easter, 1925, was very heavy, our record shows an increase of 45 per cent.

"So enthusiastic are we over the success of your copy that we hereby authorize you to continue the same schedule until further notice."

ENWRIGHT HELD FOR GRAND JURY

Boston Publisher Gives \$100 Bail Criminal Libel Suit

Frederick W. Enwright, publisher of the *Boston Telegraph*, was ordered held for the November grand jury in \$100 bail by Chief Justice Bolster in municipal court, Boston, Oct. 8, on the charge of criminal libel brought by ex-Mayor James M. Curley of Boston.

The action was the result of a cartoon printed on the first page of the *Boston Telegraph* which depicted Curley as a convict in striped suit with ball and chain attached to his leg, behind prison bars and labeled "Curley the Thug."

Enwright's counsel, Michael J. Sullivan, waived the reading of the complaint and the publisher was released upon bail being furnished by Mrs. Enwright.

G. O. P. TO ADVERTISE

Kansas Republican Committee to Use 265 Newspapers in State

The Kansas Republican State Central Committee will advertise in some 265 Republican newspapers in Kansas the last two weeks of the political campaign. O. W. Little, Alma, executive secretary of the Kansas Press Association has announced.

"After careful consideration the members have decided they can reach the voters in the state through their newspapers better than in any other way and at the smallest expense," Mr. Little said. "The papers in every county in the state will be used."

Advertising matter will be distributed through the press association.

BIGELOW PICTURE PRESENTED

A portrait of William Poultney Bigelow, owner of the *New York Evening Post* with William Cullent Bryant from 1849 to 1860, was last week presented to the New York State Chamber of Commerce by Grace Bigelow and John Bigelow, daughter and son of the former publisher. Feodor Encke painted the portrait from life in 1901. Mr. Bigelow was a member of the Chamber.

First in National Advertising

THE NEW YORK TIMES leads all New York newspapers in volume of national advertising. In nine months of this year The Times published 5,209,210 agate lines under this classification, an excess over the second newspaper of 1,064,486 lines.

The Times leads all New York morning newspapers in national advertising on weekdays as well as Sundays, having published 199,488 agate lines more than the second New York morning newspaper on weekdays so far this year.

In September The New York Times printed 314,538 agate lines of national advertising in week-day editions, a greater volume than any other New York morning newspaper. The excess Sundays and weekdays in national lineage in September was 81,224 lines.

The Record

	Nine month 1926		September 1926	
	Weekday	Total	Weekday	Total
THE NEW YORK TIMES.....	2,745,644	5,209,210	314,538	553,752
Second New York morning newspaper	2,546,156	4,144,724	303,638	472,528
TIMES EXCESS	199,488	1,064,486	10,900	81,224

The Times leads all New York newspapers in total volume and in high quality of advertising. Despite the exclusion of much advertising by its careful censorship, in nine months of 1926 The Times printed 21,821,480 agate lines, 1,906,182 lines over the corresponding period of 1925 and an excess of 8,132,480 lines over the second New York newspaper.

The average net paid daily and Sunday circulation of The New York Times, as reported

to the Post Office Department for the six months ended September 30, 1926, was 391,465 copies—the highest figure ever reported by The Times for a corresponding period of any year. The daily and average daily and Sunday circulation of The Times is greater than that of any other New York morning newspaper of standard size. The present weekday net paid circulation of The Times exceeds 370,000 copies, and the Sunday edition, 625,000 copies.

CRAB APPLE TREE ASSOCIATION GROWS IN QUAGMIRE OF HALL-MILLS CASE

Newspaper Workers Covering Famous Murder Story Organize Group for Recreation Between Bootless Clue Chasing—Wild Rumors Make New Jersey Anything But Pleasant

By MAZIE CLEMENS

Staff Writer for the New York World.

(Written Exclusively for EDITOR & PUBLISHER)

THE CRAB APPLE ASSOCIATION, composed of newspaper representatives and writers who have worked on the case of the murder of Dr. Edward Hall and Mrs. Eleanor Mills under a crab apple tree on the Phillips farm on the outskirts of New Brunswick on the night of Sept. 14, 1922 was formed recently.

It sprang from a desire on the part of the newspaper writers who have passed through the storm and strife of the investigation with its quagmire of falsehoods, its maze of misleading statements and rumors, to form some kind of connecting link.

Relaxation and recreation of some kind are necessary especially after the wild bootless chases that have marked the Hall-Mills murder from the beginning. Like all mystery stories of its kind it has juttied out rumors like the spark of a Roman candle. Every reporter on the job, in his heart knew at times that the sparks would sputter out into nothings, but there was always a chance that one might live and mean something which must be found out. The result was that each spark had to be chased. That meant hard and arduous labor. It meant wild auto rushes from Somerville to New Brunswick to Lavallette to Philadelphia to Trenton and to the uncharted and unmapped points on the New Jersey landscape, which have figured in the story. Ninety per cent of the cases have been without results beyond the loss of sleep and temper to the pursuers. Sometimes an entirely new angle to the case was dug up in just such a fashion.

City editors who hold that when there isn't any news, that that is news, might have learned a lot by following some of the free and untrammelled rumors that swarmed around reporters when the bonafide leads were scarce. In the early hours of the morning, several times the gang was called out on rumors that had to be run to earth.

Word passed like wildfire one night that Mrs. Hall, widow of the slain rector, had taken her life in her palatial home in New Brunswick. The morning papers had but 20 minutes to check the rumor. Shortly after 1 A. M. Mrs. Hall's home was called on the telephone. By some chance Mrs. Hall answered the phone and in a sleepy and hurt voice said to a disgruntled reporter who questioned her: "No, I'm not dead and I don't intend to kill myself!"

Twenty voices hurled a trite reminder of Mark Twain at the embarrassed reporter when he turned from the telephone.

It was because of the instinctive desire for social relief that the Crab Apple Association was formed. Several of the reporters chipped in together and rented a house in order to have a few of the comforts of home. The house, vacated by its owner, a minister, was named Crab Apple Villa. Here the association has met and discussed their troubles, planned strategic moves to get from officials new developments of the case or to listen over the radio to a prizefight. The association's functions have been few because the opportunities to get the crowd together have been scant. But there have been a few instances when the reporters were able to shed the sense of tragedy which surrounds the Hall-Mills crime and live their own lives for an hour or two.

Four years ago 85 reporters were at work on the case and in the recent revival of the story city editors dispatched eight of these veterans, who proved invaluable both to the investigators and the greener reporters. At no time while the story was making columns for Europe and

America were there less than 20 leading dailies and news services represented.

The dean of the veterans on the story is Frank Roth of the *New York Evening World*. Other veterans are Wilbur Rogers of the *Brooklyn Daily Eagle*; Ishbel Ross, *New York Herald Tribune*; Bruce Rae, *New York Times*; Ray Daniell, *New York Evening Post*; Edward Reiss, *Brooklyn Times*; Frank Walton, *Herald Tribune* and the writer.

Officers were elected at the first meeting of the association. Martin McEvilly of the *New York Daily News* was elected president; Wilbur Rogers of the *Eagle*, vice-president, Richard Crandell of the *Herald Tribune*, secretary and Frank Roth of the *Evening World*, treasurer. The writer was elected unanimously as hostess.

The members of the association include at present the following representatives: New York Herald Tribune, Ishbel Ross, Richard F. Crandell, Frank Walton.

New York Times, Bruce Rae, John Eddy, Frank Adams, Edward R. Hall, Alexander Sedgwick, E. J. Gordon, Laura (Deacon) Lyman, Charles Zerner, Ferdinand Kuhn.

New York Daily News, John Wallace, Grace Robinson, George Kivel, Lloyd Acuff, John Tresilian, Jack Rielly, Robert Acton, Eddie Jackson.

New York World, Edward O'Toole, Mazie Clemens, James Robbins, Joseph Costa, Earl Lewis, Frederick Sykes, Anthony Muto.

New York Daily Mirror: Herbert M. Mayer, Arthur Medford, Martin Halling, Ray Doyle, Theodore Hough, Thomas Flanagan, Edward Doherty, W. Pledge Brown.

Philadelphia Bulletin, Walter Capelli and Walter Long; *Philadelphia Public Ledger*, D. F. Dickson; Associated Press, Wallace Conover; *New Brunswick News*, Leslie Munn and George Kenny; *New York American*, Morton Parkinson, Robert S. Conway, John Hyatt, Evelyn Lee Boon, Louis Fehr.

New York Journal, Benny Markowitz, Julia McCarthy, James Aide, William Weiner, Frank Henry; *New York Evening Graphic*, Leo J. Casey, Charles E. Gregory, Jack Miley, Harry Denlinger, Arthur Robinson, Dick Rose; Standard News Association, Adolph T. G. Novak, W. F. Ritchie; *New York Evening Post*, Ray Daniell; *Brooklyn Daily Eagle*, Wilbur Rogers; *Evening World*, Frank Roth, M. Ollie; *New York Sun*, Edwin De Long.

OHIO GROUP ELECTS

Louis Brush Re-Elected President of Select List of Ohio Dailies

Louis H. Brush, publisher of the *Marion (O.) Star*, was re-elected president of the Select List of Ohio Daily Newspapers at the recent annual meeting. Fred W. Bush of the *Athens Messenger* has been re-elected vice-president and C. H. Spencer of the *Newark Advocate* secretary-treasurer.

Directors are Fred S. Wallace, *Coshoc-ton Tribune*; W. P. McKinney, *Marietta Times*; Frank Ridenour, *Piqua Call*; and James Hanna, *Chillicothe Gazette*.

SCRANTON TIMES' VETERANS

The 25-year club of the *Scranton (Pa.) Times* met on Oct. 9, and elected new officers for the coming year. B. B. Megargee, newspaper dealer in Scranton is the new president of this club. Three employees qualified for membership this year, F. Ash, W. J. Boland and George Daniels.

LONG ISLAND WEEKLIES SOLD

The *Glen Cove City Record*, the *Bayville Times* and the *Oyster Bay News*, all Long Island weeklies, have been sold by James F. Sullivan, editor and manager for the past five years, to Frank M. Dunbaugh, Jr., of Mount Vernon, N. Y., associate editor of the *Bronxville Review*. The sale was negotiated through Harwell Cannon, newspaper brokers, New York.

BROOKLYN DAILY 40 YEARS OLD

The *Brooklyn Citizen* on Oct. 10, published a special edition celebrating its 40th anniversary. Three sections were devoted to the Brooklyn of 40 years ago as compared with the Brooklyn of today. The paper was founded by Andrew McLean in 1886. David J. McLean is the present publisher.

More than 90 per cent of its total advertising appropriation is invested in newspaper space by the Studebaker Corporation.

STORE USES 15½ PAGES

The *Portland (Ore.) Journal* on Oct. 1 carried advertising copy aggregating fifteen and one-half pages for the Lipman-Wolfe department store, heralding "Lipman-Wolfe Day." It is claimed to be the largest volume of advertising from a single firm ever carried in a local newspaper.

EDITOR CELEBRATES 90th YEAR

J. West Goodwin, pioneer newspaper man of Sedalia, Mo., celebrated his 90th birthday Oct. 2. He now publishes *The Bazoo*, a monthly chronicle of items from the *Sedalia (Mo.) Daily Bazoo*, which he established in 1869 and ran for 30 years.

WEEKLIES NAME REPRESENTATIVE

The executive committee of the United Newspapers of Iowa has appointed Charles H. Clarke, Des Moines advertising man, to represent the organization in its expansion program. Mr. Clarke will soon open offices in Des Moines. W. C. Jarnagin is president of the organization, which is composed of weekly papers.

Lowest Farm Paper Advertising Rate in America

THE Weekly Kansas City Star offers the lowest rate for farm paper advertising in America.

Likewise it offers the highest percentage of rural route subscribers of any farm paper in Missouri or Kansas.

A circulation three and one-third times greater than that of the largest weekly farm magazine published in Kansas!

A circulation two and three-quarters times greater than that of the largest farm magazine published in Missouri!

That is why The Weekly

Kansas City Star can sell more merchandise to farmers, at a lower cost, than any other publication.

Half-page or larger space in The Weekly Kansas City Star can be purchased for only 75 cents a line. This is a special low rate to users of space in either the daily or Sunday edition of The Star.

Think of it—a rural, paid-in-advance circulation exceeding 426,000 copies in the richest productive area in the world, at 75 cents a line!

Ask your advertising agent if it isn't the greatest farm paper advertising bargain in America.

The Weekly Kansas City Star.

FALSE ADVERTISING IS BEING CURBED WITHOUT PUBLICITY, TRADE BODY SAYS

Agreements to Desist Such Practices Are Binding on Unscrupulous Concerns—Move to Make Actions Public Voted Down

MEMBERS of the Federal Trade Commission informed EDITOR & PUBLISHER this week they believe they have succeeded in placing an effectual check upon false and misleading advertising by unscrupulous concerns.

Where the practice complained of has been found unlawful its discontinuance by stipulation, and without the formal issuance of complaint, or resort to publicity, has been accomplished in a growing number of instances, it was stated.

Five stipulations accepted by the Commission this week brought the total up to 30. In each case the proceedings were dismissed after the respondent executed an agreement to cease and desist from the alleged unfair methods and practices with the further understanding that should the alleged unfair competition ever be resumed the stipulation may be used as evidence against the respondent in other proceedings by the Commission.

Before the recent retirement, upon the expiration of his term, of Huston Thompson as a member of the Commission, he joined with Commissioner John F. Nugent, in dissenting from the majority order, accepting the stipulations as a fixed policy of the Commission, on the grounds that "complaints should be issued against the respondents and the cases tried in order that the public might be informed of the unfair practices adopted by the respondents and their law-abiding competitors be benefited by increased trade."

The majority on the Commission overruled this view, and decided to proceed with the stipulations wherever and whenever warranted in accordance with the now well established policy of the Commission to avoid "pitiless publicity" as much as possible.

The five stipulations accepted this week were:

A corporation engaged in the manufacture of cereal products agreed to cease and desist forever the use in its advertisements of the representation of "Pancake Flour" and "Waffle Flour" as "All Wheat—It Keeps!" which "contained no corn meal or other substances which will attract the tiny bugs and worms that get into many cereals in the summer time," and from otherwise "using disparaging representations or comparisons to the effect that cereal products manufactured by competitors from corn flour have a greater tendency to spoil and to attract bugs and worms than cereal products manufactured by the respondent."

A corporation engaged in printing stationery by special process agreed to cease and desist forever from advertising their product as "Handgrav" and from the use of any other word or combination of words "as descriptive of said imitation engraving which have or may have the capacity or tendency to confuse said product with engraving."

Co-partners engaged in the sale and distribution of hosiery in wholesale and retail quantities agreed to cease and desist forever from the use of the word, "Fashioned," in their catalogs, order blanks or other advertising matter as representing and describing "Thread Silk With Art Twist" "when in truth and in fact the boot of said hosiery is not composed entirely of silk but is composed also in varying quantities of fabrics or material other than silk."

An individual engaged in making necklaces agreed to cease and desist forever from the use of the word and figures, "Price \$50" when "in truth and in fact the said product so advertised, labeled and sold with the aforesaid word and figures, 'Price \$50' marked thereon, was and is advertised and labeled greatly in excess of the prices at which the aforesaid respondent sells the said product, or contemplates the same to be sold by his

vendees, and greatly in excess of the actual price at which said necklaces sell in the usual course of trade."

A corporation engaged in compounding or manufacturing a chemical compound

which it designates, defines and describes as "Shellac," agreed to cease and desist forever from the use of the word, and also from the use of the words, "Strictly Pure" in connection with the word, "Shellac," in defining and describing its product, "when in truth and in fact the said product so labeled and sold was compounded or manufactured in accordance with a formula containing constituent elements, ingredients or substitutes other than contained in the product known to the trade and purchasing public as 'Shellac.'"

Editorial independence, by its very nature, must of necessity be based upon financial independence. The Scripps-Howard newspapers are completely owned within their own organization. The editor of every Scripps-Howard newspaper is a partner in the ownership of his paper. Financial independence is a guarantee against outside influence.

NEWSPAPERS FOLLOW MAZE OF MIXED COURSES IN PROMOTION METHODS

Few Dailies Have Standardized Department with Fixed Budget for Advertising Their Merits—"Hit and Miss" Idea Predominates

By J. P. DEWEY

Director of Publicity, Dallas Morning News

AS we go about our two-fold task of advertising our markets and our media we newspapers are following a maze of mixed courses. Just why this is so it's not easy to say. Are individual problems radically different, or are there many methods of accomplishing the same result or do we simply not know how to handle the all-important problem of applying our universal commodity to our own needs? I visited 15 eastern and middle western newspapers seeking the answer and I did not find it, but I learned some interesting facts. I found that this new scientific business of newspaper advertising promotion is passing rapidly through the early stages of its development, but not as rapidly as it should. Each of us is working along his own lines and apparently not paying much attention to what the rest are doing. It is as though all of the radio manufacturers went to building outfits according to their own ideas and without paying much attention to the developments of radio as a science.

I gained the general impression that the middle west is giving more serious attention to the possibilities of advertising promotion than is the east. Upon some middle western papers it has reached the proportions of a major activity, but in Philadelphia, for example, there is only one newspaper that has a department devoted to the job of advertising the paper as an advertising medium. In Pittsburgh there is no such department. In both Indianapolis and St. Louis, on the other hand, there are well-developed, efficient promotion units. There are some in New York, but their activities fall short of the things that are being done in Chicago. Of course some papers that do not have promotion departments are advertising themselves extremely well in an unorganized and month-to-month fashion.

Some of these actually seem to get down to brass tacks more effectively than some that are more carefully organized. Here is a paper whose "office ads" are written by some bright fellow on the staff whenever the spirit or the boss moves him and there is a paper with a carefully adjusted program, intricately planned, and the hit-or-miss chap seems to be registering more hits than the planner. This condition was pointed out by one executive to justify his lack of plan and system, but the paper with the plan is far ahead of him just the same. The plan will develop, along lines of efficiency, and while it is developing the hit-or-miss operator will be passing out of the picture.

The absence of organized promotion departments and of planned advertising campaigns built up through proper analysis of selling needs is only one of the opportunities for improvement that become obvious to even the casual investigator among newspapers. The absence of budgets and appropriations for advertising is another. Many newspapers, even the big ones, still think that the advertising budget is an excellent thing for department stores.

Such budgets as there are range all the way from 2 per cent to nearly 12 per cent of gross advertising revenue. The 12 per cent was an exceptional instance. It included the cost of a heavy schedule of space in the advertiser's own columns, and an appropriation for space in newspapers of other cities that was many times the total outlay of some other papers who believed themselves to be serving their own needs adequately.

The appropriation that seemed most nearly standard among papers that have begun to arrive at an efficiency basis is from 2½ per cent to 3½ per cent of the total advertising revenue.

Among the papers with fixed appropriations for advertising promotion there is a wide difference of opinion as to what the appropriation should be made to do. Some are spending it all in advertising to the national field. Others are buying elaborate advertising plans and services for classified and neglecting the needs of display. I found not one budget definitely subdivided among the three major advertising departments.

There is no standard definition for "advertising promotion." It means everything from merchandising co-operation to writing of want-ad pluggers. There are, however, three general classes of promotion systems as they now operate. First, there is the unit with the sole function of copy-writing, serving in turn the various advertising interests, the circulation manager and the editors; taking care of all the odd jobs of ad-writing that have to be done, and leaving the planning to the department heads who order the work. Then there is the department which combines the work of

advertising with the infinite variety of merchandising tasks, dealer co-operation, surveys, sometimes circulation premium drives, and in fact everything that comes up as reinforcement to the face-to-face selling of the things that newspapers sell. In such departments the job of advertising, in the printed salesmanship sense, is rarely given the careful thought and attention to which it is entitled.

Between these two is the kind of promotion department which seems most likely to become standard equipment. That is the department whose one great function is to sell advertising, local, national and classified, through the power of the printed word and picture; the department administered by a trained and experienced advertising executive, working closely at all times with the advertising staff and giving its services to others only when they can be spared from the big job. It is unquestionably the newspapers with service units of this character whose advertising has been accorded the greatest recognition and success.

Such a department receives its statistical materials from the national and local advertising managers and the merchandising department. It deals in facts about the paper and the market which the paper serves. It presents those facts to advertising patrons by effective means. It uses publications, printed matter, billboards and other media just as any other national advertiser does. It sometimes employs its advertising agency. It is to the newspaper what the advertising department is to any other industry, and it is hard to see why this sort of unit is not as good for ourselves as it is for our customers.

Executives are keenly interested in advertising promotion. They realize its value to them and of course they are going to use it. One of these days the mechanical operation of the promotion department will be as well standardized as the circulation and editorial departments are today, but no student of conditions at present can escape the fact that we will all profit if a few things are done to speed the day.

CHICAGO R.R. WINS FORBES CUP

The Chicago Rapid Transit Company was last week awarded the B. C. Forbes cup in the public relations contest conducted by *Forbes Magazine* among member companies of the American Electric Railway Association. Judges were James O'Shaughnessy, secretary, American Association of Advertising Agencies; Louis Wiley, business manager, *New York Times*; J. C. McQuiston, Westinghouse Electric & Manufacturing Company, and Mr. Forbes.

IOWA PRESS MEET OCT. 23

Three University Professors Named With Publishers on Program

The Iowa Press Association will hold its annual meeting at Iowa City, Ia., Oct. 23 and 24.

Speakers who are scheduled to appear on the program are: Prof. C. H. Weller, head of the school of journalism, University of Iowa, "The Professional Side"; James S. Farquhar, publisher, *Cedar Rapids Republican*, "The Market Value of Your Newspaper"; John Houston, circulation manager, *Ottumwa Courier*, "Circulation"; Quinted K. hart, advertising manager, *Cedar Rapids Republican*, "Advertising Copy"; Prof. F. J. Lazell, Iowa school of journalism, "The Editor and His Community"; Prof. W. S. Maulsby, Iowa school of journalism, "Reporting and Correspondence."

At the luncheon meeting, E. F. Tucker Ames, managing director of the association, will speak on "Benefits of Association." State Senator Charles M. Dutcher will also be a speaker at that gathering.

BRADFORD HERALD REORGANIZED

Reorganization of the *Bradford (Pa.) Herald*, a daily, has taken place through the purchase of an interest by Raymond S. Siff and Paul E. Tanner. Robert P. Habgood continues as publisher and retains an interest in the newspaper. Mr. Tanner will be editor and Mr. Siff, general manager.

DUPLEX SUPER DUTY

Interchangeable Unit Semi-Cylindrical Plate Press

The best press built for long runs and dependable daily use

"Our Customers Write Our Ads"

THE DUPLEX PRINTING PRESS CO. OF BATTLE CREEK MICH.

WELL, the biggest printing press in West Virginia whizzed off its first edition of The Herald-Dispatch yesterday morning. The great machine worked almost perfectly, and set up none of the difficulties which usually attend the breaking in of a new machine of such vast magnitude. To get satisfactory results the most delicate adjustments are required, both as to building and assembling the multitudinous parts. The Duplex Printing Press Company, of Battle Creek, Mich., have achieved a marvel in this new invention. The Herald-Dispatch can now print at a single run a paper of any size up to sixty-four eight-column pages. The issuance of the first edition from the new press was accomplished without any delay, the 9,000 out-of-town papers being put on trucks and trains in ample time.

WHY TURN STAR REPORTER INTO A POOR DESK MAN AND CALL IT "PROMOTION"?

Many Brilliant News Men Sidetracked for Sake of \$5 Desk Raise Because Reportorial "Top" Has Been Reached, Writer Declares

By CHARLES E. GALLAGHER

Night Editor, Lowell (Mass.) Courier-Citizen

IF that traditional efficiency expert who once told a newspaper publisher that he should "fire" his desk men and hire reporters "who could write their stories correctly in the first place," had had his way, the general average of writing ability in the newspaper field might have been materially increased. Not necessarily because this particular publisher would have been more careful in the selection of his reporters, but rather because he would have stopped creating desk men out of staff writers whom he or his managing editor wanted to reward for faithful or brilliant service at the typewriter.

In other words, if the market for desk men had been abruptly and completely wiped out, the news writing force would have been left free to develop to its greatest potential skill, without the Damoclean sword of a "promotion" to the desk constantly hanging over its head.

However, the efficiency expert whom Professor Norman J. Radder mentions in his helpful book, "Newspaper Make-Up and Headlines," failed to achieve his mission and the perspiring copy readers and slot men kept their posts. As Professor Radder pertinently remarks, "Few men write so well that their work cannot be improved by a critical revision." There is a definite and compelling need for good desk men on every newspaper, as any sagacious publisher well knows. My present purpose is less to defend the usefulness of the copy editor than to discuss the sources from which he is drawn—and, in many cases, drafted—for desk service.

In the average small town or moderate-sized town newspaper office, a desk job is held as a fetish, more or less—it is surrounded with a sort of supernatural glamour that persists until one actually drags a chair up to the desk himself, finds out what it's all about and then wonders what's been biting him.

The average cub reporter begins his work with one goal before him—to get on "the desk." There, one is called "mister" and there, one's weekly pay envelope is substantially bulkier than it is when one is pounding the streets in search of the elusive yarn. Instead of devoting his every effort to becoming a reporter supreme in his field, he dissipates his energy by attempting to learn the fundamentals of desk routine in his spare moments. His heart is not wholly in his work as a reporter, the business for which he was hired. And yet, as he develops, he becomes a good reporter in spite of himself. He can turn out a crisply written story with the best of them. In a few years he demonstrates all-around reporting ability and is rated

as a star man. Then—precisely then—does Humpty-Dumpty take the great fall.

Jones, the assistant telegraph editor, quits or is laid up by a long illness, and someone has to fill in. Who will get the job? An out-and-out desk man, imported from the outside? No. The star reporter, perhaps the most valuable man in the entire news department, is "rewarded." He's given the post with a \$5 increase in salary and his friends congratulate him on his becoming an "editor." In his place on the city staff a mediocre man—or perhaps even a cub—is put to work and immediately there is a perceptible decrease in the quantity and quality of local news in the paper. But the star reporter has been taken care of and his good work "recognized." What matter if he is a complete "dud" as a desk man? He's earned the place and he's kept there. And \$5 is \$5.

I'm willing to wager that this same sorry spectacle takes place in a hundred newspaper offices in the country every three or four months. It will continue to be enacted while managing editors labor under the delusion that the desk is necessarily the place for the reporter who has "performed." It will also continue to be enacted in those offices—and there are hundreds of them—where there is an arbitrary line drawn between the salaries of desk men and the salaries of news writers—wholly in the former's favor, of course.

"You can't expect to get more than \$40 a week here as a reporter no matter how good you are," I heard one managing editor tell a capable member of his city staff a few weeks ago in a New England town of 120,000 population—large enough to support a few first class writing men. "That is our maximum scale for reporters."

And yet this same managing editor is putting his O. K. on a payroll every week that gives mediocre desk men \$55 and \$50 a week, without a murmur. In his estimation—if one is to judge by the cold figures—a whirlwind of a reporter is worth \$15 or \$20 a week less than the ordinary copy reader and headline writer.

There are exceptions, of course. The larger cities have far more sensible practices. There, a reporter's salary is based on his value as a reporter and is not automatically brought to a dead stop when it approaches the salary paid some routine desk man.

But your average small-town publisher or managing editor can't see it. Tradition has built an impregnable wall between the remuneration of the "desk" forces and that of "street" men. Naturally, the ambitious reporter is going to let himself be

eased into a desk berth when the opportunity presents itself. If he can get \$50 there, why should he continue to pound the typewriter where his greatest expectation of compensation is \$10 a week less? Meanwhile, his paper suffers and his own inalienable right to the fullest development of his special gifts is taken from him. He no longer writes and he soon wearies of the drudgery and monotony of reading copy and writing the same old symbols for headlines night after night or day after day. His contact with the public is curbed, his social instincts begin to be cramped and he gradually sinks into his allotted groove never to make his way out.

Disregarding the obvious unfairness which this situation imposes on the good writing man, publishers and managing editors ought to recognize at least the harm they are doing their own papers by such a practice. They are mowing down in the prime of their powers reporters who could bring distinction and prestige to their newspapers as reporters, but who will never do so as desk men. After all, everything is pretty much standardized in American dailies today except the handling of local news and local features. The paper that seeks to stand out from the herd must develop its local department to the "nth" degree. And in this development, the services of topnotch reporters and other writers are imperative.

Briefly, then, why not let your star reporter stay in his chosen field even after he has earned what is quaintly called a "promotion"? Why not give him \$10 a week more and encourage him to persist in the department where he has shown his best work? Let him remain an individual and not a mere cog in the works, as so many transplanted reporter-desk men become. Then go choose your copy reader from the abundantly supplied field of men who are adapted primarily for that work, but who aren't worth a pinch of snuff as writers. Here's something, truly, to which newspaper executives may give profitable consideration and study.

GOSS ENLARGING PLANT

The Goss Printing Press Company, Chicago, is erecting a new four-story building, 100 by 160 feet, completing a continuous line of buildings two blocks long, on South Paulina street. The building is being constructed on a foundation suitable for an 8-story building, and is so designed as to be adapted for either offices or production departments.

CONTEST TO END AUTO PERIL

The New York Evening Graphic has started a prize contest as part of its campaign to reduce the automobile peril of the streets. A first prize of \$100 is offered for the letter containing the best safety first suggestions.

EDITORIAL

CLEARING THE AIR

PRE-CONVENTION debate of the issues to come before the annual meeting of the Audit Bureau of Circulations has led the debaters off their original line and along several side-paths, some of which lead nowhere. The latest letter of Mr. Clague, "re-selling" the A. B. C. idea to the membership, is a case in point. In the thousands of words stirred up by the A. B. C. proposal to print rate cards on the back of publishers' circulation reports, that proposal has been lost to sight entirely and the talk has run off into two old and well worn channels:

1. Reorganization of the A. B. C. to give control to newspaper publisher members, who pay most of the cost of operation.

2. Reduction of membership dues.

Mr. Clague in his letter cites a recent statement by Walter A. Strong, publisher of the *Chicago Daily News* and an A. B. C. director, to the effect that "the new generation of newspaper executives do not understand the fundamental purposes of the Bureau," that a small group of metropolitan publishers proposed to fight for a larger newspaper representation on its directorate, and that, in their ignorance of the Bureau's concept, they were endangering its very existence.

Mr. Clague and Mr. Strong, we feel, express fear of a danger which does not exist. The New York City newspaper publishers, who objected first to the rate card proposal, do not seek control of the Bureau. They do desire, as EDITOR & PUBLISHER understands their position, that newspaper publishers, as the principal source of revenue, have a larger voice in the councils of the organization than is provided by two directors and an advisory board. They have sought and obtained an unknown number of proxies and promises of support at the meeting, but they have not sought and they could not hold proxies for a proposal to take the A. B. C. control from the space-buying interests and turn it over to a group under the dominance of New York City newspaper publishers. That extreme view aside, neither the New York City publishers nor any other group of publishers are so blind to their own interests as to believe that they would profit were audits to be conducted under the government of space-sellers rather than space-buyers. If Mr. Clague chooses this ground for the skirmish that seems certain to come, he wins for lack of an adversary.

Not so fortunate is the board's latest effort to solve the long controversy over dues. No publisher objects to paying dues to the A. B. C. if he is convinced that his money is necessary to enable the Bureau to do the work assigned. That all of his money has not been necessary for the day-to-day job of the Bureau he reads in the annual report showing a surplus, now probably about \$200,000. That fund, or the larger part of it, has come from the pockets of newspaper publishers, and the publisher is right in reasoning that if it is not doing useful work for the Bureau, it should be permitted to work for him. The Bureau's answer that it was needed to cover "liability to members" and "future exigencies" has been neither clear nor convincing, and the announcement that both of these nebulous needs have been met recently is suspect. The resultant announcement of a 7½ per cent rebate on dues cannot be expected to end the demand for a thorough discussion of the whole dues question, with such reduction as may be made without hampering the proper work in the proper spheres of the organization.

It is the latter phase, now forgotten in a cataract of words and postage stamps, that has provoked the present controversy. The prime question before the house is not one of having a few more voices in the board room, or saving a few dollars a year on dues. It is whether the A. B. C. shall confine itself to the purpose for which it was created—the auditing of circulation. Some publishers believe that the Bureau is departing from that purpose when it proposes to print rate cards on circulation reports. True, no publisher is now compelled to furnish a copy of his rate card; a regular service covering revisions and corrections is promised by the Bureau to keep the records up to date in the space-buyer's office; no coercion of publishers into changes of rate on a semi-annual basis only is even remotely considered by the present Board.

All of that begs the question, which is—Is the

Trust not in oppression, and become not
vain in robbery; if riches increase, set not your
heart upon them.

A. B. C. doing the job laid out for it so well that it can afford to put time, thought, energy and the publishers' money into a new line of service? One doubts it. The circulation backyard is a thousand times cleaner than it was a few years ago, but it has several corners that are still far from beautiful. The A. B. C. is spending more and more money per audit each year, but its files of current investigations grow no smaller. Its efforts have been worth millions of dollars to newspapers and other publications, and will be worth many millions more when a number of circulation situations and questions now untouched are cleaned up. In that job, the A. B. C. may encounter opposition of individuals interested, but it is assured of general publisher support. It cannot be sure and should not have support for enterprises beyond the original, and strictly construed, definition of its field.

Louisville Times says the White House Press Association should have shown the sportsmanship of Dempsey and said: "It's the old story. The best man won. We have no alibis. Give all the credit to Bruce. He's the champion interviewer."

A GOOD PRESS AGENT

SOME of our press agent friends say EDITOR & PUBLISHER is unjust in its attitude toward their business. We should announce that there are good and bad press agents and, to be constructive, should publish a definition of legitimate publicity work.

By all means, let criticism be constructive! Here, in our opinion, is what constitutes a good press agent: Through experience as a newspaper publisher or employee he understands newspaper methods and has liberal appreciation of newspaper ethics. He believes that a journalist who uses his power for selfish or unworthy purpose betrays his trust. Promotion of any private interest contrary to general welfare is dishonest journalism. News columns cannot be used to sell any article or service, or promote any private interest without violation of a fundamental principle. The reader looks to the news columns for truthful, sincere and wholly unprejudiced information, the product of writers who are responsible to the editor and no other person.

A good press agent will make available to reporters all the information they may seek, both favorable and unfavorable. He will hand out "news" which is authorized by his employer, subject to publication within "quotes" and with credit to a named official. Never will he stand as a shield between his employer and the inquiring reporter. When the good press agent's employer instructs him to induce a newspaper to publish an item which he, as a newspaper man, could not conscientiously hand to his city editor, or to get a news fact suppressed, he will point out that such an act would be subversive of impartial and independent news practice, and resign from the job if the employer insists.

Is this definition extreme? Is EDITOR & PUBLISHER "prejudiced" against the publicity craft? If so, the American Society of Newspaper Editors is extreme and prejudiced, for these rules of conduct are based upon the well-known "Canons of Journalism" of that responsible body.

If Miss Zoe Beckley persuaded the sprightly and interesting Queen Marie to visit America credit is due to that able newspaper woman for furnishing, particularly to her sex, one of the refreshments of the year.

INTENSELY LOCAL

A NEWSPAPER publisher who started his career with a two-dollar bill less than 20 years ago, possessing credit based upon personal integrity worth all that was needed to buy a local paper, and who is today earning in his relatively small field as much as most publishers in large cities, is authority for the following observations.

Our caller said: "Local interest is the first interest of the people of my community. We give it to them. Six columns of local news show on our first page daily. This is the proportion throughout the paper. There is no attempt to save money when reporters are needed. These young men and women bring into our office the product that our people desire us to produce, and we do not slight the responsibility. Yes, they want to know what is going on in the world, but their interest in local affairs comes first. We employ at salaries or at \$1 per column space rates, with bonuses for special services, 125 correspondents in our circulation territory. When the city editor comes to his desk daily he is faced by a huge stack of correspondence. The task is to get it edited and into print. We scatter it all through the paper, heading up the items of general interest. The city editor personally knows each correspondent. Most of them are school teachers. Once a year or oftener we have a rally meeting of some sort, perhaps a picnic. At least once a month a staff man will visit each correspondent, spurring action.

"Call this provincial journalism, if you will, but it is the kind of newspaper we like to make and which gives satisfaction to our readers. I do not know many newspapers whose roots are more deeply sunk in the lives and affections of the people. Such circulation is as staple as the grocer's sugar.

"There are plenty of journalistic responsibilities in our own little teacup without looking abroad. We take a lively interest in school problems. Our paper has boosted a small and struggling university in near-by town until it has become well known and thrives accordingly. We fight for good laws and their enforcement. We oppose misrepresentative men in public office. There is nothing that affects the welfare of our community which we do not tackle with bare hands. We seek to do good. We try to harm no one. I know almost everyone, and almost everyone knows me, and I am always available at my desk in the front office. I write my own editorials, and everyone knows exactly where I stand on public matters. I find the average man honest and open to reason. My daily contacts sustain my optimism. I believe in men. My life is a pleasure."

Congratulations are due to A. N. P. A. for active establishment of its bureau of mechanical standards, a crying need of the newspaper business for generations.

MASS PRODUCTION

SOME of the most astute economists have been predicting that the day would come when mass production would so far outrun the capacity of the American people to consume, regardless of money in circulation and the efficiency of selling machinery, that one of two steps would be necessary to avoid serious complications: (1) find adequate world markets, or (2) curtail mass production.

Henry Ford's introduction of the five-day week is at present being heralded in some quarters as a cautious step in the direction of inevitable curtailment of mass production, but the evidence appears to be that Mr. Ford's act concerns his own business, and is not typical of a general condition. According to the latest statistical reports issued by the National City Bank of New York, a dependable authority, the condition of industry was favorable throughout the month of September and "the feeling is one of continued confidence for the balance of the year." Production was substantially above normal with no indication of undue accumulation in inventories and the maintenance of distribution at high levels was shown by an increased volume of bank checks drawn and cashed throughout the country, by favorable reports of retail activity and by car loadings which broke all records in the week of September 18. There are a few doubts in agriculture, but in industry it is evident that mass production is not out of balance.

PERSONAL

R. JOHN H. FINLEY, associate editor of the *New York Times*, will be speaker at the assembly luncheon of the Boston, Mass., Chamber of Commerce on Nov. 11. His subject will be "Eight Years After."

David Town of the Hearst general management returned to New York this week after spending three months on the Pacific Coast.

Charles H. Dennis, editor of the *Chicago Daily News*, was a member of the delegation of representative citizens of Chicago at the Sesquicentennial Exposition in Philadelphia Oct. 9.

Cornelius F. Kelly, publisher of the *Fall River (Mass.) Herald News*, has presented the Fall River Boys' Club with a cylinder press once used by the *Fall River News* which was recently consolidated with the Herald.

W. M. Glenn, publisher of the *Orlando (Fla.) Morning Sentinel*, and Mrs. Glenn, sailed from New York on the S. S. France for Europe Saturday of this week.

Capt. Cranston Williams, manager of the Southern Newspaper Publishers Association, is suffering an attack of gallstones and will be carried to the home of his wife's family at Lynchburg, Va., where an operation will be performed. Capt. Williams had planned to attend the meetings of the Inland Daily Press Association and Audit Bureau of Circulations in Chicago next week. This is his first illness in many years.

George F. Booth, editor and publisher of the *Worcester (Mass.) Telegram-Gazette*, was the chief speaker Oct. 6 before a meeting of the Worcester City Club.

John H. Fahey, publisher of the *Worcester (Mass.) Post*, gave an address on "Greater Business Efficiency" Oct. 5, before the Lions Club of Worcester.

James G. Simpson, editor of the *Orleans American and Weekly News*, published at Albion, N. Y., is seriously ill in a hospital in that city, following an operation.

Dan R. Anthony, Jr., owner and editor of the *Leavenworth (Kan.) Times* and veteran member of Congress, must take an extended leave of absence for his health. He is leaving to spend several months in California and Arizona.

IN THE BUSINESS OFFICE

HAYES McFARLAND, advertising director of the *Chicago Herald and Examiner*, has returned from a month's hunting and canoeing trip in the Hudson Bay country with a party of four.

Raymond R. Beaudry, formerly a reporter for the *Worcester (Mass.) Post* and more recently with the local branch of the R. G. Dun & Co., has joined the advertising staff of the *Worcester Telegram*.

Sidney D. Long, business manager of the *Wichita (Kan.) Daily Eagle* and Mrs. Long returned Oct. 4, from a 17-day automobile trip covering the states of Oklahoma, Texas, Louisiana, and Arkansas.

H. Devore Gates, late of the *Glendale (Cal.) Press*, has become advertising manager of the *Montrose (Cal.) Herald*.

Frank Murphy, for several months county agent for the *Worcester (Mass.) Telegram*, has resigned.

James M. O'Neill has gone from the business department of the *Prescott (Wash.) Spectator* to the staff of the *Colfax (Wash.) Gazette*.

IN THE EDITORIAL ROOMS

JAMES J. DELANEY, former sporting editor of the *Milwaukee Sentinel*, has returned to that post from the managing editorship of the *Albany (N. Y.) Knickerbocker Press*.

H. G. Head is now night telegraph editor of the *Houston Post-Dispatch*.

Jeffrey Holmesdale, formerly of the ship news department of the *New York*

World, has been transferred to the dramatic department.

Walter L. Millis, formerly an editorial writer for the *New York Herald Tribune*, is now traveling in Spain, and contributing a series of articles to that paper.

Olaf Bue, reporter for the *Chicago Daily News*, is spending his vacation at his home in Montana.

Ward Morehouse, assistant dramatic editor of the *New York Herald Tribune*, has returned from a week's vacation.

Robert Hertzberg, former radio editor of the *New York American* has been appointed associate editor of *Radio News Magazine*, New York.

William D. O'Brien, for a number of years reporter for the *Bridgeport (Conn.) Post and Telegram*, has resigned to leave the newspaper field.

Herbert Asbury, a member of the night rewrite staff of the *New York Herald Tribune*, is the author of a new book "Up from Methodism" published by Knopf. Mr. Asbury's famous article "Hatrack" which appeared in the April number of the *American Mercury*, and which caused that magazine to be barred from the mails, is incorporated in the new book.

W. H. Robertson has rejoined the staff of the *Lafayette (Ind.) Journal and Courier* as managing editor of the morning edition, after an absence of several years. Robertson resigned the managing editorship of the *Olean (N. Y.) Evening Herald* to return to Indiana.

Harry A. Stroud, night editor of the *Shawnee (Okla.) Morning News* and president of the News Writers of Oklahoma has resigned to become secretary of the Shawnee Junior Chamber of Commerce.

Russell W. Whitney, Alameda county correspondent, *Oakland (Cal.) Tribune*, has returned from a two-weeks' vacation at Ensenada and Guadalupe in the state of Baja California, Mexico.

George Douthit, assistant sports editor, *San Antonio Evening News*, recently underwent an operation for appendicitis.

Allen M. Lacey has been made news editor of the *Colfax (Wash.) Commoner*.

Kenneth A. Schell has resigned as editor of the *Olympia (Wash.) Morning Olympian* and joined the staff of the *Hoquiam (Wash.) Grays Harbor Washingtonian*.

James Newton has joined the city staff of the *Worcester (Mass.) Telegram*.

Frank C. Emmerling, real estate editor of the *Columbus (O.) Dispatch*, has resigned to become advertising man for a local real estate firm.

Earle Van Brockland has left the city staff of the *Worcester (Mass.) Telegram* to accept a lieutenant's commission in the army. He is being sent to Japan.

FOLKS WORTH KNOWING

HARRY CHASE BREARLEY, as president and founder of the Brearley Service Organization, a New York

H. C. BREARLEY

advertising agency, has for several years been actively promoting the idea of a national co-operative advertising campaign to be conducted by stock insurance companies, utilizing every daily newspaper in the United States. Considerable progress on the plan has been made lately,

and Mr. Brearley announced this week he was confident success would be forthcoming.

Mr. Brearley first became interested in the plan of co-operative insurance advertising in the newspapers more than six years ago, when he was director of public relations, a position he created for himself, on the National Board of Insurance Underwriters, New York.

Born in a newspaper family, Mr. Brearley had considerable experience as a newspaper man before turning to advertising work. His father was William H. Brearley, who was associated with James E. Scripps in the founding of the *Detroit News*. With his father, Mr. Brearley later was part owner and assistant business manager of the *Detroit Journal*. On this latter paper he had editorial, circulation, and business office training.

Leaving the *Detroit Journal* in 1892, he went to New York, where he devoted himself to writing and advertising work, before founding the Brearley Service Organization. He is author of several books, including "Animal Secrets Told"; "Fifty Years of a Civilizing Force"; and "Time Telling Through the Ages." For the Bank of Manhattan Company, New York, he recently wrote a booklet called "News and Progress," which is now being reprinted by more than 800 newspapers in the United States.

William H. Brearley was one of the early advocates of the American Newspaper Publishers Association.

G. C. Armstrong of the *Chicago Daily News* copy desk is spending his vacation in the East.

HOLDING NEW POSTS

ARTHUR DAVENPORT, from *Tulsa (Okla.) World*, to *Shawnee (Okla.) Morning News* staff.

T. D. Higgins, from *Petersburg (Va.)* (Continued on page 28)

William F. Holland, from copy desk, Worcester (Mass.) *Gazette*, to county editor, same paper.

Max Schafer, from Vancouver (Wash.) *Evening Columbian*, to Marshfield (Ore.) *Coos County Times* staff.

David Resnick, from St. Louis correspondent, Kent Press Service, to staff, *St. Louis Post-Dispatch*.

Calvin B. Houck, from news staff Winston-Salem (N. C.) *Sentinel* to editor, *Southern Furniture Market News*.

Clarence Dore, from Chicago City News Bureau to rewrite staff, *Chicago Daily News*.

MARRIED

CECIL G. MORRISON, editor of the *Independence* (Ia.) *Conservative* to Miss Marion Miller, Oct. 3.

Dwight H. Teter, editor of the *Elkins* (W. Va.) *Intermountain*, to Miss Mary S. Barron of Charleston, at Elkins on Oct. 9.

Torrey B. Stearns, reporter for the *Chicago Daily News*, to Miss Margaret Ryan of Chicago, Oct. 4.

Bernard Bruemmer of the composing room force of the *Rockford* (Ill.) *Morning Star*, to Miss Estelle Hemmer, Quincy, Ill., Oct. 4th in the rectory of St. John's Catholic church, Quincy.

Edwin Benedict Dooley of Brooklyn, N. Y., former special writer for the *New York Sun*, to Miss Harriette Marie Feeley of Long Beach, L. I., at Norwich Vt., Oct. 7.

Edward T. Stone, a reporter on the *Seattle Post-Intelligencer* and a graduate of the University of Washington School of Journalism to Miss Bertha Dewey of Seattle.

Harold T. Riley, advertising manager of the Westfield office of the *Springfield* (Mass.) *Daily News* and business manager of the *Westfield Valley Herald*, to Miss Josephine Hopkins of Great Barrington, in St. Peter's church in that city on Oct. 12.

Floyd Taylor of the night rewrite staff, *New York Herald Tribune*, to Miss Marian Lockhart of Ridgway, Pa., Oct. 9, at the Little Church Around the Corner, New York.

SPECIAL EDITIONS

MIDDLESBORO (Ky.) DAILY NEWS, 64-page Cumberland Empire edition, Oct. 2.

Galveston News, 92-page annual trade edition, Oct. 1.

San Angelo (Tex.) *Daily Standard*, 60-page edition Sept. 26, promoting the All-West Texas Exposition in San Angelo.

Albia (Ia.) *Union Republican*, Fall Festival edition, Oct. 4.

NEW PLANTS AND EQUIPMENT

DAVID CARLSON, publisher of the *Owensmouth* (Cal.) *Gazette*, has let the contract for the erection of an office building to be occupied by his publication. The structure will be of stucco, 25 by 50 feet.

Pawtucket (R. I.) *Times* has added a new four-unit Goss press. The *Times* already had a four-unit Goss machine.

New buildings have been completed for the *Cushing* (Okla.) *Daily Citizen* and the *Drumright* (Okla.) *Evening Derrick*.

CHANGES OF OWNERSHIP

MOUNT HOLLY (N. C.) CITIZEN, weekly, has been sold to H. C. Hamilton and Ural B. Murphy of Mount Holly. They have re-named the Citizen the *Journal*.

B. M. Schick, formerly publisher of the *Palouse* (Wash.) *Republic*, has purchased the *Columbia Chronicle* and *Columbia County Dispatch*, at Dayton, Wash.

J. W. Rutherford of Burlingame, Cal., has bought the *San Carlos* (Cal.) *Post-*

Inquirer and placed Dave H. Moore in the editorial chair.

Ben J. Pruess, who recently became half owner of the *Sac City* (Ia.) *Sun* has sold his interest in the *Ida Grove* (Ia.) *Record-Era* to Carl Brown of Atchinson, Kan., formerly associated with Ed Howe on the *Atchison Globe*. Stanley Meade retains his third interest in the *Ida Grove* paper and continues as head of the mechanical department.

Raymond Fields and E. C. McIntyre, publishers of the *Guthrie* (Okla.) *Leader* and the *Okemah* (Okla.) *Leader*, dailies, have purchased the *Capitol Hill* (Okla.) *Beacon*, a weekly at Oklahoma City, in connection with which four other weeklies are published for suburban towns.

Dow City (Ia.) *Weekly Visitor* established last May by J. F. Cooley, former publisher of the *Sloan Star*, has been sold to Carl Wolven and W. J. Shepherd of Woodbine for \$2,500.

George D. Borden recently sold his interest in the *St. Helens* (Ore.) *Mist*, to his partner, Ira B. Hyde, Jr., editor of the semi-weekly. Mr. Borden has gone to San Francisco where he will be affiliated with the Mergenthaler Linotype Company, with which he was connected before becoming associated with the *Mist* last March.

H. B. Cartledge of Oregon City and Sheldon F. Sackett, formerly equal partners with George C. Martin and Lynn C. Burch in the *McMinnville* (Ore.) *Telephone-Register* have purchased the interests of the latter two. Mr. Sackett has been editor for the past year and a half of the *Telephone-Register* and Mr. Cartledge has been superintendent of the *Morning Enterprise* plant at Oregon City.

W. A. Blair, owner of the *Oswego* (Kan.) *Independent*, has sold a half interest to A. E. Garvin, Erie, Kan.

Fred J. Demile has sold his interests in the *Paso Robles* (Cal.) *Press* to Fred J. Smith and his son, Fred W. Smith.

William Lemon and Edgar Smyser have bought the *Council* (Idaho) *Adams County Leader*.

Chapin Collins of Seattle, Wash., and Roy G. Rosenthal of Montesano, Wash., have purchased the *Elma* (Wash.) *Chronicle*.

ASSOCIATIONS

COLUMBUS, (O.) ADVERTISING CLUB at its meeting last Monday was entertained with a film entitled "Secrets," produced by the Advertising Specialty Association of America. The film is a portrayal of merchandising and advertising suggestions.

"Outdoor Advertising" was the topic of discussion at a recent meeting of the SEATTLE ADVERTISING CLUB. R. S. Montgomery, general sales manager and Otis Shepard, general director of the Foster and Kleiser Company were the speakers.

SCHOOLS

ANNUAL gathering of South Dakota high school newspaper and annual publications will be held in South Dakota College, Brookings, S. D., Oct. 29.

An 83 per cent increase in the registration in the school of journalism at the University of Iowa, has been announced by Dr. Charles H. Weller, director of the school. In 1925 there were 175 registrations and this year 320 are taking the 15 courses offered by the school.

High school students of seven states attended the annual University of Iowa Journalism Institute at Iowa City, Oct. 15 and 16, the program also including the annual convention of Quill and Scroll national honorary society for high school journalists.

Carl C. Magee, known as "the fighting editor" of the *Albuquerque* (N. M.) *State Tribune* this week addressed students in the Department of Journalism at Syracuse University convocation on how to conduct a modern newspaper. His principal advice to young journalists was to "connect with some newspaper on which you are able to make a big enough impression." This is possible, he said, on the smaller papers more than on the larger ones.

Revival of the journalism assemblies at the University of Washington, which

once were a feature of journalistic work there, began Tuesday Oct. 5, with King Dykeman, publisher of the *Seattle Post-Intelligencer* as principal speaker.

Formation of the University Press Club was brought about last week with about 85 students in the department of Journalism, Syracuse University, as the nucleus for membership. This is the largest enrollment since the department was founded in 1919, according to Professor John O. Simmons of the journalism faculty. George Pring, formerly of the *Geneva* (N. Y.) *Times* and a senior in the department, was elected president.

State Journalism Conference of Ohio will be held Oct. 29-30 at Ohio State University. Speakers will include H. E. Cherrington, *Columbus Dispatch*; Kar A. Bolander, *Columbus Gallery of Fine Arts*; Lester C. Getzloe, department of journalism, O. S. U.; Dr. George Stern Lasher, department of journalism, O. S. U., and Miss Clara Ewalt, publication director, board of education, Cleveland.

In this circle and the accompanying chart are shown the San Francisco Retail Trading Radius of 50 miles, with its 342,147 families, and the comparative number of its homes into which each San Francisco newspaper goes. The black on each home in the chart shows the coverage each medium offers to advertisers in this zone.

Sunday Examiner
1 paper to 1.46 homes.

Sunday Chronicle
1 paper to 3.39 homes.

Daily Examiner
1 paper to 2.64 homes.

Daily Call
1 paper to 4.01 homes.

Daily Chronicle
1 paper to 5.32 homes.

Daily News
1 paper to 5.63 homes.

Daily Bulletin
1 paper to 6.46 homes.

One Paper Coverage of the San Francisco Retail Buying Area!

342,147 families (1,676,046 people) are included in San Francisco's 50-mile Retail Trading Radius. 233,838 of these families read the San Francisco Examiner every Sunday and 129,296 families read the Daily Examiner.

Tens of thousands of these people travel daily from every point in the circle to the City of San Francisco, which is readily accessible by automobile, train and ferry service. Many of these do part of their buy-

ing here, but a vast number depend entirely on the particular section in which they live.

It is therefore obvious that for a manufacturer to consider San Francisco only, either from the viewpoint of distribution or advertising, is to miss a large proportion of a closely knit buying unit. A complete selling campaign, to attain the maximum of success, must consider all the population of the adjacent area as well as the population of San Francisco.

In appealing to this rich market, the San Francisco Examiner, with its total Sunday circulation of 359,852 and its total daily circulation of 188,630, cannot be overlooked. (Net paid average for September.)

N. E. DAILIES MEET

Railroad Traffic Man Discusses Freight Rates at Springfield

A. P. Lane, traffic manager of the Great Northern Paper Company, Wednesday, addressed the fall meeting of the New England Daily Newspapers Association, the first session since the forming of the organization five years ago to be held outside of Boston, in the Noyasset Club, Springfield, Mass. There were 35 publishers present. Mr. Lane spoke on "Railroad Rates on Newsprint Paper in New England."

In the afternoon the publishers inspected the New England Printing School, started in Springfield in July under their direction and voted to authorize continuance of the school and expansion of the course in Springfield. The spring meeting of the association will take place in Boston.

PLACING RADIO CAMPAIGN

The Stewart-Warner Speedometer Corporation has launched an autumn campaign of radio advertising in newspapers throughout the country. The company is using 71 cities in the United States to carry a series of advertisements of the Matched-Unit Radio Products. The campaign opened on Oct. 10 and will continue until Christmas.

CHARLES PHILLIPS DEAD

Charles Phillips, an editorial and feature writer on the *New York Evening Graphic*, died Oct. 8 in New York. He had been connected with a score of newspapers in various cities and at one time was night editor of the *New York Evening Journal*.

Obituary

H. LYNN DAVIS, 30, railroad and commerce reporter on the *Portland Oregon Journal*, died Friday, Oct. 1, following an operation. He came to the Journal in 1919 from Pennsylvania where he had been connected with various newspapers.

SALEM ELY, 75, for 14 years editor of the *St. Anne (Ill.) Record* and since then lumberman and banker in the Iroquois, Ill., community died Sept. 30.

JAMES T. SPACKMAN, 22, newspaper man of Dubois Pa., died at the Cresson Sanitarium, Cresson, Pa., Oct. 9.

JAMES C. FLEMING, 65, died at his home in Shippensburg, Pa., Oct. 1. For many years he was the owner of the *Shippensburg News*.

FRED H. GOODWIN, 71, for many years foreman of the composing room of the *Biddeford (Me.) Journal*, died Monday, Oct. 4, in Sanford, Me.

J. EDWIN MALLORY, former editor and publisher of the *Dassel (Minn.) Dispatch* and later connected with Chicago and St. Louis newspapers, died last week at Dassel.

J. H. WILLEY, 73, editor and part owner of the *Independence (Ia.) Bulletin-Journal*, for 35 years associated with the paper, died Oct. 2 in his home after an illness of two years.

MISS MARY E. MCKAY, for 40 years on the editorial staff of the *Boston (Mass.) Globe* died at her home in Arlington, Mass. last week after a long illness. She was a native of St. John, N. B., where she first entered the newspaper business. In December, 1887, she joined the *Globe* staff.

GEORGE SCHLEY DAVIS, 42, vice-president of the United Fruit Company and vice-president and general manager of the Tropical Radio Telegraph Company, died Oct. 10 at his home in Brookline, Mass. Mr. Davis last December inaugurated a press service for ships at sea and Central American newspapers, news dispatches being broadcast daily by the company from its radio stations at Miami, Fla., and New Orleans, La.

REV. JOHN SOBIESCZYK, a director of the *Chicago Polish Daily News*, died October 11, after an operation.

OHIO PUBLISHER WEDS

C. F. Ridenour of Piqua and Miss Belle Lee Married in New York

C. Frank Ridenour, publisher of the *Piqua (O.) Daily Call* and the *Urbana (O.) Democrat and Citizen*, and Miss Belle Lee of Atlanta, Ga., were married at the Little Church Around the Corner, New York, Friday of this week.

C. FRANK RIDENOUR

The bride is the daughter of Mrs. Mitchell Lee of Atlanta, Ga. She is a graduate of Columbia University and did considerable free lance writing in New York City before becoming advertising manager of Burdine's department store, Miami, Fla.

Since Mrs. Ridenour just returned from a seven months' world tour, the couple will not take a wedding trip, but will spend their honeymoon at the Hotel Biltmore, New York.

STEWART GOLF WINNER

Defeats Mohler for Kansas Editorial Championship in Arkansas City

Ray Stewart of Topeka won the Kansas Editorial Golf Association championship in Arkansas City, Kan., recently, defeating J. C. Mohler in the final round.

Angelo Scott, *Iola Register*, defeated Wilfred Cavaness, *Chanute Tribune*, 2 and 1 for the Dick Howard flight; Will King, *Iola Register*, defeated H. J. Cornwell, *St. John News*, 6 and 5 in the Osage Hotel flight; Gray Levitt, Abilene, defeated John Gilmore, *Fredonia Herald*, 2 and 1 for the K. G. and E. flight.

Clyde Speer, business manager of the *Wichita Eagle* was elected president of the Golf Association at the annual business meeting. George Hausaman, *Hutchinson News-Herald*, was named secretary-treasurer.

Wichita was awarded the 1927 spring tournament, probably in May and Hutchinson the fall tournament, in October.

TEXAS PRESS GROUP MEETS

The executive committee of the Texas Press Association, meeting in Dallas this week during Press Day at the State Fair, set June 17, 18 and 19 as the dates for the convention next year in El Paso. Side trips to Juarez, Mexico, and Cloudcroft, N. M., will be made. President R. L. Baldrige of Clifton presided at the committee session.

A membership of 2,000 is the goal of the National Editorial Association before its 1927 convention next June.

Over 3,000 cities and towns
have streets paved with
portland cement concrete

Horse-and-Buggy Pavements Won't Do

Property owners in many towns and cities whose streets swarm with motor traffic are still wasting their money on horse-and-buggy "pavements" of bygone days.

These rough, bumpy streets are directly responsible for broken springs, cut tires, greater depreciation of cars, physical discomfort, loss of time, and many accidents involving loss of life or limb.

And the heavy expense of trying to keep worn-out, dangerous, horse-and-buggy streets in repair, added to their original cost, amounts to more than enough to pay for true, even, non-skid concrete pavement that has the maintenance built in.

So in the long run you are paying for concrete streets. Why not get them?

All of the facts are in our free booklet on "Concrete Streets." Ask for your copy

WITH THE GENERAL ADVERTISERS

International Silver Company Using Newspapers as "Selling Lever" on Dealers—Forhan Company Running Test Campaign for New Anti-septic—Milk Dealers Urged to Buy Space in Dailies

INTERNATIONAL SILVER COMPANY, a big user of magazine space, has turned to newspapers as a "selling lever" on dealers.

A campaign is being placed in newspapers in 46 cities to run from Nov. 1 to Nov. 22. The account is handled by Lennen & Mitchell, New York advertising agency. In an effort to impress dealers, the company is advertising its newspaper drive in jewelers' trade papers.

A test campaign is now being placed in newspapers in 16 cities for a new anti-septic, manufactured by the Forhan Company of New York. If this campaign is successful, a larger list of newspapers will be scheduled. Forhan's toothpaste is regularly promoted in newspapers. The newspaper appropriation of this firm in 1925, according to the estimate of the Bureau of Advertising of the American Newspaper Publishers Association, was \$550,000.

Addressing the International Milk Dealers convention held in Detroit in conjunction with the National Dairy show, L. S. Hellock, vice-president of the Northland Milk and Ice Cream Company of Minneapolis, Minn., strongly urged the use of newspapers for advertising milk and other dairy products. He told of the experience of his company in using both newspapers and billboards.

"When we have a short message we use the latter," Mr. Hellock, said. "When we have a longer story to tell about qualities, or the activities and service facilities of our firm, or the food and health value of dairy products, then the newspapers are our choice. We would not think of using billboards without liberal newspaper space to back them up."

Mr. Hellock urged milk dealers to stay out of irregular advertising mediums and to select only those that have a continuing and cumulative value, a standing and influence of their own.

A fund of \$20,000 has been obtained by the Hotel Men's Association of Southwest Washington of which Dave Boice of the Monticello Hotel of Longview, Wash., is president, and will be used for advertising in eastern papers, to attract tourists to that section of Washington.

Roy McKinney, for seven years head of the advertising department of the Baker-Hemphill Company, San Angelo, Tex., has joined *The Vogue*, San Antonio, as advertising director.

Thomas P. Comeford, director of sales and advertising at the Namm Store, Brooklyn, and also director of the store, has tendered his resignation to take place about the first of next year. He has made no definite announcement of his future plans.

Comeford joined the Namm Store five years ago as director of sales and advertising. He has been actively engaged in advertising and sales promotion work for the past 18 years—for seven years as advertising manager of Simpson-Crawford Company, New York.

Comeford is president of the Advertising Club of Brooklyn, a member of the Advertising Group of the National Retail Dry Goods Association, and of the Sphinx Club. He was also one of the leaders in establishing the Better Business Bureau in Brooklyn.

Newspapers and magazines will be used in a campaign for the Ground Gripper Shoe Company of Boston, now being planned by Frank Seaman, Inc., New York advertising agency.

H. Lee Bristol, advertising manager of the Bristol-Myers Company, New York, was elected president of the Window Display Advertising Association, which held its annual convention in New York last week.

ADVERTISING AGENCY AFFAIRS

H. E. Lesan Advertising Agency, Inc., Unites with Pacific Coast Group—G. N. Wallace Elected Secretary of Charles W. Hoyt Company, Inc.—Cowan Forms New Agency

A JOINT announcement was made this week by H. E. Lesan, president of the H. E. Lesan Advertising Agency, Inc., of New York and Chicago, and K. L. Hamman, of San Francisco, of the election of Mr. Lesan as vice-president of the Hamman group of agencies on the Pacific coast, and of Mr. Hamman to a similar office with the H. E. Lesan Advertising Agency, Inc.

This affiliation brings the following agencies together as a functioning unit: Johnston-Ayres Company of San Francisco, H. E. Lesan Advertising Agency of New York and Chicago, K. L. Hamman Advertising, Inc., of Oakland, Cal., Crossley & Failing of Portland, Ore., Lesan-Carr Advertising Agency of St. Petersburg, Fla., L. S. Gillham Company of Los Angeles and Salt Lake City, Utah.

While each agency will continue to operate under its own name, a nationwide service is now available for clients of each.

George N. Wallace has been elected secretary of the Charles W. Hoyt Company, Inc., N. Y. Mr. Wallace was formerly connected with the Hoyt Company for several years and has recently been with Alfred Wallerstein, Inc., as account executive and assistant to the president. He will make his headquarters in New York.

Harrison J. Cowan has organized a new advertising agency under his own name with offices in the Heckscher Building, Fifth avenue and 57th street, New York.

Louis H. D. Weld, for the last nine years manager of the commercial research department of Swift & Co., has joined the H. K. McCann Company, as an account executive. Mr. Weld was formerly assistant professor of economics at the Universities of Washington, Pennsylvania and Minnesota, and professor of business administration, Sheffield Scientific School, Yale University. He is the author of a book, "The Marketing of Farm Products."

H. D. Phillips, for the last two years space buyer of the Southwestern Advertising Company, has been made director of research. He is succeeded as space buyer by Harold Hendrick, who has been assistant space buyer for the past year.

M. C. Gaveka, former secretary to E. D. Hungerford, superintendent of the Chicago, Rock Island and Pacific Railway Company, between South Omaha and Denver, has joined Albert Frank & Co., Chicago office.

Byron Bruce, formerly with Metcalf & Little of San Francisco, has joined Honig-Cooper Company of Seattle.

Thousands of New Homes Need Furniture --in Florida

The furniture maker's best customers are the owners of new homes, apartments and hotels.

Nowhere else in the country are there so many new homes, apartment houses, hotels and business buildings being built (in proportion to population) as in Florida.

Nearly half a billion dollars were spent last year in Florida for new buildings. More—and much more—money will be spent during the present and coming years.

This means big business for furniture manufacturers, for Florida at present produces almost no furniture at all. Its demand must be met entirely from outside.

The manufacturer of home furniture or office furniture will find that an advertising campaign directed to the Florida market will be highly profitable. He will also find that he can cover this market most completely and at lowest cost by using the Associated Dailies.

Wonderful Market for Electrical Appliances

Iowa leads Nation in Electrification of cities and towns. 99% of urban population have Electrical Service.

HERE is a wonderful market, in fact, for any product or service that adds to convenience or enjoyment.

And note this startling fact about covering Iowa: The 28 leading daily newspapers comprising this association have combined circulation exceeding the number of families in the state.

NUMBER OF FAMILIES IN IOWA . . 550,000
CIRCULATION OF THESE NEWSPAPERS . . 571,151

UNIFORM MERCHANDISING HELP

Every member of this association pledges the following definite help, in connection with any campaign using 5,000 or more lines in his newspaper:

1. Make a study of local market and trade territory, as pertains to your specific product.
2. Supply complete and accurate list of retailers, in the newspaper's city and surrounding territory.
3. Introduce your salesmen to a number

Map shows service lines of electric light and power companies

Compiled by Joe Carmichael, Director Iowa Committee on Public Utility Information.
Triangular dot indicates isolated generating station.

of big retailers. Advise you as to relative sales standing of competing products.

4. Urge retailers to feature displays of nationally advertised products. Furnish you with names of stores that will make use of window displays.

5. Make market investigation for prospective

advertisers. (Identity to be made known first.)

6. Urge local retailers to mention your products in their own advertisements.

7. Send, on receipt of contract, a multigraphed letter to list of retailers in the territory, telling of the campaign.

Year after year this market is consistently worth while for you. Let this association help you deliver your message most effectively.

IOWA—WHERE EVERY FAMILY READS A DAILY NEWSPAPER

WOMEN IN ADVERTISING AND JOURNALISM

Mrs. Barbour Lyndon Reorganizing New York Evening Post's Statistical Bureau—Miss Sumner Made Society Editor of Worcester (Mass.) Gazette—Tribute to Julia Harpman

WOMEN are in exclusive charge of the reorganized statistical bureau of the *New York Evening Post*, which measures the advertising carried by Greater New York dailies.

MRS. BARBOUR LYNDON

Mrs. Barbour Lyndon, who organized the Publishers Information Bureau in 1915, is in direct charge of the reorganization. She is being assisted by Mrs. Mae Irving, who has succeeded W. J. Punch as bureau manager.

Lineage statistics of New York and Brooklyn daily newspapers, as they are published monthly by EDITOR & PUBLISHER are prepared by this bureau. As part of the enlarged service of the bureau, classifications of the lineage of individual advertisers will be furnished. There is said to be a list of approximately 20,000 different advertisers who buy space in the newspapers of Brooklyn and New York.

MRS. MAE IRVING

The Publishers Information Bureau, organized by Mrs. Lyndon, gathered lineage statistics for a list of 50 different magazines. Mrs. Lyndon headed this magazine bureau until three years ago, when her interest was bought out by Miss Anne R. Edgerly, the present owner. During the War, Mrs. Lyndon was secretary of the statistical department of the United States Shipping Board. She has prepared exclusive statistical reports for the Curtis Publishing Company and *Literary Digest*. A graduate of Barnard College, she took an M. A. degree from Columbia University. Mrs. Irving was Mrs. Lyndon's assistant on the Publishers Information Bureau, serving for eight years with that organization.

Porter Carruthers, of the *New York Herald Tribune*, is chairman of the committee on statistics, of the New York City Publishers Association.

Miss Muriel Sumner, reporter for the *Worcester (Mass.) Gazette*, has been named society editor, succeeding Mrs. Marion Hazelton, who has resigned to join a business house in Boston. Miss Dorothy Blair, formerly of Tulsa, Okla., has joined the women's department of this newspaper.

Miss Mary Blythe, who has been publishing the *Cook (Neb.) Courier* under a lease for more than a year, has purchased the paper from her father, R. B. Blythe.

The current number of *News Pix*, office publication of the *New York Daily News*, pays tribute to the work of Miss Julia Harpman, in private life, Mrs. Westbrook Pegler, who reported Gertrude Ederle's successful channel swim.

"Throughout the two months of training at Cape Gris Nez, it was Julia Harpman and Art Sorenson who offered encouragement, ironed out squabbles, kept the party in good spirits, made all the arrangements of whatever kind necessary—did the million and one different things small and large, which put Trudy in shape and kept her in shape for the supreme

effort," the tribute reads. "Julia was Trudy's official chaperone for the summer, but that doesn't start listing the duties she found.

"Through the two months Miss Harpman's stories were splendid. There are few instances of more delightful reporting or writing."

Miss Edith Friedman, formerly of Weymouth, has joined the women's department of the *Worcester (Mass.) Telegram*.

Miss Eleanor Meade, reporter for the *Worcester (Mass.) Telegram*, has joined the *Springfield (Mass.) Union*.

Nadine Robbins, a graduate of the University of Washington School of Journalism, has joined the staff of the *Seattle Post-Intelligencer*. She is assistant editor of the Homekeepers' Section.

Mrs. J. W. Schilling of Ada, O., holds a unique place among news writers of Ohio. For 52 years she has served as correspondent for the *Ada Record*. The Ohio Women's Newspaper Association has invited Mrs. Schilling to attend their meetings Oct. 29 to 31 at Akron.

Miss Mary Watkins has joined the music department of the *New York Herald Tribune*, as assistant critic with Francis D. Perkins, to Lawrence Gilman.

Miss Watkins has been free lancing for a number of years, and is the author of two books published by Stokes—one called "First Aid to the Opera Goer," and the other "Behind the Scenes at the Opera."

Previous to her writing career, Miss Watkins was secretary to Olive Fremstad, the Wagnerian singer.

Selma Robinson, formerly of the staff of the *New York Herald Tribune*, is now doing music publicity with the firm of R. E. Johnston.

FEMININE IDEAS TRIED IN NEWS EDITING

Women Take Charge of Sioux Falls (S. D.) Press for a Day—Ban Crime News But Play Sharkey Fight on Page One—No Stocks

For the third time in three years a staff made up exclusively of local women edited the Oct. 12th issue of the *Sioux Falls (S. D.) Press*, which was called the annual history club edition. The Press for three years now has permitted members of the Sioux Falls History Club to take charge once a year to put their newspaper making ideas into practice.

Women reporters "covered" all the regular beats, police headquarters, political meetings and theatres. Women also had charge of the advertising and circulation departments.

The account of the Jack Sharkey-Harry Wills fight was put on page 1. Mrs. R. D. Springer, manager editor for the day, said the victory of Sharkey "was bigger news than a win for Wills would have been."

Most crime news found the waste basket with the exception of the Chicago gangland feud, which was "buried" on an inside page. Mrs. Springer said the story was a "disgrace" to any city.

Because yesterday was a holiday there was no New York stock report, but if there had been it would not have been published, according to Mrs. Springer, who did not care to print accounts of what she termed a "gamblers' market."

An Opinion that Means Much

The sole owner of the most modern and finest newspaper plant in the world has had these pleasant words to say of the METROPOLITAN DRY MAT.

"Seven hundred and sixty-eight plates are required to equip the Inquirer's presses with thirty-two casts from each mat on a sextuple run and we have had no difficulty in getting the full complement of plates.

"With two moulding machines we handle two forms a minute regularly and have moulded seven forms in three minutes, when rushed, with a saving in time of ten to fifteen minutes in getting started in the press room.

"We have no hot forms to handle and there is a consequent saving in the composing room in making quick lifts.

"We use the same number of men in packing out as we did with wet mats but are able to get deeper and better printing plates than before.

"We have cut one inch off our full roll width, which is now 71½", and this brings a saving in excess of 1-1/3% in newsprint cost with a proportionate reduction in freight bills."

Excerpts from a letter written by an enthusiastic user of a device which has enabled him to make more efficient his wonderful plant—COLONEL JAMES ELVERSON, JR., Proprietor The Philadelphia Inquirer.

The METROPOLITAN DRY MAT costs a little more at the mill, but in its dependability, saving in time and physical labor, and its good printing it is much the cheapest dry mat to use.

COMBINES WORD COUNT AND LEGIBILITY

WORD COUNT of 6 point

The British delegation of trade-union representatives, who came here on Tuesday at the invitation of "The London Daily Mail" to study reasons for the disparity between the high wages and prosperous living conditions of the American worker and their own lower wage standards, gained considerable light in a tour of several industrial establishments in Brooklyn yesterday.

They were curious to know how it was that the average wage of the American toiler virtually doubled that of his British brother, and how it was possible for industries here to offer such fat envelopes to their employees and at the same time compete successfully in world markets.

American More Productive

After a study of the Brooklyn Edison plant and the factory methods of the Mergenthaler Linotype Company in Brooklyn, the delegates remarked that one of the vital reasons for the disparity was that the American worker was capable of producing and actually did produce more than the British toiler in a given time.

This he was enabled to do, they learned, because of the high standards of efficiency obtaining here, mass-production methods, the utter perfection of organization for which the American industrialist seems always to be striving, and labor-saving devices evident on every hand.

The comments of the delegates were voiced by Sir Percival Phillips, special correspondent of "The Daily Mail"; Fenton MacPherson, of the same newspaper, and William Mosses, J. P., who had a prominent part in the British Labor Ministry during the war.

Mr. MacPherson also noted that the welfare facilities offered by the American plant were much more elaborate than in England and that equipment and quarters were more beneficial. This was evidently the result, he observed, of the frequent scrapping of plants here to make way for expansion and development. His countrymen are

CLASSIFIED ADVERTISING

"Colyumizing" the Little Want-Ad Idea—Daily Campaigns to Modernize Classified Columns—Should "In Memoriams" Be Solicited?—Introducing Seattle's "Bargain Bazaar"

A NEW idea in classified promotion is meeting with success on the *Albany* (N. Y.) *Times-Union*, according to A. B. Harris, classified advertising manager. Mr. Harris described it this week to EDITOR & PUBLISHER as a "personal appeal in the matter of obtaining reader interest for the classified pages." In effect, the usual promotion ideas are being presented in column form under the heading "The Little Want-Ad Man Says." A recent example makes the "colyumizing" plan clear.

The other day, for instance, "The Little Want-Ad Man" had the following to say to readers of his column:

"Ain't it funny what a difference just a few hours makes? Isn't that a familiar strain to you? No doubt you remember that famous comedian, Raymond Hitchcock, who made such a hit with that song in the popular musical comedy, 'The Yankee Consul.' No truer phrase could have been used had reference been made to the little Classified Ads.

"To-day, with the service that newspapers are able to offer advertisers, it is but natural that the *Times-Union* is the only newspaper offering Albanian service on the same day. Suppose your maid left you right after breakfast time—no need to worry. You'd naturally just call Main 6700, the ad-taker would set your Want working, and in 'just a few hours' you'd have another maid as good, if not better.

"If you wanted to rent that vacant room, the same principle would apply, and so on, all through the various captions of the Classified Section. Results are most certain through this exclusive Service of the *Times-Union*, and is proof positive of 'what a difference just a few hours makes.'"

Then, in the same chatty manner, he took up the subject of brides and brides-to-be, pointing out how the classified columns could supply their needs. Samples of several newsy advertisements in the paper of that day pertinent to present and prospective housewives were next reprinted with the names, addresses and telephone numbers omitted.

Other want ads which brought forth observations and wisecracks from the classified column conductor concerned offerings listed on the advertising page of pets for the kiddies, dancing lessons, furnace installations and a country home far from the madding crowd.

The *New York Herald Tribune* has changed the slug on its classified pages from "Situations wanted—Women" to "Positions wanted—Women." This, and its recent change from "Help wanted—male" to "Help wanted—men" are part of its campaign to modernize the classified columns.

While commenting on the change, L. L. Heaton, classified advertising manager exhibited a copy of an old *Herald*—back in 1846—which lists in its "Situations, &c. Wanted" columns the following item: "A young lady who has recently finished a thorough course of English education wishes a situation in a family, as teacher. References given."

And another, "Wanted—By a Woman, a situation. She is a first rate cook, washer and ironer; understands all work in general."

"When the phrase 'situation wanted' was first used in the classified advertising columns," said Mr. Heaton, "it meant exactly that—the applicant wanted a situation, a permanent place of residence. Nowadays when a girl advertises for a position, she wants a position, or even a job—and not a situation. The difference is a technical one, but there is no reason why the classified columns should not keep pace with modern development as well as any other department of a newspaper."

Should the "In Memoriams" be solicited?

Classified advertising men are asking this question since J. J. Tierney of the *Spokane Spokesman Review* originated and started to sell a system to develop the In Memoriam classification. Tierney has described his system as "unique and dignified."

Disapproval of the idea was this week voiced by Theodore N. Bates of the classified department of the *Cleveland Plain Dealer*.

"Have our organizations become so commercialized that we no longer respect the privacy or have consideration for the personal feelings of the public whom we are here to serve?" asked Mr. Bates. "It is true that there are some who feel it an act of respect and devotion to their departed ones to print a public expression of their sorrow from year to year. But countless others prefer to bury their sorrow in their own hearts and do not wish to be reminded of it, or at least do not wish to make public mention of a sorrowful event. And many of this latter class cannot but feel offended and subject to an unwarranted intrusion when they receive a 'reminder' from a newspaper, no matter how 'unique and dignified' the method of solicitation may be."

Mr. Tierney claimed that new business amounting to 72 ads for the first trial was created practically over night by his plan. He maintains a demand for the classification exists in every city and that the problem is only to make it easy for people to use it.

The *Seattle Post-Intelligencer* recently grouped the names of many Seattle merchants who have been using the classified columns daily in a large office display advertisement under the heading "Seattle's Bargain Bazaar."

Starting a fall campaign for want ads, the *Aberdeen* (Wash.) *Daily World* gave away a 60-cent brick of ice cream with every ad placed in the paper for three consecutive issues. In a front page announcement of the campaign, the paper asked its readers to telephone the copy in the morning and come down to the newspaper office in the afternoon to pay the bill and take home the ice cream for supper.

Glen DeForest Chow, classified advertising manager of the *Jackson* (Mich.) *Citizen Patriot*, is author of the textbook on classified advertising entitled "How to Say It," which was recently reviewed in this department.

The *Boston* (Mass.) *Herald-Traveler* has opened a centrally located downtown classified advertisement office at 264 Washington street.

"BILLIONAREA" SHOWS SPEED

Speed in linking its promotion advertising with the news was shown this week by the *St. Louis Post-Dispatch*, which on Monday, Oct. 11, placed a full page advertisement in New York morning newspapers congratulating "the St. Louis advertising agency of Rogers Hornsby, Grover Cleveland Alexander & Co., for winning the World Series." Copy was telegraphed to New York by the Yost-Gratnot Advertising Agency, St. Louis. The advertisement was part of the St. Louis paper's campaign promoting its territory as the "Billionarea."

CARSON TO BERMUDA

W. E. Carson, recently director of the Travel News Service, New York, will take charge of the press bureau, Hamilton, Bermuda, during the coming winter season.

A cable from Paris to the *Herald Tribune* says that there are 40,000 germs in a kiss, but it sounds like a plot to solve the already acute parking problem. —F. P. A. in *Conning Tower*, New York *World*.

The Record-Star-Telegram,
Fort Worth, Tex.

Dear Sir:

Re: National Advertising campaign
Associated Salmon Packers

When it came to placing the advertising for Canned Pink Salmon in the Fort Worth territory there was no hesitation as to the selection of the Star-Telegram and Record-Telegram to carry the message. And well was the confidence merited, for a recent tabulation showed the responsiveness of this newspaper's readers as exceeded by those of only one other newspaper in the United States, and leading by a large margin any other newspaper used in the Texas field.

Very truly yours,

STRANG & PROSSER

TTP:VJK

—that a good product *plus* sales effort *plus* a rich market *plus* intelligent advertising *equals* increased business for you.

McCoy

DR. McCOY has a hold on his readers that is unequalled by any other health writer in the world. His original ideas and his plain, understandable way of presenting them awakens in the minds of his readers a new health consciousness.

"Time" magazine of Sept. 13th says:

"The teaching of health information to the public is a serious matter. People want to know about disease and how to cure those diseases."

No matter what HEALTH service you are now using you need Dr. McCoy's "different" health service. There is no substitute for the McCoy Health Service.

JOSEPH PULITZER

built the New York World on constructive service to his readers. There is nothing closer to a human being than health. There is no greater service you can render your readers than a genuine health service that does not simply say "Go see a Doctor" but tells them how to cure themselves in a definite, practical and natural way right in their own kitchen.

This service is open to one paper in each city. Write or wire now

McCOY HEALTH SERVICE, Brack Shops Building

Health and Diet Advice

By DR. FRANK McCOY

Author of

"The Fast Way to Health"

Questions in regard to health and diet will be answered by Dr. McCoy, who can be addressed in care of this paper.

HERE'S HOW TO CURE ASTHMA

IN THE preceding article I explained to you how asthma is caused entirely by an excessive amount of stomach and intestinal gas, and the fact that the patient has poor control of the diaphragm.

The way to get the quickest results, if you are suffering from asthma, is to start at once to get rid of the gas pressure. The simplest way to do this is to start immediately on a fast, and expect to continue this fast for at least a week or ten days.

You may take a plain water fast, drinking only water, as much as you desire, but the orange juice fast is usually quite successful in quickly bringing about good results. You may change the water diet by the addition of the juice of one or two oranges every two hours during the day. Lemon or grapefruit juice may also be used in place of the orange juice.

A daily enema of one quart of warm water should be used, more if necessary, in order to remove a large amount of intestinal gas.

After the first day on this fast, if you are using adrenalin or smoking any powders, you should stop this so that the drugs you have been using can be thrown out of your system by the end of the fast and no more be added afterwards.

The heavy breathing will usually disappear in from twelve to forty-eight hours, and will never again appear during your lifetime if you will follow the rest of these instructions.

After you have fasted for ten days, start the following diet on the morning of the eleventh day:

Breakfast

One egg. (Prepared in any manner, except by frying.)

Three or four pieces of Melba toast. (Prepare the toast by cutting bread one-quarter of an inch thick and toasting in the oven until it is brown all the way through. Butter as desired at the table.)

Five stewed prunes, or an approximate amount of figs or raisins. (These to be prepared without sugar.)

Lunch

Choice of one of the raw acid fruits listed below: Apples, apricots, peaches, nectarines, pears, grapes, oranges, grapefruit, lemons, plums, loquats, cherries, berries, pineapple, tomatoes and melons.

Dinner

Choice of one of the following proteids: Lean beef, mutton, fowl, turkey, rabbit or fish.

Choice of two of the following cooked, non-starchy vegetables: Celery, spinach, small string beans, asparagus, summer squash, cucumber, egg plant, beet tops, turnip tops, small carrots, small parsnips, small turnips, pumpkin, lettuce, okra, chayotes, oyster plant (salsify), mallow, kale, zucchini.

Choice of one of the raw salad vegetables listed below: Celery, spinach, asparagus, cucumber, parsley, small beets, small carrots, small turnips, lettuce, oyster plant, mallow, nasturtium leaves and flowers, endive, alligator pear, ripe olives.

Take an enema daily for one month, at which time the enema may be discontinued and the bowels will move normally, if you will wait at least three days.

(Tomorrow's article, Dr. McCoy will tell how to develop a strong diaphragm.)

WHAT'S WHAT IN THE FEATURE FIELD

Dorothy Dix to Report Hall-Mills Murder Trial—L. P. Eickel Named M. E. of Central Press Association—King Features Syndicate Wins Crosby Suit

DOROTHY DIX will report the Hall-Mills murder trial for the Ledger Syndicate, Philadelphia, it was announced this week, following the writer's return Oct. 13, from a three months' European trip. The trial is scheduled to start early next month in Somerville, N. J.

Miss Dix has covered the trials of Czolgosz, assassin of President McKinley, Albert T. Patrick, Harry K. Thaw, Nan Patterson, Josephine Terranova, Father Schmidt, Florence Burns and many others in her newspaper career.

Leslie P. Eickel, for many years with the Scripps-Howard Newspapers, and at one time editor of the *Evansville (Ind.) Press*, was this week appointed managing editor of the Central Press Association, Cleveland. He will assume his new duties Oct. 18.

Judge Wasservogel in New York supreme court this week granted a motion to dismiss the complaint brought against King Features Syndicate, Inc., New York and Percy Crosby, artist, by the Johnson Features, Inc., seeking to restrain Crosby from drawing and the Hearst syndicate from distributing the Sunday comic page entitled "Skippy." The court granted counsel for Johnson Features 20 days in which to file a new complaint against Crosby. Johnson alleged that he had a contract with Crosby for the daily comic strip "Skippy" and providing for first opportunity to handle a Sunday page should the artist decide to prepare it. Crosby maintained he had offered first opportunity to Johnson, but had not received a satisfactory money guarantee, and had consequently accepted a contract with King.

The Post Syndicate, New York, has contracted for the original story by Wil-

liam Douglas Burden of his capture of the varanus komodoensis, a rare member of the lizard family popularly known as "dragons." They were caught on the Island of Komodo in the Malay Archipelago.

Famous Features Syndicate has obtained "Why I Left Daddy Browning," a confession story signed by Frances ("Peaches") Heenan Browning.

Queen Marie wrote for the North American Newspaper Alliance two articles on why she decided to visit the United States.

Ledger Syndicate, Philadelphia, has obtained second serial rights to "The Love Game" a novel by Suzanne Lenglen, the professional tennis star.

T. S. Stribling, author of "Teetallow," has sold the Merit Newspaper Service first serial rights on his latest novel "The Enigma." This syndicate is now installed in new quarters at 562 Fifth avenue, New York.

William H. Johnson, president of Johnson Features, Inc., left New York this week to make Cleveland his permanent headquarters.

J. K. Cowan is author of a new daily comic strip entitled "Here's to Your Health!", which will be distributed by United Features Syndicate, beginning Nov. 1.

Latest serials by Hazel Deyo Batchelor are entitled "The Spider Woman" and the "Million Dollar Wife." Her work is handled by Ledger Syndicate, Philadelphia.

WHAT THEY ARE SAYING

"**COURAGE**—if there's any one quality to build newspapers, it's editorial courage. Of course, there are all the other elements—news gathering, business and mechanical ability—but I think that if you analyze the history of the successful papers of this country, you will find that at one time or another in their careers, they won the respect of their community by at least one act of sincerity and courage."—David Stern, publisher, *Camden Courier*.

* * *

JOURNALISM'S RESPONSIBILITY

"**I**T is our responsibility to give people the facts, presented with a proper sense of proposition, and so afford them the only solid foundation for straight thinking. He who draws the daily picture with fidelity serves as it is given to few to serve. He who for his own selfish purposes falsifies the picture, causing a distorted vision and mental chaos, is in the smallest sense a traitor to the democratic form of government and in a larger sense the most dangerous enemy of society today."—Edward McKernon, superintendent, Eastern Division, Associated Press.

* * *

"OBVIOUSLY"

"**O**BVIOUSLY when the problem is one of reaching, in any given locality, a large number of people and of giving them an easily comprehended general message no medium is to be compared to the daily paper. Moreover, in these days of audited circulations, it is possible to know just how many people are being reached by any good paper. In addition to these facts about quantity, a good deal of knowledge can be had about the qualitative factors in circulation."—Paul T. Cherington, Director of Research, J. Walter Thompson Company, Before Financial Advertisers Association.

* * *

"NEWSPAPERS LACK REAL ISSUES"

"**I**F there is any trouble with the press today it is that the newspapers do not select clear-cut fundamental issues in their various communities about which they should shout. The newspaper which does not call public attention to public wrongs is just as bad as the individual who sees a person being murdered and does not call the police."—Carl C. Magee, editor, *Albuquerque (N. M.) State Tribune*, in address before School of Journalism, Syracuse University.

MEMBER A. B. C.

PENNSYLVANIA'S

Highway Progress

\$220,000,000 on Highway Construction and Maintenance Being Spent

From January, 1923 to January, 1927, the Keystone state will spend about \$220,000,000 on highway construction and maintenance. During this period about 3,000 miles of new hard surface roads have been constructed, and about 1,200 miles of roads have been re-built, making a total of 4,200 miles for the four years.

With the completion of this road building programme, it will bring the state's hard surface mileage up to 8,000, while 4,000 miles will be of fine dirt or shale roads.

With this great net work of fine highways the buying power of the state is knitted closer together—the city and country have become one great community. A national campaign in the city papers reaches the suburbanite and farmer almost at the same time. Sales resistance is reduced to a minimum and buying power is increased.

What national advertiser can afford to overlook the great Keystone state as his logical market—study its population, wealth, and buying power—and then let these newspapers listed below help you reach Pennsylvania's great mass consumer.

SHOP TALK AT THIRTY

By MARLEN PEW

NO other profession or trade compares with newspaper work for range of interesting and profitable experience and contacts. Yet one of the commonest experiences is to hear newspaper men complain that life is dull, irksome and futile. These malcontents, one finds on investigation, fall into the following categories: (1) Lazy fellows, who would shirk any task; (2) Men without purpose or objective—the familiar “go-along guy”; (3) Procrastinators. Those in the first two classes may wake up, but the race is too fast and interesting to bother much about them. The procrastinator may need only a spur.

* * *

TOO many of us permit our finest thoughts to run off into thin air in “shop-talk.” The word that counts is the written word. It is a very old observation around newspaper offices that the best stories are not printed, but told in “after thirty” gossip. The advice the old editor gives the dispirited young newspaper man is: “Write your way out of obscurity. Your typewriter is the only tool of commerce in your life. All that is worthy in your heart and mind you may pour out in copy and in this day any earnest man can find markets for good material. Whatever it may be, do your stuff!”

* * *

JACK LONDON told an approximately true story of his own life in *John Barleycorn*. This writer knew him in his youth. Man never lived who took greater interest in life and its adventures than he. London was like a bumble-bee, whizzing everywhere, burying himself in every flower, ravenously searching in every corner of the field. He was no cold, calm observer, but a passionate participant in the affairs of men. All that happened to him or within the range of his penetrating eye was grist to his mill.

Jack London once told a party of his friends, gathered in New York to honor him, how he made copy. “The plot of a story flashes in my mind,” he said. “Presently I am obsessed by it, unraveling the details one by one. The important climaxes of the story become real in my imagination. I begin to like the story and everything I see and do becomes relevant to the plot. There is an incubation period of weeks or months and then I take my typewriter between my knees and sally into it. I tear up a dozen introductory paragraphs. I write the first chapter over and over again. I know no formula for such work. Every page is a novel experience. I love the job, but oh, God, it is hard work and I suffer a thousand births and deaths before I get a story into shape for the publisher. But there is one rule that I rigidly observe. Nothing must interfere. I write 1,500 words a day. I may do more, but never less. When I say ‘a day’ I mean every day, seven days per week, 365 days per year. Most of the stuff will not pass and I tear it up and write again. I can do 1,500 words of fiction every day because I am a reporter.”

* * *

THIS is a valuable tip for the writing fraternity, especially for dreamy souls who are always about to make a start, but seem never able to put a foot forward and keep walking. A man who writes 1,500 words every day has an annual product of 547,500 words per year, offering ample surplus for the waste basket if the object is to produce a novel a year, a newspaper column, a Sunday feature or sufficient article material to

assure a first-class livelihood. Starvation is no longer the synonym for authorship in this country.

* * *

MRS. LONDON, the charming Charmain, was Jack's best spur. After the way of good wives she knew how to steer the business of the day so that Jack might free himself from social and business duties and pound out the daily stint. But at Half Moon Bay she once said: “He is working himself to death.” Because he did so completely live the lives of his fiction characters, writing as a reporter rather than from sheer imagination, Jack London's career was a whirlwind of experiences and more than human strength could long endure.

* * *

VERY few men can write as well or as much as did Jack London. But every sincere professional writer may establish a word quota for his typewriter and make his life conform to this obligation. It is one sure way out for the procrastinator.

WHITE DEFIES BLUE LAW

Editor of *Emporia (Kan.) Gazette* Furnishes Fans with World's Series Returns

William Allen White, noted editor of the *Emporia (Kan.) Gazette*, stepped into local opposition over this last weekend, but held his ground firmly.

Preceding last Sunday's World Series game, the *Gazette* issued an invitation to fans to attend the game vicariously by means of a score board “a half hour after church services.” *Emporia* has air-tight Sunday blue laws. Ministers followed up the *Gazette's* invitation with a vigorous pronouncement, protesting the use “in the same breath” of the words “church service” and “ball game.” Mr. White countered in a typically biting and somewhat bewildering rejoinder, joshing the clergymen on their stand.

On Sunday, Mr. and Mrs. White had a ringside seat before the magnetic player board. About 2,000 fans watched the play-by-play returns.

On Sunday afternoon, two ministers announced they had voted against the ministerial protest.

INTERPRETING LAWSON'S WILL

Court to Decide Whether Tax Will Be Paid by Estate

Certain clauses of the will of the late Victor F. Lawson, publisher and owner of the *Chicago Daily News*, are being interpreted by Circuit Judge Hugo M. Friend as the result of a suit before the court, brought by Iver Norman Lawson, brother of the late editor.

Differences between heirs and the Illinois Merchants Trust Company, executor and trustee of the \$20,300,000 estate, caused the filing of the suit. The chief point of dispute concerned the disposition of profits of the newspaper for the period from Aug. 19, 1925, when Mr. Lawson died, to Jan. 1, 1926, when the *Daily News* was sold to a syndicate headed by Walter A. Strong, business manager of the paper.

Judge Friend was asked to decide whether the profits of the paper during this period were applicable to the payment of income to which the legatees were entitled. The sale price of the newspaper was \$13,671,704, the suit revealed.

Mr. Lawson also contended that he ought not to pay an inheritance tax of \$214,502 out of his own bequests. He declared the tax should be paid out of the body of the estate. He was made

the beneficiary of two trust funds, one of \$300,000 and a second of about \$1,000,000, while his two children were each left a trust fund of \$200,000.

If he has to pay the tax, Mr. Lawson's total income from the estate for the first year will be wiped out, he said. His lawyer proposed that the tax be taken out of the body of the estate.

COWLES PAPER FIRM TRUSTEE

W. H. Cowles, publisher of the *Spokane (Wash.) Spokesman-Review*, was elected a trustee of the Inland Empire Paper Company, succeeding John E. Alexander, of Port Edwards, at a recent meeting at the company's plant in Millwood, Wash. It was also voted to increase the company's stock by \$350,000, making a total of \$2,000,000. Production will be increased from 2,800 tons to 5,000 tons a month when contemplated plant improvements are completed.

N. Y. WEEKLIES CONSOLIDATE

The *Kingston (N. Y.) Ulster County News* this week absorbed the *Fleischmanns (N. Y.) Press*, Ira Warren is general manager of the *News*. Sydney Flisser was publisher of the *Press*.

CATHOLIC WRITERS TO MEET

The Catholic Writers Guild of America, Inc., will open the winter season with a meeting to be held in the evening of Oct. 21 at the Guild House, 128 W. 71st street, New York. Kent Cooper, general manager of the Associated Press, is scheduled to speak on the subject “Truth in News.” Hugh A. O'Donnell, assistant business manager of the *New York Times*, is president of the guild.

WESTCHESTER WEEKLIES ELECT

Thomas M. Kennett, of the *Pelham (N. Y.) Sun*, has been re-elected president of the Westchester County Weeklies, Associated. Frederick Dromgoole, of the *Mt. Kisco Recorder* and C. E. Lovejoy, of the *Bronxville Press* and *Eastchester Citizen Bulletin*, vice-presidents; G. Harris Danzberger, of the *Hartsdale Herald*, secretary, and Colin T. Naylor, Jr., of the *Peekskill Highland Democrat*, treasurer.

CELEBRATES 31ST YEAR

In connection with the 31st anniversary of the ownership of the *Scranton (Pa.) Times* two special editions were issued. One appearing on Oct. 11 consisted of 64 pages. The second edition appeared on Oct. 12 with 54 pages. The special editions were also published in connection with the official opening of the *Times'* new modern four-story plant. The special edition of Monday contained views of various parts of the new plant and was featured by an article in which E. J. Lynett, owner of the newspaper, traced the history of the *Times*.

NEW PUBLICITY DRIVE BOOSTS DOCTORS

Press Agent Bellows Puffing Medicos Whose Ethics Forbid Paid Advertising—Voluminous Handouts to Nation's Editors

The free publicity sensation of the week was furnished to newspaper editors far and wide by the great and honorable medical profession, through the “Medical Publicity Service,” operated by Reed and Carnrick, of Jersey City.

A green circular announced the plans of the service in the following extraordinary terms: “The doctors of this country—155,000 of them—are ethically bound by their oaths not to indulge in individual advertising or publicity. But editors know they are good material for editorials, news and feature stories. They are much misunderstood, underpaid and subject to unfair competition by quacks, without the means of getting their story before the public. Some day—in the not far distant future—there will be a great, co-operative medical campaign of education, paid space, in all newspapers. Until that time, and to speed its arrival, the use of material in this release is urged.”

Thus introduced the spirited publicity men proceeded to unload upon the press the following items: 8 short editorials, one entitled, “How Much Time Do Doctors Waste in Traffic”; 1 column article, “The Price of a Life vs. the Price of a Car”; feature story, “Doctoring the Opera House Songbirds”; one-half column article, “The Commissioner of Family Health”; 1 column article, “Are We Being ‘Doctored’ to Death?”; 1 column editorial, “Don't Call Him ‘Doc’”; 1 column editorial, “Doctors Express Yourselves.”

Any editor who uses this stuff may, it is announced, do so without carrying the copyright line, may edit the stuff as he may elect or give credit to the “Reed & Carnrick Medical Quarterly.”

An Illinois publisher who forwarded Reed & Carnrick's stuff to Editor & Publisher this week made the following comment:

“How soon do you suppose they'll be ready to advertise, if the newspapers of this country run this for them? And if it's unethical for an M. D. to run paid advertising isn't it also unethical for a newspaper to run free advertising for him?”

“If the ‘regular’ doctors are finding that the quacks and non-medical healers are cutting into their practices by using advertising, isn't it about time they were also finding that the best way to fight back is with paid advertising space over the signature of the American Medical Association?”

“If it's all right for religion to be advertised with paid space why isn't it all right for medicine to do so?”

Time and time again we have proved to the most skeptical that the complete checking proof service which we operate is the most practical and efficient method that any newspaper publisher can use for supplying his agencies and advertisers with ‘proof of insertion.’ The best proof we can offer of our ability to make good, is the results of our accomplishments—326 well satisfied subscribers.

The Advertising CHECKING BUREAU Inc.

538 So. Clark St.
CHICAGO

79 Madison Ave.
NEW YORK

MACHINE MEASURES ATTENTION VALUE OF COPY

(Continued from page 5)

ure frames were fastened in front of the openings, thus forming the "eyes" the face as seen in Fig. 1. These frames were large enough to take full the advertisements of the size appearing in the *Saturday Evening Post* and *Los Angeles Home Journal*.

by an ingenious arrangement the (—) x keys of a typewriter were connected with electric switches. When a passerby directed his attention to the left hand advertisement, the operator touched the switch which set the (—) key operating. This timing arrangement caused the key to be struck three times a second. When the passerby changed his attention to the right hand advertisement the operator pushed the left-hand switch and pushed the right, causing the x key to strike the paper three times to the second. A sample record obtained in this way appears as follows:

----- xxxxxxxxxxxxxxxxxxxx
----- xxxxxxxxxxxxxxxxxxx m 25.

Translated, this shows that a male, at 25 years of age looked at the first advertisement on the left for six beats (seconds), then to the right for 18 beats (seconds), back to the left for 4 beats, and again to the right for 15 beats. Mr. Nixon conducted three different experiments to test the value of color in attracting attention. In the first experiment two advertisements were exposed simultaneously to the view of the pedestrian who had stopped to look, attracted many cases by a newspaper black and white advertisement. Record was made of the length of time spent in looking at each of the two competing advertisements. One of the pair was colored, and one was white. The advertisements used were not necessarily of the same company or of a similar product. The investigator found in the experiment that neither the use of color nor the failure to use color made any difference in the length of time that the subject spent in looking at the advertisements. A group of 287 people spent an average (in thirds of a second) of 8.14 seconds looking at black and white while 284 people spent an average of 7.63 in looking at color.

In a second experiment a series of eight advertisements, four in black and white, and four exact duplicates except they were colored, were placed in the apparatus at a time and left in view while 50 people passed, a record being made of the number of people turning their heads to each. Exactly the same number of pedestrians looked at the black and white as the colored, while a slightly greater number stopped for a closer look at the colored group.

Mr. Nixon's third color experiment was comparing 54 black and white advertisements with 54 in color. The 54 in each were divided into sets of nine, representing pictures of men posing, men in

action, women posing, women in action, simple objects and complex objects. When the black and white advertisements were exposed 2,700 people passed, 1,034 looked and 127 stopped. Of the same number of people passing the color advertisements, 889 looked and 73 stopped.

Other findings resulting from Mr. Nixon's experiment may be summarized as follows:

Younger pedestrians showed a greater interest in the display than older ones.

Males and females showed about the same interest as measured by the tendency to turn the head in passing, but the men showed much greater tendency to stop.

Negro pedestrians were slightly less interested than whites.

No marked sex differences were found with regard to attention to advertisements having pictures of people or those having pictures of objects.

NEWS COMPANY INCORPORATED

Among the new Massachusetts corporations is the Saxe Agency, Inc., newspaper and magazine distributors, with a capital of \$50,000. The incorporators are Goldie Saxe, Myer Saxe and Samuel D. Saxe of Brookline and Harry Berger of Roxbury.

BLUE BOOK "SALE" ATTACKED

The National Better Business Bureau, Inc., New York, in its current bulletin attacks the "perpetual last call" of the advertisements selling "Little Blue Books," placed by the Haldeman-Julius Company, Girard, Kan. Following his announced determination to quit publishing the Little Blue Books, Mr. Haldeman-Julius, the bureau says, announced instead that he would raise the price of them from 5 to 6 and 7 cents. The most recent advertised quotations on Little Blue Books, however, the bureau adds, is at 4 cents.

Announcing 72-Point Now on the Ludlow

Ludlow 72-point in sluglines, a size long contemplated, is now ready in Caslon Bold.

This new size can be had by any Ludlow user from his present casting unit. To make any outstanding Ludlow caster available for delivering 72-point in sluglines, a slight change in mechanism is necessary. This change can be made by any Ludlow operator in a few minutes.

Cast in Sluglines on Your Ludlow Caster

With the Ludlow that is equipped for producing this new 72-point face, any size from 6-point condensed to full-width 72-point caps and lower case can also be cast at any time—without machine or mold changes.

Naturally, every newspaper executive contemplating the use of dry mats will ask: "Will these new 72-point Ludlow slugs stand up under the dry-mat roller?" The answer is contained in a special folder "How Ludlow Slugs Stand Up Under Dry Mat Pressure." Write for it today.

EMPIRE CIRCULATORS TO DISCUSS RADIO

To Consider Effect of Broadcasting
News at State Meet Set for New
York Oct. 19-20—Bus vs. Railroad
Service Also a Topic

Effect on newspaper sales of radio broadcasting of elections, prize fights, world series or other big news events will be discussed by Fred S. Ohrt, *Niagara Falls Gazette*, addressing the annual convention of the New York State Circulation Managers Association, at the Hotel Martinique, New York, Oct. 19-20. Charles E. Blewer, *Binghamton Press*, is association president, and Alfred W. Cockerill, *Utica Press*, is secretary-treasurer.

C. E. BLEWER

Other speakers and their subjects will include: Glenn S. England, *Johnstown Leader Republican*, "Team Work Spells Success for Newspaper Circulation"; J. J. Allardice, *Brooklyn Eagle*, "Independent Carrier Delivery in Larger Cities"; P. L. Clar, *Norwich Sun*, "Street Sales in Smaller Cities"; J. S. Sullivan, *New York Daily News*, and B. W. Bloom, *New York American*, "Direct Delivery vs. Agency Operation."

Also: Martin A. Miner, *Syracuse Post Standard*, "Mail Promotion"; Dan W. Tanner, *Utica Observer-Dispatch*, "Suburban and Country Dealer Promotion"; Bernard Knight, *Syracuse Herald*, "Bus Service vs. Railroad Service"; W. F. Baldwin, *New York World*, "Effect of Tabloids on Standard Size Sales."

John T. Calkins, business manager of the *Elmira Star Gazette*, will discuss the value of circulation to the publisher.

Four past presidents of the International Circulation Managers Association will be introduced to the convention. They are R. S. Weir, *Buffalo Courier Express*; W. J. Argue, *Toronto Star*; J. McKernan, of Brooklyn, and A. E. MacKinnon, of New York City.

CIRCULATION ETHICS CODE PLANNED

Will Be Proposed to Carolinas' Circulation Managers' Association by Council, Durham Herald, at Spartanburg Convention, Oct. 18-19

A code of ethics for circulation managers will be drawn up and presented to members of the Carolinas' Circulation Managers' Association by C. C. Council, of the *Durham Herald*, at the association's seventh annual convention in Spartanburg, Oct. 18-19.

The convention will be opened Monday morning by Ben Hill Brown, Mayor of Spartanburg. Will X. Coley, acting president, will respond for the association.

Promotion of serial stories and other features will be taken up by H. L. Strickland, *Charlotte Observer*; R. M. Bynum, Jr., *Raleigh News and Observer*, will talk on the best methods of promoting street sales and handling sales boys.

J. L. Erwin, *Columbia State*; W. T. Corbin, *Greensboro News*; S. D. Bagwell, *Charlotte News*; J. M. Blalock, *Spartanburg Herald* and *Spartanburg Journal*, and V. L. T. Cooper, *Charleston Post*, will also speak.

MONITOR PLANS N. C. EDITION

Miss Ruth Sutton, of Kinston, N. C., is chairman of the "subject matter committee" to review copy for a special "North Carolina Supplement" to the

Christian Science Monitor, Boston, now being prepared.

GOLF DRIVING CONTEST

The *Chicago Tribune* will hold its second annual golf driving contest at Lincoln park October 17. The contest is open to both amateurs and professionals, with a 2-foot silver loving cup as the prize in the amateur division and \$200 in cash to attract those in the open contest.

10TH DISTRICT TO MEET IN BEAUMONT, OCT. 24

River Trip to Port Arthur to Mark
Opening Day—Progress on
\$500,000 "Advertise Texas"
Drive to Be Told

Members of the Tenth District, International Advertising Association, will hold their annual convention in Beaumont, Tex., Oct. 24, 25 and 26. Delegates en route to Beaumont will be entertained in Houston, Saturday night, Oct. 23, by the Houston Advertising Club and the Women's Advertising Club, James P. Simpson, Dallas, district chairman, has announced.

On Sunday, the opening day of the meeting, the delegates will take a trip down the Neches river to Port Arthur, where a dinner will be served in the evening.

General sessions will open Monday morning with Mr. Simpson presiding. One of the prominent speakers at the morning session will be J. R. Ozanne, advertising manager, Carson, Pirie & Scott, Chicago. In the afternoon L. A. Rodgers, secretary of the International Association of Display Men will give an illustrated talk on "The Value of Display to Retailers and to the Community."

One of the Tuesday speakers will be H. J. Kenner, manager of the New York City Better Business Bureau. His topic will be "Helping to Improve Retail Merchandising Conditions."

A newspaper man, C. B. Gillespie, vice-president of the *Houston Chronicle*, will talk on "The Newspaper, the Power Behind Advertising."

Progress to date on the campaign to advertise Texas will be told by John W. Carpenter, Dallas, president of the Advertise Texas Committee, Inc., under the subject, "Texas's \$500,000 Advertising Campaign."

Election of officers and selection of a place for next year's meeting will be the final business of the convention Tuesday.

KANSAS EDITORS TO MEET

Will Spend Two Days at State University, Lawrence, Oct. 22-23

Kansas editors will meet in Lawrence, Kan., Friday and Saturday, Oct. 22 and 23, for the annual round table conferences at the department of journalism of the University of Kansas. The round tables are the outgrowth of meetings which began some 15 years ago.

Prof. L. N. Flint, head of the department, announces the "order of events," as follows:

Oct. 22—Morning: Registration at journalism building; general sessions, lunch.

Afternoon: Round table for weekly newspapers, round table for daily newspapers; general session 3:30 p. m. with Irwin R. Kirkwood, editor of the *Kansas City Star* as the main speaker.

Evening: Dinner by the university to its editorial guests at University Commons, 5:30 p. m.

Saturday morning: Round table for daily newspapers; round table for weekly newspapers; 10:00 a. m., address "Better Business Methods," Alfred J. Graves, instructor in journalism, K. U., graduate and former head of the Tulsa (Okla.) Better Business Bureau; luncheon at noon to the visitors by the Lawrence Chamber of Commerce.

Afternoon: Homecoming game, Kansas vs. Nebraska, newspaper men as guests at the game.

PROSPERITY

Tune in on

INDIANA'S Prosperity Wave!

Indiana is always broadcasting its prosperity. Its strategic position in the heart of industry and commerce makes it the most desirable market for the national advertiser. A compact, unified state, with its rich farms, gigantic industries employing contented labor at high wages—where people live comfortably in their own homes—and who enjoy the best that life offers within their means.

A thrifty people who are interested in home-life, politics, sports, and who take pride in the enviable position of their state as a factor in the national life of their country.

Advertisers can make an intelligent appeal to Indiana's citizens as buyers. They will always listen to Reason, if your product is worthy of their attention—tell them your story through the papers listed below.

BUILDING NEWSPAPER CIRCULATION

Jack Estes on Dallas News Puts High School Boys to Work With Success—Gaining a Closer Relationship With Rural and Suburban Readers—P. A. Bloom Made Circulation Manager of New York Mirror

AROUND the slogan "A Paper at the Door is Worth Two in the Yard," Jack Estes, circulation manager of the *Dallas* (Tex.) *News*, has built up a sampling and sales campaign that has aided him considerably in solving problems coincident with a change from men to high school boy carriers in his city.

"The result of the first three months operation has been very satisfactory," Estes said this week. "We expect to solve what have hitherto been problems of service and solicitation with the new system."

The fact that the high school boys had to deliver their papers at an earlier hour than the men was turned into an effective sales argument by Estes. In notices to subscribers, the *Dallas News* made it plain that the new metropolitan delivery plan would "enable all our readers to get their paper at an earlier hour—each copy to be delivered flat on your porch, regardless of weather conditions."

On the day the new carrier system went into effect, Estes took care to introduce *News* subscribers to the boys delivering the route. On every home-delivered paper was pasted a small pink slip, headed "Good Morning" and reading:

"How do you like the way your paper is delivered today?"

"I am your new route carrier. I go to school and have this privilege of serving you each morning, rain or shine. The special early service—unrolled papers—my boss says, is just about the last finishing touch of service, and well becomes the *Dallas News*. Our editors tell us they are giving us the best newspaper possible. Now we boys realize that any improvement must come through our services from the presses to your door."

"I am proud of you as my subscriber. Thanks!"

Space was left for the carrier boy's signature.

In illustrated dodgers, left at the doors of present and prospective subscribers, Estes went into further detail about the new system. The picture, illustrating the slogan "A Paper at the Door is Worth Two in the Yard," showed a carrier carefully placing a copy of the *News* on a front porch.

"Our new system embodies the services of high school boys," the text of one dodger read in part. "These young men are in need of earning extra compensation to assist them in getting an education. We need the reliable service they are capable of rendering. Most of these boys are in business for themselves for the first time."

"The weekly collection plan eliminates bookkeeping and makes possible the reduction in subscription price. (The *News* is now being sold home delivered for 15 cents a seven-day week). The boys will appreciate your co-operation in rendering it possible to make collections each week at the home rather than necessitate calls at the husband's downtown address."

"More than 200 boys—the finest type of Texas youth—are serving *Dallas News* readers, making it possible for the subscriber to have each morning early an unrolled paper, flat, near, or in the door of your home, rain or shine, hot or cold."

When leaving sample copies at the homes of non-subscribers, another dodger is used, which reads in part as follows:

Dear Reader:

"Please accept the sample copy I am leaving for you."

"I am just starting in business for myself. The *Dallas News* has given me this territory, which includes several blocks, and your home is on my route. I buy my papers from the *Dallas News* at a wholesale price and sell them to my customers at retail, just the same as a merchant buys and sells goods. The more customers I have the more papers I sell, and the more money I make. As my

route includes only a few blocks, I must get every possible customer. To do this I must give the very best of service. My motto is 'Promptness and Courtesy.' Promptness means to deliver the paper at the same time early every morning. I can easily do this because my route is short and I can walk over it in about an hour. It is to my interest to start early, as I must return home, eat breakfast and get to school on time."

"Courtesy means to fold each paper neatly and place it right at your door, where you can reach it easily. When it rains I will take pains to place the paper where it will not get wet. If I had a big route and had to throw my papers from a moving automobile or other vehicle, I could not guarantee dry papers in wet weather."

By sponsoring rural baseball in its territory, the *Rochester* (N. Y.) *Democrat and Chronicle*, believes it has found a successful way to gain a closer relationship with its rural and suburban readers.

For the second year this newspaper sponsored several amateur baseball leagues in every city and village in its territory outside of Rochester. Invitations were issued in the spring.

"The response was beyond all expectations," Boyd E. Hart, member of the newspaper's staff wrote EDITOR & PUBLISHER. "Twenty-four teams, representing eight counties, sought entry and they were divided into four groups of six clubs each. Nearly 2,000 fans paid International League prices to see some of the final games."

Howard W. Kemp of the editorial department of the *Democrat and Chronicle* and the *Rochester Herald*, handled the organization work and direction of the leagues.

The *Scranton* (Pa.) *Republican* sent a number of its carrier boys to see world series games in return for good work performed in the interest of the newspaper. Circulation Manager Buck looked after the youngsters while in attendance at the games.

P. A. Bloom, formerly connected with the Macfadden Publications, Inc. and the *New York Evening Graphic*, has been appointed circulation manager of the *New York Daily Mirror*.

The *Seattle Star* held a county fair for children, Oct. 16. All garden products, fruits, flowers and vegetables were exhibited and the fair was open to all boys and girls in King county, city or country, under 15. Prizes were given for the best specimens exhibited.

Sunday newspaper, is now putting out a Saturday night sport extra. It appears on the streets at 10 o'clock each Saturday evening.

Forty-seven carriers of the *Worcester* (Mass.) *Evening Post* left Worcester Sunday on a trip to Niagara Falls as the guests of the Post. The trip was offered to all carriers who obtained a certain number of new six-month subscriptions for carrier delivery. Those who did not make the trip received a commission. As another means of boosting circulation, the Post is giving coaster wagons to all those who obtain five new six-month carrier subscriptions.

The boys were accompanied on the trip by Harold H. Sloan, circulation manager of the Post, James T. Kelly, assistant circulation manager and Israel Isenberg, country circulation manager, as well as by several district men. Valuable assistance to the carrier party was given by George Erb, Jr., country circulation manager of the *Buffalo Evening News* and roadman Alfred L. Murbach.

"This carrier promotion stunt," Mr. Sloan said, "netted more than 1,200 subscriptions, representing an increase of 500 on the carrier circulation."

The *New Bedford* (Mass.) *Times* is offering footballs to those obtaining a certain number of six-month subscriptions in a campaign to boost circulation figures.

Minor Shutt, formerly editor of the *Sweetwater* (Tex.) *Daily Reporter*, has been named circulation manager of the *San Angelo* (Tex.) *Daily Standard*.

The *Chicago Evening American* recently awarded a \$100 first prize and a \$25 second prize in a contest for the best pictures taken by premium cameras given away for one subscription to the paper. Women won both prizes. The contest was conducted by the junior carrier department of the *American*.

"Radiographs," a new contest, is being run by the *Chicago Daily News* in con-

nection with its broadcasting station WMAQ. The paper every week will print a blank ruled into squares and numbered. Then instructions will be given over the radio for drawing lines which if properly followed will result in pictures of birds, animals and people. Cash prizes will be awarded every week for the best "radiographs" submitted—the outline drawing made by following the broadcast directions to be shaded or colored in as the contestant desires. There will be prizes for children up to 14 years of age, for youths and older boys and girls up to 21 years, and still other prizes for adults.

The *Chicago Daily Journal* will award \$750 in prizes to the prettiest bride of September or October, in connection with the radio show held this week. The *Journal* will present a console radio set and living room furniture to the prettiest bride whose name is registered at the *Journal* booth.

OHIO'S GREATEST HOME DAILY

OUR OWN WORLD OF LETTERS

By JAMES MELVIN LEE

ME account of the part played by newspapers during the early days of War of the Revolution may be found in Samuel Adams—Promoter of the American Revolution" (Henry Holt and Company) by Ralph Volney Harlow, Assistant Professor of History in Boston University. Because this volume deals with the psychology and politics of the period it will help the editorial writer to understand the underlying causes of the situation of the colonies to Great Britain. Samuel Adams was much more closely associated with the papers of his period than previous histories have admitted. Early as 1747 Adams had organized a literary club dubbed by its opponents "Whipping Post Club" because of advanced ideas of its members. This was instrumental in starting the *Public Advertiser* which, while it lived only a short time, "put pep in the patriots," in the language of the street. Adams was a frequent contributor to this sheet though it has been impossible to trace his contributions.

The Stamp Act of course stirred Adams and his friends to action. Their medium was the *Boston Gazette*, a sheet that was to be known as the pet of the patriots. The *Boston Gazette*, published by John Gorton and Gill, had what might be called a sworn circulation of 2,000 copies—a remarkable achievement for the time. Its picric attacks upon the Stamp Act and its pointed demands for action on behalf of American "constitutional rights" brought this denunciation of Governor Bernard of Massachusetts, an infamous weekly paper which has been noted with Libells of the most atrocious kind.

Professor Harlow makes this comment on the press activities of Adams:

He does "public" opinion, so-called, not content to prove upon examination, to be the pet of a few self-appointed leaders, who take upon themselves the responsibility of deciding what the community shall be made to think and what shall be directed to act.

In the connection of Adams with the printing, Professor Harlow prints the following:

In addition to writing himself, Adams played an important role in directing what might be called the editorial policy of the *Gazette*. This of the Caucus Club was always full of propaganda, and Adams's own contributions formed but a small part of the virulent and dogmatizing and inflammatory material which appeared. From 1770 on the *Gazette* was edited by the new paper founded by Thomas, the *Massachusetts Spy*. If possible, the sheet outdid the other in its radicalism and violence of tone.

It may be noted in passing that Adams may sign his own name to his contributions to the *Boston Gazette*. As was the custom of his day he used such nominals as "Chatterer," "Vindex," "Idus," or "Valerius Poplicola," to name only a few of his pet pseudonyms. In this study of Samuel Adams so heavily on the columns of New England newspapers of the colonial period would strongly appeal to newspaper men of today. Indeed, the frequency of quotations is a fine tribute to the policy of the pioneer press of this country.

The book itself presents a personality of one of the most interesting characters in American history—Samuel Adams.

AR A. MOWRER, chief of the Berlin Bureau of the *Chicago Daily Tribune* contributes to *Harper's Monthly* for October an illuminating article on "How the Dawes Plan Works." Being the World War Mr. Mowrer is correspondent for the *Daily News* in Belgium, and in Italy. His brother, Paul Mowrer, is also connected with the *Daily News* as a foreign correspondent.

UNDER the somewhat striking caption "His Master's Voice," *The American Mercury* for October prints a personality sketch of Ivy Ledbetter Lee from the pen of Henry F. Pringle. Mr. Pringle, who was graduated from Cornell, is now on the staff of the *New York World*. In connection with this article the story is told of how a reporter on the *New York Herald* obtained an interesting interview with the late J. P. Morgan.

SIXTY-TWO newspapers in as many cities co-operated in compiling "A Study of 81 Principal American Markets." Copies of this book may be obtained from the 100,000 Group of American Cities, 19 South La Salle Street, Chicago, Illinois.

From this volume the *New York Times* has taken ten statistical pages for its booklet, "A Study of the New York Market." The other six pages of text tell about the *Times* and its distribution.

INTERESTING hours for newspaper workers may be found in "Adventures in Editing" (D. Appleton Company) by Charles Hanson Towne—even though the book deals with magazine rather than newspaper editing and making. Towne has had editorial connections with so many magazines that his volume has a remarkable catholicity in points of view. He began his editorial career, when only 11 years old, on a monthly periodical which he produced on his own typewriter. To this publishing venture he gave the very appropriate title, *The Unique Monthly*. He later had to bury it, but as he himself remarks "with no tears and few regrets." His latest editorial connection is as editor of *Harper's Bazar*.

In between these positions Mr. Towne edited a magazine for the Worthington Pump Company of Brooklyn. Then he assisted John Brisben Walker in putting out *Cosmopolitan Magazine*—at that time published at Irvington-on-Hudson. One of Walker's peculiarities was a distaste for telephones. Communications with the outside world had to be by telegraph. But Walker with the help of men like Towne produced a great magazine, until he became an automobile manufacturer. This change in interest undoubtedly explains the change in ownership of the *Cosmopolitan*—as Mr. Towne intimates in his book.

Whether Towne made the *Smart Set* or the *Smart Set* made Towne is a matter of debate. It would be safe to say that his association with that monthly is the one that will be the longest remembered by magazine readers. Handicapped by a limited exchequer he nevertheless did

wonderful work in developing new writers. To a new contributor he once sent a check for \$17 for a 1,700 word story. Small as this payment was, the contributor came back with another yarn at the same rates—only to come to New York a little later where he achieved literary fame under the nom-de-plume of O. Henry. Who discovered O. Henry is another matter of debate, but Towne was among the first to recognize the popularity of this great technician in the field of fiction.

It was while Towne was with the *Smart Set* that a compositor played a trick that still goes the rounds of editorial rooms. Ella Wheeler Wilcox sold Towne a poem which began:

My soul is a lighthouse keeper.

The printer put it into type as follows:

My soul is a light housekeeper

From the *Smart Set* Towne went to the Butterick Company as fiction editor of *The Delineator*, *The Designer*, and *The Woman's Magazine*. His adventures in editing while with these three magazines are told in detail and give the reader an interesting glimpse of how the wheels go round in a magazine plant. The next shift was to *McClure's Magazine* and then to *The Metropolitan*. The briefness of the latter connection cut short some interesting experiences. But Towne will have a chance to finish them on *Harper's Bazar*.

The editorial phrase "read with interest" exactly describes my perusal of "Adventures in Editing" by Charles Hanson Towne.

A VOICE that is well-known through radio broadcasting is that of H. V. Kaltenborn, associate editor of the *Brooklyn Eagle*. His chats over the air on current events have made his remarks almost a spoken newspaper.

His radio audience is familiar with how he was deprived by one of the broadcasting stations of any expression of editorial opinion. Consequently this au-

dience will find added interest in the article "On the Air" which he contributes to *The Century Magazine* for October.

This article takes up somewhat in detail the responsibility of the radio as a mold of public opinion. Both in subject matter and in mode of treatment this article in *The Century* is very similar to the address which Mr. Kaltenborn gave before the World's Press Congress at Geneva and which was reported at the time at some detail in *EDITOR & PUBLISHER*. Because the points covered in the article and in the address are the same no extended notice is needed in this department.

FUNK AND WAGNALLS COMPANY of New York City announces for publication this month "Dorothy Dix: Her Book." The advance notice says that the volume contains the best thoughts of "the little lady of New Orleans" as expressed in a life time of newspaper writing.

Largest Evening Circulation in Largest Market

NEW ORLEANS

RADIO MEN APPLAUD BAN ON PROGRAM PUBLICITY

(Continued from page 9)

ning's entertainment from the radio program in the newspaper. But there isn't one fan in a thousand who listens to Chicago because of the musical entertainment which it offers him. Distance affects quality of reproduction so detrimentally that a program under ordinary conditions, more than 200 miles away, offers a very poor comparison to the most mediocre local station.

In New York, for instance, it is likely that WEA, WJZ and WHN engage the attention of 80 per cent of New York's listeners. There are two or three other stations for which space might be spared and there are half a dozen stations in New York which are listened to primarily by those so close to them that their superior volume forces them upon a neighborhood following. Programs from Chicago and Boston are as thrilling to the radio fan seeking entertainment as a cubist exhibition is to a colorblind bricklayer. Distant listeners would be satisfied if the only thing broadcast by out-of-town stations was uninterrupted repetition of their call letters. So twelve inches of detailed programs of the more important local stations would meet 90 per cent of the needs of local listeners. In that space, the program of five or six locals could be published in complete detail together with a list of outstanding features of stations within range of good reproduction.

The needs of most long distance enthusiasts are satisfactorily met by a complete list of stations, their wavelength and frequency, and the time that they are on the air for evening hours only.

If a newspaper wanted to do an especially good job for the long distance enthusiast, it could publish a time chart as well as a list of stations, indicating by a series of Ben Day shadings or different styles of rules, the nature of the program broadcast at various hours. If only five different designations are feasible, the following classification would serve: 1. Talks, 2. Dance Music, 3. Classical Music, 4. Soloists, 5. Entertainers. By devoting one line to each station, this information could be carried for fifty out of town stations in a total of four column inches of space. That's a lot better than 40 inches. In 16 inches, allowing 12 for locals and 4 for distant stations, the needs of most broadcast listeners would be met.

If more detail were desired for the long distance chart, here is a suggested list of classifications: 1. Educational Lectures, 2. Speeches, 3. Farm Information, 4. Weather and Time Reports, 5. Sporting Events, 6. Dance Music, 7. Classical Orchestras, 8. Bands, 9. Instrumental Soloists, 10. Male Vocal Soloists, 11. Female Vocal Soloists, 12. Male Quartettes, 13. Mixed Quartettes, 14. Drama, 15. Humorous Entertainers, 16. Bedtime Stories, 17. Chain programs from New York.

The objection might be raised that interpreting 17 different kinds of shades on a sheet would be difficult for a long distance enthusiast. Nothing is too difficult for a long distant enthusiast. He would work out a full page crossword puzzle to identify a single, long distance station and consider his time well spent. As a matter of fact, if he hears a dance program from a distant station at a certain time and can follow down a column designating that particular hour to obtain a list of stations which are broadcasting dance music at that time and, knowing from the position of his dials the approximate wavelength on which the program is broadcast, he can narrow down the station which he seeks to identify to one or two.

Of course, this would make much more work in editing radio programs, but, if the complaint is that valuable space is being wasted, cutting it by nearly 70% should justify the effort.

Another complaint is in regard to the mention of advertisers who buy time on

the air. By reducing the amount of space devoted to program publication, this abuse is proportionately decreased. How serious is the harm in mentioning such a feature as Eveready Hour? If it has news value, isn't it worth publication? Does the news read that a famous Detroit automobile manufacturer purchased antique furniture at a New England town or does the newspaper say that Henry Ford bought the Wayside Inn?

If you substitute for Eveready Hour, "classical orchestra," or anything else you please, the newspaper is wasting its space. In the last analysis, all news is advertising in the sense that it brings the names of individuals before the public. Newspapers discriminate against those who perform stunts in order to create news about themselves. On the same basis, the broadcaster who uses radio for the sole purposes of obtaining space in the newspapers, or stations which sell time on the air because of its newspaper publicity value, should certainly be discriminated against.

No reputable broadcasting station sells newspaper publicity space. It is too busy selling the value of its facilities as a means of gaining goodwill to that limited class of advertisers which can use it to advantage. A broadcaster who sells free newspaper space or who sells his medium on the basis that it performs the function of advertising is a poacher.

If the user of broadcasting is after newspaper space, it can be bought much more cheaply from the newspapers directly. The most successful users of broadcasting advertise with paid space in newspapers the feature which they are presenting. This practice will continue and grow because it increases the listening audience. They also advertise their products in the newspapers in order to present direct selling arguments because the radio audience is substantially the newspaper reading audience. They use the newspaper for selling purposes, for the presentation of selling arguments, and radio for the purpose of gaining goodwill and sympathetic attention to their advertising.

Since the newspapers sell goods and radio wins sympathetic name publicity, radio and the newspapers are non-competing. Winning favorable attention to trade names helps to make newspaper advertising more effective. As a competitor for the newspaper's dollar, radio is one of such small proportions that it is ridiculous to regard it with any apprehension. If the revenue from commercial broadcasting ever reaches a total of 1 per cent of the amount spent for newspaper advertising, it may be complimented on its tremendous growth.

The combined income of all the stations on the largest broadcasting chain in the country is smaller than the advertising revenue of many a newspaper in towns of less than 50,000 population. The number of concerns which can profitably use name publicity is limited to those having immense distribution, affecting every class of society. Naturally, such concerns are newspaper advertisers. As the limitations of the radio medium become known, it will be found to be inevitably associated with large newspaper advertisers and persistent newspaper advertising. It is a supplementary medium and not a primary one.

One of the things mentioned by Mr. Robb is the obligation of set manufacturers to support broadcasting. If the purchase of a radio set included its share of the cost of presenting the programs which are radiated during its useful life, the price would be prohibitive. The obligation of set manufacturers to support broadcasting is no greater than that of newsprint makers to publish newspapers or phonograph makers to give a perpetual supply of records. Of course, if newspapers were to suspend publication, newsprint makers would busy themselves with checking their discontinuance. If broadcasting stations are closed down, set manufacturers would take steps to keep a desirable number (less than half now operating) running.

Radio set manufacturers contribute liberally to broadcasting by maintaining stations and by presenting paid talent. The public will not pay for broadcasting

directly and the radio industry is in exactly the same boat on that score as newspapers are with regard to baseball and radio news. It's a shame that the persons who profit do not pay directly, but they do pay, in one form or another, in the end. Since other than radio set manufacturers can and do profit from broadcasting by the goodwill which it can secure for them, what valid objection is there to sharing the cost in proportion to the goodwill value which they obtain? Because that's one dollar that can't be spent directly on newspaper advertising? The same argument applies to every cent spent by every corporation for anything except newspaper advertising. The power of the argument will disappear when broadcasting's functions and limitations are fully recognized and understood.

Another abuse mentioned is the free publicity which set manufacturers secure in newspapers. This is an abuse in newspaper editing and not an abuse of radio. If newspapers publish publicity, of course set manufacturers cannot be blamed for giving it to them. The radio industry has demonstrated its faith in newspaper advertising by buying paid space liberally. If that advertising has been gained with publicity as a bait, it is time for the newspapers to realize it.

Apparently some newspapers prefer free publicity to radio features that cost money. I have observed a number of radio syndicate features which have starved to death because of free publicity competition. Possibly these features have not been an expert diagnosis of newspaper needs, but that difficulty would certainly be remedied if newspapers supported radio syndicate features.

A. B. C. MEMBERS LINE UP FOR PROXY BATTLE

(Continued from page 7)

Bureau has the soundness of this fundamental theory been assailed. Your board in its annual report for the year ending Oct., 1920, stated:

"Perhaps the most encouraging trend of opinion regarding the work of the bureau on the part of publisher members, has been the expression of desire from various classes of members and from various sectional bodies of members to secure direct representation on the board of directors."

"Various groups of publishers have felt that they individually should have representation on the board and the board views with pride this desire on the part of these sectional organizations for individual representation, because it evidences the growing recognition of the work of the bureau and the responsibility of its government."

"Nevertheless, the board passes this matter along to the convention at this time for its consideration, if it so desires; but the board desires to call particular attention in the consideration of this subject, to the fundamental principle on which the bureau is based, in regard to representation on the board of directors."

"It was regarded by the founders of bureau as being a rule which should be held inviolate, that the board should be composed of a majority of advertising members."

"But, as a matter of fact, in a meeting of the board of directors, a stranger would find it impossible to determine to which class an individual director belonged. Every member of the board uses his responsibilities and duties in the broadest possible manner, and the discussions the rules made are in the interests of the board and not in the interests of any individual section or class. The wonderful characterizing the meeting of the board has demonstrated the wisdom of the founders of the bureau, and any change that are made should be made with extreme caution."

"As a matter of fact, the only way which additions can be made to the board would be by proportional additions to advertiser membership on the Board. At the present time there are two advertising members, two newspaper publisher members, two magazine publisher members, two farm paper publisher members, two business paper members, making in all. It is necessary, therefore, to elect eleven advertiser members. In various publication divisions there is sectional consideration. A member is elected from the South, or the West, or from Canada, at the choice and discretion of the individual publication division, whose wishes are regarded almost as law in the convention when the election of Directors occurs."

"It is hoped that this broad, international character of Bureau's work will be perpetuated, that no sectional divisions occur in making up the membership of the board of directors."

After a thorough discussion at the convention the membership reaffirmed principles on which the bureau was founded.

This somewhat lengthy communication is in response to many requests for information in regard to this matter of fundamentals of the bureau."

"If larger representation is given to newspapers on the board of directors, may mean either domination of the board by one class of membership or a proportional increase of all classes of membership which would make that body unwieldy if not impracticable."

This is the argument advanced by the sections of the membership of the A. B. C. and should be taken into consideration in weighing proposals advanced for increase of representation in any class of the bureau's membership.

There are several members of the committee of New York newspaper publishers who may not have been or are not familiar with the fundamental principles on which the Bureau was founded.

It is hoped that with this information they will wisely execute the proxy power which they have solicited, so that at this convention of 1926 there may be a reaffirmation of the principles which have made possible the success of the Bureau in its work for the publishing and advertising world.

USE HEADS SEVENTH DISTRICT AD CLUBS

Business College Executive
 named President at Tulsa Sessions
 —St. Louis 1927 Conven-
 tion City

A. Guise, manager of the Tulsa Business College, was unanimously elected chairman of the Seventh District Advertising Clubs, International Advertising Association, at the sixth annual meeting in Tulsa, Okla., Sunday, Monday and Tuesday of this week. Attendance at the convention was hampered by heavy rains in the states comprising the district, Kansas, Oklahoma, Arkansas, Missouri and Louisiana. St. Louis was chosen as the place for the 1927 meeting, the date to be selected by the delegates.

The Tulsa Advertising Club was hostess for the delegates. Monday afternoon was devoted to an automobile tour of the city followed by a luncheon at the Mayo Hotel. Dr. John H. Evans spoke on "Some Creative Ideas in Advertising." General sessions began Monday. Gov. L. B. Trapp, Mayor Newblock of Tulsa and President Fred L. Foster of the Tulsa Advertising Club spoke briefly to the visitors. Monday's sessions stressed merchandising problems. A luncheon was held at noon at the Tulsa club. At night a dinner-dance was held at the hotel ballroom for the delegates and their wives. Golf was a special attraction for the visitors. Herman Lewis, president of the Advertising Club of St. Louis, spoke Monday on "The Greatest Force in the World."

SHOPPING NEWS EXPANDS

Detroit Advertising Organ Now Circulated in 10 Nearby Towns

Beginning with the issue of Oct. 11 *Detroit Shopping News*, an advertising paper published by the leading merchants of that city, extended its delivery service to cover the outlying towns of Birmingham, Brightmoor, Dearborn, Ferndale, Mt. Clemens, Pontiac, Redford, Trenton, Wayne and Ypsilanti.

The circulation of this edition, including the above towns, was 275,000, the largest number of papers yet distributed in any one week. Delivery is by carrier. The *Detroit Shopping News*, of which Henry C. Veon is general manager, was started Feb. 8, 1926, by 21 of the leading Detroit merchants. The initial issue consisted of 150,000 copies, which were distributed by carriers. The paper consists

COLORADO JOURNALISM SCHOOL USING EDITOR & PUBLISHER IN CLASS WORK

Careful Index Kept for Four Years Yields Wealth of Material on Newspapers and Their Problems, Instructor Declares—Shows Power of Press

By A. GAYLE WALDROP

Assistant Professor, Department of Journalism, University of Colorado

THIS story tells how an experienced reporter or copy reader may make \$1,000, and how EDITOR & PUBLISHER is made use of by students in the journalism department of the University of Colorado.

Among the awards provided for in Joseph Pulitzer's will is one "for the best history of the services rendered to the public by the American press during the preceding year. One thousand dollars (\$1,000)." Only once—in 1917—so far as the writer knows, has this been given. Yet in any year since then and in the years to come, a reporter or editor might compile from a careful reading of EDITOR & PUBLISHER, a history that would win the Pulitzer award. It would be a job in editing—EDITOR & PUBLISHER brings together all the facts.

Such a trade journal should not escape the attention of journalism students. At the University of Colorado it has not. In 1922 advanced students were assigned selected stories and were held responsible for them in their final examinations. This system was continued in succeeding years, the results being highly satisfactory. But it soon became evident that a use of more than the current issues was desirable. Here was a magazine that should be indexed, made available for instant reference, for special assignment, for ready use by students this year and next year, and for students in all classes.

If the original purpose of assignments in EDITOR & PUBLISHER was to be conserved—if the history of journalism was to be made a thing of the present as well as the past, if ethics was to be shown as a real and pressing subject, if news writing was to be more than academic, if reporting was to rise above routine, if copy reading was to be charged with imagination and buttressed with experience, if editorial writing was to be more than filling the columns, if the newspaper's relation to law was to be clear, and if current problems were to be challenging and inspiring—then an index must be made.

Such an index, grouping stories under the courses in which they would be of most use, was made. Under these major heads there were subdivisions. The index is for the use of instructors to make assignments for parallel readings, to draw material for lectures, and for students to choose stories as they are interested. The index is not thorough in that it includes every story printed, but it is complete in listing the major stories—sometimes under several heads—so that they will be available for ready use.

And what a wealth of material useful not only to students but to all newspapermen and women is to be found in the past four years of EDITOR & PUBLISHER! First, under the major subject of "History," which is divided into these parts: Newspapers and Newspapermen, The Future, Criticism and Replies, Ethics and Problems, Comparative Journalism, and Advertising. "Chandler of the Los Angeles Times," the birth of the North American Newspaper Alliance, the obitu-

ary of Charles R. Miller and of Lord Northcliffe, Roy Howard succeeding Milton McRae, "The Life and Death of E. W. Scripps," "The Inside Story of the Herald-Tribune Merger," interviews with Cyrus H. K. Curtis, W. R. Hearst, Arthur Brisbane, the Springfield Republican centenary, the sale of the Dallas News, the Chicago Daily News and Kansas City Star, the complete story of Magee's fight in New Mexico, Coleman's history of the New York Herald—these are representative of the first subdivision.

Under The Future the tabloid press is discussed, the consolidation of newspapers recorded and Morley's Religio Journalistic, and Yost's Principles of Journalism and Flint's Conscience of the Newspaper are reviewed, to list nothing more.

Passing over a long list of stories on criticism and replies wherein figure the names of Butler, Villard, Bliven, Beck, Bellamy, Crowell, Bleyer, Mencken and Seitz, we come to Ethics and Problems. Crime news suppression and segregation bulk large, with privacy and free speech prominent.

Comparative journalism includes all references to the press of foreign countries, chiefly England, France, Germany, Russia, Spain, Italy, and Japan. There are many stories by native and American journalists in this division.

Under the major head of News are considered news values, special kinds of news, reporting, reporters and their experiences, foreign correspondence. Not less than fifteen articles discuss news evaluation, W. P. Beazell, Julian Mason and Kent Cooper standing behind stories. Ralph Pulitzer advises accuracy and fairness.

The writing of special business, sports, dramatic, musical, religious and scientific news is outlined by experts: S. S. Fontaine, Damon Runyon, Alexander Woollcott, Percy Hammond, Deems Taylor and other equally well known writers.

More than sixty stories tell of the life history or the stirring exploits of reporters who have achieved within the past ten to twenty years. W. P. Beazell tells of the days when the beat was the thing, Stackelbeck's expedition into Senator Fall's state is recounted, Covering the Bay With the Ship News Men is included, The Success Story of David Lawrence, The Weird Adventures of 200 Reporters at the Evolution Trial, Two Newspaper Men Braved Peril for Amundsen story, Newspaper Ingenuity Tested by Shenandoah Crash—these are a few of the titles in one of the richest divisions.

Smith's articles on Good Typography are of value in the course in Copy Reading and Make Up, and in Editorial writ-

ing. Under the first subject are these stories among many others: Editors on News Handling, Copy Desk is Weakest Link in Modern Newspapers, Stefansson Asks Careful Editing of Arctic Stories, The Influence of Headlines.

Stories grouped under Editorial Writing include interviews and articles by editorial writers, reviews of collections of editorials and related books, personality sketches of colyumists, and a series on cartoonists. Hamilton of the Wall Street Journal, Frank I. Cobb of the World, William Allen White of the Emporia Gazette, Walter Harrison of the Daily Oklahoman, Irving Brant formerly of the St. Louis Star—these are headliners. Books reviewed, among others, are: Lippmann's Public Opinion and The Phantom Public, White's The Editor and His People, Cobb of the World, and Kent's The Great Game of Politics.

Brown, F. P. A., R. H. L. Sullivan, Marquis and House are included among the colyumists. And Christopher Morley, who is represented by "Getting an Education and Getting Paid For It," Jay House's Odyssey of a Columist which appeared in the Saturday Evening Post is reviewed. "Our Own World of Letters" brings to the attention of journalists and journalism students everything of any importance in their field that is printed in any magazine, book, or newspaper.

The series on cartoonists is extended, including among many: Webster Kirby, McCutcheon, "Ding," Fisher, Roth, Briggs, McManus and Orr.

Philip Schuyler's series on Libel during the present year, containing the garnered wisdom of many editors, is of much value as a supplement to a course in The Newspaper and the Law. The stories have the advantage of personal experiences and of actual cases. Various stories about successful small city dailies are equally useful for students of community newspaper management.

For the final division of the index, Current Newspaper Problems, there is no dearth of material that is important and stirring. It is the story of newspapers "who through faith" subdued railroads,

wrought anti-gambling laws, checked estate slumps, improved local credit conditions, provided for the city's neediest, posed legal corruption, built better homes, caused more cotton to grow on five acres, put to rout the boll weevil, encouraged local art talent, and "seen those who needed it most, disregarding their own interests." If the indexing EDITOR & PUBLISHER did no more than call the attention of journalism students to America's crusading press and to convince them of its power, it would be inestimable power. It would delay if it prevented the coming of the correct cynicism that many newspaper men require, and would give the recruits confidence in their profession that would withstand "the wreckful seige of bading days."

Advertising results depend on more than the mere number of a publication's copies circulated. They are measured in the reader's attitude of mind toward the newspaper.

STORM PUBLICITY HIT BY FLORIDA PRESS

Three Groups Meeting in Daytona Beach Discuss Plans for Off-Setting "Exaggerated Statements"

Plans for off-setting "misleading and exaggerated" statements of the storm damage in Florida were discussed by Florida editors and publishers gathered in Daytona Beach, Friday and Saturday of last week. Three Florida press groups were in session, the Associated Dailies of Florida, the South Florida Press Association, and the State Press Association.

W. A. ELLIOTT

C. C. Carr, of the Lesan-Carr Advertising Agency, declared that the state's greatest need was to disseminate the truth about the storm and to assure the public that it would find fair prices in Florida this winter.

Major Alfred Birdsall, of the St. Petersburg News, proposed that editors and publishers of the nation be invited to Florida as Florida's guests to see the state for themselves and to write what they please.

D. H. Conkling, Palm Beach Post, said that Kenneth Roberts, journalist, was now in the state preparing a story for the Saturday Evening Post and that he had been impressed with the fact that Weather Bureau records show that no storm has struck Florida between December and May and that the last storm which did any considerable damage was 39 years ago.

Morton M. Milford, editor of the Miami News, said that the hurricane, despite its great loss of life and material damage, would accomplish three desirable things for Florida:

- 1—Better building restrictions.
- 2—Better sanitary conditions.
- 3—Drain off the dross and leave the gold in the population of Florida.

He declared that those who had left Florida because of the storm had come with nothing and expected to get rich overnight.

Appreciation of the efforts of Richard I. Edmonds, editor of the Manufacturer's Record, "to remove the slur placed upon Florida" by John Barton Payne, president of the Red Cross, was expressed by editors and publishers.

The newspaper men especially thanked Mr. Edmonds for his description of the splendid relief work done for storm sufferers by Florida leaders in every walk of life and condemned the statement of Mr. Payne that "Florida was more interested in its tourists and hotels than in the suffering."

"If any attempt has been made to minimize the damage from the hurricane, has been done because of that inimitable spirit of Florida which made her attempt first to take care of herself," the editors declared.

The communication was signed by Lew

B. Brown, St. Petersburg Independent, president of Associated Dailies of Florida; George E. Hosmer, Fort Myers Press, president of the Florida State Press Association, and Gilbert D. Leach, Leesburg Commercial, president of the South Florida Press Association.

A committee consisting of T. E. Fitzgerald, publisher, Daytona Beach News; C. C. Codrington, Deland News, and Mr. Milford was appointed to try to double the legal advertising rate at the next session of the legislature, the present rate having been in force for twenty-four years.

Gilbert D. Leach of the Leesburg Commercial led a discussion of foreign advertising for weekly papers, the gist of which was that the publishers will profit most if they act as their own agents and solicit business through personal letter.

The Associated Press Club elected W. A. Elliott, Jacksonville Times-Union, president; Lew B. Brown, St. Petersburg Independent, vice-president; and B. M. Mitchell, Miami, secretary-treasurer. Mr. Milford was chosen Florida director on the Southern advisory board. It was decided to establish a winter bureau at Palm Beach and it was urged that special staff men be attached to state bureau during the winter to cover sport events of national interest.

The proposal of W. A. Allan, managing director of the Associated Dailies, for amalgamation of the three press bodies did not meet with much favor and action was delayed.

The Dailies will hold their annual meeting in Jacksonville on Dec. 9.

KANSAS DAILY INCORPORATED

The Kansas state charter board has issued a charter to the Independence Publishing Company, publishers of the new Independence (Kan.) Reporter. The company is capitalized at \$120,000 with D. Clyde Knox, Charles Spencer, Kirke W. Dale, Oscar S. Stauffer and J. R. Porter as incorporators. The company purchased the Independence Free Press, a morning paper and the Reporter, the afternoon paper, merging them under the name of the Independence Reporter and Free Press. Clyde Knox formerly owned the Reporter and Mr. Knox the Free Press. The new paper is an afternoon publication.

PRESS CLUB 50 YEARS OLD

To observe its 50th anniversary the New York Press Club is inaugurating a series of entertainments, the first of which will be held Sunday, Nov. 14, at the 44th Street Theatre, New York. Proceeds will be devoted to the club's relief funds. Sidney W. Dean is club president.

COMMITTEE NAMED TO PLAN N.E.A. MEET

Large General Group Appointed at Omaha by Ole Buck, Nebraska Field Manager—Three States Represented

Plans to make the National Editorial Association convention in Omaha next June the most successful in the organization's history were made last week, when a state-wide organization was formed at Omaha with Ole Buck, Harvard, Neb., secretary of the Nebraska Press Association, as chairman.

The meetings, which were held at the Hotel Conant and Chamber of Commerce, were attended by representatives of railroads, press associations and chambers of commerce from Nebraska and Iowa.

Selection of an executive committee will be made soon by Mr. Buck.

The general committee, chosen by the executive body of the Nebraska Press Association, will include:

W. A. Brown, president Nebraska Press Association; H. D. Leggett, Ord, vice-president; C. L. Jones, Council Bluffs; B. J. Seger, Scottsbluff and Gering, Neb.; Lloyd Thomas, Hastings; John Curtiss, Lincoln; A. F. Buechler, Grand Island; High Brown, Kearney; Ira L. Bare, North Platte; J. J. McIntosh, Sidney; James Good, Chadron. Francis Case, Hot Springs, S. D.; Earl D. Morford, Deadwood, S. D.; I. L. Curran, Lead, S. D.; John B. Green, Rapid City, S. D.; R. L. Brownson, Belle Fourche, S. D.; F. G. Humphrey, Norfolk, Neb.; George Wolz, Fremont, Neb., and Harley Conant, representing chambers of commerce; E. B. Oddy, Woonsocket, S. D., president, South Dakota Press Association; Wil V. Tuford, Clinton, Ia., secretary-treasurer, Inland Daily Press Association; E. F. Tucker, Ames, Ia., manager Iowa Press Association; H. T. Brown, Grand Island,

"Get It FIRST but First Get It RIGHT"

63 Park Row
NEW YORK CITY

NEW HOME OF SARASOTA (FLA.) TIMES FINE EXAMPLE OF SPANISH ARCHITECTURE

ABOVE is the handsome new home of the *Sarasota (Fla.) Times*, which was recently occupied by that newspaper.

The building was designed by New York architects, and the design is Spanish throughout. The tile used on the roof was imported from Spain, while other tile used in stairways was imported from Tunis, Africa. The unusual interior of the business office has attracted much attention. It duplicates some of the old business buildings of the ancient cities of Spain.

The building rears its three stories of tan stuccoed grace above Seventh street

at Broadway. It is one of the most efficiently laid out newspaper plants in the state as well as one of the most beautiful. Mechanical equipment installed at great expense is of the most modern construction.

The upper floor is devoted to the editorial offices and composing rooms. On the next lower floor, comprising a mezzanine to the first floor and a hanging floor above the mailing room, are located the advertising and job departments. On the ground floor are the business offices and the press room. Adjoining the press room is the mailing room.

SIR RODERICK SPEAKS ON CABLE RATES

Chairman of Reuters Says Establishment of Competitive Charges Between London and Canada Would Increase Volume of British News

By Telegraph to Editor & Publisher

Montreal, Oct. 14.—If governments of this Dominion and the United Kingdom would only see their way to establish a competitive rate on cables between London and this country, you would have to this country a direct service for British news declared Sir Roderick Jones, chairman of Reuter News Agency, in the course of an address before the Canadian Club.

"The establishment of a competitive cable rate between London and Canada which would enable a greater volume of British news to be brought to this country direct instead of by New York, would," stated Sir Roderick, "be a fine act of public policy and a very beneficial one from an imperial point of view."

"At present, he pointed out, it was an economic difficulty for newspapers of Canada to get a larger direct service for British news from London, Sir Roderick intimated that the matter might possibly come up at the Imperial conference which opens in London on October 19. He referred to his past efforts to have a competitive cable rate established between London and Canada, and declared that his attempts to have such a rate put into effect would be continued in order that

British news might be received in this country direct from London."

Sir Roderick briefly traced the establishment of Reuters as a news distributing agency over eighty years ago. In 1915, Reuters had been reorganized in such a manner as to insure that for all time its control as a British institution would be assured. Reuters was connected with the principal news agency in each country in the world for the dissemination of news. In Canada, its connection was with the Canadian Press, which in his opinion was a "fine organization." While in the United States, Reuters was linked up with the Associated Press. In its work as a news

agency, working with the typical agencies in each country, it performed a duty in preserving the peace of the world, through bringing information about one country to another and about one race to another; its business as a news agency was not to interpret views but to collect facts and in-

formation and present them. The duty of interpreting news was the work of special correspondents, there was however no "unhealthy rivalry" between news agency and special correspondents and each was the compliment of the other in the newspaper world.

AN industrial survey of your city can be used as the foundation of a weekly industrial page, the advertisements being sold to many industrial firms which cannot be brought in under the regular headings. A member of the reportorial staff can write the series of articles—a good general title for which is "The Industrial Romance of—." The idea has been used successfully on several dailies.—M. V. Briggs, Duluth, Minn.

The *Oakland* (Cal.) *Post Enquirer*, has worked up two full pages of used car advertising for the classified section under page headings: "Today's Best Buys in Good Used Cars." Most of the advertisements are in display, and half are single column. The sale of a used car involves enough money, ordinarily, to warrant more than a three or four line classified ad.—Fremont Kutnewsky.

Does advertising pay? An Indiana newspaper placed a reporter in a prominent drug store to listen to the inquiries of customers. A total of 100 customers was so checked. Out of the hundred, 87 asked for some advertised article by its proper trade name; four others "guessed" the name, and the remainder just asked for the article in general and accepted what was offered. A good stunt for promotion copy or feature story.—B. A. T.

A Paterson newspaper sometime ago put on a contest designed to boost trade in one of the city's many shopping sections called "The Mystery Man."

On a certain day the "Mystery Man"

was to appear in the stores of the 28 merchants who agreed to participate in the contest—and to each of six persons who happened to be in the store he would give \$1 in cash. All told, \$168 was distributed.

Six full pages was used and paid for and all the participating merchants turned an ordinary Wednesday into a good Saturday. Total cost to each merchant was \$20.—J. M. K.

If the advertising solicitor in making his daily rounds can give to the merchant some concrete reason for business optimism, he will be more likely to sell space. Increase of bank clearings and deposits are used effectively by some solicitors. The advertising manager of the *Bloomington* (Ind.) *World* is using a new one. He points out the increase in power consumption as an indication that manufacturers are busier and that pay checks will be larger. Most of the 30 stone companies in and around Bloomington use electric power and the advertising manager can have ready access to this information at the office of the Interstate Public Service Company.—Norman J. Radder, Bloomington, Ind.

As Children's Book Week will be held throughout the country from Nov. 7 to 13th, now is the time to line up book stores, stationery stores and gift shops for ads. Reading matter for a page layout of ads may be furnished by the children's librarian of your public library. Five thousand cities and towns celebrated this week last year.—C. M. L., Seattle.

STALLED motorists who are financially embarrassed often leave various personal articles for deposits in lieu of cash at gasoline filling stations. A Kansas City filling station attendant recently received a gold tooth for payment. An interesting feature story can be obtained in your city by interviewing filling station attendants to discover strange articles pawned by motorists and to ascertain how many of these are redeemed.—W. R. A.

Each Monday night KMOX, the radio broadcasting station of the *St. Louis Globe-Democrat*, does honor to some town in the paper's mythical "49th State." An "Etherlogue" is dedicated to it and the village pride is swelled by having its name and fame heralded throughout the

(Ind.) *Times* is that run under the boxed caption, "Did You Hear That—," which consists of short news and personal items ranging from 2 to 6 lines long. The feature, which runs every other day on page 1, column 2, provokes interest and is unbeatable in a paper where community interest is paramount.—A. J. Mayo.

The *New York Sunday World* has a most interesting feature in a series of articles—interviews with leaders in various lines—on what the "professions" of medicine, dentistry, advertising, real estate, etc., offer a young man and woman. Usually if such articles are left to the laymen to write they too often become preachments, but if handled as an interview pertinent points are brought out, and a widespread reader interest is aroused both among younger and older readers.—L. G. D.

A Davenport paper made an excellent feature out of the assignment: "Queer and Unusual Calls for Western Union Messenger Boys Tax Ingenuity to the Utmost." An interview was obtained from the local W. U. manager.—D. A., Davenport, Iowa.

The *Cleveland Press* is running a series of editorials on the various departments and department heads that go to produce the daily paper. A caption such as "Know your paper and the men who make it possible" might be used. It causes greater interest in the entire paper.—Thomas McKee.

A crowd of football fans is always hungry for football results from other places. As a bit of promotion work supply the yell leaders with the scores from your newspaper office having them preface each announcement with, "Through the courtesy of (your newspaper), etc."—F. D. H., Rockford, Ill.

In practically every community the duck hunters activities are governed by

daylight or sunrise and sunset time. Secure from the state fish and game department a copy of the official sunrise and sunset time and make a daily feature it during the hunting season. The *Mass. City* (la.) *Globe-Gazette* is doing this now.—Anton Jeppesen.

Haunted houses in early fall seem even more haunted than usual. Most of the have disappeared, but you will find worth a feature story if one remains standing in your vicinity. Halloween drawing near, increasing the value of such a story. And a little mystery in the lead will put over the feature with a big kick.—Ralph Gible.

With winter fast approaching a little story on nature would not come amiss. Explain scientifically how the trees change colors. Also tell about bird migrations—where local species spend the winter. Here is a story that is sure to interest.—C. E. Pellissier.

Facts about New England

Leads in Paper Manufacture!

New England has always had the reputation as a producer of quantity and quality paper, the annual production totals well over \$250,000,000.

Closely related to paper production are the printing and publishing trades and allied industries. Probably more high class printing is done in this territory than in any other part of the United States.

You will find located in this compact little area two of the largest general publishing houses—and five of the ten largest school book publishing plants in the country.

These great manufacturing and commercial interests, of vast importance to national progress, employ the highest type of skilled labor. This class of people live more comfortably and enjoy more than the average luxuries of the families in moderate circumstances.

Can any national advertiser afford to overlook this market. Rich in earning and buying power—easily covered at very little investment cost,—it is always a prosperous market for business. Ask these papers listed below to show you the way to greater sales.

TO NEWSPAPERS LOADED WITH MAT SERVICES

Acquire the Newspaper Advertising Service of the Chicago Tribune Without Disturbing Your Budget

To hundreds of newspaper publishers, business and advertising managers all over the country who are interested in increasing their advertising volume this is a dramatic announcement.

..... No matter how many advertising mat services you are now buying or the term of your unexpired contracts, we have a plan whereby the Newspaper Advertising Service of the Chicago Tribune may become available to you at once (Provided the rights for your territory are open) without undue expense on your part or any extraordinary inflation of your service costs.

..... A plan to help you share in the benefits of this lineage-building service at once, to secure for you the maximum of business for the heavy advertising months of November and December; to offer advantages that will be exclusive to your publication in your territory; to set in motion the principle that helped triple the Chicago Tribune's local lineage in ten years, so that it may write a similar story for you.

How The Chicago Tribune Newspaper Advertising Service Differs

The Newspaper Advertising Service of the Chicago Tribune is an advertising mat service produced by a newspaper from a practical newspaper standpoint; based on our success in increasing our local lineage from 5,582,211 to 16,153,941 lines. It contains reproductions of copy, artwork, illustrations, layouts, merchandising ideas and complete advertisements, most of which have appeared or will soon appear in the Chicago Tribune—material that every advertiser wants and every advertising manager needs to make the gains his publisher expects of him. Twenty-eight artists and ten copy and mer-

chandising men, stars of the retail advertising field, comprise the backbone of this service, directed by the vast resources and experience of the Chicago Tribune.

Each month more than forty pages of mats and proofs are shipped—more quantity, more completeness and more useability than ever offered a newspaper before. Mats come complete with type matter. Binder is furnished. There is no filing problem. Included free, also, is the Chicago Tribune's Classified Advertising Promotion.

Tribune Newspaper Advertising Service differs because—

1. Being scientifically prepared and of proven tested nature it has much greater pulling power.
2. Because of its high pulling power it creates advertising prestige and acceptance which are quickly translated into increased volume and profits.

Buffalo the Wonder City of America

Some Facts About Buffalo

Buffalo's population is 538,016. (State census, October, 1925.)

Retail trading radius population exceeds 1,000,000.

Building permits granted in the Greater Buffalo area in 1925 represent a total value of \$225,000,000.

There are 122,276 homes in Buffalo. Of these more than 40 per cent are owned by householders.

Erie County has registered 138,400 pleasure cars, 115,187 commercial cars, 887 buses, 1,063 motorcycles, 543 trailers and 1,437 omnibuses.

Buffalo Savings Banks average \$810 per depositor. The per capita deposit in all banks is \$862.

The total deposits in Buffalo banks are \$517,451,035.

The total deposits in savings banks are \$138,077,371.

In the four savings banks there are in all 169,115 depositors.

In the metropolitan district of Buffalo there are 3,000 manufacturing establishments with a total weekly payroll of \$2,750,000.

Sixty-three per cent of the lines of manufacture recognized by the U. S. Census of manufactures are represented in Buffalo.

The twenty leading industries of Buffalo in order are—automobiles, bodies and parts; flour and grist mill products; slaughtering and meat packing; foundry and machine shop products; iron and steel; coal tar products; linseed oil; bread and bakery products; soap; railroad repair shops; rubber; printing and publishing; ship building; brass, bronze and copper products; leather, tanned and curried; malt; furniture; oil refining; lumber and planing mill products; airplanes and parts.

Buffalo has the largest grain elevator in the world. Its 28 elevators have a capacity of 39,000,000 bushels. It is the second largest flour milling center of the country, with approximately 10,000,000 barrels output annually.

At Buffalo nearly 70% of all air brake hose used in the United States is manufactured.

The Buffalo district is one of the most extensive producers of pig iron in the world, having over 20 large blast furnaces with a combined annual capacity of between 2,500,000 and 3,000,000 tons.

Buffalo leads the United States in the production of linseed oil.

Buffalo has a chemical plant devoted to the development of the aniline dye industry which is rated as the largest dye plant of its kind in the United States.

At Buffalo is the greatest development of hydro-electric power to be found anywhere in the world. The average cost of power is the lowest in the nation.

The Buffalo district is one of the greatest lumber markets in the world.

The Buffalo district produces 75 per cent of the world's wall board.

Buffalo holds the wonderful record of a gain of 472 new industries in a five-year period, which is a greater increase than is to be found in any other of the twenty-five first-class cities of the United States excepting New York.

During the year 1925, 757,092,599 kilowatt hours of electricity were consumed in Buffalo.

Summer tourists who visit Buffalo number more than 1,000,000 each year.

Buffalo is the eighth largest manufacturing city and the second largest inland port in the United States and one of the ten leading ports of the world.

Signaling the Officers of a Vast Buying Army

*T*HE buying habits of the nine millions in the New York metropolitan area are largely influenced by the purchases of the progressive leaders of the city.

These substantial officers of the metropolitan army have for years shown a decided preference for one morning paper—the New York Herald Tribune.

This preference is particularly marked in the residential suburbs, where thirty-two percent of the men listed in the Directory of Directors have their homes, and where the Herald Tribune is the preferred standard size morning paper on weekdays.

Its readers particularly enjoy the great Sunday Herald Tribune, with its new and enlarged magazine section, its eight pages of comics in colors, sixteen pages of gravure pictures, its Radio Magazine, its Junior Magazine, its famous literary review, "BOOKS".

A DVERTISEMENTS in the Herald Tribune attract the attention of readers who not only buy, and buy largely, for themselves; they also set a buying example that is followed by an army of others.

Newspapers Vote Down A. B. C. Rate Card Proposal; Would Increase Directorate

Divisional Meeting Rallies Round New York Opposition to Directors' Plan—Four New Directors Each for Newspapers and Advertisers Plan Presented to General Meeting—Would Limit Board's Powers

By WARREN BASSETT

CHICAGO, Oct. 21.—The expectantly awaited audit bureau "battle of proxies" has been fought and the rebellious New York city delegation and their backers, 477 strong, are in possession of the field as the 13th annual convention of the Audit Bureau of Circulations prepared for its second-day general session.

Today in the newspaper division meeting they pushed through three resolutions which in effect rebuke the board of directors for passing the rule permitting publication of rate cards on publishers' statements.

The resolutions not only knocked the rate card issue into a cocked hat, but also expressed the will of the newspaper members that no further rules not directly connected with circulation shall be passed by the A. B. C. directors and that no rules of any kind affecting the newspaper members be passed before they have been submitted to the full membership.

A fourth resolution increased the newspaper representation on the board of directors from two to six and the advertiser representation from eleven to fifteen, four each.

The board of directors on Thursday evening until midnight considered the New York resolutions in executive session. Managing Director Clague declined to forecast the result of their deliberations.

Although there was strong opposition in some sections to the combative program sponsored by the insurgents from New York, the majority of members were strongly behind them, and the loud "yes" records when votes were cast.

The New York group was on its toes for the struggle. Fred A. Walker, managing director of the *New York Telegram*, played the "Red Grange" role for them. It was he who introduced and examined each of the resolutions. He was supported by John F. Bresnahan, business manager of the *New York World* and E. G. Martin, business manager of the *Brooklyn Eagle*, fellow members of the committee representing the New York publishers.

Following are the four resolutions sponsored by the New York members which the newspaper group adopted:

1.—RESOLVED: That no facts or figures relating to any matter other than circulation shall be printed in any publisher's report or audit report of the Audit Bureau of Circulations.

2.—BE IT RESOLVED: That the newspaper members of the Audit Bureau of Circulations ask the board of directors to refer to the convention, together with the result of their action thereon, an amendment to section 4 of article VI of the by-laws, so that it shall be read as follows: "The board of directors shall have power to make, publish, and enforce such rules and regulations as they may deem necessary for the proper conduct of the business of the bureau, but the board of directors shall not make, publish, or enforce any rule or regulation affecting any

activity of a newspaper member not directly connected with circulation. Such rules shall be in full force and effect until rescinded by the board or by a majority vote of members voting at any annual or special meeting called for the purpose."

manager of the *New York Times*, was named to call the roll.

"Ayes" and "noes" ran neck and neck for a time until "J. F. Bresnahan" was called by Mr. O'Donnell.

"One hundred and fifty-five votes for

Smiles of Victory—The successful newspaper "battle of proxies" to keep the A. B. C. within the limits of its original field was led by "Generals" E. G. Martin, *Brooklyn Eagle*; Fred A. Walker, *New York Telegram*; and J. F. Bresnahan, *New York World*.

3.—RESOLVED: That no rules, regulations, restrictions of rights or extension of rights regarding the facts incorporated in any publisher's statement or audit report of circulation of newspaper members shall be put in force until such proposed rules, regulations, restrictions or rights or extension of rights, shall have been submitted to all newspaper members.

4.—That the board of directors be increased from 21 to 29 members, four additional directors to be nominated by the advertisers' section and four additional directors by the newspaper section, the representation of other sections to remain unchanged.

Other resolutions and other business came later in the afternoon, but when this program had been carried to victory the excited tension of the meeting fell so precipitately as to be almost audible. A hum of conversation hitherto absent, started up; members walked about the room; some left. From then on it was just a routine meeting. Not ten seconds elapsed from the time the advisory committee report was approved at the opening of the session Thursday morning until Mr. Walker was on his feet to present the first resolution, printed above.

This document was a direct and uncompromising attack upon the proposal to print rate cards, entirely eliminating this function as a bureau activity.

Vote was by roll call. Although many had backed it vocally, no one could foretell the strength for or against until the proxies had been voted.

Hugh A. O'Donnell, assistant business

It was immediately seconded by Mr. Bresnahan. Gardner Cowles, publisher of the *Des Moines Register-Tribune*, objected to the wording saying it would prohibit publication of population figures.

O. V. Fragstein, circulation manager of the *Milwaukee Journal*, was first to drop a bomb on the New York city group's hopes. He offered a substitute resolution authorizing the bureau to print rate cards at the option of the newspapers.

"Publication of rates would make it easier to sell newspaper advertising" he argued.

The fusillade was on.

Out of the discussion came a searching question from Jerome D. Barnum, publisher of the *Syracuse Post Standard*.

It was: Where did the suggestion to print rate cards emanate from—dissatisfied advertisers, or from around the table of the audit bureau board?

Mr. Clague was immediately on his feet and speaking with great emphasis, said:

"I am glad to answer that question. There have been a number of insidious suggestions in regard to this matter which are most unfair to the board. The idea did not come from the advertisers, but from publishers themselves who declared they were finding difficulty in getting pages two and three of their semi-annual statements read by the space buyers. The board of directors conceived the idea of printing rate cards to get these pages read, believing it to be a service to publisher members. Printing of rates was not made compulsory. It was purely a service idea for those who wished it."

After it was agreed to vote on Mr. Walker's motion rather than Mr. Fragstein's substitute, a question as to proxies arose. Mr. Bresnahan was told his proxies could not be voted inasmuch as they were not yet approved by the credential committee.

It was decided that no vote would be taken on any resolution until the proxies could be voted, which held the matter over until the afternoon session.

Following this triumph, the sentiment of the meeting was established and the other resolutions passed in quick order.

One of the New York group's resolutions, however, failed to pass. It provided for distribution to members of 75 per cent of the present \$180,000 surplus now held by the Audit Bureau. It read as follows:

2.—RESOLVED: That the board of directors of the Audit Bureau of Circulations be asked to authorize a distribution of 75 per cent of the surplus now maintained in the treasury of the Audit Bureau of Circulations; said distribution to take place on or before March 1, 1927; the amounts to be paid to each member to be in direct ratio to the dues paid by that member during the year 1926.

The meeting which had been enthusiastic in support of the New York delegation, immediately became frosty with antagonism.

Paul Block, New York special representative, who had made a long and effective speech opposing the printing of rate cards, was immediately on his feet to protest.

Mr. Clague also spoke advising strongly against such a move. He said it represented liabilities to members, that it was not in reality a surplus. The government has attempted to tax it as such, but had later ruled it was not a surplus.

Mr. Bresnahan then made a motion that the resolution be withdrawn, and thus it did not come to a vote, which would undoubtedly have been unfavorable.

Then Mr. Walker rose again to introduce the final resolution for the Manhattan delegation. Of four motions already introduced by him three had been passed, and the other withdrawn.

This measure urged that the newspaper representation on the board of directors be increased by four making a total of six, and that the advertiser representation also be increased by four making a total of 11 from that division. These increases would make the total number of directors 29, including the two directors each from the agency, farm paper, magazine and business paper divisions.

S. F. Thomason spoke strongly favoring the resolution as did F. Lansing Ray and others.

It was put to a vote and passed.

Then directors were named at the close of the meeting the members unanimously renominated David B. Plum of the *Troy Record*, who with Walter A. Strong of the Chicago Daily News has been one of the two newspaper section directors. Mr. Strong holds over.

The following four members were put into nomination as directors from the newspaper division provided the general meeting approved the plan for an expansion of the board:

W. B. Bryant, *Paterson Press-Guardian*; J. W. Magers, *St. Paul Pioneer-Press* and *Dispatch*. David E. Town, Hearst general manager, New York, H. C. Adler, *Chattanooga News*.

The clubbing question, which was presumably settled at last year's convention when it was the chief topic of discussion, was injected into the meeting near its close.

John M. Schmid, business manager of the *Indianapolis News*, after declaring that the new rule adopted by the directors in February is not only inadequate but conflicts with another bureau rule, introduced the following resolution covering the situation:

"When subscriptions for two or more publications are sold in combination, the price for such combination shall be the price of the highest-priced publication, plus not less than 50 per cent of the combined regular subscription prices of the other publications in the combination, provided that the number of the publications in any clubbing offer shall in no case exceed five. This rule to become effective July 1, 1927."

After much discussion it was decided that the resolution as it stood interfered with the farm paper and magazine members, and also that there was not time to discuss all its phases thoroughly.

On motion of J. D. Barnum, of Syracuse, it was referred to the advisory committee.

A survey on the question of the uniformity and equality of counting returns, presented by E. K. Gaylord, of the *Daily Oklahoman* and the *Oklahoma City Times*, brought a step toward an entire revision of the rules of the A. B. C. He found that 271 publishers sold their papers on the non-returnable basis, and that in the case of 256 of these the audit bureau had never deducted the left-overs.

"This means that the audit bureau has deducted news agent left-overs from the reports of 15 publishers," he continued, referring to the group under examination. "In the case of some of the publishers, deductions were made three or four years ago. In some cases the deductions were made only in one year and thereafter the publishers were allowed to count the left-overs as paid circulation."

"In every instance of deduction, there has been a complaint and a special audit."

He related the situation of a number of papers forced to make the deductions where out-of-town papers circulating in the same territory were not affected, but were permitted to count as paid circulation any left-overs in the field of the home paper.

In the case of his own paper, Mr. Gaylord related that an investigator had deducted papers, which carrier boys paid for to take into their own homes.

In order to work toward uniformity, Mr. Gaylord presented a resolution and also a recommendation to the directors for an amendment of the by-laws, both of which the section adopted. The resolution follows:

"Resolved, That the newspaper division request our board of directors to thoroughly revise all rules, regulations and rulings of this bureau and that they particularly define the terms, 'news agent' and 'news dealer' and 'independent carrier,' and, if possible, place them in one classification, subject to identical rule, and apply the present allowance of 5 per cent to all classes of dealers and agents."

"All rules and regulations of whatever character shall be published by the bureau and due notice of them given to all publishers, so that circulation will not be audited by rules of which the publisher has no notice. The section approved the proposal for amendment of the by-laws, Article 11, to read whenever and wherever audits are made of the circulation of any publisher and auditors find any deductions or changes are necessary in the publishers' circulation figures, it shall be the duty of the auditor to give the publisher full and exact information as to where and why deductions or changes are to be made."

"In the event the publisher challenges the accuracy of the auditor's figures, he shall have the right to present the matter to the managing director and in the event the managing director does not satisfy the publisher, the publisher shall have the right to file a brief with the board of directors, which brief may be considered by an appeal committee appointed by the board, consisting of at least three members, of which at least one member shall be a publisher in the same class as the one making the appeal. The decision of this board to be final."

A vital question which will undoubtedly loom large at the next session of the bureau was introduced in the closing moments of the newspaper meeting by Mr. Thomason, who asked the members to consider the question of pre-date Sunday newspapers, now certified by the bureau as bona fide circulation—whether some regulation should be made limiting the day of publication.

A resolution made attempting to cover the situation was referred to the advisory committee.

The meeting witnessed a complete victory for the insurgents from New York and their several hundred backers from other cities.

However, all of the reforms embodied in the resolutions passed at the division meeting may not be binding upon the board of directors. The board is not forced to act upon such recommendations from members, but in general it shapes its policies to conform with their expressed wishes.

Four of the members of the newspaper members' advisory board were renamed and a fifth was named to fill a vacancy. George M. Rogers, *Cleveland Plain Dealer*, succeeds E. Lansing Ray, *St. Louis Globe-Democrat*, who declined renomination. The other members are: David E. Town, of the Hearst general management, New York; Hugh A. O'Donnell, assistant business manager *New York Times*; Gardner Cowles, publisher *Des Moines Register-Tribune*; T. R. Williams, *Pittsburgh Gazette Times* and *Chronicle-Telegraph*.

The convention broke all records in point of attendance and interest. More than 1,000 members came from all sections of the United States and from Canada to witness and to take part in what was heralded in A. B. C. circles as "The Battle of the Century." Last year's attendance, then a record, was about 900.

The impending struggle over the rate

card issue was the chief preconvention topic of conversation. All members had been circularized by both factions weeks before the meeting. Proxies had been sought by both sides. The publisher and advertiser delegations began arriving Tuesday, chiefly Inland Press Association members who met Tuesday and Wednesday.

On Wednesday the Audit Bureau hosts began to arrive. Registration started Wednesday noon on the mezzanine of the LaSalle and continued through Thursday morning. Stanley Clague's admonitions to "register early" in order to participate in the division meetings Thursday afternoon were well heeded.

The LaSalle was practically taken over by the Audit Bureau members. A huge A. B. C. flag floated over the entrance to the hotel. Inside, the lobby was crowded with publishers; advertising managers of great national concerns whose advertising budget run into six figures; agency men; magazine and farm paper representatives. About the lobby large placards told the time and place of the various division meetings.

There was, however, none of the carnival atmosphere of which surrounds the annual convention of the American Newspaper Publishers Association each spring at the Waldorf in New York. No jovial celebrities from the comic strips grinned down from the walls of corridors; no clank of machinery came from supply and machinery booths. The atmosphere of the Audit Bureau convention was strictly business.

The New York group went into action fast. They steamed into Chicago on the Century at 9:30 Wednesday morning and by 10:30 they were holding a pre-convention session in room 409 of the LaSalle. Meeting with them were more than 50 publishers from other cities sympathetic with the aims of the Gotham group.

The four resolutions, presented at the newspaper session Thursday, were discussed in detail and minor changes made in the wording.

In the New York group were: J. F. Bresnahan, business manager, *New York World*; Hugh A. O'Donnell, assistant business manager, *New York Times*; E. G. Martin, business manager, *Brooklyn Eagle*; F. A. Walker, managing director, *New York Telegram*; Victor Ridder, *New York Staats-Zeitung-Herald*; L. L. Jones, of the New York City Publishers Association.

Accompanying them, representing the New York State Publishers Association were: Jerome D. Barnum, publisher of the *Syracuse Post-Standard* and E. H. Butler, publisher of the *Buffalo News*.

John C. Martin, general manager of the *New York Evening Post* and business manager of the *Philadelphia Public Ledger*, arrived Thursday to cast his lot with the protesting group.

The group had powerful support. Among their backers were all of the Hearst newspapers, all of the Scripps-Howard group, the Gannett newspapers, the Paul Block newspapers, the *Chicago Tribune*, the *Springfield Republican*, *Cincinnati Enquirer*, *Washington Post*, *Louisville Herald-Post*, *Portland (Me.) Express*, *Syracuse Post-Standard*, and many others.

Before the convention opened Mr. Bresnahan said four hundred newspapers were lined up against the bureau's plan to print rate cards on publishers' statements.

Part of the ammunition brought to the convention by the New York group was a printed pamphlet entitled, "Audit Bureau of Circulations—Information from Annual Reports 1920-1925."

The pamphlet contained two powerful attacks upon the bureau, the one directed against its mounting expenditures, which have not resulted in greater service to members, according to the booklet, and the other concerning the membership, "which seems to be decreasing rather than increasing."

It has detailed tables of Audit Bureau expenditures as compared with earnings in the past five years, gleaned from the annual reports of Arthur Young & Co., auditors for the bureau, concerning expenditures.

The foreword of the booklet stated

that the reports of the auditors are so condensed that it is possible to make a comparison of only a few items of income and expenses. The reports are further complicated by their practice of deducting "charges to members" and sales and other incomes from the expense accounts instead of reporting them as income.

In the following pages, all items of revenue are shown under income and the full amount of all items of expense, under expense.

Comparisons of the financial reports for five years show an increase in expenses of \$76,452.22 and an increase in revenues of \$69,386.13.

The membership report shows that 17 fewer general advertisers are taking the reports than in 1921 and 12 more advertising agents. There has been an increase in the associate membership which is composed of those who take the reports of only one class of publications.

Expenses have increased 23 per cent in five years, the number of audits 15 per cent. In the year 1925, expenses increased \$35,630.08, and only 9 more audits were released than in the year 1924.

Comparisons of the treasurer's reports are included, for the reason that they are more fully itemized than the income reports.

The expenses of the audits have greatly increased during five years. The value of the reports to the publishers, as shown by the small number of advertisers and agents who take the full reports, has not kept pace with the cost.

Analyzing the present membership, the pamphlet said:

"The American Newspaper Publishers Association recognizes 526 advertising agencies in the United States and Canada."

"The names of 166 advertising agents appear in the Bureau's June 24, 1926, list of agency members. Of this number, 150 are recognized by the American Newspaper Publishers Association; 28 per cent of the agencies to whom the publishers allow commission. About one-half of these agency members are full members. That is, they take the full reports of the bureau. The other half are 'associate' agency members. Taking the reports of one division of publications only—news-papers, magazines, business papers or agricultural papers."

"McKittrick's Directory of Advertisers lists the names of approximately 10,000 advertisers. The bureau has a membership of 255 advertisers in the United States and Canada. Its June, 1926, list contains the names of 137 national advertisers and 118 local advertisers in the United States and Canada; 2½ per cent of the whole number of advertisers."

"The membership of advertisers and advertising agents seems to be decreasing rather than increasing. The value of the bureau's service to publishers depends upon the number of advertising agents and national advertisers who buy and use its reports."

Another A. B. C. record was broken Friday night when 1,000 A. B. C. members and their guests attended the annual banquet at the LaSalle, the closing event of the A. B. C. week. Speakers for the evening were United States Senator, Pat Harrison of Mississippi, former Congressman Frederick Landis, of Logansport, Ind., brother of Judge Kenesaw Mountain Landis, czar of baseball, and Dr. John L. Davis, humorist, of New York City.

Before the speakers were introduced, Edith Mason and John Marshall, both of the Chicago Grand Opera House Company sang.

President O. C. Harn, of the Audit Bureau presided at the dinner.

AID FUND DRIVE IN UTAH

The Salt Lake City Chamber of Commerce-Commercial Club will hold its fifth annual drive for a \$75,000 community advertising fund during the week of Oct. 25. The money will be spent next spring, according to present plans, on space in metropolitan newspapers, national magazines, billboards, booklets and pamphlets, conventions and a bureau of information at the Chamber of Commerce-Commercial Club.

N. Y. TYPO WAGE RISES UNDER NEW CONTRACT

Newspapers' Offer Accepted, Giving Increase of \$3 July 1, 1926, and \$1 Each in 1927 and 1928 After Long Fight

The three-year contract offered by the Publishers' Association of New York which was accepted this week by Typographical Union No. 6 calls for a \$3 a week increase retroactive to July 1, 1926, and \$1 a week increases on July 1, 1927 and 1928, and a 7½-hour day. The agreement will terminate June 30, 1929.

The present base scale of the union for a 7½-hour day is \$60 a week for day workers, \$63 a week for night workers and \$66 a week for the third shift. The union first asked on May 1 an increase of \$6 a week with a 6½-hour day.

A counter-offer of \$6 a week increase, with a 7½-hour day, and the elimination of the resetting by individual newspapers of matter which comes into one or more offices in matrix or plate form, was made by the publishers.

The union refused this counter-offer and then the publishers proposed the present agreement which was at first refused by the union. The International Typographical Union then asked the New York local to accept the offer or submit to arbitration and refused to sanction a strike as long as the publishers were willing to arbitrate. This was agreed to by the union membership.

HOW IOWA ADVERTISED

Publisher Tells Inland of Success Through Editor & Publisher's Columns

(By Telegraph to EDITOR & PUBLISHER)

CHICAGO, Ill., Oct. 21.—How the advertising of a state by its publishers was put across was graphically described by an Iowa member, Frank D. Throop, publisher of the *Davenport (Ia.) Democrat*, at the Inland Daily Press Association on this week. He told of his pride in the close association of 28 Iowa newspapers which finally became the working body from 33 responses sent in from 45 Iowa newspapers asked to join the campaign. The Iowa publishers at first tried song about tall corn to advertise the state but decided that the nation was misled into overlooking other Iowa interests. So they went in for paid advertising. They scattered their message among trade journals and newspapers but finally, in the last year, concentrated trade journal advertising in the *EDITOR & PUBLISHER*, with excellent results, he said.

A full page a week in *EDITOR & PUBLISHER* brought in new contracts from foreign advertisers at a rate heretofore unknown to the group, Mr. Throop declared. He cited figures to show the increased lineage in the papers represented by the advertising group in 1926. There has been a gain of 3,660,425 lines as compared with 1925, a gain of 21.39 per cent. The advertising volume from January 1 to September 1, 1926, was 6,907,790 lines, he stated, as compared with 15,949,365 lines for the corresponding period in 1925.

EDITOR & PUBLISHER, after a thorough test, has now been decided upon for concentration as an advertising medium, Mr. Throop said. When newspapers had been organized an agency was agreed on and copy prepared on a broadside. All the member papers used the same copy so that not only was the message spread nationally but Iowa sold to itself with pleasing results.

AIDING RED CROSS

John C. Martin, of the Curtis-Martin newspapers, Inc., and Frank M. Lawrence, George Batten Company, are firmen of the newspaper and advertising agency groups, respectively, in the annual Red Cross Roll Call.

SPONSORS RADIO SHOW

The Fairmont (Minn.) *Martin County Independent* sponsored the first radio presentation held by the Fairmont Radio merchants last week.

W. R. HEARST NOTES TENDENCY TOWARD TABLOID PRESENTATION OF NEWS

Noted Publisher, Answering EDITOR & PUBLISHER Questions, Declares Readers Have No Time to Separate Wheat from Chaff—Editors Must Do Winnowing

(Copyrighted 1926, by EDITOR & PUBLISHER)

William Randolph Hearst is here shown with Mrs. Hearst and their eldest son George, who is president of the *New York American*.

A TENDENCY of American journalism toward the tabloid in condensation and presentation of news was remarked on this week by William Randolph Hearst, answering questions asked him by *EDITOR & PUBLISHER* when he returned to New York following a summer spent in California.

Mr. Hearst was asked what the average man in the street wants to read in his newspapers, and he replied:

"He wants to read all the news of importance and all the items of interest. He wants to read features, some of which are important and some of which are merely entertaining. And he wants to read opinions which are illuminating and interesting."

"Furthermore, he wants everything presented to him briefly as well as brightly."

"There are so many things to occupy the time of every man, woman and child in America these days that no one has a great deal of time to give to any particular matter."

"Moving pictures take part of every modern person's time, the radio takes part, the various developments of the phonograph take part, and recreation in the open due to improved transportation takes quite a considerable part."

"If you want to obtain and retain anyone's attention, you must say something worth while and say it quickly. Hence the tendency of journalism towards the tabloid. I do not mean necessarily the tabloid in shape, but the tabloid in condensation and presentation of news."

"The reader has not time or inclination to separate the wheat from the chaff, to pick out the grains of information from a mass of words. It is the editor's business to do the winnowing for him."

"Lord Northcliffe was the originator of the tabloid form of newspaper, but not the originator of the intelligently condensed newspaper—the newspaper which makes the strongest circulation appeal in modern journalism."

"I think Charles A. Dana was the founder of that type of journalism, and I once heard Lord Northcliffe say he had modeled his *Daily Mail* largely on the idea of the old *New York Sun*. The *London Daily Mail* is a tabloid newspaper in content."

"The tabloid newspaper in its small form was something of an accident. Lord Northcliffe had an idea that he could print a daily newspaper for women and started the *London Mirror* as a woman's paper. It did not succeed, so he transformed the paper into a general newspaper without changing the small size of the page."

"This size gave him even a better opportunity for condensation than he had had in the *Daily Mail*; and the value of the condensation was speedily proved in the astonishing success of the *Mirror* as a condensed newspaper."

"When Lord Northcliffe was in America on one of his trips he got out a special edition of the *New York World* in which everything was printed very briefly, in order to illustrate his idea of the news in tabloid form."

"All of us newspaper men smiled patronizingly but continued to make our voluminous newspapers. It was not until years later that the success of the tabloid in England compelled its adoption in this country."

"Is there any justification for publication of private scandal?" Mr. Hearst was asked.

"None whatever if it is private and if

it is scandal. But news about the actions of private people ceases to be private when it gets into the public courts," he declared.

"I once sat next to a man in Washington at a dinner and he kept annoying me by complaining that some one of my newspapers had printed items about his brother's divorce."

"Finally I told him that it was deplorable and I would make a compact with him. If he would keep his brother out of the police courts and out of the divorce courts I would keep him out of my newspapers, because as far as I knew his brother had no other claim to newspaper attention."

"A good many people who object to the attention that newspapers give to their private affairs forget that their affairs have become of public interest and public importance through their own fault entirely, and through no fault of the newspapers."

"A newspaper's right and duty are to print public facts in which the public is interested, whether the individuals concerned are public or private."

"Do you think that the entertainment side of newspapers is being exaggerated or does the present age demand more entertainment?" was another question.

"I do not think the entertainment side of newspapers is being exaggerated," Mr. Hearst said. "I think the public demands in a newspaper both information and entertainment. That entertainment is not entirely supplied by features. It should largely be found in the news."

"Good writing is an important part of a newspaper's attractions. Every editor knows the value of human interest stories, the news item with a touch of humor or a touch of pathos, the news incident of a romantic character."

"News is not altogether hard facts. News is what the public wants to know about. Important facts are always news but they are not all the news."

"The human side of life interests the public in a newspaper as it does in a play."

"The romance and tragedy of life figure largely in the news and always will, just as they figure in literature and in the drama."

"In fact, they have the additional appeal in the news of being true."

NEWSPRINT PRICE UNCHANGED

International Announces \$3.25 Per Cwt., Contract Price for 1927

The International Paper Company, on Oct. 18, announced the 1927 contract price for newsprint at \$3.25 per cwt., the present rate charged by this company and other mills generally.

As sent out by Joseph L. Fearing, vice-president, the announcement stated in part:

"During the first half of 1927 we expect to bring into production another newsprint mill on the Gatineau River near Ottawa, with an ultimate capacity of about 600 tons per day. It is believed that this mill, together with our new mill at Three Rivers, Que., which is now producing at the rate of about 650 tons per day, constitute (with the vast areas of timber back of them) two properties second to none on this continent."

DEWART HONORED

Editorial Staff Gives Dinner to New Owner of N. Y. Sun and Telegram

Members of the editorial staff of the *New York Sun* gave a testimonial dinner, Oct. 14, to William T. Dewart, who recently purchased that paper and the *New York Evening Telegram* from the Metropolitan Museum of Art to which it was bequeathed by the late Frank A. Munsey. About 100 members of the newspaper's staff attended.

Short addresses were made by Mr. Dewart and by Frank O'Brien, present editor of the *Sun*. A telegram of congratulation was received from Edward P. Mitchell, former editor, now living in New London, Conn.

INLAND COST REPORTS NOW ON MONEY BASIS

Members Will Reveal Their Real Figures to Committee Confidentially—Thomason Says Newspaper Machinery Is 15 Years Behind Times—Inequalities in Railroad Tariff Revealed by Antrim

(By Telegraph to EDITOR & PUBLISHER)

CHICAGO, Oct. 20.—After nine years of research and study, members of the Inland Daily Press Association voted today for the immediate change to a unit cost finding system based on dollars and cents. The percentage system, long a local point of controversy because of its intricacy, was thrown into the discard at an executive session in the Hotel Sherman by a majority vote and what is a virtual cost-finding bureau came into existence. The inland meeting was the opening convention of "A. B. C. Week."

C. R. Butler of Mankato, Minn., chairman of the cost-finding committee and a member of the committee since its inception, led the fight for the adoption of the dollars and cents system and introduced this resolution putting it into effect:

"The membership of Inland Daily Press Association approves the recommendation of the cost-finding committee that the survey for 1926 and thereafter be made in dollars and cents, on forms to be prepared by the committee; that the individual reports be submitted to the cost-finding committee direct, and that the committee be authorized to enter into an agreement with a certified public accountant for the association under which the sanctity and privacy of all figures submitted shall be carefully guarded and that detailed reports, which shall not reveal the identity of the submitting members, shall be submitted only to those contributing."

Associated with Mr. Butler on the committee are A. J. Wilhelm, Huntington, Ind., and W. R. Donald, Mitchell (S. D.) *Republican*.

The new system is not obligatory upon members, but its immediate success seems assured by the hearty support it received.

Much debate has centered around the question of throwing open the books of a newspaper by putting down in actual figures the payrolls, editorial expenses, circulation department costs and the many other items that go into a newspaper. Thus the adoption of the system centered upon the ability of the committee to convince the members that their figures would be secret, that the results would be so couched as to conceal the identity of any single contributor and that no competitor would get information which he would be able to turn to his own advantage.

The efficacy of the cost-finding system is established, the committee reported, referring to the full explanation of the Inland's percentage system as made by Wil V. Tufford, secretary-treasurer, in last week's *EDITOR & PUBLISHER*.

This former system is the basis of the money-unit system adopted, which otherwise is the same. It has been modified to make it more appealing to the subscribing members and it will be more highly organized than its predecessor.

The new system is expected to give the small newspaper the advantages of an inexpensive method of determining the accuracy of balance as an index to profit and loss. Furthermore, he is able to compare his departmental costs with the departmental costs of other newspapers in his own circulation class, the classes being arranged as follows: Class A, under 3,000; B, 3,000 to 8,000; C, 8,000 to 15,000; D, 15,000 to 30,000; E, 30,000 and over.

The committee announced that the Southern Newspaper Publishers' Association and the Nebraska State Association had adopted the Inland's percentage system as a basis for evolving a system for its members, and that many inquiries received showed that the plan in general is sound and is needed by newspapers the world over.

Fine points in negotiating a wage scale were told the inland members Tuesday morning by Harvey J. Kelly of the special standing committee of the American

By LUCILLE BRIAN GILMORE

Joe Carmichael, director of Iowa Committee on Public Utility Information, Des Moines, finds pleasant the society of (left to right) T. O. Huckle, *Cadillac (Mich.) News*; Allyne V. Carpenter, *Lincoln (Ill.) Courier*; Verne E. Joy, *Centralia (Ill.) Sentinel* and Inland vice-president; and John C. Fisher, *Cairo (Ill.) Citizen*.

Newspaper Publishers' Association.

Publishers must know all the facts successfully to conduct a wage agreement, Mr. Kelly stated:

"You must have your objective definitely in mind, and drive straight for it from the very start," he emphasized. "Be so well informed you can meet any argument which may confront you."

The general practice of scale committees is to quote printing scales elsewhere to show that an increase should be granted.

"If this is allowed to weigh your decision, you will get a gradually increasing spiral," Mr. Kelly said. "The wage comparisons must be broadened to cover other industries requiring approximately the same amount of skill."

Mr. Kelly here cited a new use for *EDITOR & PUBLISHER'S MARKET GUIDE*.

"If your scale is compared with a higher scale in city of similar population, use the *MARKET GUIDE* to show differences in industries, in trade, and in markets, which may justify the higher scale in the other town and not in yours," he said.

Asked how to meet the stock argument that the printing scale should equal that of workers in the building trades, Mr. Kelly told the publishers to remember that work in the building trades was seasonal and that comparison should cover annual wages in the two fields, not daily compensation.

"Some statistics show that in several of the building trades the men work only 180 days a year," he declared. "These things should be kept in mind when wage comparisons are raised."

The ideal arbitrator for a wage dispute was pictured by Mr. Kelly.

"He is not a man who has lived in comfortable circumstances all his life, who has had his education paid for, and arrived at affluence without difficulty. He is rather a man now of comfortable means, who had to work hard in his youth, who knows what it means to labor with his hands, and who understands working conditions as they are, in fact rather than in theory. This man makes the ideal arbitrator."

The sport page is the best page in the modern daily newspaper, Prof. H. F. Harrington, director of the Medill School of Journalism, declared in his address Tuesday.

"It is the best-edited page and the most authentic in its coverage of news," he

stated. "It must necessarily be, because it has the critical scrutiny of a host of interested and informed readers. It interprets and criticizes the events it reports. If other sections of the paper were open to the same interested scrutiny, many faults would soon be eliminated."

Prof. Harrington stressed the value of school news in daily papers. He cited the *Cleveland Press*, *Des Moines Register*, and *Evanston News-Index* as papers that had emphasized school news with great success.

Will H. McConnell of the *Springfield (Ill.) State Journal* and chairman of the Inland Postal Committee introduced George C. Lucas, executive secretary of the National Publishers' Association, who discussed the present postal situation.

"I feel that a second-class rate reduction is coming," he said. "Last year the postal deficit was \$40,000,000. This year it is expected to be \$35,000,000, a decrease of \$5,000,000, and that is in addition to absorbing a \$70,000,000 wage increase granted postal employees last year."

Mr. Lucas said a rate reduction bill will be introduced in the coming Congress, and that the big fight will be to have it brought out of committee for vote. He urged the publishers to use influence with their Congressmen to line up support for the rate reduction drive.

The circumscribed territory in which a newspaper has its influence and support was taken up by Stephen Bolles, editor of the *Janesville (Wis.) Daily Gazette*, in a partial answer to four questions he propounded:

"What is the best news policy?"

"Are not many newspapers becoming mere press association and feature bulletins?"

"What proportion of news should be purely local?"

"How many front-page heads should be local news stories?"

Local news, he asserted, was the excuse for existence of many of the newspapers with which he came in contact. The regional paper with a strong wire service has come into its own, he believed, and the policy should be to publish every bit of news into a definite territory. All newspapers may be alike in pattern, but the local news they carry still keeps their individuality clear.

Features alive with human interest can be had, Mr. Bolles said, but "they differ materially from the sloppy stories written

in the region of sky-scrapers." He warned the publishers to avoid the "merely piffle." Often better features could be written inside the office, he said.

C. C. Marquis of the *Bloomington (Ill.) Pantagraph* made a plea for trained agricultural men to edit farm pages and pointed out a definite cash register value to rural articles. A survey of his paper showed that 71 per cent of the circulation read farm news daily or occasionally, and this fact was used to boost farm page advertising.

Good will advertising for the gas industry, unceasing over long periods, was recommended by Joe Carmichael, Iowa public utility information director. Mr. Carmichael explained that he was not suggesting that first to the newspapers. He had already urged a policy of continuous advertising at the convention of the American Gas Association, in Atlantic City, October 12. The way is now paved for the newspaper to approach the public utility, he said.

Among the arguments he used to the Gas Association were that advertising must be the means of fostering public good will and kindly consideration where gas companies want favors. That is open a wider market for security selling as it builds up the gas business by creating a demand for more service.

To approach the gas companies, he suggested several definite places to begin advertising: the economy of gas service the relatively low cost in comparison with other services, stability of the industry, its freedom from the retrenchments of depressed economic periods because use is necessary to cooking and heating. He has 16 subjects available for single ads or for development into series.

The Inland Press is in an excellent financial condition at present, Wil V. Tufford, secretary, stated in his annual report. By rigid administration economy a small deficit has been wiped out. President William Southern, Jr., has paid his own traveling expenses, Mr. Tufford said, and the secretary's office has been run on a budget totaling about one-fourth that of many smaller organizations.

Two newspapers were elected to membership, the *Marion (Ind.) Leader-Tribune*, E. H. Johnson, publisher, and the *Bicknell (Ind.) News*, F. F. McNaughton, publisher.

The fall business outlook for the Middle West is very good, Mr. Tufford said.

The newspaper industry is fifteen years behind in the development of the mechanical advantages which automatically should keep pace to offset the ever increasing labor costs was the statement of S. E. Thomason, business manager *Chicago Tribune*, in a talk before inland members Wednesday.

Mr. Thomason, who was former president of the A. N. P. A., was presenting to inland members the work which being done by the A. N. P. A. to meet this situation, together with the other lines of its promotional work in an effort to interest more inland members to become members of the larger group.

It was Mr. Thomason's opinion that the newspaper industry stood indicted for this gross neglect in development of better mechanical equipment for more efficient production. He stated that the *Tribune* found that stereotype equipment now 17 years old could be used as economically as the latest type of machine in that department.

Such lack of foresight in manufacturing efficiency militated against the newspaper when it came to meeting increasing labor demands of printers, stereotype and pressmen to keep pace with the change of living conditions which are being met possible by better wages to workmen in other crafts, where experimental institutes were being maintained to lessen the cost of operation in such industries.

C. C. Marquis, manager *Bloomington (Ill.) Pantagraph* and D. W. Grandon, editor and manager *Sterling (Ill.) Gazette*.

The speaker explained that the A. N. P. A. was behind a move to establish a school of newspaper mechanics at Cornell University where newspaper engineers could study these problems. This was one point which he brought out to prove the worth of an A. N. P. A. membership.

The fight for reduced postal rates for second-class matter, for the development of advertising through the association's bureau, and the great benefit of the newly organized traffic department of the association were emphasized also.

Mr. Thomason concluded his talk showing that the problems of the larger newspaper are identical with those of the smaller publications. He showed facts to disprove the argument that the contention of the larger newspaper to blanket the advertising field was a detriment to the smaller newspaper but a real benefit in that the work of development of the advertising accounts by the larger newspaper always resulted in local tie-up campaigns by which the smaller newspapers benefited in lineage otherwise unavailable. The postal rate fight of the American Newspaper Publishers Association was explained by J. D. Barnum, publisher of the *Syracuse (N. Y.) Post-Standard* and chairman A. N. P. A. Postal Committee. He warned the publishers of the possibility of a failure of the Congressional Postal Commission to afford any relief. In fact, if the commission, which is headed by Senator Moses, does not decide upon recommendations for legislation at a hearing scheduled for Nov. 10, the commission will expire of its own accord.

"It is clear that the Postmaster General is still adamant against second-class rate reductions that would help newspapers and readers," said Mr. Barnum. "Just what legislation Congress will consider cannot be determined until after the elections. Some believe that if the Republicans are successful in retaining control of both houses, there may be some kind of postal legislation advanced at this session. On the other hand, there are those who argue that there may be little legislation brought up in order that advance the tactics for bringing about a special session next spring."

In an address on "How freight rates enter into newsprint costs," E. Antrim, Chicago Tribune, told publishers to look forward to rate readjustments on newsprint from mills and on core returns, both in carload and less than carload lots.

The talk was illuminating to many publishers in showing how they unwittingly permitted a higher rate to be placed upon newsprint by not being familiar with the two systems of rating, the basic rate on shipments moving partly by Canada through a competitive move of the Grand Trunk to fill its empty west-bound cars, and the standard rate applying to the United States roads.

With the Canadian line sharing in more than 99 per cent of the newsprint movement, because the rate that way was 20

cents as against 23 cents over all-American lines, the Interstate Commerce Commission allowed various increases. "Now we will see what foxy gentlemen our friends, the railroads, are," continued Mr. Antrim.

"When the 15 per cent general increase was authorized they applied it first to the 23 cent rate of the standard lines—the rate that moved none of the business. That made a rate of 26.5 cents. Then they said, 'We will now proceed to maintain the "fixed relationship" of these rates by making the rate via the differential lines (Canada) three cents less.' This gave them an increase in the rate designated as the base rate from 20 to 23.5. In other words, they put one over on you publishers to the tune of one-half cent per 100 pounds.

"If they had followed the spirit of the Commission's order they would first have applied the 15 per cent increase to the base rate, which would have made it 23 cents. Right then was the time for the publishers to get up on their hind legs and holler. You would have won your case easily.

"When the 25 per cent increase came along, they hadn't heard a holler, so they proceeded to apply that in the same way, making the new rate 30 cents instead of 29. Then came the 40 per cent increase, and, of course, it was easy for the railroads."

Mr. Antrim presented a table showing that the ultimate result in this system was that at their peak the base rate should have been 40.5 cents, but was 43, while the standard was 46, where it should have been 43.5. The last reduction made the base rate 38.5, where it should have been 36.5, and the standard rate 41.5 instead of 39.5.

The rate of 38.5 today, thus 40 cents a ton higher than it would have been had the publishers been on their toes, he concluded, and it makes a pretty penny for the publishers when applied to millions of tons.

The adroit, frank, friendly approach to the space buyer was advocated by J. K. Groom, director of the National Advertising Section of the Northern Illinois group. Mr. Groom recalled many instances where ethics had been fractured in competition and also in the handling of a space buyer by a newspaper. Solicitors should be coached that friendliness is the best asset a newspaper can have and should not employ bragging, bullying or blustering to get business, nor forget that they are dealing with shrewd and sensitive people, he said. Mr. Groom recommended "friendly co-operation" between competing newspapers.

Sharp words were spoken at Wednesday morning's session about newspaper commercial enterprises employing the word "Inland" in their corporate names. The meeting was informed that a prominent Illinois person, name not revealed, had taken a trip through the east with expenses paid by representing himself to be an emissary of the Inland Daily Press

Association and that an advertising agency is using "Inland" in its business. The result was the adoption of a resolution warning against persons not members of the group who represent themselves as such, and forbidding the use of the Inland name to all who are not members.

Successful consolidations were taken up at Wednesday's session by A. O. Lindsay, president and director of sales of the Quincy Newspapers, Inc., publishing the *Quincy (Ill.) Herald-Whig* and the *Quincy Journal*, and D. W. Grandon, of the *Tribune-Post* of LaSalle, Ill. Mr. Lindsay expressed the belief that multiple newspaper service was unnecessary to a community, but that consolidation must be approached with a certainty of larger profits and an enlarged field for advertisers at reasonable rates.

A woman appeared on the platform in the person of Mrs. Allyne V. Carpenter, publisher of the *Lincoln (Ill.) Evening News*. She read a paper which was to have been delivered by Frank T. Carroll, advertising director of the *Indianapolis News* and president of the Newspaper Advertising Executives Association on "The Advertising Manager's Job."

"This is the age of specialization," said Mr. Carroll. "The advertising man who accomplishes most must concentrate on one class of advertising and develop that to its maximum. Even on the smaller papers, I believe it wise to have classified handled by a separate man. It's a business by itself, and the same is true of national advertising.

"As the paper grows it must have more salesmen. As the sales force increases the ability of the advertising manager as an executive becomes more important. On his ability to pick men, to develop them, and to get them to work with him, depends his success. The supervision of the sales force, the training of salesmen, getting increased business with a reduced sales force, holding regular inspirational meetings to develop morale—all these are of importance to the manager who is on the job.

"After all, the biggest part of the advertising salesman's job is training and handling salesmen in order to get the most out of them. In this way a good manager multiplies his own ability to secure business for his paper. The advertising manager must be allowed to select his own material. These men should be responsible only to their manager. In selecting salesmen there are several points that demand consideration. Appearance is rated almost 50 per cent by some salesmen. Then, too, the man whose conversation is cheerful and optimistic is welcome where the pessimistic whining fellow can not get a look in. Naturally, a knowledge of the mechanics of advertising is a great asset, yet my own experience indicates that we have better results with untrained salesmen who love their work than with men who have worked on many newspapers, but who expect to get by because of their greater knowledge of the tricks of the trade. After all, given a reasonable degree of intelligence, the advertising salesman reacts to the life insurance formula: 'Expose yourself to a lot of business and you are bound to get some.' Leg work, energy, perseverance—these are the greatest assets of the successful advertising salesman.

"I have no patience with the advertising manager who does not persistently and insistently demand that his efforts be supported through regular, intelligently planned promotion in his own paper.

"Many of the biggest publishers with rates from \$7 per inch up are using promotion matter on a schedule that demands rejection of paid advertising before promotion copy can be omitted. Classified promotion has every reader as a prospect. Display promotion has a smaller percentage of people who may be interested to the extent of becoming purchasers of space. But well-written promotion carrying an interesting story of the romance of business and the value of your paper as a builder of industry can be made so dynamic that every reader of your paper is given an additional reason for loyalty.

"The newspaper represents the only industry that publishes its sales records

every day. With this information available there is no reason why every dollar spent by every advertiser in your city in newspapers, should not be accounted for. That doesn't mean that the advertising manager should make his job one of statistics, nor that he should spend much of his time getting them out. Where there is more than one paper in a city, accurate, detailed statistics become increasingly important. The gains or losses showing on the report today were probably made six or eight months ago. But the daily, weekly or monthly report shows the trend for or against you or your competitor. It's the pulse of your business, and enables you to diagnose the health of your property.

"When the advertising manager realizes that he is, after all, a sales manager, newspaper advertising will grow even faster than it has in the past. One of the best sales managers among the advertising managers of my acquaintance has adopted this slogan as applied to his advertising department: 'If you need help ask for it—if you don't need help, prove it.'"

William A. Thomson, New York, director of the Advertising Bureau of the A. N. P. A., spoke and introduced the Chicago manager, F. Guy Davis, and the Pacific Coast manager, Walter Burn of San Francisco.

"In selling national advertising, it seems to me that you have two things of equal importance to offer the advertiser," said Mr. Thomson.

"The first is the value to him of the market which you cover and the second is the extent to which you cover that market. In other words, what you are offering is not only the circulation and influence of a medium of advertising but also a place in which advertising can be done profitably.

"If this is logical, I think it is equally logical to expect the newspaper which is selling national advertising to know its own market thoroughly and to be in position to give the advertiser the benefit of this knowledge.

"I believe you should be able to show an advertiser rather conclusively just what his opportunities for marketing a product successfully may be in your community. This means that your data should include a study of possible wholesale and retail outlets, a summary of the competition both local and general which he may have to face, an idea of the dealer attitude toward kindred products and some worth-while conclusions as to present or potential consumption of the article.

"I know of a recent case where an advertiser made the point he could not afford to spend \$1,000 in newspaper advertising in a certain city because his sales quota for that locality was only \$3,000. The service department of a newspaper made an analysis of dealer outlet and the like and was able to show him a report which caused him to raise his sales quota to \$10,000 and to go ahead with the campaign.

"This kind of data is useful also in soliciting advertising as well as in helping advertisers who are already considering a market.

"Once a newspaper has faithfully tackled the job of market analysis, it is bound to find many neglected opportunities for national advertisers.

"This suggests another prospect which I think most newspapers neglect and that is the local manufacturer. I have always been impressed by the fact that in most communities there are few contacts between the newspaper and the factory. The factory may be one producing a product which is sold all over the country. It may be turning out an advertised article but too often there is little or no sign of the product or of the advertising in the territory surrounding the plant. Any newspaper can tell you the names of all the local advertisers but in my experience very few advertising departments know much about the big chimneys that dot the horizon on the outskirts of the town, unless it happens to be the name of the man to see if you are getting out a special edition. The reason for

(Continued on page 52)

CIRCULATION OPERATION CAN SHOW PROFIT, ERWIN TELLS CAROLINIANS

His Paper, Columbia State, Is Sold to Agents and Carriers on 50-50 Basis—Coley New President—Value of Serial Stories Questioned

(By Telegraph to Editor & Publisher)

SPARTANBURG, S. C., Oct. 19.—With the election of officers for the ensuing year and the selection of Asheville, N. C., as the place of meeting in 1927, the seventh annual convention of the Carolina Circulation Managers' Association came to a close this afternoon, following a two days' session in this city.

As a fitting compliment to his ability and extreme activity as acting president of the association, Will X. Coley, *Raleigh News and Observer*, was chosen as president for the ensuing year, and J. M. Blacklock, circulation manager for the *Journal-Herald* of this city, was chosen for the position of second vice-president. Other officers elected were: First vice-president, S. G. Bagwell, *Charlotte News*, and C. C. Council, of the *Durham Herald*, secretary-treasurer; J. R. Marks, of Asheville, was chosen a member of the board of directors, and J. L. Erwin, of the *Columbia State*, and Miss C. McCaskill, *Fayetteville Observer*, were selected to fill vacancies in that body.

Discussion of timely topics calculated to advance and improve the circulation departments of the various papers represented in the organization occupied practically all of the time of the convention. Twenty-five of the 35 representative newspapers in the Carolinas were represented. Last night at the Franklin Hotel, the members were entertained with an elaborate banquet by the management of the Journal-Herald Company. Will Rogers, cowboy humorist and unofficial ambassador of America to Europe, was one of the principal speakers of the evening.

Co-operation between the circulation and editorial departments was stressed by Acting President Coley when he made his opening address. He urged unity among the various departments of the newspapers in the effort to get the best results, while the editorial policy of the paper, methods to meet competition in lowering subscription rates for the benefit of certain classes, effectiveness of sample copies and the handling of agents and solicitors were the principal subjects he desired to bring before the meeting.

Charles O. Hearon, of the *Spartanburg Herald*, spoke on the merits of the circulation men and what they meant to the newspapers, advancing his opinion as to the opportunities offered in the Carolinas for the furtherance of the newspaper interests.

The members of the association went on record as being opposed to the publication of serial stories, following a prolonged discussion, but agreed that these and other features had been taken up in many instances where there was a demand for them.

"The Code of Ethics for Circulation Managers" was one of the principal topics of the first day's session, which was presented by C. C. Council, of Durham, while the best methods of handling street sales and sales boys were advanced by Mr. Bynum, of the *Raleigh News and Observer*.

Mr. Council did not propose a definite code, but submitted a proposal which was accepted in principle by the association and a committee headed by J. M. Marks, *Asheville Citizen*, was named to re-draft the measure. The proposal in the main provided for a closer relationship between the circulation men with regard to the establishment of agencies, and the conduct of the circulation business upon higher and broader planes.

Discussion of the subject, "Does increase in Circulation Warrant the Cost of Making Deliveries by Special Automobiles to Individual Subscribers and Dealers?" advanced by C. Eador, of the *Winston-Salem Journal*, was one of the most interesting of the session. The promo-

tion of this plan, in one instance cited by the speaker, after a period of fifteen months, resulted in the government putting bus and mail service into the territory, which had hitherto been served at the expense of the newspaper. Another instance cited, in which two papers engaged in strong competitive efforts, resulted in financial losses to both. This point of discussion revealed there are certain territories that can be served both to the advantage of the subscribers and paper when the circulation is not made prohibitive by aggressive competition.

J. L. Erwin, of the *Columbia State*, discussed the subject, "Can a Publisher Produce a Newspaper and Sell to Agents on a Fifty-Fifty Basis?" During the course of his remarks, Mr. Erwin pointed to the success his paper was having in a venture of this nature.

"We put on the fifty-fifty basis some time ago in many of the cheaper sections of our town and smaller towns throughout South Carolina," he said, "selling routes to the carriers, and have been able to show a large increase, not only in Columbia, but throughout the State. While our percentage of profit is not large, we are taking in more money and in sufficient quantity to more than pay the increased expense; consequently, we can turn over more money to the general profit column. It is the duty of the paper to educate the people and the live circulation manager will figure just what the possibilities of a locality are and go at it the same as a farmer would a field. It costs more to cultivate some fields than others, but cultivation we must have."

An important subject and one which was heartily endorsed by the members of the association was that of "Mail Subscription Rates Based on Zones," presented by J. M. Blacklock, of the *Journal-Herald*. It was the opinion of the majority that newspapers coming under the Carolinas organization should take immediate steps to make the necessary increase in subscription rate beyond either the second or third zones of the respective localities to assimilate the increase in the postage rates prevailing on newspaper mail matter in these localities.

Several members have already taken the step in this direction, which, according to the reports made in the discussions, is meeting with much success and proving a material financial aid to the circulation departments.

Following the conclusion of the closing

session this afternoon, President Coley announced he would name the standing committees of the association within a very short time and immediately upon perfecting this part of the organization, steps will be taken toward perfecting arrangements for the eighth annual meeting in Asheville next year.

SEEK UNIFORM RATES ON ILLINOIS BUSES

Modern Newspaper Transportation Methods Reviewed by Central States Circulators at Chicago

(By Telegraph to Editor & Publisher)

CHICAGO, Oct. 19.—The adjustment of bus rates for newspaper hauling will be chief among the problems and activities before the members of the Central States Circulation Managers Association for the next few months. It was decided at the semi-annual meeting held here today that Illinois circulation managers will make a survey of the bus rates within their State and endeavor to reach some conclusion as to equitable costs and the availability of buses chartered exclusively for passenger carrying.

Indiana, it was pointed out, is the pioneer State in getting uniformity of rates. Outside of Indiana the bus driver or company charges what he will or drives the best bargain he can, and the rates were found to vary 50 and 75 per cent in various communities for equal service.

Clarence Eyster, *Peoria Star*, is conducting the Illinois survey. He discussed the entire problem before the circulation managers of Illinois, Indiana, Iowa, Kentucky, Michigan and Wisconsin at today's meeting at the La Salle Hotel. The completed survey will be used to make an appeal to the State Commerce Commission or the Legislature for a uniform bus order.

J. N. Eisenlord, *Chicago Daily News*, was the chairman of a round table discussion which occupied the entire afternoon session.

Among the speakers were: Paul Kinzel, *Springfield State Journal*, "The Evil of Making Agents Eat Papers"; Roy Parrish, *Decatur (Ill.) Herald*, "How Can Outside Agents and Carriers Be Urged to Get Circulation Without Awards Being Offered Them?"; R. S. Schmedel, *Indianapolis News*, who discussed "Rural Circulation"; Clarence Bevinger, *Terre Haute Post*, on "Prize Contests and How to Stimulate Reader Interest in Them"; and Charles Payne, *Indianapolis Star*, who spoke on "Advantages of Organization in Spreading Good Circulation Ideas."

A mail poll was ordered on a proposition to advance the meetings of the association from April to March and from October to September.

NEWSPRINT MILLS MAKE 18% MORE PAPER

Nine Months' Product of U. S. and Canadian Plants Totals 2,640,747 Tons—Mill Stocks 33,245 Tons

Newsprint production in the United States during Sept., 1926, amounted to 136,167 tons and shipments to 135,300 tons. Production in Canada amounted to 161,287 tons and shipments to 162,740 tons, making a total United States and Canadian production of 297,554 tons and shipments of 298,040 tons. The newsprint mills also made 1,409 tons of hanging paper in September, 227 tons of which were made in Canada. During September 16,525 tons of newsprint was made in Newfoundland and 1,345 tons in Mexico, so that the total North American production for the month amounted to 315,424 tons. For the nine months of 1926 the Newfoundland output of newsprint totaled 133,590 tons, an increase of 145 per cent over 1925, and the Mexican output 9,572 tons, an increase of 1 per cent compared with the previous year.

During September the United States mills operated at 95.7 per cent of rated capacity and the Canadian mills at 99.0 per cent.

The United States mills made 12 per cent more in the first nine months of 1926 than in the same period of 1925, and the Canadian mills made 24 per cent more than in the first nine months of 1925.

The combined production of the United States and Canadian mills in the first nine months of 1926 was 18 per cent more than in same period of 1925.

Stocks of newsprint at United States mills totaled 18,741 tons at the end of September and at Canadian mills 14,682 tons, making a combined total of 33,423 tons, which was equivalent to 2.7 days average production.

MORE SPACE NEEDED

New York Newspaper Club Meeting to Consider New Quarters

William P. Beazell, assistant managing editor of the *New York World*, an president of the Newspaper Club, called a special meeting for the evening of Oct. 22 to consider proposals for new quarters for the club. The present clubrooms in the Bush Terminal Building on West 42nd street, which have been occupied since the establishment of the club four years ago, have been outgrown, many members believe.

ALL INLANDERS ARE HAPPY

A trio of them are here shown (left to right): W. O. Paisley, editor and manager *Marion (Ill.) Republican*; Emery A. Odell, publisher *Munroe (Mich.) Times*; F. G. Smith, secretary and manager *Waukegan (Wis.) Sun*.

NEW YORK STATE CIRCULATION MANAGERS IN CONVENTION AT NEW YORK

Members of the New York State Circulation Managers Association, attending the convention in New York City, pictured above, are: Bottom row (left to right) Fred Arn, *Gloversdale Leader-Republican*; Maurice Eisenman, Metropolitan News Company, New York; John T. Calkins, *Elmira Star-Gazette*; Glen S. England, *Gloversville Leader-Republican*; Charles Blewer, *Binghamton Press*; Charles Hertz, Metropolitan News Company; Bernard Knight, *Syracuse Herald*; William Baldwin, *New York World*; R. D. M. Decker, *Rochester Democrat & Chronicle*; A. E. MacKinnon, Advertising Club of New York; James McKernan, Kings County Delivery, Brooklyn. Second Row: (left to right) Earl Jones, *New York Commercial*; Frank Roberts, *Rochester Times-Union*; Alfred Brandon, *Long Island City Star*; R. E. Kurz, *Brooklyn Eagle*; Daniel W. Tanner, *Utica Observer-Dispatch*. Top Row: Charles Congdon, *Watertown Times*; M. Adams, *Watertown Times*; Louis Gautier, *New York Morning Telegraph*; Martin A. Miner, *Syracuse Post-Standard*; Abram Newman, *New York Evening Post*; John Sternicker, Kings County Delivery; Frank Conley, *Watertown Standard*; W. J. Mathey, traffic superintendent, A.N.P.A.; William W. Saxe, American Newspaper Promotion Service; A. Seagal, New York; L. A. Glacken, *Wall Street Journal*; Al Zimmerman, *New York World*; Michael Burke, Brooklyn; Howard J. Appley, *Binghamton Sun*; George Erb, Jr., *Buffalo News*; Charles Bailey, New York; Theodore Edson, *Rockville Centre (L. I.) News*; Louis Weinstock, Metropolitan News Company, New York; D. Bertrand, Shreveport, La.; Lewis Boller, *Hornell Tribune-Times*; E. Weisman, *New York World*.

CIRCULATION TECHNIQUE ENGAGES NEW YORK DISTRIBUTION EXPERTS

**Calkins Advises Thorough Analysis of Readers' Preference in News and Features and Interest in Advertising—
R. D. M. Decker Is Elected President**

A DEFINITION of a "good circulation manager" was offered this week by Edwin S. Friendly, business manager of the *New York Sun*, addressing the annual banquet of the New York State Circulation Managers' Association, held Oct. 19 at the Hotel Martinique, New York.

"The circulation manager who is alive and showing progress," Mr. Friendly said, "must be in constant touch with his editorial department. He should know news values in order to be able to judge how many extra copies a big story will sell as soon as it breaks. The best circulation manager for a metropolitan newspaper is one who has had small city experience, because he usually has served in all departments of a newspaper, and brings with him experience which men working only in the larger cities are never able to obtain."

The New York circulators, representing all larger cities of the state, met in New York on Tuesday and Wednesday this week. R. D. M. Decker, *Rochester (N. Y.) Democrat & Chronicle*, was elected president, succeeding Charles E. Blewer, *Binghamton Press*.

Another speaker at the annual banquet was Bernarr Macfadden, publisher of the *New York Evening Graphic*.

Mr. Friendly urged the circulation men to support their state association, because, he said, such a body enabled members to obtain valuable information concerning methods of building up circulation.

"The large city circulation manager should feel there are a great many things he can learn from the smaller city circulation man," he said. "For example, methods of transportation are the same

for a newspaper with big circulation as for the paper with a smaller number of readers. Last year, when Senator Moses made a tour of the country investigating newspaper postal rates in various cities, some of the most beneficial information for the publishers was brought out by the small-town circulation managers.

"The same fact holds true as regards new methods of transportation, the use

of automobiles for suburban and long-distance hauling, as well as state laws relating to news boys and news dealers. In fact, there are any number of problems in the solution of which the experience of a man in one town is of value to a man in another.

"Just as the publishers' association is a very helpful organization, so should your association be vital to all circulation managers of the state."

President Blewer opened the convention Tuesday morning, when papers were read by M. A. Miner, *Syracuse Post-Standard*; and Glen S. England, *Gloversville and Johnstown (N. Y.) Leader-Republican*. Considerable discussion followed Mr. Miner's paper, which was on methods for mail promotion.

"Road men, local subscription agents and postmasters make up the best organization for promotion of mail sub-

scriptions," Mr. Miner said. "The roadmen will work and re-work assigned territories, selling your paper to new and renewal subscribers and explaining any special offer you may have. They will travel in cars, preferably their own, and will be paid a salary to cover car upkeep, in addition to commission on business obtained and a bonus on new orders over a certain number each week.

"Local agents and postmasters, if they are your friends, will produce considerable business for you. Supply them with receipt books, order blanks and envelopes to make order-taking easy. They should be paid a flat commission, usually 10 per cent.

"A prospect list, made up from unexpired expirations and from other sources, will prove a valuable promotion medium. Keep it up to date, and 'hit it up' occasionally with circulars and any special offers you may have."

Argument following Mr. Miner's suggestions were concerned chiefly with whether road men and agents should be paid on a commission or salary basis. Mr. Blewer declared \$50 a week should be considered a reasonable salary for roadmen. He said he had found that by paying commission services could be obtained at a little lower rate.

Mr. Decker, the president-elect, cautioned members to analyze their mailing lists carefully, because, he maintained, national advertisers discount all mail subscribers beyond a certain radius.

"There is considerable danger attached to the payment of commissions to road men and agents," F. T. Conley, *Watertown Standard*, declared. He related how some smooth talkers had once put it over in his town, obtaining commissions for subscriptions paid for with checks dated in advance, which later proved worthless.

Don C. Seitz, former business manager of the *New York World*, now an associate editor of the *Outlook*, was the speaker at the luncheon Tuesday. He described what he termed "strange changes in the handling of papers in the last decade and curious shifts in the public attitude toward the press."

R. D. M. Decker, *Rochester (N. Y.) Democrat & Chronicle*, new president New York State Circulation Managers' Assn., receiving well wishes of C. E. Blewer, *Binghamton (N. Y.) Daily Press*, retiring president.

"The greatest improvement recently has been made by the country newspapers," Mr. Seitz declared, "while most metropolitan newspapers are chasing butterflies, creating great confusion in their circulation departments over a flood of nothing in particular."

"In the larger cities today there is such a flood of editions that the readers have become confused and don't get value for their money. The papers never catch up with the news. The whole news system is out of joint. Although the delivery organization and the handling of papers generally has been developed to the nth degree, the editors apparently have quit working."

Mr. Seitz blamed this situation on the war with its voluntary censorship. Because of the censorship, he pointed out, it became easy for the newspaper men not to do anything.

"The greatest danger confronting the newspaper world today," he concluded, "is that the newspapers are being taken out of the journalistic category and are rapidly coming into the hands of bankers, who see in the press only a money-making machine."

At the annual election held on Wednesday morning, other officers chosen in addition to Mr. Decker were: George Erb, Jr., *Buffalo News*, first vice-president and William F. Baldwin, *New York World*, second vice-president. Alfred W. Cockerill, *Utica (N. Y.) Press*, was re-elected secretary-treasurer.

New directors are: Edward Dobson, *Brooklyn Times*; Bernard Knight, *Syracuse Herald*; David Tanner, *Utica Observer-Dispatch*; and Charles Waterfield, *New York Times*.

Speakers on Wednesday included: J. J. Allardice, *Brooklyn Eagle*; Mr. Tanner and John T. Calkins, *Elmira Star-Gazette*. Mr. Allardice maintained that the "home delivery" or independent carrier method of delivery can be made as successful in a large city as it can in the smaller towns.

"Publishers have come to realize," he said, "that it is just as essential for a newspaper to control its own well-trained selling and distributing organization, as it is for any other big industry, and that with their own controlled carrier organization, their readers will be served every night, no matter what the weather conditions are, or what day of the week it may be. Circulation figures will not drop on holidays because newsdealers refuse to open their stores."

"We have been experimenting with home delivery in Brooklyn for the last few months, and the system seems to be working out well. We have experienced no trouble in making collections in any of our branches. Our boys are collecting the money for their papers, and we have no accounts in arrears. Our carrier organization is one that we are proud of."

"If a newspaper covers an entire city with independent carrier service, it is only natural to assume that newsstand sales will fall off. There is no way to get around this. In big cities, however, there are so many newspapers sold on newsstands that dealers are more independent than they are in smaller cities. If a newspaper in a large city breaks away from a newsdealer to establish home delivery, the newsdealer, as a rule, does not seem to take it very seriously. He simply tries harder to sell more of the papers he has on his stand."

Mr. Calkins, speaking on the value of circulation to a newspaper publisher, divided his subject into three groups for analysis. The three circulation groups he listed as: first, the breadth; second, the acceptance; and third, the depth.

"By breadth we mean the size of the circulation and its buying power," he explained. "By acceptance, we mean the intensity of reader acceptance of the news and advertisements; and by depth, we mean the reader's readiness to buy."

"A publisher wants to know how many families there are, not only in the home town of publication, but also in the suburban towns. He also wants to know the buying power of these communities, what kind of people live there, whether they spend money for advertised articles, how much they spend, and whether they are able to spend at all. Such an analysis

is very valuable in assisting the national advertising department of any paper to obtain a campaign.

"Another feature in circulation breadth relates to the coverage of magazines in any given territory. The advertising department is forever fighting the old, old story that complete coverage cannot be obtained without use of magazines."

"Go into the facts and find out for your publisher what magazines are circulated in your trading area. We did and to our surprise we found that only one magazine, a woman's journal, had as much as 10 per cent coverage in the city of Elmira against better than 98 per cent of our newspaper coverage, and only one general magazine has as much as 10 per cent coverage."

"Reader acceptance is a thing that every newspaper publisher should know exactly and without guess. Just because a newspaper is received in a home is no reason that the contents, news and advertising are accepted. An accurate survey should be made to find out what your readers think of your newspaper. Find out, for instance, how many readers actually read the advertisements, how many the news."

"Results are apt to surprise and educate you. We found, as an example, that 98 per cent of the readers of one of the newspapers read the advertisements regularly. More than 91 per cent expressed the opinion that this same newspaper was a direct benefit to them and they believed the news printed in it. These facts answered the question of reader acceptance, and they formed a powerful argument for the publisher."

Mr. Tanner said he had been convinced that the use of serial stories was one of the best ways to hold old readers and develop new ones.

The association members with their wives concluded the convention on Wednesday afternoon by taking a trip down the bay in a boat furnished for them by New York City.

"REDISCOVERING ILLINOIS"

Newspaper Men Plan Campaign to Tell State About Itself

(By Telegraph to Editor & Publisher)

CHICAGO, Oct. 19.—The tale of "Rediscovering Illinois," was told to fifteen members of the Publicity Committee of the Illinois Chamber of Commerce, meeting Tuesday in connection with various gatherings of publishers and editors. All the members of the committee are connected with newspapers.

The Committee's purpose is to "acquaint Illinois people with the long, spraddled-out State that has a range for climate nurturing everything from cotton to hard wheat, and producing minerals ranging from fluorspar to fool's gold."

Under the chairmanship of Seymour Oakley, editor of the *Peoria Star*, the series of articles covering the different regions of Illinois was explained. The writer once a week takes a representative community and turns it inside out so that its good points, those often overlooked by the community itself, are shown to the entire State.

"It is our job to sell Illinois to itself," said Mr. Oakley. "When we have shown Illinois to the Illinois people and have sold them their own State, we are going out and sell the State to the nation at large in the same way."

The Committee had all Inland Daily Press Association members from Illinois as guests at a dinner, Tuesday night. Later members attended a theatre party.

BIG PAPER IN MILWAUKEE

The largest daily newspaper ever published in Wisconsin came off the presses of the *Milwaukee Journal* October 15. With a 72-page paper, and 447 columns 9 inches of net paid advertising, the state record as well as the Journal record was broken. Previously, the record paper was the *Milwaukee Journal* of October 16, 1925, with 64 pages, and 415 columns 17 inches of net paid advertising.

An appropriate present for a girl is anything she can wear; for a boy, anything he can eat.—*St. Paul Dispatch*.

PRESS FIRM ELECTS HOUSTON DIRECTOR

Also Named Vice-President of International Intaglio Corporation—Plans to Develop Wide Scale Color Printing by Newspapers

Preliminary plans for development of color printing by newspapers on a large scale were disclosed with the election this week of Herbert S. Houston, member of the American Committee of the International Chamber of Commerce, as vice-president and a director of the International Intaglio Corporation, which represents printing press manufacturers of France and Germany in the sale of color gravure presses in the

H. S. HOUSTON

United States, Canada and Mexico. Frank M. Walsh is president of the corporation, which makes New York its headquarters. Mr. Houston retains his interest in the Cosmos Newspaper Syndicate, New York, of which he is president.

Announcing Mr. Houston's election, Mr. Walsh said:

"Now that the practical demonstration has been made as to the possibilities of color printing on fast rotary presses, we intend to co-operate with newspapers in developing full color advertising. Mr. Houston has been chosen to direct this work because of his high standing in the publishing and advertising field, and, in particular, because of his long association with the development of color advertising for magazines. It is our belief that a great development of color advertising is ahead for the newspapers. Until now this has been a field in which the magazine has had a virtual monopoly, but it is now possible for newspapers, as the *New York World* and the *St. Louis Post-Dispatch* are showing to become effective competitors."

Mr. Houston was interviewed by Editor & Publisher at his syndicate office in New York.

"We are bringing together a group of leading papers, so placed geographically that they will constitute a great national medium," he said, "and we shall then offer to advertisers full color, backed by all the powerful arguments that have gained for newspapers, in the past 10 years, such a large volume of national advertising."

"Mr. Walsh and I have just returned from a two weeks' trip together, during which we met a number of the most important newspaper publishers of the country, and, with hardly an exception, they expressed the greatest interest in our plans."

Mr. Houston quoted one publisher, whose name he withheld, as declaring:

"Color printing on a rotary press is no longer an experiment. It is here, and full color advertising should follow."

"I definitely believe there is a great opportunity for development in the color advertising field for the newspapers," Mr. Houston continued. "There are 500 national advertisers who use full color in the magazines. I have discovered by a survey. Very often magazines of today run as many pages in color as in black and white."

"As demonstrated in the laboratory experiment conducted by Howard Nixon, of Columbia University, and reported in Editor & Publisher last week, color has lost its attention value in the magazines, because, in that medium, it has reached a saturation point, and the law of diminishing returns has set in. Also, as Mr. Nixon stated, the reverse would be true in the newspapers, where color in advertising is a novelty."

"Unless some of the most far-seeing publishers are out of focus on the im-

mediate future, the newspaper is approaching one of its greatest triumphs."

Mr. Houston said there are now five color gravure presses in this country. He pointed out that new units are being installed by the *Philadelphia Inquirer* and *Montreal La Presse*.

Mr. Houston was formerly a vice-president of the Doubleday, Page & Co., where he was associated with the beginning of the growth of color advertising in *Country Life*. He was founder of and for many years publisher *Our World* and *Our World Weekly*. He founded the Cosmos Newspaper Syndicate in 1923.

In addition to his connection with the magazines, Mr. Houston has had considerable newspaper experience. From 1890 to 1892 he was city editor of the *Sioux City (Ia.) Journal* and was associated with the *Chicago Tribune* from 1892 to 1895. After this period he served successively with *Outing Magazine*, Doubleday, Page & Co., and *World's Work*. He was with Doubleday, Page & Co., from 1900 to 1921.

GORDON NAMED CHIEF

Succeeds Ford on Editor's Desk of Richmond Times-Dispatch

Robert D. Ford, after eighteen years in the employ of the *Richmond (Va.) Times-Dispatch*, under three ownerships, as news editor, telegraph editor, managing editor and editor, severed his connection with that newspaper organization October 16.

While a successor to Mr. Ford as editor has not been, and will not be appointed for the present, according to the management, Douglas Gordon, former police commissioner of Richmond, and for the last several years editorial writer and dramatic critic of the *Times-Dispatch*, following a period of several years as editor of the *Norfolk (Va.) Ledger-Dispatch*, will be the chief editorial writer. Assisting him will be Richmond Maury, who, up until his appointment as Mr. Gordon's assistant, has been agricultural editor.

Just before Mr. Ford bade farewell to his associates, some of many years' duration, others of less, Ernest C. Pollard, managing editor, called the members of the news department together, and Charles Phillips Hasbrook, the publisher and general manager, presented the retiring editor, on behalf of the news department, a magnificent golf set in a genuine full leather case. Mr. Ford responded feelingly. Later, Mr. Ford was the recipient of a silver loving cup from the composing room chapel of the *Times-Dispatch*.

Mr. Ford leaves the *Times-Dispatch* to become secretary of the co-ordinated Scottish Rite bodies of Richmond.

"100,000 GROUP" MEETS

CHICAGO, Oct. 20.—Members of the "100,000 Group of American Cities" who gathered here for the Audit Bureau Convention held an executive meeting in the LaSalle Hotel to-day, which was followed by a noon luncheon. George M. Burbach, business manager of the *St. Louis Post-Dispatch*, presided at the meeting in the absence of Walter Strong, publisher of the *Chicago Daily News*, who is in Europe. Leslie Barton, advertising manager of the *Chicago Daily News*, told of the progress made by the group in distributing market data to agencies and national advertisers. Details of the meeting, however, were not made public.

TO MARK ANNIVERSARY

The *Wilmington (Del.) Evening* will issue a 64-page anniversary number in rotogravure Oct. 28, combined with its regular edition. The number will present a pen and picture story of Wilmington and the Del-Mar-Va peninsula and their commercial and industrial activities. This will be the first rotogravure publication that has ever been produced in Delaware.

WHEN A QUEEN WRITES FOR THE DAILY PRESS

**Syndicates Row Over Rights, but Deny Intention to "Bottle Up" Story from Papers Not Clients—
Editors Will Greet Rumanian Majesty at N. A. N. A. Sunday Reception**

MARIE of Rumania in her queenly way has created a royal stir in American syndicate and newspaper circles, which she may or may not explain away at a reception to be given in her honor by the North American Newspaper Alliance at the Plaza Hotel, New York, Oct. 24, from 4 o'clock until 6.

Between 800 and 900 editors, publishers and distinguished newspaper writers of the United States and Canada have been invited to the reception, and Major Loring Pickering, general manager of N. A. N. A., announced on Wednesday of this week that he had received acceptances from publishers as far west as Seattle, Wash.

Who owns the newspaper rights to the royal literary output, became a perplexing problem immediately upon Queen Marie's arrival on the *Leviathan*, Oct. 18.

The North American Newspaper Alliance announced then that Her Majesty would write her "American Impressions" for its 60 member newspapers exclusively, an announcement which caused consternation in the office of Famous Features Syndicate, Inc., New York, which believed Marie was securely under contract to write for them for another year to come.

Famous Features is offering "Queen's Counsel," a daily column written by Marie, and Leslie Fulenwider, general manager, informed EDITOR & PUBLISHER this week that that feature would continue, arrangements with N. A. N. A. notwithstanding.

The contract with Famous Features expired Oct. 1, but contained an optional clause providing renewal to Oct. 1, 1927. The option, Mr. Fulenwider said, was executed.

Her Majesty, according to Major Pickering, will receive no remuneration for the "American Impressions" to be written for N. A. N. A. other than that the articles "may draw Rumania and the United States and Canada more closely together in friendship."

Zoe Beckley, a member of the Famous Features staff, who first interested Rumanian royalty in writing for the American press, has told EDITOR & PUBLISHER that Queen Marie is paid for the articles she writes for this syndicate.

Miss Beckley and Guy Jones, a member of the N. A. N. A. staff, were aboard the *S. S. Leviathan* on the last trip from abroad covering the Queen's passage. Both refused to talk about the trip.

Both syndicates denied stories published in New York to the effect that they had attempted to prevent the Queen from granting interviews on her arrival in New York. Her Majesty, it was reported, was under orders of the Rumanian government to grant only one interview in this country. She had not been a half hour in New York harbor, however, before American newspaper persistence prevailed, and she had submitted to three mass interviews, answering questions put to her by more than 200 newspaper men and women.

"Those who believe that the Alliance could impose a 'no interview policy' on Queen Marie don't know much," Major Pickering declared. "Her government impose such a policy, and I understand it has. Certainly we could not, nor could we want to."

"We observed the bad effect of the attempted bottling up of the King Tut tomb story. The more the Queen is interviewed and the more of a newspaper figure she becomes, the better it will be for the papers which carry her 'Impressions of America.'"

Those who believed that some syndicate was responsible for the Queen's silence during the trip over on the *Leviathan* were given warrant for their belief in an announcement made to correspondents shipboard Oct. 15 by the Queen's

business manager, Mme. Simone Lahovary, that the news writers would be allowed to see Her Majesty, but could not be permitted to print interviews because the Queen was under contract to do all her talking for a feature syndicate.

Major Pickering insisted to EDITOR & PUBLISHER that the only arrangement the N. A. N. A. had with Queen Marie was set forth in the following letter he wrote to Her Majesty on Aug. 15, and the reply written by Mme. Lahovary, and approved with Marie's signature:

"To Her Majesty

"The Queen of Rumania:

"The Board of Directors of the North American Newspaper Alliance which last year published Her Majesty's first series of newspaper articles, feels a special interest in the announced visit of Her Majesty to America, and believes that the people of North America would be interested to know Her Majesty's impressions while touring this continent. We therefore place our columns at Her Majesty's disposal.

"Through a membership comprising over sixty of the most prominent newspapers in as many cities of the United States and Canada, and associated member newspapers in fifty other countries, it is believed that Her Majesty will become better known to the people of North America and thereby draw Rumania and the United States and Canada more closely together in friendship."

The following is the reply to Major Pickering's letter:

"Her Majesty has received your invitation and is deeply touched by the spirit of co-operation expressed therein. Her Majesty desires us to say that she will, with pleasure, give you her *Impressions of America* during her coming visit, for you to convey to the people of America through your esteemed publications."

Both Famous Features and the Alliance silence those who insinuate that Her Majesty engages a "literary ghost" to do her writing for her by showing manuscripts written in longhand by the Queen. The exhibits seen in the N. A. N. A. office are written with a blunt pen on blue ruled linen, faintly scented with perfume. Her Majesty evidently writes rapidly, skipping over such unseemly barriers as commas, periods and semi-colons rather lightly. She makes few corrections. Her handwriting is very legible. On the back of each manuscript, she usually writes: "Kindly return this M.S. to me when you have finished typing it."

Granted, then, that Marie writes everything that appears under her signature in the press, the question as to what news-

papers have exclusive right to her articles remains as yet unsolved.

Mr. Fulenwider, representing Famous Features, told EDITOR & PUBLISHER he expected to have a private conference with the Queen late this week, when he hoped everything would be satisfactorily settled.

Meanwhile, Major Pickering continued preparations for his mammoth function for the press.

According to plans for the N. A. N. A. reception, those in the receiving line at the Plaza, when large numbers of the nation's newspaper men with their wives file past to bow at royalty will include: Mr. and Mrs. Edwin Cowles, *Spokane Spokesman Review*; Mr. and Mrs. E. J. Lynett, *Scranton (Pa.) Times*; Mr. and Mrs. Van Lear Black and Mr. and Mrs. Paul Patterson, *Baltimore Sun*; Mr. and Mrs. James E. Scripps, *Detroit News*; Mr. and Mrs. Edmond Booth, *Grand Rapids (Mich.) Press*; Mr. and Mrs. Newbold Noyes, *Washington Star*, and Major and Mrs. Loring Pickering, of the N. A. N. A.

Acceptances from those invited to attend the reception were being received rapidly this week, indicating that editors, publishers and newspaper writers of the land are as anxious as the proverbial cat for a peek at the Queen.

Major Pickering declared he understood that Chicago editors and publishers had engaged a private car for the New York trip. More than 300 are expected to attend from cities outside of New York.

Reports varied as to whether or not newspaper men would accompany the Queen when she starts her tour of the States. Early in the week it was announced in supposedly definite fashion that no newspaper men would travel with her on the special train, the only exception being Stanley Washburn, of Lakewood, N. J., a former war correspondent, who was listed as Her Majesty's official companion and liaison officer. Later in the week this announcement was reversed, and indications were that the usual large number of correspondents would draw a pleasant assignment as chroniclers of the royal trip.

Mr. Washburn's friendship with the Queen dates back to his work as a war correspondent in Rumania in 1916. The Queen personally requested that he accompany her on the American trip. When the Rumanian army was retreating from Bucharest in 1916 and Bucharest was being bombed, Mr. Washburn was the only American correspondent with the soldiers. Queen Marie, torn by the illness of her youngest son, who was afflict-

ed with scarlet fever and facing defeat on the field, rode out three consecutive days to rally her armies. Mr. Washburn rode out with her each time.

When in Rumania in 1916, Mr. Washburn was writing for *Colliers' Weekly*. He began his newspaper career as a police reporter for the *Minneapolis Journal* in 1901. Later, he worked for the *Minneapolis Times*.

His first experience as a war correspondent came in 1904, when he was sent by the *Chicago Daily News* to cover the Russo-Japanese war. He also reported the Russian revolution in 1906.

He went to Europe in August, 1914, as a correspondent for *Colliers'*. Later in the same year he was sent by the *London Times* to Russia, where he was attached to the Russian army for 26 months, and was the only American having access to the Russian front.

When the United States declared war, Mr. Washburn joined the 26th Division as intelligence officer in France, serving in the Toul and Chateau-Thierry sectors. In September, 1918, he was invalided home.

During the trip to Washington and Baltimore, reporters in her wake declared Queen Marie "cleverly, frankly and graciously made everything easy for what she terms her 'fellow scribblers'."

Dorothy Dayton of the *New York Sun* wrote that the reporters had the "shattering experience of being not only allowed, but encouraged to enter into every discussion of the whole day, beginning with the visit to Arlington Cemetery in the morning, followed by the trip to Mount Vernon, where the Queen's every word was purposely made audible to the dozen or so trailing reporters."

Miss Dayton quoted Mme. Lahovary, one of the Queen's ladies in waiting, with saying that Marie wakes up every morning at 6:30 to do her syndicate writing in bed. The proceeds from her syndicate writing go entirely to Her Majesty's charity fund.

Marie's first adventure with American newspaper men and women was not particularly favorable to this country's press. Robert Mountsier, of the *New York Sun*, who was among those who went down the bay to meet the royal visitor on the *Leviathan*, thus described the affair for EDITOR & PUBLISHER:

"Her Majesty!" announced Captain Herbert Hartley, and in the Square on C deck of the United States liner *Leviathan* 150 newspaper men and women, slightly seasoned with secret service men and heavily iced with Rumanian and

WHEN FLORIDA NEWSPAPER FOLK MET AT DAYTONA

Group of Associated Dailies of Florida members at recent annual convention.

AGENTS TO HEAR PRESIDENT COOLIDGE AT TENTH ANNUAL CONVENTION

Two-Day Program in Washington Next Week Marked by Many Other Noted Speakers—Sessions Open to Public

PRESIDENT COOLIDGE will address representatives of 133 advertising agencies assembled in Washington next week for the 10th annual convention of the American Association of Advertising Agencies. Sessions will be held at the Mayflower Hotel on Oct. 27 and Oct. 28. A meeting of the executive board of the association will be held the day preceding the formal opening of the convention. President Coolidge's address will be made at the dinner meeting.

The meeting this year is considered of special importance because of the wide variety of subjects to be discussed. Throughout last year the association has had 47 committees at work in the study of varied problems involving national advertising and advertising agencies. Reports covering these activities will feature the convention.

Roy S. Durstine, of Barton, Durstine & Osborn, Inc., New York, president, will formally open the convention at 10 o'clock on the morning of Oct. 27.

Various committees of the association will then present their annual reports, and there will be addresses by Willard S. French, of Brooke, Smith & French, Inc., Detroit; Henry T. Ewald, Campbell-Ewald Company, Detroit; H. H. Charles, Charles Advertising Service, New York, and Newcomb Cleveland, The Erickson Company, Inc., New York.

St. Elmo Massengale, of the Massengale Advertising Agency, Atlanta, will be toastmaster at the luncheon, scheduled for 12:45 o'clock on Wednesday. The speakers will be S. E. Thomason, of the *Chicago Tribune*, former president of the American Newspaper Publishers' Association; Frank Braucher, Crowell Publishing Company, vice-president of the Periodical Publishers' Association, and Malcolm Muir, McGraw-Hill Company, Inc., president of the Associated Business Papers, Inc.

Following the luncheon there will be an open session of the convention at which the speakers and their subjects will be: "Conducting an Advertising Agency Business with Profit," by John Benson, of Benson & Gamble, Chicago; "Where Advertising Agency Service Begins and Ends," by F. J. Ross, F. J. Ross Company, Inc., New York; "The Agency's Position in the Field of Business Economics," by Clarence D. Newell, Newell-Emmett Company, Inc., New York; "Work of the Research Department of the Four A's and Its Application to the Problems of the Individual Agency," by Stewart L. Mims and Stanley Resor, of J. Walter Thompson Company, and Dr. Daniel Starch, director of research for the American Association of Advertising Agencies.

At the conclusion of the open session there will be a dinner at the Mayflower Hotel, at which the speakers besides President Coolidge will be: B. Kirk Rankin, *Southern Agriculturist*, Nashville, Tenn., former president of the Agricultural Publishers' Association; John A. Park, *Raleigh* (N. C.) *Times*, president of the Southern Newspaper Publishers' Association; Kerwin H. Fulton, president General Outdoor Advertising Company, and Edward T. Hall, Ralston Purina Company, St. Louis, president of the Association of National Advertisers. James W. Young, of the J. Walter Thompson Company, Chicago, will be the toastmaster.

Thursday's sessions will be devoted largely to the discussion of reports of various committees, with addresses by T. E. Moser, Moser & Cotins, Utica, N. Y.; S. W. Page, George Batten Company, Inc., New York; Earnest Elmo Calkins, Calkins & Holden, Inc., New York; Charles W. Hoyt, Charles W. Hoyt Company, Inc., New York; Richard S. Humphrey, H. B. Humphrey

Company, Boston; William H. Johns, George Batten Company, New York, and Louis Honig, Honig-Cooper Company, San Francisco.

Edgar D. Mason, Albert P. Hill Company, Inc., of Pittsburgh, is chairman of the committee on convention plans. His associates comprise John A. Dickson, Mitchell-Faust Advertising Company, Chicago; Ernest E. Dallis, Johnson-Dallis Company, Atlanta; C. L. Eshleman, Griswold - Eshleman Company, Cleveland; Willard French, Brooke, Smith & French, Inc., Detroit; Louis Honig, Honig-Cooper Company, San Francisco; Richard S. Humphrey, H. B. Humphrey Company, Boston; Eugene McGuckin, Eugene McGuckin Company, Philadelphia; T. E. Moser, Moser & Cotins, Utica; C. D. Newell, Newell-Emmett Company, Inc., New York; Rossiter Holbrook, Nelson Chesman & Co., New York.

Frank J. Reynolds, Albert Frank & Co., New York, heads the committee on hotel arrangements.

The entertainment committee comprises Winthrop Hoyt, Charles W. Hoyt Company, Inc., New York, and Clarence W. Scully, Lord & Thomas, and Logan, Washington.

"KATY" AGAIN IN DAILIES

Successful Railroad Advertising More Than Doubles Space

Newspaper advertising was conducted so successfully in 1925 by the Missouri-Kansas-Texas Lines that in June of this year the railroad resumed its campaign on a more extensive basis.

During five months in 1925, the road placed more than 10,000 lines in forty newspapers in Missouri-Kansas-Texas territory. The space so far used this year has aggregated more than 20,000 lines.

According to Walter Johnson, publicity agent, the purpose of this advertising was twofold: to present railroad facts to the public in an effort to create favorable public opinion, and to direct attention to the "Katy" personnel.

The advertising is of a character that is attracting widespread attention. Display layouts showing Katy engines and in an inset a closeup of the engineer, with a character sketch of that engineer, have appeared in many of the newspapers.

In addition to citing the performances of the Katy personnel, the advertisements also inform the public in regard to the railroad situation as a whole.

"Of course we were pleased with our 1925 advertising campaign, or we would not have increased our appropriation this year," Mr. Johnson said. "It has been distinctly effective in accomplishing the results at which we aimed. A friendlier public attitude towards railroads in general exists than before this advertising campaign began."

WIRELESS RATE LOWERED

The Ministry of Communications in Tokio has announced that from Nov. 1 wireless press messages from Japan to San Francisco will be 18 cents, with rates to other centers lowered accordingly. The rate to New York will be 21 cents. Recently the Japanese government offered a 20-cent press rate. The Radio Corporation of America immediately consented but the Continental Telegraph and the Commercial Pacific still did not consent. Therefore, the Ministry decided to reduce the wireless rate, which it controls independently of other companies. The reduction resulted from demands for cheaper trans-Pacific press communications made by newspapers in both Japan and America.

EDITOR & PUBLISHER CALENDAR

- Oct. 24—Fortnightly Forum, Debate on Publicity, Park Lane Hotel, New York.
- Oct. 24-26—International Advertising Assn., 10th District, annual convention, Beaumont, Tex.

- Nov. 7-13—Children's Book Week.
- Nov. 8-10—Assn. of National Advertisers, annual convention, Atlantic City, N. J.
- Nov. 9-10—International Advertising Assn., 1st District, annual convention, Worcester, Mass.
- Nov. 10-12—American Newspaper Publishers Assn., fall convention, French Lick, Ind.

DEWART INCORPORATES NEW YORK SUN

Employees Asked to Tell How Many 8 Per Cent \$100 Shares They Can Buy for Cash—Mutualization Plans Still Hazy

Employees of the *New York Sun* were this week asked to signify how many shares of eight per cent cumulative preferred stock with a par value of \$100 they would like to purchase for cash.

The request, made to members of various departments of the newspaper, which employs more than 1,000 men and women, by Edwin S. Friendly, business manager, furnished a possible hint on how William T. Dewart, recent purchaser of the paper, plans to carry out his announced proposal of mutualizing the property, according to the wishes of the late Frank A. Munsey.

Questioned by EDITOR & PUBLISHER, Mr. Friendly declared that the mutualization plans were still too indefinite for comment.

Incorporation papers of the Sun were filed Oct. 16 in Albany by Mr. Dewart. The capital stock includes 30,000 shares of first preferred and 20,000 shares of second preferred stock, each of \$100 par value, and 100,000 shares of no par value. Mr. Dewart, A. R. Watson and C. T. Dixon were named as the incorporators. The papers were filed by Watson, Lehman & Willgus, attorneys for the Sun.

The corporate name is New York Sun, Inc. Mr. Watson is a member of the law firm which represents the Sun, and Mr. Dixon is secretary of the newspaper.

The Sun, the *New York Telegram*, and the chain store properties of the late Mr. Munsey were bought recently by Mr. Dewart for \$13,000,000. The bulk of the proceeds of the sale will go to the Metropolitan Museum of Art as residuary legatees under Mr. Munsey's will.

CHARGED WITH OBSCENITY

Harry Turner, editor, and Miss Alice Martin, publisher and business manager of *Much Ado*, an occasional publication in St. Louis, were arrested last week on the charge of sending obscene matter through the mails. The charge was based on the reprint in *Much Ado* of an article on the Aimee Semple McPherson case in Los Angeles from a San Diego newspaper, which also was suppressed and its editor arrested. They have been released under \$5,000 bond to appear before United States Commissioner Atkins on Oct. 25.

ADS FOR NORTHWEST STATES

Advertising of the Northwest states of Washington, Oregon, Idaho and Montana was advocated by chamber of commerce secretaries of these states meeting at the Hotel Davenport in Spokane, Wash., recently.

TOLEDO BLADE FLASHES AGAINST LOCAL VICE

Editorial Proclaims Widespread Crime, Gambling, Bootlegging, While Police Tag Traffic Violators

A vice crusade was foreshadowed in Toledo, Oct. 18, when the *Toledo Blade* cut loose with a two-column editorial on page one pointing to Toledo conditions.

"Gambling houses are open.
"Slot machines are operating.
"Bootleg saloons are prospering.
"Everyone who isn't hopelessly dumb knows it."

Those are some of the high lights of the editorial which is said to have been written by Grove Patterson, editor of the Blade.

The editorial caught the Toledo Police Department in the midst of a petty campaign on traffic violators and at a time when the police have before the voters an appeal for higher wages.

The editorial follows: BETTER CHASE CRIMINALS THAN TRAFFIC OFFENDERS.

"Within three days Toledo citizens have been held up and robbed by armed thugs in the best residence streets of this city. Irving, Putnam, Prescott, Delaware, Maplewood and Collingwood avenue have not escaped. These are not underworld sections of Toledo, into which citizens deliberately or ignorantly go at their own risk. They are the so-called safe sections.

"Every day's newspaper records new reports of stick-ups, burglaries, thugery.

"And there are criminal depredations more significant and serious than the rapidly increasing activities of footpads.

"Gambling houses are open.
"Slot machines are operating.
"Bootleg saloons are prospering.

"Everybody who isn't hopelessly dumb knows it.

"There is a big job in this town for a big police department, properly encouraged by a conscientious city administration and properly led by the right officials.

"And what answer are the citizens of Toledo getting to this problem?

"What service are the taxpayers getting?

"What are YOU getting?

"The answer today, as it was yesterday, is a fly-swattening campaign directed at busy men and women who park their automobiles ten minutes overtime in the wrong place.

"Anybody can escape in a sandstorm. And in the sandstorm created by this amazing playhouse activity against the picayunish violations of traffic law offenders, real thugs are getting in and out as neatly as they ever did in the history of Toledo.

"Organizations which do not sense the real situation in this city, and a police department which does not want to sense it, are not satisfying the good people of Toledo by sticking yellow tags on Fords.

"If the police department is so suddenly keen about law observance, if the police department is so eager to make arrests, let them go after big game. There's a bagful here."

TACOMA LABELS HELP CHURCH

An advertising contest which will benefit a church or some worthy charity has been started by manufacturers in Tacoma, Wash. Saving labels from Tacoma products offers the opportunity to local residents to cast votes for local churches, giving them the prizes which often go to individuals, thus helping the church, as well as the city in which local money is kept in local circulations.

RADIO AN ADJUNCT TO NEWSPAPER NOT COMPETITOR, SAY WIRE SERVICE MEN

Bickel and Lawrence Address New York Publishers Banquet—Plans for State Promotion Campaign Discussed

SYRACUSE, N. Y., Oct. 20.—Some weaknesses of the modern newspaper and some of its strong points were emphasized before the Fall meeting of the New York State Publishers Association at the banquet, October 14, by David Lawrence, publisher of the *United States Daily* and head of the Consolidated Press Service.

Karl A. Bickel, president of the United Press Association, was also on the program.

Faults of the press were treated by Mr. Lawrence under the headings of (1) faulty headlines as they pertain to the facts in the news columns; (2) unfairness of the news columns, mainly with respect to the way the news is handled; and (3) inadequate proportion of news to advertising.

When the meeting was thrown open to the answering of questions, Mr. Lawrence maintained that there is better news going out of Washington to the newspapers today through the press associations and there is more public interest in it than ever before. With respect to the radio as a distributor of news in competition with the newspaper, Mr. Lawrence said one cannot deal with the public unless he deals frankly and the people are already tired of having advertising strung along with entertainment. The time is coming when the radio will take the place of

costly sport extras, said Mr. Lawrence, and it will act as an advance sheet in attracting newspaper interest. The two can work together. They are not competing, he said.

Mr. Bickel also answered questions following his address. He stated that it was his belief that the radio would come to act as the bulletin board for the newspaper. He said there were 50 per cent more newspapers on the Dempsey-Tunney and world series circuits than on the Dempsey-Firpo fight, despite the fact that the radio gave the complete report. He described at considerable length the intricacies of foreign news service.

"There has been a most curious and interesting tendency toward self-analysis and appraisal prevailing in the American newspaper industry during the last year," said Mr. Bickel.

"A great deal has been said about the ethics of journalism: the publisher's duty; and a somewhat hectic search has been conducted to ascertain the drift of the business and why.

"Naturally the outburst has had its reactions upon the men and women actually engaged in the hard and at times prosaic work of manufacturing the newspapers themselves. Newspaper associations have seen fit to give recognition to these expressions. The result has been a somewhat dreary and depressing re-statement of aged and quite incontestable platitudes to the general effect and point that honesty is admitted to be the best policy.

"American newspaper publishers and the self-appointed investigators into the national journalistic conscience need have no fear. American journalism has never

been so honest; never so efficient and never so effective as it is today. And it is solely because of these facts that it is more prosperous than it has been at any other time in its history.

"Our newspapers have not won all their battles. There are still menacing dangers to the free expression of fact and opinion. The forces of darkness are not yet conquered. But the newspaper industry was never so strong on its part to make its light and never so clear in its own mind as to its rights and its destiny.

"When the American newspaper was freed from the curse of partisan political control; when the day passed that an advertiser could influence an editorial policy with the threat of a withdrawal of patronage; when the day arrived that the publisher, in the words of the philosopher from the wide open spaces could 'look every man in the eye and tell him to go to hell,' the ability and capacity of the American editor to serve leaped a thousand-fold; his value as a factor of worth in business enormously increased and the world in turn came to him with money in its hands to secure his honest and impartial services."

Prior to the Friday morning session of the New York State Publishers' Association the New York State members of the Associated Press discussed wire service improvements, following a report by Edward McKernon, supervisor of the Eastern Division of the A. P. Frederick P. Hall, editor of the *Jamestown Journal*, was elected a member of the eastern advisory board.

A plan to advertise New York State as a rich market for national advertising was presented at the opening session of the publishers, presided over by President Frank E. Gannett, of Rochester. It is planned to have advertisements prepared for publication in New York State newspapers every week. Russell C. Harris, secretary of the Advertising Department of the publishers, reported on the development of this plan. He stated that 67 newspapers with a combined circulation of 1,308,000 in up-State New York has agreed to participate. Only two of the larger newspapers up-State have not joined, and it is expected that the number will total 75 in a few days, making a combined circulation of 1,500,000.

New York City newspapers are expected to enlist in the plan. Mr. Harris said more than 3,000 national advertising accounts are placed or controlled by men living in New York State. The plan will be started in the near future.

The remainder of the morning session was taken up with a discussion of the controversy over the Audit Bureau of Circulations' proposed extension of its activity beyond its present field. Lester L. Jones and Victor F. Ridder represented the New York City publishers. David B. Plum, of the *Troy Record*, maintained that the A. B. C. should not go outside of its main purpose of auditing circulation accounts. It was felt that the newspapers were not given enough representation on the board of directors of the A. B. C. It was brought out that only two of the 21 directors were representatives of newspapers, yet the newspapers pay more than 80 per cent of the expenses of running the bureau. A motion was passed approving the action of the New York City publishers to the effect that there should be more representation from among the newspapers on the board of directors.

Frederick H. Keefe, of the *Newburgh News*, chairman of the legislative committee, discussed proposed legislation to be brought up at the coming session of the legislature.

J. B. Pinkham, counsel for the association, was ill in the hospital, but his written report of the present situation with regard to labor was presented to the members.

Ross W. Kellogg, director of the Empire State School of Printing, stated that the enrollment was satisfactory and progress was being made with the school and its new branches.

Arthur D. Hecox, of the Albany Knickerbocker Press, made a report relative to baggage rates on newspapers and progress being made with negotiations with the railroads and others concerned.

GARSTIN BACK IN LOUISVILLE

Now Business Manager of the Herald-Post—Recently in Florida

Bert N. Garstin, who, some years ago, was business manager of the *Louisville Courier-Journal and Times*, has returned to Louisville to accept the post of business manager of the *Louisville Herald-Post*. He was formerly business manager of the *Detroit Times*, and more recently he served as advertising executive on the *New York Evening Post*.

Some months ago Mr. Garstin determined to give up newspaper work and went to Florida to look after interests there. He remained in the South until recently invited by James B. Brown, publisher of the *Herald-Post*, to return to Louisville as business executive.

BERT N. GARSTIN

PREDICTS NEW TAX SYSTEM

Jeffress Says Rich and Poor Must Share Cost of Tarheel Progress

"The next great fight in North Carolina will come in the next two years, and it will be over the question of reorganizing our system of taxation so that the rich and poor man will pay his just proportion and no more," declared E. B. Jeffress, publisher of the *Greensboro News* and mayor of Greensboro, speaking at Founders' Day exercises in commemoration of the 133d birthday of the University of North Carolina.

"We are facing a critical period in North Carolina today," Mr. Jeffress asserted. "We have pulled ourselves out of the bounds of poverty and are now in a materialistic age. Wealth in itself is a great thing for any State, but one great trouble about it is that after a while it gets to a point where it becomes selfish and doesn't want to do its part. We are now engaged in a struggle between those who say we have gone too far and those who say we haven't gone far enough.

"The State cannot afford to halt in its educational program. It must find the means to go ahead."

CREDITORS GET NOTHING

Creditors of the defunct *Champaign (Ill.) Evening Herald* will receive nothing, the final report of E. S. Swigart, trustee, filed in the circuit court there last week, indicated. The paper was in debt more than \$13,000 when the creditors closed it, and a balance of \$385 is left after expenses of administration of the receivership. Carrier boys were owed \$475, and Mr. Swigart, himself a carrier boy at one time, has asked the court for privilege to distribute assets among them.

INTERNATIONAL IN BIG DEAL

The International Paper Company has purchased the greatest part of the assets of the Chaleur Bay Mills Company, with headquarters in Sherbrooke, Quebec. The price is understood to be \$1,800,000, of which \$1,000,000 was paid in cash. Property owned by the company includes 465 square miles of timber.

DALE BROWN APPOINTED

Dale Brown, manager of the Cleveland Better Business Bureau, has been elected a member of the board of governors of the National Better Business Commission.

MOODY ADDS TRIBUNE TO GALVESTON NEWS

Morning, Evening and Sunday Papers of Gulf Coast City Now in Control of Old Business Family

Management and direction of the *Galveston Tribune*, afternoon paper, passed, Oct. 18, to Shearn Moody, publishing owner of the *Galveston News*, morning, who two days before had announced he had acquired control of the Tribune from Harry I. Cohen and Arthur L. Perkins.

Moody, who is a member of the wealthy pioneer Galveston family of that name prominently interested in banking, cotton and insurance businesses, said the Tribune would be merged with the *News* under single ownership. The Tribune will still be published as an afternoon paper, and for the present use of the Tribune plant will be continued.

Cohen, as president and publisher, and Perkins, as vice-president and managing editor, acquired the Tribune control in May, 1921, from C. H. McMaster, who had controlled the paper for 20 years before his retirement. The Tribune was established in 1880. In recent years it outgrew its old quarters at 21st and Post-office streets, and moved to a new home at 24th and Mechanic, where new equipment was installed.

The *Galveston News*, oldest daily in Texas, was owned by A. H. Belo & Co., publishers of the *Dallas News* and allied publications, until a few years ago, when it was sold to the Moody interests.

Moody desired to purchase the Tribune because, according to a statement published in the *News*, "he is convinced that well-conducted Galveston newspaper properties are a good investment."

"The owners of the Tribune," said a statement in that paper, "feel that the sale and a joint ownership of both papers is desired for the advancement of Galveston. During recent weeks the owners of the Tribune have received numerous attractive offers for the purchase of its property from outside interests, but in view of the circumstances decided that the sale as concluded was more advantageous to the general interests of the city."

SIGMA DELTA CHI ESSAYS

Undergraduates Will Discuss College Man in Journalism

"The College Man in Journalism" is the subject of this year's undergraduates' writing contest which is conducted every fall by Sigma Delta Chi, professional journalistic fraternity. All male undergraduates studying journalism in the 38 colleges and universities having chapters of Sigma Delta Chi are eligible, whether members of the fraternity or not. Three prizes, of \$75, \$50 and \$25, will be awarded.

"What about the college journalist after he leaves college?" asks the contest committee of the contest entrants. "How completely is he making good? What are his good points? His weaknesses? What do non-college journalists think of him? What does he need, in the way of preparation, that he isn't getting?"

Manuscripts may not exceed 1,100 words, and must reach Mark L. Haas, editor *The Quill of Sigma Delta Chi*, 2704 Rochester street, Detroit, not later than Nov. 15.

Judges will be William P. Beazell, assistant managing editor of the *New York World* and associate in journalism at the Pulitzer School of Journalism; Karl A. Bickel, president, United Press; James W. Brown, president, Error & Publisher. Prize-winners will be announced in December.

DAILY BUYS REAL ESTATE

The *Brooklyn Citizen* has purchased Woodhull Lodge, the 168-acre estate of the Sherman family at Mastic, L. I. The newly acquired property adjoins Mastic Beach, which the Citizen purchased and developed as a summer resort for the newspaper's subscribers.

KARL A. BICKEL

SESQUI'S ADLESS POLICY WROUGHT DISASTER

Gigantic Publicity Department Smothers Press with Free Releases in Effort to Show Record Stack of Clippings—Large City Papers Ignore Show—No Selling Campaign Planned at Any Stage

PHILADELPHIA has tried the press agent and found him wanting.

Blame for the complete financial failure of the Sesqui-Centennial Exposition is laid directly on the exposition management, directed by Mayor Kendrick of Philadelphia, because of its failure to advertise and merchandise the exhibition. The management argued at the beginning that since the show was staged in commemoration of the 150th anniversary of the birth of American freedom, and its appeal was largely patriotic, the managers and newspapers of the country would throw open their columns gratis for Sesqui propaganda—that no genuine advertising or merchandising campaigns were needed to sell the show. It would sell itself, they argued, despite all precedents to the contrary.

The net result today is that the exposition is a "flop" financially running behind approximately \$40,000 a week, with debts totalling about \$5,000,000 and creditors organized into a protective committee ready to demand redress through the courts unless the municipality meets their claims.

The administration, facing the necessity of providing this money and paying its debts, has been reported to be dicker with the Philadelphia Rapid Transit Company to lease a valuable subway-elevated franchise for funds enough to meet its exposition obligations. Citizens are forming protective committees and holding public meetings to prevent transfer of the lease, which they insist "robs the city."

So strong was the feeling of the administration and the exposition authorities against advertising that none of the local advertising agencies were consulted seriously concerning an active selling campaign for the exposition. An advertising committee was named, but it never actively functioned along this line, figuring, perhaps, "what's the use?"

It was a one-man show absolutely, dominated by Mayor Kendrick, who, officially, is president of the Sesqui-Centennial Exposition Association.

"Kendrick's Carnival" it was dubbed by the Shriners when they staged their annual conclave in Philadelphia to open the exposition officially last Spring. "Kendrick's Carnival" it has since remained.

Every bit of propaganda sent out by the exposition staff of hired press agents—except for some booklets and posters was free publicity, thrown as a sop, in the guise of patriotism, to the newspapers. A lot of them fell for it at the start, but they soon got tired of the reams of "press release" copy seeping through to the editorial departments.

The more tired the newspapers became, the more determined was the publicity department to put it over. A dearth in return clippings meant an added pressure from the propaganda-grinding machinery. More press agents, recruited from the newspaper offices and among ex-newspaper men, were hired at fancy salaries and the publicity staff at one time exceeded 80 employees, mostly press agents or near-press agents and their helpers. The publicity department at the exposition soon became a "soft snap" for former newspaper men. Ability to write a story was all the qualification needed to land a job.

The only money spent in advertising—aside from a batch of posters—was a total of about \$10,000 a week which is now going to Philadelphia newspapers to cover the cost of printing the daily program of events at the exposition. The psychology of the publicity department in this respect being that the press-release propaganda, spread all over the country, will bring the crowds here and the daily program is all the visitors are interested in after they arrive.

Unfortunately for the exposition, the

propaganda didn't bring the crowds, because worth-while newspapers didn't fall for it. Not that they were not in sympathy with the exposition as such, but because they had been so "fed up" on free publicity.

These newspapers were willing to go along, so long as the publicity was of news value concerning national and international participation in the celebration. But, again, because the exposition wasn't properly "sold" in advance, the number of nations that staged exhibits was smaller than during any previous so-called "world's fair."

The only bit of international selling was a feeble effort through the mails and the sending of a representative to Europe to "drum up trade." Except in only a handful of small nations, the representative was given the cold shoulder and repeatedly he was asked "what is it all about?"

Exposition interests figured the show would attract anywhere from 25,000,000 to 40,000,000 visitors. And prospective concessionaires were so informed. They were told that extensive advertising and publicity would put the show across in great shape and that a money "clean up"

would be "like taking candy from a child" for concessionaires and exhibitors. As a matter of fact, there is to date no record of more than about 5,000,000 persons attending the exposition—one fourth of them, Philadelphians.

These promises and the activities of professional showmen induced a large number of persons to take space at the show. The concessionaires waited for the cash customers—some of them patiently and others very impatiently. The patient ones still are waiting. The impatient ones got out—many of them, at least. Some of those who "stuck it out a little longer" went broke and in two instances the exposition authorities have had to take over concessions to "save the Sesqui."

It is a good show—yes. It could have been a better show, exhibitors say, had it been properly "sold" to the world on a sensible, business-like basis, the same as any other product is "sold". Nearly three years of squabbling and petty jealousies preceded the opening of the exposition and because of these dilly-dally tactics and personal and political jealousies, the show was only about one-third finished when it formally was

opened. As a matter of fact, it isn't finished yet and it's booked to close Nov. 30.

Concessionaires are complaining of having been induced to come here by false pretense and are seeking to recover some of the losses they have sustained on the basis that the authorities failed to live up to their promises about properly advertising the event. They recently demanded that the exposition remain open another year so that they might recoup some of their losses. But Mayor Kendrick said "no"—and it was "no".

Down in the publicity department at the exposition none of those in charge have any idea of what the free publicity is costing the administration. The department works without a budget—in fact, it has no financial system at all. Efforts were made by several members of the staff to get one up in advance of operation, but the press agents were told to "go ahead, shoot the stuff and count the cost after the job's done."

The only actual expenditure the department says it has any record of, aside from the salaries of its attaches, is an item of \$80,000 which was eaten up in three full-page publicity releases, in plate form and mats to about 10,000 newspapers served by the Western Newspaper Union. And the \$10,000 weekly that it is costing the municipality to tell the world, in Philadelphia's newspapers, "what's doing at the Sesqui today."

The page-plates cost the exposition \$2.50 each—\$25,000 for each page, leaving a balance of about \$5,000 which went for matrices that were shipped to small-town newspapers. On the walls of the publicity department are hundreds of newspaper clippings for which the department pays 5 cents each to three clipping bureaus. The excess clippings are bound in big bundles and when the show is over they are going to be taken to the city dump.

A batch of press agents sit day after day at the exposition grinding out propaganda that is shipped all over the country. It is a custom of the press agents to "help out" wherever possible the exhibitors who become too loud in their complaints about "false promises" and whose exhibits are not producing the cash. This they do by featuring these concessionaires in the publicity and in the daily program "ads" in the Philadelphia newspapers.

Tons of stories are written and multi-graphed by the press agents and near-press agents, seeking a bit of the "easy money" being passed out and on the exposition payroll. It's not a matter of quality in the publicity department. It's quantity that counts, the department taking exceptional pride in the great volume of stuff shipped out at the close of business each day.

Pride, too, in pointing to the batch of newspaper clippings at 5 cents each that come into the department from the country.

The Philadelphia newspapers have quit taking the Sesqui "handouts" and each has assigned its own man to get the news. Little in the way of propaganda is being used and only scheduled events of some importance are getting any space.

The end of November will wind up the show and then will come the finale—the summing up of exposition finances. No public record has been published to date of these expenses. So far as the publicity department is concerned, an effort to get down to the cost of operation brought out nothing further than the statement, "there's no way of telling; you've got to wait until the thing closes."

There have been resignations galore among prominent men associated with the executive committee in charge of the exposition. And, in the meantime—

The incessant grinding out of free publicity continues and with each story sent out goes a prayer that some newspaper, somewhere, will use it and add to the so-called "alibi collection."

BY ARTHUR JOYCE

I WILL REMEMBER

By L. N. Flint

Professor of Journalism, University of Kansas

Some of the rules of good newspaper practice worthy of a place in the code of any journalist.

THAT when I write for print I put myself under an obligation to other people. Publishing a newspaper, large or small, is not merely a commercial activity, nor a form of amusement, but a rather serious effort to satisfy certain needs of the public.

L. N. Flint

That when, as a reporter, I use my eyes or ears or mind, I must constantly ask myself, "Am I seeing or hearing or apprehending this thing as it really is? Am I getting at the truth?"

That when I write I must keep before me the reader, to be sure that I am giving him a true impression, satisfying his curiosity, holding his interest, adding to his knowledge or his happiness.

That as a journalistic writer I have the power to help good causes and to hinder bad ones and that having such power I must use it or admit a failure in the line of duty.

That I owe it to myself, as well as to my readers, to seek diligently for the right word; to economize effort, both on my part and his, by using the fewest words that will express my thoughts.

That I should not sacrifice sincerity for mere cleverness, nor fairness for flippancy.

That humor is too fine a quality in writing to be degraded by bad taste or maliciousness.

That a sense of proportion as well as an appreciation of reader interest, must be an active factor in judging news values.

That notwithstanding the fact that the readers of my paper have a right to expect me to give them the news, I must always consider the larger social interests in deciding what to print and what to omit.

That in matters affecting the feelings and rights of others my judgment is not as good as it might be, and I may, without humiliation, accept the guidance of judicious persons having the advantage of wider experience.

That courage and aggressiveness should be controlled by the spirit of fair play even to the point of admitting a mistake or changing a policy or showing impartiality where personal likes and dislikes are involved.

That I am an unofficial guardian of law and order.

That unless I like journalism better than anything else, and unless I am reasonably sure that what I can do is worth doing, I had better work at something else.

TWO ADVERTISERS FIGHT OVER COOKING SCHOOLS

Procter & Gamble, Makers of Crisco, and Southern Cotton Oil Trading Company Want Their Products Used in Demonstrations—Conditional Clause Put in Snowdrift and Wesson Oil Contracts

RIVAL foodstuff advertisers disputing over the question of alleged "special privileges" accorded by some newspapers are threatening the life of the demonstration cooking school as a newspaper feature, and have put many publishers in that position tritely known as "between the devil and the deep blue sea."

The fight is between the Southern Cotton Oil Trading Company, New Orleans, makers of Snowdrift and Wesson Oil, and Procter & Gamble, Cincinnati, makers of Crisco, in addition to several other well known products.

The Home Economics Service Corporation, a big cooking school syndicate serving some 200 newspapers, has solicited and obtained lineage from Procter & Gamble along with several other general advertisers, to be run in newspapers in conjunction with the cooking school feature. It has never approached the Southern Cotton Oil Trading Company for similar business. M. J. Brown, president of the corporation stated. In addition to the paid advertising given to newspapers subscribing to the cooking school service, lecturers employed by the syndicate make use of and endorse Crisco during the local demonstrations, usually staged under the newspaper's name over a period of a week or more. Mr. Brown said it was absurd to say that the life of the cooking schools was threatened by the dispute between the two advertisers.

Combating this arrangement, Calkins & Holden, Inc., New York advertising agency handling the Southern Cotton Oil Trading Company's account, has inserted a clause in its current newspaper contracts, making the advertising schedule conditional on the publisher's promise to use Snowdrift or Wesson Oil for demonstration purposes, if his paper is in any way connected with a cooking school.

The conditional clause reads as follows:

"We have no intention of asking you to run a cooking school demonstration in connection with this advertising. It is, however, made a condition of this contract that if a cooking school, that has any connection with your paper, is conducted during the life of this contract, that the products of this client, namely, Wesson Oil and Snowdrift, shall by virtue of the schedule of advertising which is a part of this contract, be used by such cooking school for all demonstrations of uses found for a shortening, cooking fat or salad oil."

The Blackman Company, the New York agency representing Procter & Gamble, immediately countered with the following letter sent out to all newspaper advertising representatives:

"We understand that the agents for Snowdrift and Wesson Oil are now placing contracts for next year's business and that in these contracts they are including a clause reserving to themselves first option to be represented in any cooking school promoted by the newspapers they intend using.

"We wish to go on record that we think it is wrong in principle for a newspaper to accept a contract from any advertiser giving them a special privilege which cannot be given to all advertisers. We have never included in any contracts placed by this agency any clause reserving any special privileges for our clients and we do not want to do so. However, in self-defense where papers accept contracts with such a clause in as referred to above, we shall be obliged to include a similar clause in contracts placed by us for Procter & Gamble advertising (this refers to all Procter & Gamble products, not merely Crisco)."

"If you accept the contracts for Snowdrift and Wesson Oil with this clause in it you will have made it impossible for you to accept the Procter & Gamble busi-

ness as you cannot give to two advertisers a 'first choice.'

"Please let us know immediately what action you are taking on any contracts which may be tendered to you for Snowdrift and Wesson Oil advertising."

Officials of Calkins & Holden, Inc., interviewed this week by **EDITOR & PUBLISHER**, stated that the Snowdrift and Wesson Oil contract with its conditional clause had been sent out to more than 200 newspapers. Of this number, it was claimed 88 per cent had accepted the contract with the clause unaltered, seven per cent had declined to accept, and five per cent had accepted with slight modifications in the clause. The modifications, it was asserted, were to the effect that should there be any cooking school the two fats would receive equal representation.

"We have been handling the business of the Southern Cotton Oil Trading Company for 12 years and we have never asked the newspapers to run a cooking school mentioning Snowdrift or Wesson Oil," H. G. Telford, of Calkins & Holden, Inc., declared.

"We believe in the value of newspaper advertising space. We believe that advertising space is the only legitimate product a newspaper has to sell. A newspaper ought to be a newspaper, not a cooking school. In other words, we want to confine our purchases to that product a newspaper has to sell, its advertising columns.

"When we buy space we pay the generally known rates, without asking for any gratuities, such as mention in the news columns or mention in a cooking school endorsed by the newspaper. We rebel when a competitor, paying the same generally known rate, obtains as a gratuity the special privilege of exclusive endorsement in a cooking school. The newspaper that grants such a special privilege vitiates our advertising. We have, therefore, in self-defense, decided to include the conditional clause in our newspaper contracts. We object to buying space from a newspaper which endorses a competing product.

"A great many newspapers have told us they have not and will not run a cooking school. We have no objection to a cooking school unless it is carried on under the newspaper's name and is at the same time allied with a competing advertiser."

L. T. Bush, space buyer for the Blackman Company, would not discuss with **EDITOR & PUBLISHER** the arrangement between its client, Procter & Gamble and the Home Economics Service Corporation, the cooking school syndicate.

An official of the syndicate, speaking in the absence of M. J. Brown, the president, declared the connection was of minor importance.

Procter & Gamble, he said, was one of several national foodstuff advertisers, which guaranteed a certain amount of lineage to newspapers agreeing to conduct the cooking school. Other advertisers include the Calumet Baking Powder Company and the Knox Gelatine Company. The lineage amounts to upwards of 25,000 lines.

"It is the local lineage obtained by newspapers that makes the cooking school so attractive in addition to the fact that it builds good will and prestige for the papers obtaining exclusive rights in their towns," the official said. The official read a letter from a publisher who stated he had been able to obtain 46,000 lines of local advertising as a result of the school.

When **EDITOR & PUBLISHER** called on Mr. Bush at the Blackman Company this week, he declared that some of the newspaper advertising representatives to whom the letter had been addressed had agreed to the sentiments it expressed 100 per cent, while others had referred the matter to the newspaper publishers.

"We do not want to put any clauses in our Procter & Gamble contracts," Mr. Bush declared. "We believe that a publisher shouldn't have his hands tied by any advertiser."

Mr. Bush said the Crisco advertising schedules ranged from 5,000 to 20,000 lines dependent upon different cities. Including Chipso and Ivory soap, two other

Procter & Gamble products, the lineage placed by this manufacturer in the newspapers runs, he said, from 5,000 to 60,000 lines.

The Home Economics Service Corporation, which is but one of several cooking school syndicates, was organized about three years ago. It sells its service chiefly in newspapers from Omaha, Neb., to the northern and southern Atlantic seaboard. While the experts engaged and sent to cities where newspapers have purchased the service use Crisco, Calumet Baking Powder, and Knox Gelatine in their demonstrations, syndicate officials insist these experts are instructed not to attack any other similar products.

"We use these products in our demonstrations chiefly because they have national distribution," an official said.

Mr. Brown, the syndicate's president, on his return to New York on Wednesday this week, issued the following statement to **EDITOR & PUBLISHER**:

"It is absurd to say that the life of the cooking school is threatened. We operate in the neighborhood of 225 schools, and I understand there are between 500 and 700 in operation in the United States at the present time. Virtually all of them are conducted on the same basis as our schools, and are proving very popular with newspaper publishers. Does that sound as if the institution was threatened?"

"The Home Economics Service Corporation was organized in October, 1924. We have had a great many repeat orders from newspapers since we started functioning.

"My proposition to the newspaper publishers is simply this: I'm in the business of operating cooking schools. If you want my cooking school, it must be run according to my policies. You need only either take it or leave it. I pay my lecturers and direct them:

"As for the tie-up with national advertisers, I solicit them for lineage to be run in conjunction with the cooking school, over and above whatever plans they may have for general advertising during the year. We have never approached the Southern Cotton Oil Trading Company to ask them to participate in our schools. We solicited Procter & Gamble, because we know Crisco has national distribution.

"Last Spring, in isolated parts of the country, I learned newspaper publishers were receiving Snowdrift and Wesson Oil contracts containing the conditional clause. I saw in it then no cause for worry. I analyzed the situation thoroughly and I still see no cause for anxiety. I realized that all I needed to do was to leave the matter to the good sense of the American newspaper publishers.

"They will never bow down to an advertiser."

EDITS WEEKLY FROM TIA JUANA BAR

BILLY SILVER, editor and publisher of the *Tia Juana Rounder*, weekly newspaper published in the Mexican border town, has his office in the corner of a barroom. His mural decorations do not take his mind from the job.

BUYERS SEEK SAVANNAH NEWS

Late F. G. Bell's Executor Would Keep Paper a Local Institution

It is reported that there have been a large number of offers for the *Savannah (Ga.) Morning News*. The late Frank G. Bell, the largest stockholder in the news, left his interests in the keeping of the Citizen & Southern Company as executors with directions to sell if it was thought advisable. Mills B. Lane, head of the Citizens-Southern Company and also of the Citizens and Southern Bank, is quoted as saying that he intends to sell the paper to some one representing interests that will go to Savannah and operate it. In other words, he does not wish to dispose of it to speculators or brokers. He wants the News to remain a genuine Savannah institution.

WELLS ANALYZES ADVERTISING IN NEW NOVEL

Noted English Novelist Finds "Assertive Veracity" the Most Necessary Quality in Compelling Copy—Says Advertising World Must Sacrifice Its Black Sheep

By J. MURRAY ALLISON

Reprinted from Advertising World of London, by special arrangement with EDITOR & PUBLISHER

THE second volume of "The World of William Clissold," comprising Book III and Book IV is published today, October 1. The opening words of the opening section are as follows:

"My brother Dickon was physically very like my father, but he had a sturdier quality of mind. His imagination was as bold, but his self-restraint was steadier. Both of us, indeed, were honest to a greater degree; our consciences were livelier and more watchful, the sense of an obligation incurred gripped us more firmly and did not so readily slip its hold. Some ancestor of marked integrity must have been latent in my father."

Dickon is the brother of William Clissold, who writes the book in the first person. In Book III, Dickon Clissold takes up advertising as a "profession" (the word is Mr. Wells'). William Clissold describes the progress of his brother in advertising and reports his terrances on that subject.

When Mr. Wells' characters express opinions we are left with the strong impression that the opinions are those of Mr. Wells himself. It is an impression difficult to avoid, notwithstanding the fact that Dickon does not speak to Mr. Wells' readers direct. Dickon's words are put into his mouth by William Clissold. But we cannot help feeling that it is Mr. Wells who is speaking to us.

Now Mr. Wells can make William Clissold make Dickon Clissold say anything he, Mr. Wells, likes. He can, through his chief character, make Dickon say things about advertising quite as unpleasant as Mr. Chesterton says without cherishing about inventing people in novels to say them. But Dickon does not say unpleasant things about advertising.

Dickon is a blazing enthusiast, and Mr. Wells, through William, makes him say things that many of us in the advertising business would have been proud to have said. Most novelists who introduce advertising men into their books give their readers the impression that advertising men are either bounders or charlatans, both. But Mr. Wells in the opening paragraph of Book III of "The World of William Clissold," the paragraph that starts this paper, makes it plain that his advertising character, Dickon Clissold, is neither a bounder nor a charlatan. Read again and you will see that Dickon is a man of imagination, character and integrity.

That is the kind of man Mr. Wells wants us to envisage, I think. It is fair to assume that Dickon's views about advertising are those of Mr. Wells himself. That is the reason of the sub-heading at the top of the paper, and that is why we have asked the Editor to allow me to write this paper, with an hour or so at my disposal, in place of another already disposed.

Dickon's first words to his brother are indicative of his vision. Here are the words that one might expect from a real "top sea" advertising man.

The brothers have been to an invention exhibition (first-class idea here for one to develop). Dickon says: "It is not so good inventing things if you don't get people to make use of them," adds:

"There's no money in anything until it has been told of it."

William asks: "The money?"

"O," replied Dickon contemptuously, "anything."

William is thinking of the money; Dickon thinks of the thing to tell the people about.

After a pause, Dickon says: "Advertising! Advertising is only selling, Billy—I see it! That is where the money is. Advertising."

So among us—and when I say us, I mean us of the advertising craft—does one recognize the glow of this remark?

Dickon soon throws up his job at the School of Mines.

"His first definite step was to go, after a very careful and elaborate preliminary exploration of the special field in question, to an advertising watchmaker in Cornhill, to get an interview with him,

H. G. Wells

and tell him why his watches were not selling nearly so well as they might do in the West End, in various suburbs, among the city clerks, in the East End, and what he thought might be done to stimulate their sale. He had brought notes and sketches of almost all advertisements the firm was using, and very politely and clearly he pointed out how stereotyped was their appeal, and how mechanical their distribution. He convinced his hearer of advertisements going to waste and reaching nobody here, and of areas neglected there, and in the end he was allowed to make a scheme for a more scientific campaign. Hitherto the work had been done in an almost routine fashion from the office. His scheme was accepted. It succeeded, and his path in life was open before him."

The name of the watchmaker was Milton, with whom Dickon at the ripe age of one and twenty "fixed up his first contract."

Sales progress, Mr. Wells does not tell us how or why, but he gives us a hint of it.

"In the end Milton left the field of popular sales and became a professor of quality. Milton's, Limited, now sold 'watches that are beautiful and intimate,' but Dickon still steers the bulk of the output along the path of assertive veracity to the grateful customer."

The how and the why lies in the two words, "assertive veracity."

The noun is "veracity"; observe that. "Assertive" is the adjective—"assertive veracity." I for one have never heard a better description of what constitutes the elements of successful advertising.

Mr. Wells explodes in two words the moss-grown idea, kept alive by many ill-informed writers, that advertising will sell anything.

Milton's, Mr. Wells tells us, "was only Dickon's point of departure. A great light had come to him, and for a time he saw life wholly as a field of action in which he was to create appetites in people for commodities they had never in the least desired hitherto, or to direct their attention to the great superiority of common necessities when they are labelled distinctly with a proprietor's name. Immense wealth lay in convincing people

that an article could hardly be considered to exist unless it was vouched for by a respectable firm."

Dickon may have been wrong in creating appetites in people for commodities they had "never in the least" desired before. We are assured by the critics of advertising that it is wrong to do this, wrong to persuade people to want a piano, a wireless set, a new carpet, or a trip to the Continent. The critics of advertising would prefer the people to exist like turnips, in rows. Dickon thinks otherwise, but he qualifies the character of the new articles for which he proposes to create a desire by advertising: "It must be vouched for by a respectable firm."

We learn of the Clissolds' father, who sold as a grocer articles of food unnamed, measured out haphazard from barrels, taps and what-not, but his children William and Dickon remember: "But even in our childhood there was already a number of vigorous firms reaching their hands over the retail tradesman's shoulder, so to speak, and offering their goods in their own name to the customer."

Soap enters the picture.

"The great firm of Pears in those days had already thrust an individuality upon soap. Pears' soap marks an epoch; I hope history will not neglect it."

Pears does mark an epoch: Pears original advertising ushered in modern advertising. History will neglect it, but the deep sea advertising men like Dickon will remember it.

Dickon talks on and on about advertising. "Now why that O?" he demands, speaking of Owbridges lung tonic.

"It individualises. It is also probably on the bottle. If there is any other lung tonic going, it serves to make the other fellow seem an undistinguished nobody. But does it make people want to take the stuff much? Does it do anything to catch the eye of consumptive people? Think of anyone with lung trouble and a cough. Suppose he had this advertisement on one side, and on the other side one that said quietly, 'Clissolds' Lung Tonic soothes and gives peace, and in that peace you heal,' which would you want to try? Think of those words, Billy, not too big and noisy, but put where they seem to catch the eye almost by accident! Just whisper it. 'And in that peace you heal!'"

Dickon discusses Beecham's Pills, Eno's Fruit Salt, Cerebos Salt, Cod Liver Oil, Elliman's Embrocation, Liebig's, Bovril, Oxo. It is forty years ago, days when one needed enthusiasts like Dickon, days when he could say:

"When I was young, England was far in front of America in the process, but American advertising has long since overtaken and outstripped anything we do on this side."

He could not say it today. We in England can look American advertising straight in the eye. Mr. Wells is here historically correct. His sense of observation must have been always remarkably acute and his memory tenacious, or was he in his early youth a member of an advertising agency's staff?

Dickon does some unfruitful work for a boot firm and then turns his attention to bicycles. He starts a bicycling weekly (Mr. Wells loves bicycles), organizes the advertisement of wayside inns therein, and goes in for railway station advertising. How wise his dictum of that class of advertising:

"It must be witty, short and witty. I won't have them just yapped at."

And again, sneaking of Press advertising, how wise he is:

"Advertisement must be fresh and different each time."

Less wise when he doubted whether the "daily newspapers were very much good for proprietary articles. They were good for theatres and amusements of all sorts, but not for an advertisement that had to go on selling."

He makes up for this blunder, however, with this profound remark on newspaper copy:

"He declared it was possible to print a newspaper advertisement so big that it was totally invisible. People would not read type that was visible three yards away. Their eyes went through the gaps."

"Don't use newspaper space as poster space," should be but is not always adopted by newspaper advertisers as a cardinal principle.

Mr. Wells sketches Dickon's career as an advertising man with light touch. We can trace his progress step by step. We find him discussing the *Times* advertisement columns before Lord Northcliffe's proprietorship and after; we read of his adoration for Mr. Selfridge.

He organizes advertisers into a society for combined action, and envisaging a special university degree—Bachelors and Doctors of Advertisement.

Speaking of quack medicine advertising, he says:

"It's bad for advertising. The advertising world has to sacrifice its black sheep. *Has to*. Advertisement, Billy, is too big a thing for lying—too big a thing. Much too big a thing. It's the web of modern life; it's the call of the flock. No, I want the fellows (the charlatans) handled by the public prosecutor at the instance of a properly constituted advertisement society, and sent to gaol."

In page after page, Dickon talks to his brother about advertising. The chapter devoted to this phase of "The World of William Clissold" concludes:

"What were the twelve apostles? Drummers, just drummers. Traveling in salvation. Introducing a new line. Why did Paul raise his voice at Athens? Because he hadn't a megaphone. And the miracles they did? Sample bottles. To this day it's advertisement. What is a wayside crucifix? An advertisement of the faith. What is Christianity? An advertisement campaign. Tell 'em. Tell 'em. Tell 'em all you can. It's the method of social existence. A man, or a class, or a religion or—anything that will not advertise, isn't fit to exist in the world. It means it doesn't really believe in itself. To want to exist and not to dare to exist is something beneath vulgarity. That's why I have such a contempt for your rotten, shy, sit-in-the-corner-ask-the-dear-Prince-of-Wales-to-dinner-once-a-year Royal Society. If the soap boilers did no more for soap than your old Royal Society does for science, nobody would wash."

The first forty pages of Mr. Wells' new novel are devoted to the subject of advertising. It is one of the most important contributions to what I may call the literature of advertising that I have read. I cannot help accepting it as a statement, this opinion of Mr. Wells himself. I see in this opinion an acceptance of the principles of advertising. The shortcomings of advertising are admitted by Mr. Wells, as we all admit them. All of us know that advertising would be more profitable for those who foot the bill and for the people as a whole if the objectionable manifestations were eliminated. We deplore vulgarity and do our best to check it; we know that dishonesty in advertising limits the results of all advertising, and we go to great pains to detect it and stamp it out.

We advance the doctrine, "Truth in Advertising" to the utmost that circum-

stances allow. We want advertisers to tell the truth and refuse to insert in our newspapers those advertisements that deliberately lie. We protect our readers by guaranteeing the integrity of our advertisers (one of the journals with which I am associated has in the last few days paid nearly £2,000 winners of a crossword puzzle who were not paid by the advertiser).

Fortunately the great majority of advertisement needs no guarantee. The guarantee of integrity lies in the manufacturer's name or trade mark. Mr. Wells perceives that. He is aware that advertising could not exist without integrity. That is why he makes Dickon Clissold a man of integrity, and that is why he makes Dickon insist upon "truth in advertising." Mr. Wells is a man of vision (that is commonplace). He sees advertising as it really is—not as a device for "getting rich quick," but as a means of telling the people what they should know—it may be about safety razors or about Christianity. The full page, or the crucifix on the roadside.

"It is no good inventing things if you do not get people to know about them," said Dickon, coming up to the surface, so to speak, after a profound meditation.

The meditation of the great bulk of British manufacturers has been so profound for so many years, that we despair that they will ever come up to the surface as Dickon did, and have a look around and see what is happening in the industrial world.

Mr. Wells' chapters may meet their eyes and reach their brains. Well for them should it be so.

"SPECIAL" REORGANIZED

G. Logan Payne Co. Takes Over Payne, Burns & Smith—Spencer Joins Firm

The G. Logan Payne Company announces the purchase and reorganization of Payne, Burns & Smith, Inc., New York, and a change in the firm name from Payne, Burns & Smith, Inc., to G. Logan Payne Company, effective Nov. 1.

Egbert H. Spencer, for many years associated with John Glass, publishers' representative, and metropolitan papers throughout the United States, becomes a

general partner and has assumed active management of the New York and Boston offices.

George D. Smith, the retiring partner, is leaving the publishers' representative business.

Officers of the G. Logan Payne Company, New York, are: G. Logan Payne, George H. Payne, George J. Burns, William A. Small, Jr., Egbert H. Spencer.

PETERSON HEADS SUN CLUB

Einar O. Petersen, the *New York Sun* manager of local advertising, has been re-elected president of the Sun Club, an organization of Sun employees. The other officers elected were: Vice-president, Hans Muller; treasurer, Florence Meringer; secretary, Hilson Munsey; recording secretary, Louis A. Monaco. Delegates from the various departments were elected as follows: Editorial, James Fleming; publication, C. H. Albrecht; art, John Sennott; paper, John Hefferman; mail, Thomas Quinlan; circulation, H. W. Dietrich; press room, John Brady; engraving, Harry Schoer; classified advertising, Louis Monaco; display advertising, Fred Carrington; delivery, John De Rosa; composing and stereotype, Joseph Francis.

MATTESON JOINS HONIG

Stephen H. Matteson has joined the Portland, Ore., office of the Honig-Cooper Company, advertising agency.

HAND-TO-MOUTH BUYER STABILIZES BUSINESS

Banks' Survey Indicates Present Method Beneficial and Will Become Permanent—Banishes Over-Stocking

That "hand-to-mouth" buying has come to stay is the conclusion of most of the leaders in industrial and economic thought whose views are presented in a survey of the subject about to be issued by the Farmers' Loan and Trust Company, New York.

James H. Perkins, president of the Company, in commenting on the expressions that have reached him from manufacturers, department and chain stores, railroad executives, economists, and others, says:

"In my opinion the practice of current buying is one that will ultimately prove beneficial. It is an economic stabilizer that, instead of interfering with the prosperity of the country, directly adds to it in a most constructive way. It does away with speculative commitments, with overstocking, and with huge and unproductive inventories; it frees capital, letting it find its way into channels of the greatest usefulness. It will ultimately bring about a closer co-operation between manufacturer and distributor, and between manufacturer and the consuming public."

Jesse I. Straus, President of R. H. Macy & Co., who discusses the problem in great detail, points out:

"The producer has only his own lines to worry about; the distributor must take his chances on thousands of producers' lines. He has found that one of the cardinal principles in preserving a reasonable profit and affording the service demanded of him by the public is conservative buying—incorrectly dubbed 'hand-to-mouth' buying.

"Barring unforeseen changes in the character of consumer demand and producers' competition, I believe this policy represents a permanent change."

In general, the many railroad presidents whose comments are quoted agree with C. H. Markham, of the Illinois Central System, who states that current buying is valuable insurance against radical and upsetting changes in business conditions:

"If there arises the necessity for general retrenchment it can be accomplished with little disturbance and without serious losses, if there are not large stocks of raw materials and finished goods in the hands of manufacturers, distributors and retailers.

"In fact, the absence of such prospective losses should tend to prevent the spread of uneasiness, which has been one of the chief causes of changes in business conditions in the past."

Prof. F. W. Taussig of Harvard, Prof. E. W. Kemmerer of Princeton, and other economists agree that "current buying" is to be regarded as a permanent condition and that this practice will necessitate some readjustments, notably in manufacturing efficiency. They also stress the point that current buying makes it possible for the whole industrial structure to adjust itself quickly to changing conditions.

The emphasis of those who offer solutions which may tend to remedy whatever unfortunate effects have resulted from "current buying" centers upon three basic principles:

1. A greater standardization in the most staple articles of merchandising, such as clothing, shoes, underwear, hosiery, building materials, tires, etc.

2. A closer co-operation between the manufacturer and the distributor, jobber or retailer, so that the manufacturer, who is of necessity compelled to produce his goods far in advance of consumer demand, will avoid to as great an extent as possible the manufacture of such articles as will be unacceptable to the retail trade.

3. The adjustment by the manufacturer of his raw material purchases and manufacturing schedules to bring about an equalization of the peaks and valleys of his production program.

STOUT LEFT \$275,000

K. C. Star Editor's Estate Bequeathed to Widow—\$5 Each to Children

The will of the late Ralph E. Stout, managing editor of the *Kansas City Star*, who died Oct. 10, has been filed with the probate court of Jackson county.

In the will an estate estimated at \$275,000, of which \$150,000 was in real estate and \$125,000 in personal property, is left to the widow, Mrs. Mary Stout, named executrix. The son, David Stout, and the daughter, Mrs. Franklin Wright Gledhill, both of New York, are bequeathed \$5 each.

NEWSPAPER ADS SOLD NEW GRAYBAR NAME

Firm, Changing Title, Now Doing Biggest Business in History, Says Metz, Advertising Manager—Using Increased Space in Dailies

A change of name, far from being a detriment, has, with the aid of increased advertising, acted as an effective business tonic for the Graybar Electric Company, formerly the supply department of the Western Electric Company.

"After 10 months' operation using the new name, we are now doing the biggest business in the history of the company," Herbert Metz, advertising manager, declared in an interview with *EDITOR & PUBLISHER* this week.

"We give advertising full credit for this business increase, which has come despite predictions of loss, following the change of name.

"Newspapers," he added, "form the backbone of our advertising program."

The Graybar Electric Company, through Newell-Emmett Company, a New York advertising agency, is now using space in 70 newspapers, a new high record for this firm. Cities are added to the schedule as fast as the company opens branch offices in them. Latest additions are Dayton, New Haven and Cleveland. The company also started last month placing special appliance advertising in newspapers in Newark, Houston, Tex., Los Angeles, Pittsburgh and Philadelphia.

Mr. Metz is scheduled to address the national advertisers' group on newspaper advertising at a meeting to be held at the Advertising Club of New York on Oct. 21. He will speak on the same subject before the New England Industrial Advertisers' Association, meeting in Worcester, Mass., Nov. 8-9.

WORCESTER HOST

Prepares Impressive Program for New England Ad Club's Meeting

An impressive list of speakers has been arranged for the two-day convention of the New England Advertising Clubs to be held at Worcester, Mass., on Nov. 8 and 9.

Robert Lincoln O'Brien, editor of the *Boston Herald*, will be the chief speaker on the opening day. President George H. Johnson, of the Worcester organization, will deliver an address of welcome, and other speakers will be Marcus Urann, of the Cape Cod Cranberry Company; Herbert Metz, advertising manager of the Graybar Company of New York; Walter S. Ashby, advertising counsellor, of Manitou, Col.; C. K. Woodbridge, of New York, president of the International Advertising Association, and John W. Longnecker, of Hartford, Conn.

Speakers on the second day will be Allyn MacIntire, of Boston, New England manager of Barton, Dursine & Osborn Co.; Amos Parish, retail merchandising specialist; Harry Kirkland, of New York, advertising counsellor; Neil Borden, of Harvard University, assistant dean of the advertising department, and Joseph Ewing, of Edwards, Ewing & Jones, advertising agents, of New York.

George F. Booth, editor of the *Worcester Telegram-Gazette*, will be toastmaster at a banquet on Nov. 8.

"NEWSPAPER WEEK" IS PROPOSED TO A.N.A.E.

Business Good and Prospect Excellent for National Advertising Newspaper Executives Report—Reaffirm Standards of Practice

CHICAGO, Ill., Oct. 21.—Business is good and national advertising will hold up nicely for newspapers, with proper selling organization, according to reports made today to an all-day session of the Association of Newspaper Advertising Executives held at the Morrison Hotel.

The prospect for the next few months was gone over in detail. It will be a period of good space selling, if the newspapers are aggressive, reports to the directors indicated.

In the absence of President Frank T. Carroll, advertising director, *Indianapolis News*, W. E. Donohue, vice-president, and manager of the local display advertising of the *Chicago Tribune*, presided.

The members heard the outline of a plan for a "Newspaper Week" to be held with the assistance of 257 advertising clubs throughout the United States. A resolution was introduced and placed in the hands of Mr. Donohue who will later report on this project. The directors heard Earl Pearson, general manager of the International Advertising Association, explain how the clubs intended to boost newspaper advertising throughout one week of a year, bringing before potential advertisers in their territory the importance and advantages of newspaper space for expanding business and earning community favor.

At a round table discussion, the directors discussed a plan whereby newspapers might cooperate with agencies in the preparation of mats for national campaigns. A committee to go into the problem more definitely will be named.

The afternoon's session was given over to the discussion of local display advertising, emphasizing the point that salesmen in the local display sections should be persons of ideas and capable of developing new lines of business for retailers. Specific examples of this were related by Mr. Donohue who pointed out the Fanny May Candy Stores in Chicago. He said that when this company first started advertising only four small candy shops were being operated. Since advertising exclusively in the *Tribune*, Fanny May Candy Shops have opened 44 stores in the city. Other successful campaigns were described.

Harvey R. Young, *Columbus (O.) Dispatch*, told of the good accomplished by special sections bringing results to advertiser as well as newspapers.

The old Standard of practice of 1920 whereby specific merchandising service was offered by the newspaper to advertisers, was reaffirmed. "The meeting just closed has been one of the best and most constructive ever held," declared W. E. Donohue, at the conclusion. He added that while the fall meetings of the association are of a round table order, and no definite program arranged they brought members to study common problems freely.

A resolution was passed expressing deep sympathy for the family of Mr. Ralph A. Turnquist, formerly advertising manager of the *Milwaukee Journal* whose death occurred recently.

SCHOOL FOR MEXICO CITY

Journalism Instruction at National University Modelled on Missouri Plan

The National University of Mexico, a Mexico City, will establish a school of journalism next year organized along the lines of that of the University of Missouri, according to *El Universal*, Mexico City newspaper. Dean Walter Williams, of the Missouri School of Journalism, delivered a series of lectures at the Mexican university last winter. Last summer, Dr. Julio Jimenez Rueda, who delivered a series of lectures at the Missouri School of Journalism, studied the organization of the Missouri University school.

SEPTEMBER LINAGE GAIN IN 35 CITIES IS 4.1 PER CENT OVER 1925

NEWSPAPER advertising linage for 151 newspapers, published in 35 cities, carried a total volume in September of 139,262,093 agate lines, a gain of 5,555,169 lines, or 4.1 per cent, over the total for the same units in September, 1925, according to statistics gathered by the *New York Evening Post* and EDITOR & PUBLISHER. Gains are noted in the totals of 30 cities and 103 newspapers. The comparative totals follow:

35 cities listed 30 show gain 5 show loss
51 papers listed 103 show gain 41 show loss
7 no comparison

HOW EFFICIENT ARE JOURNALISM SCHOOLS?

Records of Graduates and Their Value to the Profession Analyzed in Relation to Four Types of Instruction, Fully Organized School Making Best Showing

By LAWRENCE W. MURPHY
Director Courses in Journalism, University of Illinois

WITH the attention centering on the enrollment of some 6,000 students in 50 schools of journalism during recent weeks, the old problem of the efficiency of such schools is being debated in many newspaper offices. A recent study of the situation, in which the records of more than 5,000 college alumni were considered, reveals some interesting facts concerning the various devices and programs of study intended to prepare students for the profession.

Whether a student shall study journalism in college or in the newspaper office is for him to decide. If he chooses to study it in college he is faced with the problem of choosing from a variety of programs the one which will give him the best preparation for life and for newspaper or magazine practice. It is in the field of this formal education that the results of this study apply, and in this field will be found a difference in efficiency of the schools ranging from 5 to 95 per cent.

Obviously, the test of professional efficiency from the newspaper point of view is the number of journalism graduates who make good on newspapers and stick to newspaper work. The same is true in the other forms of journalism, such as magazine editing, correspondence and feature writing, trade and technical journalism, press and feature syndicate work, and certain forms of publicity and advertising.

To give a student a professional education and then have him take up work not related to the profession, is to be as ineffective as possible. The education may benefit the student, as it surely does, but it has not made newspapers better, has not advanced the interests of journalism (in the sense intended), has not replaced a product of the "old school" with a product of the new one, has not achieved the use of the things taught in the professional program. When a journalism graduate takes up the selling of bonds, becomes cashier in a bank, begins to manufacture paper boxes or automobiles, he may be regarded as one who is lost to journalism in the professional sense. It is understood, of course, that he may be a better citizen, a better newspaper reader, a better promoter of sales and good-will because of his journalistic experience, and it is further understood that he may have acted with the greatest wisdom in entering a new line of work, so far as his individual case is concerned.

But this does not confuse the issue. It is still proper to judge professional efficiency by success in journalism and loyalty to journalism after graduation. Our schools must produce graduates who make good and who "stick" if they are to be worthy of the confidence of the profession.

With alumni occupation as a criterion it becomes possible, then, to go back into the records of the schools and see what system of education produces the best record. On examination it will be found that there are various ways of making the comparisons: schools are organized in a number of ways; students take a varying number of journalism subjects; alumni have been out of school a different number of years. All of these things are important in determining what the schools are accomplishing.

To obtain results of sufficient weight to warrant the drawing of conclusions, I made a study of four systems of preparation for journalism all of which have been referred to, loosely, as schools of journalism. The first two of these were real schools of journalism, organized as schools offering their own degree and settling their own problems. The third was a curriculum administered by a section of an English department; the fourth was a general college course with opportunity for election of courses in journalism without reference to journalism organization or requirements. In addition,

observation was made of the regular arts college course which did not offer any chance for election of journalism subjects, such as reporting, copyreading and history of journalism.

The comparison of these systems must depend for its effectiveness on the similarity of conditions in various schools, because unusual conditions in one school might make the figures for that school abnormal. This point was kept in mind and the results for a large number of years and a large number of cases obtained to overcome possible variations.

That the type of organization, such as school, department, division, and scattered courses, plays an important part in the effectiveness of the work in journalism may be judged from the following table which shows that the school is producing from 20 to 95 per cent more journalists than any other college system.

TYPE OF ORGANIZATION

Professional Efficiency

No. 1 School (B.J.)	92 per cent.
No. 2 School (B. Litt.)	72 per cent.
No. 3 Curriculum (Division)	46 per cent.
No. 4 Arts Course (misc.)	5 per cent.

These percentages were figures on the following: graduate from 1909 to 1925 for School No. 1, a total of 800 alumni; graduate from 1914 to 1925 for School No. 2, a total of 350 cases; graduates from 1915-1925 from No. 3, a total of 436 cases; graduates of the general arts course with work in journalism for School No. 4, a total of 700 cases.

Here we have organizations with and without the same status as schools of law, medicine, education, engineering, etc. The records show that these organized in the same way, and having the same standing on the university campus have double, and triple the effectiveness of other systems in producing professional-minded graduates.

This quantitative measure of success is reinforced by the qualitative success of the same alumni. Those from the real schools of journalism make good in much larger numbers and to a greater degree, generally speaking, than the products of the third and fourth systems. Editors who have in mind the exceptions to this rule should not confuse it with the general run of experience. For every college man who makes good in journalism without learning something about journalism while in college, there are many who try it and drop out before they have even been noticed. Of those who learn something about it while in college the journalism school graduates, in terms of large numbers, are making the best records. This does not mean that the schools have reached the point of highest development, but that they have already become effective in a noteworthy way.

Comparison of the amount of college study of journalism with success after graduation offers another angle on the problem of the professional course. It will be found that the value to journalism of the graduate bears a direct relationship to the number of courses in journalism that he studied while in college. The courses in journalism here referred to are such subjects as reporting, copyreading, law of the press, feature writing, newspaper advertising, history of journalism, country journalism, agricultural journalism, trade and technical journalism, editorial writing, newspaper administration, critical writing, and research in journalism.

The following table shows very clearly, in the percentage column, that the num-

ber of courses taken is significant in professional education for journalism. It is based on present occupation of 434 graduates measured against the number of journalism subjects they studied in university:

U. Record No. Courses in Journalism	VALUE OF NUMBER OF JOURNALISM COURSES TAKEN		
	(No reference to registration)		
	Present Occupation		
	In Journalism	Out of Journalism	Pct. out of Journalism
1.....	11	149	.90
2.....	12	88	.88
3.....	19	19	.50
4.....	23	17	.40
5.....	20	6	.30
6 or more....	59	12	.21

It should be noted that the number of cases became so small where six or more courses had been taken that it was necessary to combine them to keep the record properly. If the number had been larger, according to the returns received, the effectiveness would have increased—up to nine courses, the increase being noticeably smaller for seven and eight courses. What is given in the foregoing tables, however, is sufficient to indicate that the number of courses taken is important, for it indicates as wide a difference as 70 per cent between the extremes.

If professional registration were considered independently in the above chart, and those in general courses who took one or two dips into the journalistic program were eliminated, it would be found that the figures were altered slightly. The professional school requires from six to ten courses and would, therefore, produce a figure, for the same cases, which approximated the .210 per cent of the last row and column. (The number of non-professionally registered students who take six courses is very small and would not disturb the .210 by more than two or three per cent.)

This means that the figures for schools given in the first part of the article are supported by the new count represented here, for the non-professionally registered students are largely the 1, 2, 3, and 4 course students. It might be worth noting that the non-professionally registered students taking six courses or more do not approach the record of journalism school graduates with six courses or more. The non-professionally registered students with six courses are lost to journalism within a short time after graduation in 75 cases out of 100 while the journalism school graduates are lost in only 25 cases out of 100.

A preliminary survey of the journalism alumni indicates that the greater number of those who leave the profession do so during the first five years out of college. The loss here seems, again, to bear a direct relation to how the student looked upon journalism while he was in college.

It will be seen that the number staying in and entering journalism is influenced by the organization of the work, those

from the school having the better record by an amount that approximates earlier figures.

Newspaper men are probably interested more in knowing the effect of the schools of journalism on newspapers than upon the magazines and special publication or advertising service field. For each of the general tabulations represented in this article there is a record for the newspaper world, exclusively. That record shows that the schools of journalism have 61 per cent of their alumni in newspaper and news service work; that the divisions and miscellaneous dependent programs of study have 18 per cent of their alumni on newspapers and in news service; and that non-professionally registered arts graduates taking three or more courses in journalism are on newspapers and in news service in 6 per cent of the cases studied. Thus we see that a division triples its effectiveness from the newspaper point of view up to 18 per cent, and the school or college of journalism serves the newspapers directly with 60 per cent of its graduates. Arts graduates with no journalism are almost a total loss.

The unfolding of this report has brought with it a consciousness of the way to bring about improvement in the record of the universities in their program of journalistic studies. That way is to establish the kind of school that is producing the best results.

Journalism can never be any better than its weakest link, and the weakest link is the beginner. That beginner must be prepared to take his place and must stay in the profession or it will always be a profession with too many beginners. He must know enough when he comes into a newspaper office to report news accurately and fit into the routine of the practice. He must have an appreciation of the traditions and ideas of the profession and a desire to co-operate in projects for its improvement. He must have the feeling that journalism is a profession of public service in which a mistake may be just as serious as the slip of the surgeon's knife.

Evidently, when journalism seem to be an after-thought in the academic world, when it seems to be a matter of minor import, when it has less standing on a campus than the school of medicine or law, the student gets the perfectly reasonable idea that it does not amount to much. The result is that he regards it as a stepping stone to something else and not as an end in itself. He takes up journalism to help him earn money to study law; he enrolls in editorial writing to get another course in English composition.

It should be noted that all these are worthy reasons for taking a course in journalism but that they are not the chief reason for the existence of the professional course. To shape the program of studies for the purpose of serving the side-show public is to reverse the order that will produce better journalism in America. The main tenet in the school of journalism should be devoted to turning out journalists first.

Graduates Leaving Journalism, by Years

Class	PRESENT OCCUPATION			Non-Journalism Registration Grads.		
	Professional School Grads.					
	In Journalism	Out of Journalism	Per Cent. Out of Journalism	In Journalism	Out of Journalism	Per Cent. Out of Journalism
1921.....	18	14	.425	5	15	.750
1922.....	17	11	.380	5	44	.444
1923.....	21	11	.343	3	17	.850
1924.....	19	11	.366	6	21	.777
1925.....	22	7	.250	5	15	.750
	97	54	...	24	71	...

In this compilation the records of non journalism graduates who took less than three courses in journalism subjects were eliminated. The record is that, then, of those students who made some effort to prepare for journalism by taking more than two courses bearing on practice. This cross section of a general situation represents 246 cases.

Detroit News City Circulation Is Practically As Great As Number of English Speaking Homes

*The Detroit News Carrier Scarcely Needs a Route Book
Practically Every English-Speaking Home Is a Customer*

Concentrate Your Detroit Appropriation

In The News and get the largest possible space to the greatest number of homes

DETROIT has always afforded the advertiser unique advertising value—first, because of the prosperity of the field—second, because of The Detroit News ability to cover it alone.

A survey of the city's population recently made by The Detroit Board of Education shows Detroit and adjacent communities to have 1,188,936 English speaking people, or 289,984 English speaking families.

The Detroit News in the city of Detroit alone sells upwards of 248,000 copies, thus showing almost complete coverage of the most likely responsive element of Detroit's population.

Advertisers have in the Detroit market a testing laboratory of unlimited opportunities, for here is America's fourth city easily coverable for any campaign by the use of one newspaper. Here is an ideal situation: a rich market, a home newspaper covering it singly, an economical rate and a big population! Test it out yourself.

STUART WEST BEGINS THIRTIETH YEAR AS WRITER OF FINANCIAL NEWS

Recalls Vast Changes in Wall Street Since 1897—Fluctuations in Market Now Far More Violent—Began Career with New York Commercial Advertiser—With C. P. A. Since 1920

STUART P. WEST, head of the financial news department of the Consolidated Press Association, started on Oct.

19 the 30th year of his career as a Wall Street reporter and analyst of the financial markets.

Mr. West is one of two or three really notable newspaper financial writers of his time, and newspapers throughout the country which carry his stock market dispatches daily published

STUART P. WEST

his reminiscent story on "Three Decades in Wall Street," illustrating in a striking manner the vast changes that have taken place in the New York financial community since 1897.

On his first job with the old *New York Commercial Advertiser*, Mr. West says he soon found that even all the Harvard University economics courses did not equip him to start in immediately writing about the markets.

"The first day I got an awful attack of nerves and had to call in a man who was then a prominent financial writer, and who has since become high in government affairs, to help me out," he says. "It was a wonderful relief when he took over the dictation."

When the *Commercial Advertiser* became the *New York Globe* in 1903, Mr. West continued as financial editor for the paper until the *Globe* was erased from the metropolitan landscape in 1923 by Mr. Munsey. Since that time Mr. West's articles have appeared in New York in the *Evening World*. Mr. West's connection with the Consolidated Press Association dates from its inception in 1920.

Stock market reporting is much more strenuous than it used to be, Mr. West avers. Thirty years ago the market was running to 200,000 or as high as 500,000 shares a day. Now it is a market of 1,500,000 or even 2,500,000 shares and the number of issues traded in has increased between three and four times.

Since 1922 the main characteristic of the stock market has been the rapidity with which it has changed from a bull to a bear market and vice versa, without an intervening period of gradual change, as Mr. West views the market. Changes now are far more violent than they were thirty years ago, when a bull market had frequent interruptions during which prices would slip off, and then the advance would be resumed. At the culmination of an advance or decline, there would be an interval of uncertain fluctuations lasting sometimes for months.

Nowadays the market goes all one way or all the other, Mr. West says. Bull speculation, once checked, passes into bear speculation and the same is true inversely.

"In past years Europe was a big factor in the market," says Mr. West, "and the first question asked as Wall Street came down to business in the morning was 'How is London?' During the big markets, people used to sit up all night waiting to see what London, five hours ahead of New York, was going to do. If American stocks in London were up a point, our market would be up correspondingly, and if London was down our first prices would be low, too.

"Today there is only a small market for American stocks in London, because we bought back practically all of the floating supply and a large part of the investment supply during and just after the World War. There is no longer any

interest taken in the nominal quotations on American stocks in London and they have ceased to be a market influence."

The money market is not as important as an influence on stocks as it was thirty years and less ago, according to Mr. West. He says:

"Almost invariably, before the establishment of the Federal Reserve System, the fall of the year witnessed a money pinch which would upset the Stock Exchange. Now this contingency, if not impossible, is at least improbable, for under the Federal Reserve the banks have pooled their resources.

"In the old times it was a regular process for the interior banks to call in their Wall Street loans in order to meet the financial requirements of the crop moving. This would force liquidation and bring about a more or less severe decline, depending upon whether or not there had been much of a bull speculation in the preceding summer. Nowadays there is no worry about credit. Money is not apt to get above 6 per cent, whereas one fine day in December, 1899, it was quoted at 160. James R. Keene, the big leader at that time, was on top of the market that day.

"In the panic of 1907, on Oct. 28, when the Knickerbocker Trust Company failed, call money was simply unobtainable. One broker was instructed to go into the money crowd and borrow a half million—a very small amount—and pay the limit whatever it was. He could not get an offer after bidding 100 and 200 per cent.

"It is curious to look back to 1897 and recall what we used to write about at that time. There was a revolution down in Cuba and we used much space to discuss this. But more important than anything else was yellow fever. This dread disease (now a matter of history in the United States, thanks to the Public Health Service) used to appear regularly in the late summer and early autumn, and the market was terribly sensitive to the reports. Advices would come saying there were 'two more yellow fever cases in New Orleans,' and prices would break a couple of points.

"The weather map used to be studied with the greatest interest, for with the approach of colder temperatures the fever would be checked. Then we were accustomed to say, 'The market went higher today because of colder weather in the South and the absence of new yellow fever cases.'

"Two big industrial stocks at that time were American Sugar and Chicago Gas, the latter now known as the People's Gas Co. of Chicago. These stocks, along with the old American Tobacco, fluctuated wildly. American Sugar had a habit of always moving against the market.

"As to the rails, Northern Pacific paid three assessments and after these were tacked on to the price, sold as low as 2½. Four years later, in the famous panic, the same stock sold at \$1,000.

"It was an in-between-season time that we were writing about 29 years ago. The excited happenings lay behind and ahead.

"I was still a youngster when I wrote about the Maine explosion in Havana Harbor in the later winter of 1898. There was, of course, a wide open break, but it did not last more than a day. Then prices began to harden and to discount the inevitable American triumph.

"I shall never forget May 1, 1898, when word came of the victory of Manila Bay. This precipitated a headlong buying movement and the bull market kept up during the greater part of the following summer."

"HAY QUE LINCHAR AL JUEZ!"

Cuba So Demanded Umpire's Death, Says El Mundo Publisher

Twenty thousand Cubans followed the *World's Series* daily on a magnetic scoreboard operated by *El Mundo*, Havana newspaper, Antonio G. Mora, general manager of *El Mundo*, who has been visiting newspaper plants in New York, told EDITOR & PUBLISHER, in an interview this week. Hundreds of thousands of others "listened in" over the radio, while the population of five Cuban cities received the returns by direct telephone loops from *El Mundo*, Mr. Mora said.

The entire nation became delirious with enthusiasm, at the expense of lost hats and

collars and other articles of apparel, when Babe Ruth hit his historic homers. The Babe today rivals President Machado and Capablanca, the chess player, as the Cuban national hero, Mr. Mora asserted. "Hay que linchar al juez!" ("Kill the umpire!") is a national slogan.

"The interest of the Cubans in the American national pastime," Mr. Mora pointed out, "indicates the extent to which Cuba has become 'sold' not only on American ideas but upon American products. Cuba today is the sixth best customer of American advertisers. Eighty-five per cent of her imports are from the United States."

"Several Havana newspapers carry more advertising by leading American concerns than those of any cities in the United States, a dozen metropolitan centers excepted.

"With the first half of the funds for a \$200,000,000 road building program already appropriated," Mr. Mora pointed out, "the diversification of the island's industries will soon be under way. Sugar will no longer be the predominant crop. This diversification will bring opportunities for the manufacturers of American machinery and other advertisers."

FORM ALLEN ASSOCIATES

J. W. Allen, managing director of Associated Dailies of Florida, this week announced the formation of The Allen Associates, organized to do a general newspaper brokerage and commission business in the South, with offices at Jacksonville. The announcement states that Mr. Allen will continue with Associated Dailies of Florida until Jan. 1.

THE FLORIDA TIMES-UNION

Leads in Jacksonville Circulation

THE FLORIDA TIMES-UNION

Leads in Suburban Circulation

THE FLORIDA TIMES-UNION

Leads in Total Circulation

The Jacksonville home delivered (by carriers) circulation of the daily Florida Times-Union is 26,798; a lead of 13,000. The Jacksonville and Jacksonville suburban circulation (Jacksonville's trading territory) of the daily Florida Times-Union is 42,742; a lead of 22,000.

The total circulation of the daily Florida Times-Union is 54,423; a lead of 28,000.

There Is No Substitute for Circulation

(The above figures of our circulation were taken from our records of circulation of October 2, 1926, and refer to the daily net paid only. The Sunday circulation in each division is greater than the daily.)

The circulation of the daily and Sunday Florida Times-Union for six months ending September 30th, 1926, averaged 53,274. The net press run for Wednesday, October 13th, was 55,250. The net press run for Sunday, October 10th, 1926, was 71,575.

190,000 DAILY 400,000 SUNDAY

The Most Effective Advertising Medium in the Metropolitan Suburbs—

Suburban Rotogravure Sections

of

The New York Times

The combined circulation of The New York Times Suburban Rotogravure Tabloid Picture Sections published with the Sunday edition has increased over 20,000 copies since the issuing of the rate card. The larger circulation emphasizes the power of this advertising medium.

	Present Net Paid Circulation
Westchester and Connecticut Section—in Westchester, Putnam, Dutchess and Rockland Counties (New York) and Connecticut	61,760
New Jersey Section—throughout New Jersey	78,000
Brooklyn and Long Island Section—in Brooklyn and throughout Long Island	97,965
Bronx, Harlem and Washington Heights Section—in territory north of 110th Street, Bronx, Harlem, Morningside-Washington Heights	78,165
Total	315,890

Every section publishes only news photographs of people and events in its territory.

Advertisers in these sections have the strong advantages of local interest, the attraction of pictures, and the prestige of The New York Times. The sections are sure of the close attention of every reader in their areas.

Pioneer in the field of rotogravure printing, The New York Times has brought its process of rotogravure reproduction to the highest degree of perfection. The beauty of advertisements in The New York Times

rotogravure picture sections increases their appeal.

The New York Times carries a greater volume of rotogravure advertising than any newspaper in the world. In the nine months of this year The Times published 764,914 agate lines of rotogravure advertising, 170,096 lines more than in the corresponding period of last year and an excess over the second New York newspaper of 391,032 lines.

Advertisements in The New York Times are subject to censorship to exclude false, misleading or otherwise objectionable statements.

ESSENTIALS OF A SUNDAY FEATURE LISTED BY NEW YORK EDITOR

Should Be Based on News Says W. P. Beazell of New York World—Shun Adjectives and "Fine Writing" He Advises

By PHILIP SCHUYLER

W. P. BEAZELL

IT was in the days before typewriters. A young man sat in the city room of the *New York World*, feverishly filling sheet after sheet with scribbled longhand. Joseph Pulitzer, the chief, his eyes not yet blinded by constant editorial watchfulness, passed down the room between the rows of desks. He paused beside the young man and picked up the first sheet he had written.

"In one of the most sensational and mysterious murder cases of the age," the story began.

"J. P." dropped the paper in disgust. Turning to the boy, he made this observation:

"If that murder case is not sensational and mysterious in itself," he said, "all the adjectives in the world won't make it so."

William Preston Beazell, assistant managing editor of the *New York World*, who also teaches Sunday feature story writing at the Pulitzer School of Journalism, Columbia University, usually tells his students this anecdote to impress upon them his assertion that they must be "miserly with adjectives." For four years, Mr. Beazell has taught the feature writing course, which is known as Journalism 247 and 248 at Columbia. Early each year he tries to make plain to his students that the Midas touch is a handicap to future newspaper men and women, as far as "golden words" are concerned.

"Do the best writing that you can," Mr. Beazell says, "but not fine writing. I don't believe in fine writing, and by that I mean writing that has so-called sophistication, is smart-aleck, ornate, or high-flown."

"The English language should be to the writer what a kit of tools is to the journeyman. A woodworker doesn't use the same chisel for all his carving. He has a different chisel for each specific job. There are 250,000 words in our language. There is the right word for every thought, every phase, every mood."

"Of course there is a place for descriptive writing and for poetic writing."

But a writer is not a good journeyman unless he can tell his story in exactly the mood it should be told."

A result of this sound advice and other instruction given by Mr. Beazell, students in his class write features that sell. Last year one student sold enough articles in one term to pay his tuition for the whole year.

He follows the laboratory method of teaching, and assigns his students to stories as regular staff men of the *World* are assigned.

"My policy," he has said, "is to take my assignments for Sunday features from the current news. The ideal Sunday feature story, I believe, is the extension of the daily news story. There is always background and implications to every news event impossible to exhaust in the limited space allowed it in the daily edition. An outstanding story is always worth carrying on on Sunday into further detail, historical, analytical, or interpretive."

At regular intervals during the year, Mr. Beazell has his class members make up their own Sunday supplements from stories they have written in school. He has each student "buy" his or her own newspaper, wherever he or she pleases. They decide what policy they will follow, whether they will be sensational or sedate, entertaining or instructive. They are furnished with make-up blanks, and told to make their sections ready for their imaginary composing room foreman.

Last year, as an example, a girl who was taking Mr. Beazell's course chose to publish her supplement in Doylestown, Pa., a city of about 5,000 population.

"She knew her town; she knew what the people were interested in; and in consequence, did a first rate job," Mr. Beazell said.

Other students picked Brooklyn, Toronto, Boston, Des Moines and other cities, all seeking to furnish a paper that would appeal to residents of the respective cities.

"I don't like to ask anyone to write a Sunday feature to order," Mr. Beazell continued. "Naturally the editor of a daily must place a word limit on the stories he orders, but not so a Sunday

editor. The reporter himself must determine the length of a feature story."

Sometimes a straight-laced student will come to Mr. Beazell and say:

"I'm not going to print any crime or scandal in my newspaper."

To this assertion, Mr. Beazell always has a devastating reply.

"If you do away with crime in your newspaper," he will say to them, "you must do away with crime everywhere. You must do away with all sermons in the churches in your city, for if there were no crime, why should there be any preaching? You will have little literature left, if you insist on disregarding crime and scandal. Opera would be driven from the boards; since almost every one is based on some crime or scandal."

"What you mean is that rather than omitting crime stories from your columns, you will use good taste in your presentation of this type of news."

"Your ethics will be sound if you make your Sunday features as just, as true, and as accurate, as the editor of good taste insists his news stories be."

DINNER FOR SIR RODERICK

Reuter's Chief Given Luncheon by Cooper and Stone of A. P.

Melville E. Stone, counselor, and Kent Cooper, general manager of the Associated Press, were hosts Oct. 18 at a dinner given in New York to Sir Roderick Jones, chairman of the board and managing director of Reuter's, Ltd., British news agency.

Sir Roderick sailed for London Oct. 19, following a trip around the world.

Among the luncheon guests were: Frank B. Noyes, *Washington Star* and A. P. president; Elihu Root, George Palmer Putnam, Robert McLean, *Philadelphia Bulletin*; David Sarnoff, Charles Dana Gibson, Walter Sherman Gifford, Thomas Meighan, Newcomb Carlton, Dr. Nicholas Murray Butler, Will Hays, Elmer E. Brown, Ogden M. Reid, editor of the *New York Herald Tribune*; Julian S. Mason, editor-in-chief, *New York Evening Post*; F. Douglas Williams, New York manager of Reuter's.

FREHEIT OPENS CHICAGO OFFICE

The *New York Daily Freiheit*, Jewish language newspaper, has established a branch in Chicago and on Oct. 9 inaugurated a daily Chicago section of three pages. The Chicago editor is William Abrams. A. Ravitch is the western business manager.

GEORGIA SCHOOL TO BUILD

Henry W. Grady Journalism Courses to Be Housed at University

On the campus of the University of Georgia at Athens, Ga., ground has been broken for the erection of a building costing \$200,000 to house the Henry W. Grady School of Journalism, a branch of the University. The building is to be erected from funds subscribed by the alumni and friends of the University during a recent successful canvass for a \$1,000,000 endowment.

The new building is to be 3 stories and is to be thoroughly equipped for teaching all branches of journalism and commerce. Not only will the literary side of journalism be taught but the mechanical side also. Linotype machines and printing presses will be installed. It is hoped to have the building completed in time for the 1927 fall opening.

There was more than usual interest in the exercises preliminary to the erection of the building for the Henry W. Grady School of Journalism because the experience in connection with the operation of this school shows that it is doing practical work. Its graduates are located in many sections of the country and they are all doing well. Some of the graduates of this school who have found practical newspaper work and success include: Miss Ann Louise Moon, who is on the staff of the *LaGrange* (Ga.) *Daily Reporter*, Miss Louise B. Osborne, who is on the staff of the *Albany* (Ga.) *Daily Herald*, Dudley Hughes Milton, city editor of the *Hopkinsville* (Ky.) *New Era*; Samuel Hoyt Worley, Atlanta news editor of the *Industrial Index*, Columbus, Ga.; Murray Ellis Wyche, state news editor *Chattanooga* (Tenn.) *News*; M. P. Sullivan, *Waynesboro* (Ga.) *True Citizen*.

CHARTER FOR FREEPORT WEEKLY

The Long Island Chronicle Publishing Co., headed by Fred R. Jones, well-known for 20 years in New York newspaper work, organized this week with \$25,000 capital to acquire the *Long Island Chronicle*, a Freeport weekly.

NEWS MAN GETS CITY POST

Charles E. Keegan, for 20 years connected with the *New York Evening World*, was sworn in on Oct. 15 as aid to Aldermanic President Joseph V. McKee, of New York. His salary in the new position will be \$5,000 a year.

EDITOR SHARP, SAGE OF EVERGLADES STIRS THINGS UP AT CANAL POINT

His Bathtub Census Won Criticism and Praise—Prints Eight-Page Weekly in Town of 200—Knows Every Resident of His Section

"The enumeration of bath tubs in the Everglades goes on and six more real tubs have been discovered, this excluding a tin tub that a feller tried to ring in on the enumerator, although under the conditions of the contest, nothing but real tubs count.

"Tubs that 'are to be installed,' don't count. "A captious critic of the public service this enumeration is doing, complains that 'Sharp is knocking the Everglades.' Well, the lack of bathing facilities is a knock, but the lack can be overcome by making known the shortcoming. "Let's come clean."

THE above squib, which appeared in a box on the first page of the *Everglades News* some months ago is characteristic of Howard Sharp, sage of the 'Glades and editor and publisher of the weekly dubbed by newspaper men the most interesting in Florida if not in the entire country.

Canal Point, a little village on the eastern shore of Okeechobee where the Palm Beach Drainage takes its toll

from the lake and where Conners' Highway through the 'Glades strikes the huge body of water to begin its 34 mile stretch along the shore to Okeechobee City, is the home of the News. To the casual visitor it is a mystery how Canal Point can support a newspaper of any kind for its population is hardly more than 200 and settlements in the 'Glades are few and far between. Sharp, however, is publishing an eight page, six column newspaper as clean as a whistle typographically with big town make-up, chuck full of news and gossip and editorial observations and with a weekly average of five or six columns of legal and from fifteen to seventeen columns of display advertising.

Since the recent hurricane he has been hot on the trail of officials responsible for the Lake Okeechobee levees. Proper construction and care will present the lake from repeating its recent disastrous overflow, he declares.

Sharp's subscribers include virtually every family residing around Lake Okeechobee, their relatives in distant states and almost every owner of land in the 'Glades residing between Alaska and Key West and Labrador and San Diego, California. Sharp has been in the Everglades hardly more than eight years but he has made such an intensive study of the territory and conditions that he is regarded as one of the foremost living authorities on one of the strangest sections of the United States. The consequence is that his knowledge of the country and the manner in which he "covers" it from the news standpoint provides in his newspaper a moving picture of the 'Glades unobtainable even by visiting the territory.

The best description of the News is supplied by Sharp himself in a paragraph appearing recently in his editorial column bearing the standing head "In Lieu of Golf." There's no golfing in the vicinity of Canal Point and when the editor of the News feels the need of that exercise so popular with capitalists and people who find time heavy on their hands he obtains it by pounding the keys of a typewriter. Hence the standing head over this particular column.

"I would like to picture in every issue of this newspaper the state and attitude of mind of the residents of this region as well as record incidents and events—to give the atmosphere and to make the files of the paper a mine into which a historian may dig ten, twenty years from now or longer," he wrote. "Dozens of residents of the communities on Lake

Okeechobee pay me \$2.50 a year to send the paper to their relatives and friends at distant points and make the sending of the paper take the place of letter writing. For this reason I like it when correspondents at South Bay and Okeelanta and Belle Glade put comment as well as news into their communications; for that reason I write Community Gossip and Farm Talk and let the preachers go the limit in the church notices. I write many of the news articles with as much view to how they will read ten years from now as how they read in the week in which the subject took place. But I am not sure whether I get the effect I want."

Sharp knows by given name every resident of the 'Glades and of the territory about Okeechobee and when anything occurs worth printing the News gets it if someone has to swim the lake to reach Canal Point with the story. Sharp can be found in Canal Point on Thursdays and Fridays—the News goes to press Friday—but every other day in the week it is a hit or miss proposition if one journeys there to see him. He may be at Clewiston, on the south shore of the Lake, at Okeechobee, on the north side, in West Palm Beach, or miles out in the 'Glades inspecting a truck crop, looking over a drainage project or perhaps merely visiting the residents to learn what has happened since the last time.

It is no wonder the people of the Everglades district of Palm Beach county recently nominated him as their representative on the Board of County Commissioners. They desired a man who knew the 'Glades thoroughly and when Sharp finally did consent to go into politics his opponent was licked with the appearance of his announcement.

Sharp's bathtub census is only one of the things of this kind he has launched. The beautification idea struck him some time ago and to foster a general clean-up of premises and the creation of lawns he set out to conduct a lawnmower census, offering a six months' subscription to the News to every resident in the Okeechobee district who reported the ownership of such an implement of warfare against nature. It is needless to say that in his initial announcement Sharp declared "professionals," meaning gardeners, were barred. Now he has gone so far as to offer a year's subscription to newlyweds. There's a string tied to this offer, however, for the News must be advised of the wedding within one week after its occurrence, "with the correct spelling of the names of the couple."

"Frankly, it doesn't surprise me that the Everglades News is regarded as a unique publication," he told the writer recently. "This is a jazz age. I put jazz in the paper because the times call for it.

"The magazine *Life* has—or had—the right idea; make half of the readers so mad each week they will buy it next week to see what they can find to get mad at again. The McClatchys, in Fresno and Sacramento, have the secret—"Be audacious."

Sharp has worked either as a printer, reporter or editor in all but nine of the states in the Union. Born in 1875 in that part of Southern Illinois known as "Egypt" he was taken to New Madrid, Mo., by his parents when a year old, and to Charleston, Mo., the following year. At 13 years of age he ran away from home to go west and fight Indians but a stone-hearted brakeman on a freight train unloaded him at Humboldt, Tenn. There he met his Waterloo for, to keep from

starving to death, he got a job rolling forms on a Washington hand press, and he has smelled of printer's ink ever since. He finished his apprenticeship at Jackson, Miss., became a member of the I. T. U. at Vicksburg and was a tramp printer from one end of the West to the other until 1897 when he returned to Missouri and leased the *Scott County Newsboy* at Benton. He was working in St. Louis job-shops in 1899, was editor of the *Luverne* (Minn.) *Rock County Herald* from 1899 to 1905, with an interval on the *Sioux Falls* (S. D.) *Argus-Leader*, later editor of the *Shawano* (Wis.) *County Journal*, then went to Texas and the Indian Territory. In Bartlesville he was successively ad compositor, foreman, (Continued on page 53)

The INDIANAPOLIS

It is natural that a great evening newspaper should dominate the circulation field in the city of publication. The News does—decisively. And, through its own private motor delivery, The News gives superior and remarkably effective coverage of the surrounding territory, delivering individual copies as far as seventy miles away. That's dominance—of city and territory as well.

Advertising Director

WEEKLIES MUST RESIGN "CINDERELLA" ROLE

**Manufacturers Need Their Co-operation
in Merchandising, Mitchell Says
—Must Smooth Path to
Advertising Columns**

The "Cinderella of the World of Journalism" was the term applied to the country newspaper by H. Z. Mitchell, editor of the *Bemidji* (Minn.) *Sentinel*, in his address before the Illinois Press Association at the University of Illinois last week.

H. Z. MITCHELL

"The editorial sanctum of a country paper might often be termed 'The Port of Misfit Men,'" he said. "It has been the haven of the unsuccessful minister, who, tired of fighting sin, decided to give the devil his dues; the disgruntled politician who seeks a vent through which to discharge his spleen; the lawyer who lacks a bar at which to practice, and the ambitious school teacher. The editorial chair has even been occupied by bankers, though usually not from choice.

"The country paper is today the Cinderella of the world of Journalism. For years we sat in the ashes of public tolerance, garbed in the rags of unpaid publicity with the smudges of unbusiness-like methods concealing our natural beauty. We were lorded over by our big sisters, the city daily and the national magazine, forced to accept the scraps from their table, sustaining ourselves by the business they did not want or could not get.

"The arrival of our Fairy Godmother, the War, changed our viewpoint, for the increased prosperity in all lines of business reflected itself in the country newspaper office. We adopted better business methods, Franklin price lists, proved ourselves most valuable in service to our country, and for the first time in our lives wore for a while the glass slipper of National Advertising. Our appearance improved, and, as might be expected, we then proved attractive to the Fairy Prince, the Ultimate Consumer, whose will is law and who is even now seeking his Cinderella. Cinderella of the Fairy Story sat demurely by the hearth, you will remember, waiting for the Heralds of the Prince to seek her out, but we are somewhat more brazen, and today the Country Paper is standing on one foot, the other extended through the doorway, asking for the slipper that will enable her to take her rightful place in society.

"It will be fatal if we ever resume our position by the hearth, where for so many years the country press gathered ashes.

"We must make ourselves so firmly a part of the merchandising system of this country that no introductory campaign will ever be attempted without taking into consideration the medium that is without doubt closest to the buying public—the home town paper.

"Manufacturers of nationally advertised goods are realizing that there is a missing link somewhere and are making frantic endeavors to locate it. So acute is the situation that Babson, the economist whose advice is regarded as most valuable, in his August report calls attention to the critical situation that manufacturers and small merchants are facing and urges a closer co-operation, a co-operation that will not only include advertising plans but suggestions for better merchandising and contact with the public, a work in which the progressive country paper must play its part.

"If I were a manufacturer I would see that every advertising proposition I worked out was presented to the newspaper as soon as it was sent out to the

dealer and even before. You would act as a constant solicitor for the manufacturer.

"Make a study of your home field. Learn merchandising methods as they apply to your stores; get acquainted with your advertisers until they seek your advice about advertising as they do their bankers about finances; let the people they are doing business with know that you are interested in helping solve the sales problem and let them know that your co-operation means something. If you are proud of your paper send copies to the manufacturers with a letter telling why you are proud of it. If you know something about your community that you think they ought to know, tell them about it.

"Manufacturers want to reach the buying public, and we admit that there is no better way than through the home town paper. But the path to the advertising column of that paper must be made as smooth as possible."

UNOFFICIAL SPOKESMAN

(From the *Milwaukee* (Wis.) *Journal*.)

EDITOR & PUBLISHER, a weekly journal for newspaper men, strikes at the root of a growing evil when it suggests that President Coolidge discontinue his "unofficial spokesman" interviews. As every discerning reader understands by this time, it has been the President's practice to give statements to newspaper men under condition that they be published as coming from the "unofficial spokesman" of the White House. But with disconcerting frequency, the President has then found it expedient to repudiate these statements in his own person.

As a device to enable a President to feel out the public, the "unofficial spokesman" may seem a handy man to have around. If the reaction to his first remarks is unfavorable, the Chief Executive is always able to say that his "spokesman" was misunderstood and that his position is really thus and so. Which is very nice for the President but rather hard on the reading public.

The public depends on the newspapers for accurate information about government affairs. Therefore the public has a right to expect that statements which on their face carry White House sanction are authoritative. The public does not want to be fooled and the newspapers do not want to appear as bunglers in a matter in which they have acted in good faith.

Other Presidents tried out the "spokesman" idea but found it wanting and soon ceased speaking at all, unless officially. Mr. Coolidge would find it to his advantage, too, to take the "unofficial spokesman" off his staff. The mystery has been rubbed from this character and the "spokesman's" usefulness is about gone.

For the dignity of his office, Mr. Coolidge should hand Mr. Spokesman his hat and show him the door. He's outworn his welcome.

ADVERTISING'S BIGGEST TASK LIES AHEAD

**Stupendous Modern Production Will
Demand Greater Selling Aid, Bab-
son Executive Tells Con-
ference**

Emphasizing the importance of advertising in business today, C. N. Stone, director of sales territories of the Babson statistical organization, declared "Advertising of the future will be designed with the sincere purpose of rendering service to both producer and consumer," in addressing the annual national business conference at Babson Park, Wellesley, Mass., recently.

"Advertising will be called upon even more than in the past to take our stupendous production and find proportionate markets," he continued. "Advertising may follow to an even greater degree its present tendency toward truthfulness and education.

"During the years ahead, new products and new industries will appear with increasing rapidity as the result of scientific and technical progress. This means that advertising will become an educational force as never before.

"Business men today are concerned with advertising and selling, whereas those of the past generation were chiefly occupied with producing and manufacturing. The whole emphasis has shifted. The marvels of automatic machinery, quantity production and other modern methods have given enormous productive capacity. How can this overwhelming output, both actual and potential, be distributed so as to give the greatest possible service to the consumer and a fair profit to the producer?

"These are the central problems of business today, and they are pressing problems. Representative business men agree that distribution is the most urgent and important question which the business world is facing. Co-ordinated with this bigger and better job for advertising there will be a corresponding demand

upon the sales department. More progressive sales organizations always have recognized that a large part of the work of selling includes education and service."

CHANGES IN LOUISVILLE

Sid Gilroy, for many years foreman of the composing room of the *Louisville Herald* and more recently night foreman of the night composing room of the *Herald-Post*, has been promoted to mechanical superintendent of the *Herald-Post*. John N. Rees, general foreman of the *Herald-Post* composing room has resigned. Willard G. McCormick has been appointed night foreman.

GRAPHIC AND SKETCH MERGED

After an existence of 36 years, the *London Daily Graphic*, London's first picture paper, published its last issue Oct. 16. Its demise is due to the recent purchase by its proprietors, Allied Newspapers, Ltd., of the *London Daily Sketch*, with which the *Graphic* has been amalgamated.

HONOLULU, HAWAII, U. S. A.

Sept. 24, 1926

Wood Newspaper Machinery Corporation,
Plainfield, N. J.

Gentlemen :

You will undoubtedly be interested in what we consider a record (at least for Honolulu) in getting out the Dempsey-Tunney fight extra yesterday.

The exact time from the delivery of the last form to the stereotype room to the press start was three minutes. This included the molding of the mat, scorching, casting two plates and plating press. We use dry mats.

We consider this a distinct triumph for the Pony Autoplate Machine, which we have used for something over a year.

As an example of the splendid Associated Press service and which seems almost unbelievable, it took just four seconds from the time the referee announced Tunney winner to the receipt of the news in Honolulu. From the time the decision was made, we had an extra on the street in just seven minutes, beating our competitor, who uses other equipment, by fifteen minutes. Our news service was sent by direct wire to San Francisco and to Honolulu by Radio Corporation of America.

The difference in time between Philadelphia and Honolulu enabled the Star-Bulletin to announce the winner at 4:03 in the afternoon

Yours very truly,

HONOLULU STAR-BULLETIN, LTD.

B. C. STEARNS, Mechanical Superintendent

The TWIN Pony Autoplate Machine

It is, essentially, two machines in one—consisting of two complete casting mechanisms and a single finishing mechanism capable of finishing and delivering all casts. The finishing mechanism swings, at the will of the operator, into position to receive casts from either casting mechanism.

The Twin Pony Autoplate Machine is an efficient and economical production unit because it doubles output without doubling floor space or doubling investment.

EDITORIAL

INSTALMENT "SLAVERY"

THERE is not the slightest doubt that industry shall, in the not distant future, deal with the growing problem of instalment buying in this country. It is the liveliest subject of the day among far-seeing economists and the very fact that it is being debated so strenuously indicates the drift. During the week George F. Johnson, President of Endicott-Johnson, employing 17,000 persons in shoe factories, called instalment buying "a form of slavery" which is undermining the thrift of the nation, increasing the cost of living and creating a fictitious prosperity. Mr. Johnson was answered by Samuel J. Bloomingdale, New York department store proprietor and vice-president of the American Retailers' Association, who held that instalment buying permitted persons of small income to enjoy the luxuries. He thought Mr. Johnson expressed a selfish idea when he asserted that "freedom from debt, except for a modest home and its furnishings, constitutes the greatest blessing, next to good health, that the poor man may enjoy."

These statements present the field for interesting abstract debate, but this question will finally be decided by self-interest. No one will defend instalment buying when it ceases to be profitable to sellers, even as it is now wasteful for buyers. It is a banker's device, and few would charge that bankers have any deep concern for economic principles which tend to increase saving by decreasing borrowing. Industry will throw instalment buying a mile and a half when the natural reactions of over-extended credit begin to assert themselves, as they shall inevitably do, as day follows night.

If nothing else is accomplished fiery Thomas H. Adams and his associates have given refreshing proof that the spirit on which free press was founded still lives.

JAPAN'S RADIO RATE

STILL viewing the great objects of international communication through the wrong end of the telescope the Imperial Government of Japan announces that radio press rates across the Pacific are to be reduced after Nov. 1. Whereas this rate should not exceed ten cents per word the new price will be 22 cents. The reduction is from the almost prohibitively high rate of 34½ cents.

Perhaps the newspapers of Japan and the United States should congratulate themselves that the Imperial Government has at last taken notice of a seriously neglected matter and that there is to be some relief, but it is obvious that a 22 cent rate will not accomplish what is desired. Until there is a free flow of news across the Pacific the people of two great nations will flounder in misunderstanding of public affairs. The rate is still prohibitive for small papers and irksome for press associations. We are not even sure that the 22 cent rate is to apply to rapidly transmitted dispatches.

Opposition to a low press rate in Japan comes from the military authorities and the old regime, totally lacking faith in the principles of free press and democratic institutions, being committed to the theory of censorship and silence. As the fruits of that worn-out policy are sour for both nations the theory that free flowing news is the safeguard of peace and the forerunner of trade deserves a fair trial. When Japan permits news transmission at a ten cent rate correspondents will write news as it should be written and a thousand problems that lie between the Japanese and American peoples will fade away like mists before the rising sun.

A writer refers to "our monotonous prosperity," but most of us are willing to endure that kind of monotonous existence.

HIS PROUDEST BOAST

"IT is my proudest boast," wrote the late Lord Northcliffe, when at the height of his success, "that the changes and competition which I have introduced into English journalism have had the effect of increasing the remuneration of almost every class of newspaper writer, as well as greatly adding to the number of those engaged in journalism." He warmly endorsed organizations of newspaper men for serious co-operation, but expressed contempt for "cap-in-hand and beanfest" clubs.

God hath spoken once; twice have I heard this; that power belongeth unto God.—Psalm LXII; 10, 11.

QUEEN MARIE'S POPULARITY

FROM the newspaper point of view Queen Marie's visit is an event of peculiar interest. She makes excellent copy because of her engaging candor, womanly charm, sprightly intelligence and vim, but she is also a delight to the newspaper circle because she is notably an exception in the ranks of such celebrities in that she appears to appreciate newspaper people, value their work and trust them as individuals. The queen lends herself to the press with a smile, yet seems to be wholly devoid of the well-known objectionable thirst for publicity so common among distinguished propagandists. We can remember no woman celebrity who has received in this country such unanimous press approval and has been on such intimate terms with reporters and photographers. If Queen Marie can sustain throughout her journey on this continent the comfortable, hospitable, indeed loving relationship with the public, through the press, that has marked her first week in the East, her American visit will be a triumph extraordinary. As she is the type of woman that both men and women can admire the prospect is very favorable. We are a democratic people, but we know how to discriminate between human beings who happen to wear crowns and snobbish aristocrats of whatever station or nation.

When you have the imagination of fifty million saps juggling the mysteries of "Peaches" and "Woof-woof Bunny," wise-cracking about Aimee McPherson's private life and buying newspapers to decide bets on lotteries and prize-fights—well, would you rationally expect social progress or racial decadency?

RADIO AND CIRCULATION

THE following expression of belief is contained in an interview appearing in the current issue of *The Quill* with Edgar T. Cutter, Superintendent of the Central Division of the Associated Press: "Radio, I believe, will increase instead of decrease newspaper circulations. The Associated Press now permits the broadcasting of brief bulletins of the news it supplies. Listeners catching a brief note of an event of importance over their sets will go out and get a newspaper that they probably would not have purchased to get the full details."

This is a familiar abstract view, but EDITOR & PUBLISHER does not accept it because it runs against simple logic and certainly the evidence is that radio broadcasting of important news events has injured newspaper circulations. Take, for instance, two recent major sporting events that were calculated to produce immense circulation gains, the heavyweight championship fight and the world series ball games. It is incredible that the average person who listened to detailed radio accounts of these events as they progressed were not satisfied by the reports. When one is possessed of information concerning a news fact he does not need to be reformed. Indeed, repetition is a bore. The radio announcers did a sufficiently good job to warrant *New York Times* to reproduce their reports in full, furnishing running accounts that were so interesting because of spontaneity and authority that they challenged the best newspaper reporting. It is unreasonable to believe that the average person, unless he wished confirmation of technical points, would, hours later, care to go all through a running account in a newspaper to obtain the same facts.

Mr. Cutter affirms our often expressed view that radio broadcasting of routine news, such as market reports, does not and never can supplant the news-

paper for the simple reason that a person will not sit patiently while a long list of market quotations are being read on the air to get the news concerning one or two stocks that he may be interested in, when he may take his newspaper and turn to his particular interest without delay. But that is not the point. The point is that if the radio satisfies the natural interests of the public in major news events, the main fact being what most people want in their busy lives, the motive to buy newspapers is not stimulated, but is retarded. In instances a brief radio announcement of big news may induce newspaper buying. But only if it is inconclusive. If the fact is covered the job has been done.

Why is the newspaper extra on fixed events of importance on the decline? Circulation men know that it is because the flash interest has been covered by radio to such an extent that the extra is less profitable than heretofore. Too much of the cream has been skimmed from the pan. Radio news reporting presents a grave problem, which cannot be whistled away. That it should be encouraged by the press is doubtful indeed. It may be that this form of news service is inevitable and that if the press resists it the result will be to encourage independent initiative and the creation of much more dangerous rivalry. That, however, seems unlikely while radio is organized on its present basis of free service to the public.

Bulk of the newspaper material printed in New York and Chicago is over the heads of readers if it is true, as a Chicago health officer asserts, that the mental age of the average adult of those cities is 12 years.

AN EDITORIAL SUBJECT

COMES a neighbor with downcast, bewildered countenance, soliciting advice concerning his son, an upstanding American boy now in second year High School. The father does not believe the lad is "going to amount to anything." He just "squeaked" by his Fall exams and already his instructors are complaining of fundamental weaknesses in his educational structure. Listen to the unhappy father: "The boy has a mind, but it is cluttered with ragtag and bobtail nonsense. Life offers too many distractions to permit of serious study. He is wild for sports and as they seem healthy I have offered no objection, but they absorb time, interest and passion. He reads every line printed about the big fights and baseball and even talks knowingly of horse races. He will sit up half the night to get the reports of games over the radio. This Summer the boy spent a large share of his time in our car and if he missed a tennis match, a swimming race or any other athletic sport in this vicinity it was an oversight. I dread the approach of the football season for the effect it will have on my son."

"My wife enjoys the movies and the boy accompanies her at least once a week, often twice, and his head is full of that truck. He reads the trashiest stuff in the trashiest newspapers and has wise opinions about such characters as 'Peaches' Browning, the 'Crybaby Bandits' and current scandals. He will spend Sunday morning in his room reading stuff which has nothing to do with news or information. He has absolutely no interest in worthy books. Indeed, the boy knows nothing of standard fiction or history. I see no serious side to him. When the car is in trouble he drives it to the service station and I get the bill."

"There are, I dare say, boys who are studying and preparing themselves in the good old-fashioned way, but they avoid my home. My lad has plenty of company, however; boys who are following his foolish course seem numerous. Their talk is trivial and their humor vulgar. The dominant motive is play and the great virtue seems to be to win through luck. What shall I do?"

A few days after we had heard this father's complaint we read an address by John G. Sargent, United States Attorney General, wherein he said: "The boy of 30 or 40 years ago grew up in the habit of obedience. The present doctrine is that children should not be compelled to do distasteful tasks, but their lives be made smooth and pleasant. They do not acquire the faculty of study, but slip by their examinations by memorizing masses of facts. Parents provide too much entertainment and are lax in discipline."

PERSONAL

YRUS H. K. CURTIS is to present a pipe organ and a swimming pool to Bowdoin College, Brunswick, Me.

L. A. Thurston, editor of the *Honolulu Advertiser*, is visiting in New York.

Paul Block, newspaper publisher, and president of Paul Block, Inc., has been appointed chairman of the advertising committee for the 10th anniversary campaign of the Federation for the Support of Jewish Philanthropic Societies. Plans are being made to raise a fund of \$4,000.

R. E. Parr, auditor of the Sun Company of San Bernardino, Cal., has returned from a three months' trip through Middle West and East, where he visited newspaper plants gathering information on costs.

William F. Metten, publisher of the *Wilmington (Del.) Evening*, was awarded a testimonial luncheon in the hotel duPont, Wilmington, last week in recognition of his services as president of the Chamber of Commerce. He is completing his second term and saw fulfillment of his hope that the Chamber would have a membership of 2,000 before term expired.

Erwin R. Kirkwood, editor of the *Las Vegas City Star*, will be one of the speakers for the annual round table conference conducted by the department of Journalism, University of Kansas, at Lawrence, Oct. 22 and 23.

Hugh J. Powell, editor of the *Coffeyville (Kan.) Journal*, has been named chairman of the Planning Commission of Coffeyville.

N. Southam, of the Southam Press, publishers of the *Vancouver (B. C.) Province* and a chain of other Canadian newspapers, was a recent visitor to Vancouver.

J. Burd, managing director of the *Vancouver Province*, has left on a six weeks' business trip in eastern Canada and the United States.

W. C. Nicholas, editor of the *Vancouver (B. C.) Times*, has been appointed member of the board of governors, University of British Columbia.

George Robert Worth Bingham, publisher of the *Louisville Courier-Journal*, has returned from Europe. He has been abroad several months.

Charles E. Martin, editor and publisher of the *Cleveland Times*, has been appointed a director of the Cleveland Better Business Bureau.

Robert R. McCormick, co-editor of the *Chicago Tribune*, who was scheduled to address the Boston Chamber of Commerce at luncheon Oct. 14, was unable to postpone the engagement because of illness.

Robert MacDonal, formerly of Tacoma, Wash., has been appointed assistant publisher of the *Seattle Post-Intelligencer*. For several years Mr. MacDonal was advertising manager of the *Tacoma Times*, but resigned to publish a commercial journal.

Alfred S. Ochs, publisher of the *New York Times*, and Henry Morgenthau, United States Ambassador to Germany, have joined the motorcade which is to travel from Asheville to Atlanta, Ga., for ceremonies marking the opening of the Appalachian Scenic Highway, which traverses the mountain divide from the Gulf of Mexico, will be

White celebrated his 42nd anniversary as editor of the *Wyoming (La.)* on Oct. 14. He began as a typewriter in those years not an editor, but to press without some contribution from him.

Roland F. Andrews, editor of the *Worcester (Mass.) Telegram-Gazette*, has returned from his annual vacation in Nantucket.

W. L. Wilson, managing editor of the *Worcester (Mass.) Evening Post*, is recovering from a serious illness.

R. E. Delaplaine, co-publisher with his brother, W. T. Delaplaine, of the *Fredrick (Md.) News and Post*, who has been recuperating from illness at Atlantic City, N. J., has returned to his desk after a month's absence.

THE BUSINESS OFFICE

STEVE ARNETT has been placed in charge of the automobile advertising department of the *Seattle Times*.

John L. White, advertising manager of the *National Live Stock Reporter*, East St. Louis, has resigned to become associated with the sales division of the St. Louis office of the National Life Insurance Company of Vermont.

J. O. Parsons has joined the financial advertising department of the *New York Herald Tribune*. He was formerly with Albert Frank & Co. and previous to that was financial editor of the *Tribune*.

Erwin M. McEwan, St. Joseph, Mo., for the last three years on the advertising staff of the *Japan Advertiser*, Tokio, is returning home late in October after a tour through Siberia, Russia, China and a number of European countries.

Howard Smith, promotion manager of the *Syracuse (N. Y.) Herald*, has joined the United Press Association business department.

Max Brown, formerly of Chicago, has resigned as advertising manager of the *Louisville Herald-Post*. His successor has not been named. Mr. Brown succeeded Millard W. Ridenour as advertising manager several months ago. Ridenour is now general manager of a local furniture concern.

Porter Caruthers, assistant business manager in charge of circulation of the *New York Herald Tribune*, has returned from a two-weeks' motor trip in Canada.

Henry Chambers, assistant publicity manager of the International Mercantile Marine, has resigned, and on the first of November will join the New York staff of the *Boston Globe*.

I. W. Maier, formerly a solicitor in the city display advertising department of the *Milwaukee Journal*, has been appointed manager of that department.

IN THE EDITORIAL ROOMS

LEW WILLIAMS, former assistant city editor of the *Spokane Chronicle*, has been named managing editor of the *Olympia (Wash.) Olympian*.

Mary Rennels has become dramatic and book critic of the *Cleveland Times*.

Carey R. Sutlive has become city editor of the *LaGrange (Ga.) Daily Reporter*. He has seen service on the *Waycross Journal-Herald*, the *Augusta Herald* and the *Macon Telegraph*.

Walter S. Adams, who has been state editor of the *Asheville (N. C.) Times*

FOLKS WORTH KNOWING

FOUNDER and president of the Frank Presbrey Company, advertising agency of New York and other cities, Frank Presbrey in forty-five years has achieved prominence, both as an agency executive and publisher. Today, at seventy-one, he is recognized as one of the deans of the advertising agency profession.

FRANK PRESBREY

Mr. Presbrey was born in Buffalo in 1855. After being graduated from Princeton in 1879, he became editor and publisher of the *Daily News-Register* of Youngstown, Ohio. In 1886 he founded *Public Opinion* at Washington, D. C., and continued to edit this publication for eight years, when he became publisher of the *Forum*, New York. Two years later, in 1896, he founded the Frank Presbrey Company, which is today one of the largest and most important advertising agencies in the world. One of its prominent clients is the American Express Company.

Mr. Presbrey has written widely for newspapers and magazines on business and other subjects. He is well known for his philanthropic work, and was chairman of the Advertising Committee of the National Red Cross during the World War. He is a member of the Executive Committee of the Boy Scouts of America and last summer was one of the two American delegates to the International Congress of the Boy Scouts in Switzerland.

His son, Charles Presbrey, is a vice-president of the Frank Presbrey Company.

for the past six months, has been made city editor.

Franklin Sprague, financial editor of the *New York Herald Tribune*, returned this week from the American Bankers' Association in California.

Gordon Wasson of the financial editorial department is covering the Investment Bankers' Convention in Quebec for the *New York Herald Tribune*.

Russell R. Walker, formerly political writer of the *Vancouver Province*, has joined the staff of the *Vancouver Sun*.

F. Norman Senior, for years political correspondent of the *Vancouver Sun*, has undertaken similar work with the *Vancouver Star*.

H. A. McNITT
Editor and Manager

Michael Earl Kelly, desk man of the *Vancouver Province*, has returned from Toronto, where he represented the New Zealand government at the Canadian National Exhibition. Mr. Kelly spent several years on New Zealand and Australian papers before joining the staff of the Province.

Walter Miller, for some years photographer for the *Vancouver Province*, has gone to Seattle to enter business on his own account.

Valdemar Bendrodt, formerly city hall man on the *Victoria (B. C.) Colonist*, has been appointed copy reader, replacing C. D. Smith, veteran coast newspaper man who has gone to London, Eng.

Dilys Bennett, feature writer and artist for the *Victoria Colonist*, has gone to Paris to take a two years' art course.

Richard T. Freeman, city editor of the *Victoria Times*, has been in hospital several weeks with nasal trouble. Tom Merryman is filling in for him.

A. E. "Cap" Garvin, formerly of the *Kansas City Post* and the International News Service staffs, has purchased half interest in the *Oswego (Kan.) Independent* from W. A. Blair, who retains the other half.

Carl E. Morrison, Massachusetts State House representative for the *Boston Christian Science Monitor*, has been appointed executive secretary to Governor Brewster of Maine, succeeding Col. Charles E. Dustin. Mr. Morrison was formerly associated with the *Bangor (Me.) Daily Commercial*, the *Portland (Me.) Press Herald* and the *Worcester (Mass.) Telegram*.

Frank Harrington Clark, day city editor of the *Providence Journal* and Miss Pauline Grace Church of Worcester, will be married in December. They will live in Providence.

James Lee, formerly of the *Westfield Journal*, has joined the copy desk of the *Worcester (Mass.) Post*.

Roy C. Beckman, for the last seven years on the staff of the *Tacoma News Tribune*, recently serving as assistant city editor, has left for Los Angeles, where he will engage in commercial art work. Frank Lockerby, who has been on the *News Tribune* copy desk, is now transferred to the assistant city editorship, and B. W. Brintnall joins the copy desk. Mr. Brintnall was formerly on the *Seattle Post Intelligencer* staff.

George Lawrence Huff, sporting editor for the *Worcester (Mass.) Gazette*, is recovering from an operation for appendicitis at a local hospital.

James H. Newton, Jr., has joined the city staff of the *Worcester (Mass.) Telegram*.

Philip Steinbach has joined the copy desk of the *Worcester (Mass.) Post*.

F. H. Weinberg has succeeded Ruel R. Barlow as assistant day city editor of the *Minneapolis (Minn.) Tribune*.

Irwin F. Harrison, who has been city editor of the *Sioux City (Iowa) Tribune* for a number of years, has returned to the *Omaha World-Herald*.

Dal Dalrymple, formerly with the *San Antonio (Texas) Daily Light* is now news editor of the *Shawnee (Okla.) Morning News*.

Jack Frank has joined the photographic staff of the *New York Herald Tribune*.

Theodore B. Goetz of the *Buffalo Evening News* and the *New York Herald*, Paris edition, has joined the staff of the *New York Sun*.

Arthur Folwell, art director of the *New York Herald Tribune* Sunday magazine has returned from a two weeks' vacation.

Charles McLendon and Robert B. Peck of the *New York Herald Tribune* rewrite staff are spending a week's vacation at Mr. Peck's farm in the Catskills.

Mrs. Barbara Condon Murphy, a Toledo librarian, is in charge of the *Toledo News-Bee's* new book columns. Mrs. Murphy is the wife of Urban T. Murphy, assistant city editor of the *Toledo Blade*.

Philip Gibbs, city hall reporter for the *Toledo Blade*, has resigned to visit Europe.

James Taylor Robertson, formerly city editor of the now defunct *Richmond (Va.) Evening Dispatch*, has succeeded Robert Emmett Golden on the copy desk of the *Richmond (Va.) Times-Dispatch*. Mr. Golden resigned to accept the assistant managing editorship of the *Billboard*, Cincinnati.

L. B. Dilbeck, of Dallas, has been named correspondent of the Associated Press at Fort Worth, Tex., vice L. F. Hart, transferred to Dallas.

H. M. Glenn, of Kansas City, has been named correspondent of the Associated Press at San Antonio, Tex., vice T. R. Keniston, transferred to Denver, Colo.

Jim Killoran, former football coach of high school, college and professional teams, and Lansing business man, is now assistant sports editor of the *Lansing (Mich.) State Journal*.

WITH THE SPECIALS

THE *Pekin (Ill.) Daily Times* has appointed the Allen-Klapp Company to represent it, East and West, in the national advertising field.

La Razon, afternoon newspaper of Buenos Aires, has appointed Joshua B. Powers, New York, representative for the United States.

G. Logan Payne Company, special representatives, New York, have been appointed to represent the *Parkersburg (W. Va.) News*, east and west.

SCHOOLS OF JOURNALISM

AN historic stone lantern which has been called "one of the most enduring and representative objects of art Japan ever produced," will be presented to the University of Missouri School of Journalism at Columbia Nov. 9 by His Excellency, Tsuneo Matsudaira, the Japanese Ambassador to the United States. The lantern is the gift of the American-Japan Society through its president, Prince Iyesato Tokugawa, and will be formally accepted for the University by Judge James E. Goodrich of Kansas City, president of the board of curators.

The School of Journalism at the University of Washington is offering those who cannot attend the University an opportunity for instruction in all kinds of writing by downtown extension courses, given at night. Professor Leo A. Borah is offering short story instruction and has a class for beginners and another for advanced students. Professor Robert W. Jones teaches magazine and feature writing and another course on the fundamentals of advertising. Byron I. Christian, instructor in journalism, teaches news writing.

Josef W. Hall, University of Washington instructor and newspaper man, is being held a prisoner in Sun Chuan Fang's headquarters in Nanking, charges of being a spy having been filed against him. Mr. Hall, a lecturer at the University and who last year taught Foreign Correspondence, a journalism course, was obtaining material for a series of magazine articles when he was taken captive. He was charged with being a spy in the employ of the Cantonese, although he carried American passports. Mr. Hall has spent many years in China and has written numerous books and articles on China under the pen name of Upton Close. At one time he was the advisor of General Wu Pei Fu.

MARRIED

ANDREW J. PEASE of the advertising department of the *Glens Falls (N. Y.) Post-Star* to Wilda D. Forbes of the same city. Mr. Pease was formerly connected with the classified advertising department of the *Albany Knickerbocker Press* and the *Rochester (N. Y.) Herald*.

John S. Hubbell, *Wichita (Kan.) Eagle* reporter, and Miss Vera Saxon of Kansas City.

Amos Sawyer, Jr., instructor in the United Typothetae of America School of Printing, Indianapolis, Ind., to Miss Eloise Johnson of Indianapolis, Ind., Oct. 12, at Springfield, Ill.

Miss Mary Frances McLee, circulation department *Rockford (Ill.) Morning Star*, to Phillip Orvis Driscoll, Rockford, Oct. 12.

ASSOCIATIONS AND CLUBS

JOHN B. COOLEY, managing editor of the *Grand Forks (N. D.) Herald* was elected president of the NORTH DAKOTA ASSOCIATED PRESS ASSOCIATION at a meeting held at Bismarck. George D. Mann, publisher *Bismarck Tribune*, was elected vice-president, and N. B. Black, *Fargo Forum*, was re-elected the North Dakota member of the Associated Press regional advisory board.

The employment service of the ADVERTISING CLUB OF ST. LOUIS obtained positions for 61 advertising men and women during the fiscal year ending Oct. 1, the positions ranging from office boy to \$7,000 a year men. The work is in charge of the Club's educational committee, Daniel A. Ruebel, vice-president Chappelow Advertising Company, chairman.

Silver loving cups were awarded to the following for distinguished service to the ADVERTISING CLUB OF ST. LOUIS in 1926: Frank P. Gibbs, Britt-Schiele Advertising Company; R. E. Kane, advertising manager, Union Electric Light & Power Company; E. Julian Birk, advertising department, Southwestern Bell Telephone Company; S. Chichester Lloyd, Elliott Addressing Machine Company; and David F. Leavitt, artist. The idea of awarding the cups was that of Douglas V. Martin, Jr., director of publicity of the *St. Louis Globe-Democrat*. John Jay Johns, advertising manager of the American Trust Company, was chairman of the awards committee.

The PHILADELPHIA CLUB OF ADVERTISING WOMEN will hold a bal masque Oct. 28, 1926, in the North Garden of the Bellevue-Stratford Hotel.

Sixteen counties in northwestern Iowa were represented at the sectional gathering of the *Iowa Press Association* in L. Mars, Oct. 15. E. F. Tucker, secretary of the Iowa Press, and G. L. Caswell, former secretary, attended and P. J. Benjamin, editor of the *Nevada Evening Journal*, was a speaker. Justin Barry *Cherokee Times*, is president of the group and Otto F. Bartz, secretary.

The annual dinner dance of the *Pittsburgh Press Club* will be held Oct. 28 in the Fort Pitt Hotel. The program include dancing, a complete vaudeville bill and cards with suitable prizes.

HOLDING NEW POSTS

PAUL B. MASON from *Miami (Fla.) Herald* to state desk of the *Sandusky (O.) Register*.

M. J. Foreman from state desk to telephone desk of the *Sandusky (O.) Register*.

Fred Norris, from *Toledo News-Bee* to *Toledo Blade* copy desk.

Nelson T. Randall is doing city hall for the *Toledo News-Bee*. Richard Mealand covers city hall for the *Blade*.

Robert Montgomery, formerly managing editor of the *Louisville Herald* and now engaged in advertising and promotion work, is handling the advertising campaign of Judge Alben W. Barkley, Democratic nominee for U. S. Senator.

Dallas News of Oct. 10, 230 pages.

EVERY ADVERTISING CAMPAIGN SHOULD INCLUDE

The Rich, Concentrated Trading Area of 250,000 Buyers...

Wilmington has many claims to distinction. It is noted as a great manufacturing center and occupies a preeminent place as the home of some of the largest industries in the world. Within its 25 mile concentrated trading area of 250,000 inhabitants lies a great buying power that no national advertiser can overlook.

Shoppers from Pennsylvania, New Jersey, Maryland and the entire state of Delaware come to Wilmington to do their trading. The logical mediums to cover this rich market are the *Evening Journal* and *Morning News*. With a combined circulation of over 31,000 that covers 60% of the families in this area, the *Evening Journal* and *Morning News* are the dominant papers.

If you are not familiar with this market, get the facts—you will be convinced.

EVENING JOURNAL MORNING NEWS

Zone Selling and Zone Advertising

Newspapers for the cities and towns.

State farm papers for the country.

Agricultural problems of production and marketing differ with local conditions the country over.

National magazines can no more compare in urban sales with Newspapers than can national farm papers compare in rural sales with state farm papers—sales meaning both circulation and influence.

Zone selling and zone advertising is the simple, sure way to largest sales at a profit.

BUILDING NEWSPAPER CIRCULATION

How Do You Like the Title of Circulation Manager?—Employing Women to Obtain Mail Subscribers—La Verne Lewis, Ithaca Journal-News, Discusses Circulation Growth

HOW do you like the title of circulation manager?

The other day in a gathering of circulation managers in New York A. E. MacKinnon, for years a promotion manager of the *New York World* and a past president of the International Circulation Managers Association, rose to remark that the title was obsolete and should be cast out forever.

"There have been great strides made by circulation men of the newspapers in the last 25 years," Mr. MacKinnon, who is now a press agent, maintained. "Certainly they have outgrown the title of circulation manager, which flavors of newsboy tutelage. I think circulation men everywhere should advocate a change in title to that of sales manager. That is exactly what they are, the newspaper's sales manager. It is their duty to superintend the sale of the daily newspaper product."

To this manifesto, F. T. Conley, of the *Watertown* (N. Y.) *Standard*, took exception. Mr. Conley said he didn't think it was any more dignified to be known as a sales manager than it was to be called a circulation manager.

"If we make any change at all," he proclaimed, "let us all hereafter be known as circulation directors."

If you want to add mail subscribers to the list of your paper, look about for the right sort of woman and your problem is solved, according to D. Bertrand, for six years circulation manager of the *Shreveport* (La.) *Times*, who is now in business in New York. He told about Mrs. J. B. Rice, a woman employed by the *Times*, who goes about from city to city in an automobile, covering practically the whole state of Louisiana, getting mail subscriptions.

"Mrs. Rice has accomplished what men have been unable to do," he declared, "and what one woman has done, others can do."

The "right sort of woman," Mr. Bertrand explained, is one who is intelligent, who is a good talker, and who is energetic.

"It is easy to find women who possess these three virtues," he claimed. "And when you have found one, you have found a gem."

Charlotte (N. C.) newsboys under the age of 14 years will be registered and will wear a badge to be given them by M. M. Grey, welfare officer of Mecklenburg county. The registration is part of a system being inaugurated in North Carolina to prevent street loafing and truancy of boys within the age of the compulsory school law.

"A newspaper is like a child; it must

have a healthy growth to succeed." La Verne Lewis, of the *Ithaca Journal-News*, wrote to EDITOR & PUBLISHER this week.

"Premiums and cut-rates are as injurious to the paper as too strenuous work or insufficient nourishment is to the child.

"We have avoided premiums and cut-rates, and spent the money for good will and promotion instead, which we find more satisfactory.

"Along with good will, you must give the best possible service. We use all the bus lines out of Ithaca, and where we are not able to reach the town by bus, we find some one who lives in that town and drives here to work daily, who is glad to take the bundle out for us, and leave it in the corner grocery, if there is no post office."

Car cards which have been displayed in subways, elevated trains and street cars; posters used in stations and specimens of booklets, circulars and other printed matter—all advertising the *New York Times*—were exhibited this week at the Times Annex.

The *Times* has offered prizes to members of its staff for suggestions for improving the promotional material in the exhibit and for suggestions for new promotional literature.

The exhibit was open to the public without charge.

The *New York Evening World* is offering two dollars apiece for contributions of 100 words or less sent in by readers on odd things observed about New York. Contributors are asked to give location and time. Those printed are run under the heading "In Old New York." The same paper has started a "Peter Piper" contest, offering daily prizes for the best illiterative sentences.

The *Knoxville* (Tenn.) *Sentinel* concluded a "Know Tennessee" picture game contest on Oct. 16. Fifty pictures were published, a different one appearing each day, and contestants were asked to guess the name of the town or city represented. The sum of \$300 in cash prizes was awarded. Earlier in the year, the *Sentinel*, the *Nashville Banner*, the *Bristol Herald-Courier*, the *Clarksville Leaf-Chronicle* and the *Jackson Sun* conducted a state-wide "Know Tennessee" oratorical contest.

Although he lost the newsboys' Harvard scholarship awarded to the boy who broke the high mark record, Jack Moskovitz, who carries the *Boston Sunday Advertiser*, will realize his ambition to go to Harvard, and will continue to deliver the newspaper. Joseph Cohen, a

West Roxbury newsboy, led Moskovitz by a few points in the examination, but E. E. Keevin, director of the Newsboys' Harding Memorial Association, recommended that Moskovitz be awarded the Price Greenleaf scholarship.

The *Brooklyn Times*, which operates an independent carrier organization, believes it has found a way to overcome the handicap of serving large apartment houses by newsboy, when the no peddler and no solicitor signs are displayed. At a meeting of circulation department heads last week it was decided to appoint superintendents of several of the largest apartment houses as district managers, putting them on the newspaper pay roll. Some apartment houses in Brooklyn hold as many as 500 people.

YPSILANTI PLANT DAMAGED

The plant of the *Ypsilanti* (Mich.) *Daily Ypsilantian-Press* was damaged by smoke and water, Oct. 17, when fire broke out in the second floor of the Press Building, occupied by a clothing concern. A considerable quantity of newsprint paper was destroyed by being soaked, and rust forming on the linotype machines caused much work before the Monday edition. George C. Handy is editor and publisher of the *Ypsilantian-Press*.

PACIFIC CLUB'S NEW SECRETARY

Lindsey H. Spright, of the national advertising department of the *Portland Oregon Journal* has been named secretary-treasurer of the Pacific Coast Advertising Clubs.

MEDICAL PUBLICITY

British Doctors Relax Opposition to Newspaper Mention

The British Medical Association has for the first time in its history relaxed from its unbending opposition to publicity. Sir Thomas Horder, long a champion of the old order, speaking in London Oct. 13th declared that he has been converted to some extent to popularizing health matters through the press.

"The public has decided that it wants health talk and means to get it," he said. "The lay press is the most powerful medium of instructing the public in health matters. We must do our best to secure its co-operation."

He suggested the formation of a committee composed of prominent physicians and editors who would pass on medical articles before they are published. His purpose is two-fold:

First, to prevent physicians from using the press as an advertising medium through signed articles, thereby violating medical ethics, and, secondly, to guard the public against unscientific misinformation.

COAST AGENCY GROUP ELECTS

Herbert Carl Bernsten, vice-president of the Lockwood-Schackelford Company was elected president of the California Advertising Service Association, an organization of California agency executives, at the annual convention held last week at Del Monte, Cal. Robert Young of San Francisco, was designated secretary.

New England's Second Largest Market

GOOD COMPANY

We believe the value of an advertisement is greatly increased when it appears in company with other clean, honest and unquestionable advertising.

We exercise as rigid censorship over our advertising columns as we do the news. To conform to our policies, we refuse many thousands of dollars' worth of advertising each year.

It is gratifying to us that advertisers who desire good company are constantly increasing their space in Rhode Island's great newspapers.

CLASSIFIED ADVERTISING

Nax Traces Want-Ad History—Directors of Classified Managers Association to Meet in Chicago, Nov. 17—Good Promotion Copy Used by Chicago Tribune

HISTORY of the classified ad was traced from Biblical days to the present time by Charles W. Nax, classified advertising manager of the *St. Louis* (Mo.) *Globe-Democrat*, and president of the Association of Newspaper Classified Managers, addressing the general sessions of the annual convention of the Seventh District of the International Advertising Association, held at Tulsa, Okla., Oct. 12. In part he said:

"It has been said that classified ads are as old as the human race, and may easily be found in the Bible through a little careful reading between the lines. Perhaps, the most far-reaching want ever published was on the idographed tablets of the Pharaoh dynasty, which directed the Israelites to appear in the thousands to make bricks without straw for the public buildings of Egypt.

"Classified advertising has often been referred to as the single column threads of destiny, directing the fortune and lives of millions, and also the parent of all advertising. It is claimed by some that the first advertisement appeared in a Dutch newspaper in 1626.

"It is claimed that during this century, that classified was the only kind of advertising. One authority claims that newspaper advertising in America dates back to 1704, and the *Boston News-Letter*.

"There are some historians who credit a certain Mr. Candish of Suffolk County, England, with writing the first Classified Ad to appear in an English newspaper. Mr. Candish's famous and original advertisement appeared in the first number of the *Impartial Intelligencer* of London, which was published about the year 1600. He offered a reward for the return of two of his horses which were stolen from his stables some days before.

"It was not until 1728 that any perceptible number of people became advertisers, and the real beginning is said to have been between 1788 and 1820. During this period, advertising, while not designated as such, was in the form of the present-day Classified Ad, and was limited to a few subjects, such as books, coffee and spice importations, sale of slaves, sailing vessels and for run-away slaves.

"From 1820 until 1833, there was very little growth. Beginning with 1833, however, the character of the reading matter in most publications, then in existence, was very materially developed, and with it advertising also began to expand.

"Classified Advertising, as we know it, however, is really a development of the last 25 or 30 years. It is called 'Classified' because all advertisements of the same kind are grouped under a classification or heading so that the reader will have no difficulty finding what he wants.

"At the convention of the Association of Newspaper Classified Advertising Managers at Atlantic City, June 1923, the name 'Classified' was adopted with the recommendation that all the newspapers use it. However, some newspapers are still using the terms, Want Ads, Liners, Ad-Lets, etc.

"Classified advertising is a great public service, which the newspaper performs because it fills a big public need. It grew and developed because it is a general meeting place of all who want to secure or want to dispose of anything no matter what it might be. It is today the most wonderful of any of the many developments of the newspaper."

Plans for a campaign of classified promotion advertisements will be worked out in detail by directors of the Association of Newspaper Classified Advertising Managers to be held Nov. 17 at the office of C. L. Perkins, *Chicago Herald-Examiner*. The campaign will be released exclusively to association members, beginning about Jan. 1.

Picking a few want ads at random from the paper, the *Chicago Tribune* developed

a striking classified promotion advertisement this week running under the headline "Rambling Through the Want Ads."

Text of the copy was illustrated by a pen and ink sketch of a traveling tinker-man and his wagon driving along a country highway, and with smaller drawings picturizing the various advertisements selected for mention.

The itinerant merchant was described as "but one of the many strange forms which the market place, as an institution, has assumed in the course of the human story." The next sentence read:

"But the most inclusive market place that the world has yet seen is the want ad section of a great metropolitan newspaper."

In support of this assertion, the great variety of ads in the current number were cited, including a request for an aged negro with white hair to pose as a model for advertising photographs; an announcement of a pair of antique wrought and irons for sale; an ex-British cavalry officer's offer to act as a companion-guide in a tour of England; and a terse little personal reading: "Mamie M. S. WE LOSE the flat building unless you come at once. BILL."

Advertisers who attempt to mislead prospects in the classified columns of New York papers are being dealt with harshly by the city's courts. Vincenzo Onerato, a former elevator operator, was sentenced to 60 days in the workhouse this week for placing a misleading ad in the *New York World*.

AD-TIPS

Auspitz, Lee & Harvey, 360 North Michigan avenue, Chicago. Sending out copy on Radio Specialty Co., Chicago, to Wisconsin papers.

Carpenter Advertising Company, Sloan Building, Cleveland. Placing account for the Falls Rubber Company, Cuyahoga Falls, Ohio.

Wales Advertising Company, 250 Park avenue, New York. Will make up lists during the month of November for John T. Stanley Company, Inc., New York, manufacturers of "Mobo" automobile specialties.

Young & Rubicam, 235 Madison avenue, New York. Has secured account of the Sterling Silver-Ware division of the International Silver Company, Wallingford, Conn.

ADVERTISING AGENCY AFFAIRS

Roy C. Hayes Leaves Detroit Times to Join Campbell-Ewald Company—Appointments Announced by Street & Finney—Ring Now with Geyer Company

ROY C. HAYES, former automobile editor of the *Detroit Times*, has joined the staff of the Campbell-Ewald Company, Detroit advertising agency. In addition to his work on the Times, Mr. Hayes has for four years been automobile editor of Universal Service. With Campbell-Ewald he will direct the publicity interests of the Chevrolet Motor Company. Mr. Hayes is a graduate of the University of Detroit, where he founded and edited the *Varsity News*, student weekly.

H. J. Nagl, formerly with the Erickson Company, has been added to the staff of Street & Finney, New York advertising agency, as space buyer. W. J. Effler has been made assistant production manager of the same agency. He was formerly connected with the William R. Robinson Company, Inc.

E. D. Ring, formerly vice-president of the St. Paul Advertising Company, has joined the Geyer Company, Dayton agency, where he will be identified with

merchandising and sales promotion. Before going to St. Paul, Mr. Ring was chief of staff of Marquis Regan, Inc., advertising counsellors, New York.

William H. Johns, president of the George Batten Company, New York agency, has accepted the chairmanship of a team of workers in the advertising and publishing field, during the annual budget campaign of the Y. M. C. A. of New York, Nov. 9-19.

Articles of incorporation have been filed by the Advertising Corporation, Inc., of Minneapolis, Minn. The incorporators are F. G. Weston, W. H. Barber and Harry Kiester. The capital of the company is \$50,000.

Donald M. Bangs has withdrawn from the advertising agency known as Bangs & Hughes, Los Angeles, in which he was associated with Graham Hughes, and has started a new firm, the Bang's Advertising Company.

To You for Whom The Best is Not Too Good

The Dallas Morning News and its companion publication, The Dallas Journal, are not cheap newspapers. There is nothing cheap about them.

Their advertising rates are fair. No other paper offers equal value at a lower cost.

That's about all we can say about rates. Heaven knows it ought to be enough.

Circulation of The News and The Journal is the sort that accrues to newspapers of high character, whether they are sold in Dallas or New York or South Australia.

People in an advanced state of civilization and spending-power are not the only kind that read The News and The Journal, but there are not very many of the others.

Consider the best paper in your own city. Picture to

yourself its reader-family; alert, modern, progressive people. News and Journal readers are like that.

* * *

And they're not the same people, morning and evening. You can't buy these two papers in combination—to read. You can't even give a News subscription to a Journal solicitor. From press to porch they have nothing in common, and mighty little from pen to press—except ideals, and principles, and a sturdy allegiance to fair play.

* * *

That is why advertisers who utilize the optional combination rate for The News and The Journal not only save a substantial difference but actually receive the most widespread coverage that can be bought.

WOMEN IN ADVERTISING AND JOURNALISM

Alma Sioux Scarberry, of Amnesia Fame, Wakes Up in Pittsburgh—
Miss Francel Handling Publicity for Willys-Overland—Society
Editors Go in for, Society in Connecticut

ALMA SIOUX SCARBERRY, a newspaper woman of Indian ancestry, now a member of a wandering tribe

ALMA SCARBERRY

of itinerant feature writers, has settled down with a big front-page splash on the *Pittsburgh Chronicle Telegraph*, where she is writing a series of articles under the heading "Miss Today." Miss Scarberry first burst into prominence when, working for the *New York Daily Mirror*, she pretended to be an amnesia victim as a stunt to promote a serial by Elinor Glyn. While her memory was supposedly under a cloud, New York and other dailies gave her considerable space, believing she was some British noble woman in distress.

Leaving the *Mirror*, Miss Scarberry started out to earn her way to the Pacific Coast by working for daily papers en route. Her first stop was in Philadelphia, where she worked for the *Philadelphia Record*, and the publicity department of the Sesqui.

Arriving in Pittsburgh in August, she made arrangements with the *Chronicle Telegraph* to work on the "Miss Today" series, which started this week.

The *Chronicle-Telegraph* introduced its new staff writer to its public with 72-point type in an eight column front page streamer on Oct. 11. Miss Scarberry got a job with the local police force as a "flapper cop" and set out to see how many Pittsburgh males would try to pick her up as she strolled the streets with eyes front, and smile quenched. She was made the center of masher war mystery, which the "Tele" happily solved, but not until all other Pittsburgh papers had given their future feature writer front page space and had printed her picture in a variety of poses. Incidentally, 18 men in one night were arrested for trying to meet Miss Scarberry as she walked down Pittsburgh's Federal street. This fact formed the peg for a series of two articles which Miss Scarberry first wrote for the "Tele," entitled "Bringing in the Sheiks."

To obtain material for the "Miss Today" series, Miss Scarberry, using the name of Alma Berry, worked in a wide

variety of positions in Pittsburgh, to find out how the poor working gal gets along.

Miss A. B. Francel, formerly with the advertising staff of the Farm Trio—*Washington Farmer*, *Oregon Farmer* and *Idaho Farmer*—published by the Cowles Publishing Company of Spokane, is now in charge of handling advertising copy and publicity material for 139 western newspapers for Willys-Overland, Inc., through the United States Advertising Corporation.

Society editors of Bridgeport, New Haven and Norwalk Conn., have planned a series of Winter social gatherings, the first of which took place recently at the Pewter Bowl, Bridgeport. The next is scheduled for New Haven on Sunday, Oct. 31. Those attending were as follows: Mary J. McGuinness, *Bridgeport Post*; Marion Carter, *Bridgeport Telegram and Sunday Post*; Winifred Nicholas, *Bridgeport Star*; Katherine Brady, *Bridgeport Times*; Selma Schwartz, *Bridgeport Star*; Ellen Brady, *Bridgeport Times*; Mrs. George Troup Glynn, *New Haven Union*; Miss Florence Richter, *New Haven Journal-Courier*; Ruth Quint, *New Haven Register*; Harriet Fredericks, *New Haven Times-Leader*; Elsie Copeland, *South Norwalk Sentinel*; Alma Lycett, *Norwalk Hour*; Madelyn Farley-Santa, formerly of *Bridgeport Telegram*.

HAILS BUSINESS WOMEN

Sir Charles Higham, prominent British advertising agency man, speaking in London, Oct. 14, predicted women would in 20 years dominate all branches of the business world if men do not pull themselves together. He said he found women employees better than men. They are more energetic, more thorough and take a much keener interest in their work, he said.

COLLEGE EDITORS OUSTED

The student council of the University of North Carolina has requested the resignation of Julian S. Starr, editor, and R. K. Fowler, assistant editor of the *Carolina Magazine*, a student publication, on charges that the current issue contains a story regarded as "indecent and improper." Starr and Fowler have appealed to the faculty and President H. W. Chase has referred the matter to a faculty committee.

RECEIVER'S SALE

Imperial METAL

The Floating "U" takes Imperial along

WHEN the Floating University left New York on the S. S. Ryndam for its trip around the world it took Imperial Type Metal along.

Each day during the trip a daily newspaper will be issued by the class in journalism. This paper will contain daily announcements, doings on shipboard, sports and special articles by faculty members, students and prominent men in the countries visited.

We wish the faculty and members of the floating "U" a most pleasant and profitable trip.

It's a matter of pride with us that Imperial Linotype metal was selected for the trip. We have confidence that Imperial will give perfect satisfaction whether it is being used on the Atlantic or Pacific. Imperial Metal has the habit of giving economical, dependable service wherever it is used.

Special arrangements were made for the Metal for the "University Afloat" but all publications ashore will find that the Imperial Plus Metal Plan is the most dependable method known for taking care of type metal. Is your shop using it?

IMPERIAL TYPE METAL CO.

18,341,400 Lines of Paid Advertising

A Record of **9** Big Months in

The St. Louis Post-Dispatch carried more paid advertising during the first nine months of 1926 than during any previous similar period.

The Post-Dispatch has carried more local display advertising since January 1 than the Globe-Democrat, the Star and the Times added together.

The gain over the first nine months of last year was 1,576,400 lines—more than double the gain of all other St. Louis newspapers combined.

The Post-Dispatch is the only St. Louis newspaper to make consecutive gains every month both in local display and in total paid advertising.

The gain of the Post-Dispatch in local display advertising since January 1, was 682 920 lines. The Globe-Democrat's loss was 149,100 lines. The Star's loss was 109,500 lines

Advertisers **CONCENTRATE** in the Post-Dispatch Because Years of Experience Have Proved that the Post-Dispatch **ALWAYS** Brings Far More Profitable Results.

WITH THE GENERAL ADVERTISERS

Why G. R. Elliott, Skelly Oil Company, Likes the Advertising Business
—Kansas City, Mo. Plans Newspaper Campaign—A. & P.
Stores Observe 67th Anniversary

IN the office of the advertising manager of the Skelly Oil company in El Dorado, Kan., sits a man who has come to a halt, physically speaking, in a life of adventure and color.

G. R. Elliott, the gentleman of discussion, conceived in 1917 the idea of making a grand tour of the world in seven years. Up to that date he had worked ten years as a reporter in Canada from coast to coast, and in Alaska, the Yukon, Mexico and 42 of the 48 American states.

"So you see the romance of the oil fields must be very compelling to hold me here," Mr. Elliott said.

Mr. Elliott wrote plays for Belasco in New York City that were never produced, knocked about with Robert W. Service in the Yukon and just missed being shot by Villa in Columbus, N. M., when that bandit raided the border town and killed 17 Americans.

During his seven year tour of the world, Mr. Elliott worked as a journalist in the following places: Honolulu, Fiji Islands, New Zealand, Australia, New Guinea, the Philippines, Japan, China, Java, Ceylon, India, Egypt and London. While in London he wrote feature articles for the *Pall Mall Gazette*. He visited France, Italy, Spain, Switzerland, Austria, Germany, Belgium, Norway, Sweden, Scotland and Ireland.

"Guess it's because I am always looking for something new that I like the advertising business," Mr. Elliott commented.

Lou Holland, twice president of the Associated Advertising Clubs of the World, recently announced on his reelection as president of the Chamber of Commerce of

Kansas City, Mo., a plan for advertising the advantages of Kansas City.

An executive organization, to which Mr. Holland submitted his ideas on municipal advancement, now is preparing a budget for advertising Kansas City in newspapers throughout the country.

The Thatcher Company, Newark, N. J., makers of Thatcher furnaces, has started a new campaign, using newspapers, magazines and business papers. The account is directed by the Redfield Advertising Agency, New York.

Net profits after reductions for depreciation and taxes for the nine months ended Sept. 30 of the William Wrigley, Jr., Company totaled \$7,609,022. The net profit for the third quarter was \$2,810,107.

Thomas J. Keresey has been appointed advertising manager of the International Mercantile Marine Company, New York, effective Nov. 1.

The New England Telephone and Telegraph Co. has started an extensive advertising campaign, utilizing the columns of the daily and weekly newspapers in each community to boom the advantages of telephone toll calls in building up business.

The Great Atlantic and Pacific Tea Co., established in October, 1859, by George Huntington Hartford, a Maine young man, is observing its 67th anniversary throughout the country this week and is advertising heavily through the newspapers its many anniversary offer-

ings. Today there are 40 large food depots distributed advantageously over the country supplying thousands of the "Red Front" stores which are known as "the little red school house of American retailing." The nation-wide concern has just established 41 meat stores in Boston, Mass., and vicinity, a new departure in the A. & P. business policy.

Under the auspices of the Associated Industries of Massachusetts, an October exhibition of the many products manufactured by its members is being held at the Copley Plaza Hotel, Boston, this week. The exhibit not only demonstrates what is beautiful but also what is useful and at the same time indicates the practical way that Massachusetts is a leader. The idea behind the affair is to educate the buying public.

An interesting headline contest with prizes totaling \$6,000 is being conducted through the advertising columns of American newspapers by the P. Lorillard Co., tobacco and cigarette manufacturers, to advertise and popularize their new Old Gold cigarettes. There will be three separate contests with \$2,000 in prizes for the best headlines to the picture in each contest.

NEW IOWA DAILY PLANNED

C. F. Skirvin and J. W. Halden this week announced plans to start a new daily paper at Creston, Ia. Mr. Skirvin formerly published the *Keokuk (Ia.) Gate City*, and prior to that the *Creston Advertiser*. Since selling his Keokuk property, he has been living at Santa Ana, Cal., but will return to Creston in the next few weeks. Mr. Halden is the owner of the Halden Printing Company, a Creston job printing concern. C. J. Skirvin, son of C. F. Skirvin, will be associated in the new venture. Contracts have been signed with the United Press for the full leased wire report.

MILLER HEADS LIBRARIANS

Alcott of Boston Globe, Unable to Serve as Chairman, Resigns

At a meeting of the executive committee of the Newspaper Group of Special Libraries Association, held recently in New York, immediately following the adjournment of the annual conference at Atlantic City, William Alcott, librarian *Boston Globe*, who had been named as chairman, announced that he could not serve.

John H. Miller, librarian, King Features Syndicate, New York, was named as chairman, and Miss Agnes J. Peters, librarian, *Milwaukee Journal*, was made vice-chairman. With Maurice Symonds, librarian, *New York Daily News*, the secretary-treasurer, they compose the executive committee.

20 YEARS OF ADVERTISING

California Fruit Growers Celebrate Anniversary with New Drive

The 1926-27 campaign of the California Fruit Growers Exchange marks the association's 20th anniversary as an advertiser. The 19 completed campaigns the management points out, have built up good-will and public acceptance of California Citrus Fruits.

A change in the present advertising program provides for special newspaper drives to feature the medicinal advantages of hot lemonade, during epidemics of colds and grippe.

NEW TYPE-SETTING RECORD

Setting a total of 24,428 ems in two hours, John F. O'Sullivan and William L. Welty, of the O'Sullivan Composition Company, New York, known as the "Intertype Speed Kings," established a new high record for type-setting at recent public exhibition in New York. In 1924 in the same time the two men set 24,372 ems.

If you're after circulation put this new Graflex to work

Pictures have a sure circulation appeal, as recent successes prove. Pictures vitalize the news, pictures give the written report an on-the-spot complexion that attracts readers.

Your supply of pictures will be easy if your cameramen carry the new Graflex. Its lens speed lets it make good under light conditions that were heretofore considered impossible—even for the Graflex.

Visit a dealer or write to Rochester.

3 1/4 x 4 1/4 Revolving Back Graflex, Series C, has a Cooke Anastigmat f.2.5, three times as fast as the fastest lens previously offered. This camera makes well-exposed negatives in poor light, an advantage that is especially valuable in winter. Price \$260.

Graflex cameras are now made by

The Folmer Graflex Corporation, Rochester, N. Y.

For sale by

Eastman Kodak Company, Rochester, N. Y.

WHAT OUR READERS SAY

COPS AND SCIENCE

To EDITOR & PUBLISHER:

A prominent manufacturer of automobile bodies recently ran what we consider an unfair and misleading sort of advertisement in one of the leading publications of the country.

It purported to represent a poll of 500 police chiefs, who were asked what in their opinion would bring about greater safety in motoring.

According to this advertisement, a majority of the police chiefs agreed upon all steel bodies as one of five necessities, if safer motoring were to be effected.

Here indeed is a tip for automotive and body engineers—put the nation's leading police chiefs on your staff! Standardization is assured if this plan is followed.

Just now there seems to be a difference of opinion. Some engineers believe in a valve in head motor, others in an L-head, still others in the sleeve valve type. Some design sixes, others eights and still others fours. There are various designs of carburetors, ignition systems, tires, etc.

And why? All makers need to do now is send out a questionnaire to these police chiefs who supposedly have thrown the keenness of their scientific and engineering knowledge into the breach. They'll settle the problem.

Manufacturers of whatever you may be building—fire your engineering department and let the police chiefs do their job.

Yours very truly,
CRITCHFIELD & COMPANY,
L. T. GOBLE.

Mirror Men Play Lone Hand

To EDITOR & PUBLISHER:

The statement in your current issue that several members of the *Daily Mirror* staff have joined the "Crab Apple Tree Association" is quite incorrect.

To the contrary, members of The *Mirror* staff have refused repeatedly invitations to join this association of some of the photographers and reporters assigned to the Hall-Mills case.

One reason for doing so is we do not feel that a murder, a solemn investigation and trial, are fit subjects for either jollification or jest. The other reason is, of course, that we of The *Mirror* have not had to engage in "all those wild auto rushes" in pursuit of rumors which might make such a means of solace necessary.

The *Daily Mirror* is responsible for the publication of matter which brought on the new investigation of this tremendous tragedy. At the coming trial The *Mirror's* work on the case is bound to play some part in the evidence.

Under such conditions it is felt it would be gross bad taste for any member of

The *Mirror* staff to join any such association. May I therefore respectfully request you to make the proper correction of this entirely erroneous report?

HERBERT B. MAYER.

"COMMERCIALIZED SPORTS"

EDITOR & PUBLISHER—I think that William J. McNulty's article which appeared in the *Editor & Publisher* Sept. 4, was correct in nearly every respect, especially in regard to college athletes being commercialized.

In the issue of Oct. 2, (*EDITOR & PUBLISHER*) I read another article by Telford Work which criticized Mr. McNulty on his stand in regard to athletics being commercialized.

I wish to say that in the southwest, there are very few colleges and universities indeed that do not give their athletes some sort of remuneration for their ability which surpasses that of an average athlete. In Texas, it really seems that every college is gradually putting in a bid for the star athletes every year. This is not an idle thought—it is the truth.

For fear of being sued for libel and slander, etc., I will not mention certain colleges in this state that pay their "star" football, basketball, track and baseball players. In this state there are two particular schools that are known to "buy" their athletes, but the question is how to prove it? Another college once had a chance to throw another sister member out of the athletic organization in the southwest, but they failed to do it, and of course, they were afraid to do it for fear of being exposed by the rival school.

There are certain high schools and especially academies in this state as well as the south where men are induced to come, and it is a well known fact that this is true. Unless some remedy is given, or some plan adopted, athletics in this state will be badly "tainted."

I might ask Mr. Work to give me a plan that would do away with this commercialization in athletics, for it is true, and any sensible person can see it. The schools are not fooling the public, but how is it going to be proven?

RAY D. JONES,
Assistant sports editor
Waco (Tex.) *Times-Herald*.

TALKS ON PRINTERS' SCHOOLS

Kellogg Speaks at Annual Convention of United Typothetae

American newspaper publishers soon will have schools throughout the country for the education of their employees, Ross W. Kellogg, director of the Empire School of Printing, Ithaca, N. Y., told delegates to the annual convention of the United Typothetae of America, meeting in Detroit, Oct. 18-19.

"Newspaper publishers at last are alive to the need of institutional training in printing," he said. "They are insisting on schools where all the arts and science of printing and publishing can be thoroughly taught."

Dr. Samuel E. Stratton, president of the Massachusetts Institute of Technology, another speaker, urged that printers seek greater development of the scientific phase of their craft.

"I know of no industry in which there are as many different allied matters as in your industries. When we consider the printing industry, including all of the processes, engraving and so forth, there is not a branch of chemistry, physics or engineering that is not involved," he said.

PULITZER NARROWLY ESCAPED DEATH

Charging Rhinoceros Brought Down in Nick of Time by Guide, World Editor Tells on Return from Hunt in Africa

A story of how he narrowly escaped death in a thrilling adventure with a rhinoceros was related by Ralph Pulitzer, editor of the *New York World*, who returned this week from a hunting expedition in Nairobi and Tanganyika, south-east Africa.

The rhino had been wounded in the neck, and was charging the *New York* editor. The chief guide brought down the enraged animal with a well-aimed shot in the nick of time.

Mr. Pulitzer brought back a huge bag of game, including lions, rhinos, hippos, and many rarer species. Also among the collection of wild animals was a rare kudu and many smaller animals and birds.

The kudu is a fleet species of antelope with spiral horns. It is so fast that the natives who hunt on foot are seldom able to approach near enough to bag one.

Next year Mr. Pulitzer plans to go hunting in Angola, Portuguese West Africa, along the Congo and across to the Nile headwaters. Returning with him to New York on the Olympic, Oct. 19, was his brother, Herbert Pulitzer.

Mr. Pulitzer had a newspaper adventure in Paris, which has, he confessed, made him rather reporter-shy. He was trying to explain the fleetness of the kudu to a French reporter, who was over-confident of his command of English. The French journalist completely misunderstood and the story as published was that the American hunter had captured his kudu by pursuing it on foot until it dropped of exhaustion.

"I did have a Ford car on the trip," Mr. Pulitzer said.

FLASHES

We fear that the distinguished gloomy dean would be a total loss as a bond salesman.—*Milwaukee Journal*.

Another rather disconcerting and saddening experience is to look up a prominent friend of about your age or perhaps a year or two older in *Who's Who* and find he's 13 years younger.—*Ohio State Journal*.

According to the British press, we are a nation of raving Rumanians.—F. P. A. in *New York World*.

Twenty-one guns were fired as Queen Marie entered New York harbor. "Goodness!" exclaimed Marie, who reads the papers, "this must be Chicago."—R. H. L. in *Chicago Tribune*.

It is said Mussolini does not permit his barber to speak while attending him. But the guess of the *Kansas City Star* is the next customer gets an earful.—*New Orleans Daily States*.

In some cities pedestrians have a right to step into the street to hail a trolley car 200 feet away. But most of them have discretion enough not to do it.—*Cleveland Times*.

A "tyrant," in Greece, is any dictator who has contrived to stick on the job for more than three months.—*Vancouver (B. C.) Sun*.

The press is the greatest educational factor of the age.—But featuring "Peaches" Browning on the front page doesn't help to prove it.—*Edmonton (Alta.) Bulletin*.

Talk about the patience of Job—he never had to wait for a haircut, with six women ahead of him.—*Atlanta Journal*.

Ludlow-Set Pages

Make Your Advertising Space Worth More

When your ads and heads are set with bright, clear typelines, your advertisers are impressed with the unusual attractiveness of your paper.

Choice Ludlow faces for ads and heads on every page make your newspaper more effective as an advertising medium and increase the worth of your space. The high quality and uniformity with which Ludlow faces print insures every advertisement getting favorable attention from the reader.

With a suitable assortment of new and distinctive Ludlow faces always available in unlimited quantities, the compositor also is given an incentive to express his craftsmanship most effectively. The large size range, 6 point condensed to full-width 72-point cast in sluglines on your present machine after a slight alteration is made, will give variety in size at any time without mold or machine changes. No time is wasted in hunting for sorts or distributing used forms. The time saved goes into better typography.

Your display lines are the most valuable lines in your paper. By setting them on the Ludlow you can increase their attractiveness and also add a handsome profit to your paper.

Many of our present Subscribers told us before accepting our two months trial test, that they were not interested because they did not think their own system could be improved upon, and could not see how any service could eliminate requests, controversies, held-up accounts, etc. The fact that they continued the service after the test period proves that a practical demonstration is our most convincing argument.

UNIFORM MERCHANDISING HELP

TO make your Iowa appropriation produce greatest possible returns, every member of this group pledges the following definite help, in connection with any campaign using 5,000 or more lines in his paper:

1. Make a study of local market and trade territory, as pertains to *your* specific product.
2. Supply complete and accurate list of retailers, in the newspaper's city and surrounding territory.
3. Introduce your salesmen to a number of big retailers. Advise you as to relative sales standing of competing products.
4. Urge retailers to feature displays of nationally advertised products. Furnish you with names of stores that will make use of window displays.
5. Make market investigation for prospective advertisers. (Identity to be made known first.)

Circulation of these 28 dailies.....571,151
Number of families in Iowa.....550,000

Think what that means: More circulation than the number of families in the state.

Deal with this group as with one publication, if you wish: one order, one plate, one billing. Note merchandising help outlined below.

6. Urge local retailers to mention *your* products in their own advertisements.

7. Send, on receipt of contract, a multi-graphed letter to list of retailers in the territory, telling of the campaign.

THIS ALWAYS GOOD MARKET NOW EASIER TO COVER EFFECTIVELY

The cooperation of these 28 leading Iowa daily newspapers works for your advantage in many ways. But possible jobber connections are assured, as the leading jobbers of the state heartily endorse this plan.

Jobbers and dealers are quick to get behind a campaign in the Iowa daily newspapers. That is the advertising they understand. It brings *quick, tangible* results.

IOWA—WHERE EVERY FAMILY READS A DAILY NEWSPAPER

WHAT'S WHAT IN THE FEATURE FIELD

Cosmos First with Queen Marie Fashions—James Mills Makes Rapid Rise from Church Sexton to Writer—Congdon Joins World Syndicate's Sales Staff

A VOCIFEROUS blast was added to Queen Marie's puffing publicity calliope this week by Cosmos Newspaper Syndicate, New York, which claimed to be first in this country with sketches of the gowns chosen by Her Majesty from the couturiers of the Rue de la Paix, Rue de Rivoli and other Paris streets of fashion. It was the first real test of the Paris Fashion Board, created by the syndicate under the direction of Herbert S. Houston, president.

Sylvestre Dorian, formerly of the *Detroit Free Press*, now bedecked with the euphonious title of "Director of the Paris Fashion Board" managed to get sketches of 12 of the queenly creations on board the *Leviathan* with Marie, and the set was ready for publication in New York and other cities by Oct. 20.

Thirteen couturiers comprise the fashion board. They are: Agnes, Boulanger, Cheruit, Doeillet, Doucet, Drecol, Jenny, Lanvin, Lelong, Martial et Armand, Patou, Premet and Redfern.

A rapid rise from church sexton to syndicate writer is credited to James Mills, husband of the slain choir singer in the famous Hall-Mills murder case, by the Famous Features Syndicate, which this week announced "Dr. Hall, My Wife and I," a first person series by Mr. Mills.

George C. Congdon, lately with the Ludlow Typograph Company, has joined the sales staff of the syndicate department of the *New York World*, F. B. Knapp, manager, announced this week. Congdon was formerly on the editorial staff of the *Atlanta Constitution*.

"Sister O'Mine" by Violet Dare is the latest serial offering listed by the O'Dell Newspaper Service, New York. It is illustrated by Marguerite Neale.

Francis J. Tietsort, once with the *New York American*, and widely known as a writer on aviation, is preparing a series on air progress for the McClure Newspaper Syndicate, New York.

The *Spokane Woman* is syndicating "Weakly Wanderings" by Lucile Crites, which has been appearing in that weekly for the last year and a half.

"The Days of Finish Fights," by Joe Choynski has been purchased by the New York World Syndicate. It is offered for release Dec. 5.

W. H. Heine, for more than 18 years with World Color, and later with the Ledger Syndicate, Philadelphia, is now on the sales force of the McClure Newspaper Syndicate.

John Held, Jr., the Westport (Conn.) farmer who draws "O Margy!" for the United Features Syndicate, is a candidate for state representative in the 4th Connecticut district. Mr. Held is already a constable.

J. P. McEvoy, creator of "The Potters," is author of "God Loves Us," which had its premier on Broadway this week.

Murray Korman is responsible for "Poor Paddy" a new weekly comic strip which is being distributed by the Universal Feature Service, New York.

The 150th anniversary of Washington's historic ferry ride on the Delaware will be celebrated by the Yale University Press with a full page feature it is offering to newspapers for January publication.

LIBEL CONVICTION UPHeld

Newburgh Editor-Politician Failed to Support Change

The conviction of Charles F. McKenzie, editor of the *Newburgh* (N. Y.) *Plaindealer* of criminal libel, was unanimously affirmed by a decision of the Court of Appeals. McKenzie was an independent candidate for mayor of Newburgh in the mayoralty election of 1923, opposing Roy W. Spencer, Republican and John Rothery, Democratic candidates. The alleged libel was published November 5, the day before election and was contained in a special campaign edition of the *Plaindealer* and was distributed free to the voters.

The statement was to the effect that the *Plaindealer* was in possession of a sworn statement, "which, if true, would prevent any decent woman from speaking to Roy W. Spencer and no man would uphold him." The article stated that it would not be printed but Mr. Spencer or his attorney could see it by calling at his office. The maker of the statement later admitted he was mistaken as to Mr. Spencer being identified with the alleged story.

Spencer was elected and instituted the criminal prosecution of McKenzie, who was found guilty after a trial and fined \$250.

On the appeal to the highest court counsel for McKenzie sought to introduce in evidence articles attacking him in the *Newburgh News*, a daily supporting Spencer, as a justification for the alleged libel, although Spencer was not shown to have instigated them or had any knowledge of them. The refusal of the trial court to admit this testimony was the basis for the argument for reversal, which was not found sufficient by the Court of Appeals.

Try Them All!

and eventually you
will come to the

METROPOLITAN DRY MAT

At last there is an absolutely uniform and thoroughly reliable dry mat. The variation in thickness, shrinkage and printing qualities of other dry mats (earlier Wood mats not excepted) has been a thorn in the side of the stereotyper and has made prompt editions an uncertainty. The necessity for *closely packing* dry mats has caused the loss of more time than is saved by the elimination of steam tables.

Since the METROPOLITAN DRY MAT was introduced in February, 1925 by The Philadelphia Evening Bulletin (the first big plant to use dry mats exclusively) there has never been complaint made of it. Although now used exclusively by many of the largest plants in the country it has never once failed.

It is dependable, requires little packing, saves *all* time previously consumed by steam tables, and its plates print beautifully.

No matter what dry mat you are now using you will eventually come to the METROPOLITAN.

Costs a little more at the mill but is the cheapest dry mat at the Autoplate—and that's the point where dry mat cost should be figured.

WANTED—THE BEST

NEWSPAPER MAN AVAILABLE

"A GOOD PRESS AGENT"

(An Editorial from EDITOR & PUBLISHER
October 16, 1926)

SOME of our press agent friends say EDITOR & PUBLISHER is unjust in its attitude toward their business. We should announce that there are good and bad press agents and, to be constructive, should publish a definition of legitimate publicity work.

By all means, let criticism be constructive! Here, in our opinion, is what constitutes a good press agent: Through experience as a newspaper publisher or employee he understands newspaper methods and has liberal appreciation of newspaper ethics. He believes that a journalist who uses his power for selfish or unworthy purposes betrays his trust. Promotion of any private interest contrary to general welfare is dishonest journalism. News columns cannot be used to sell any article or service, or promote any private interest without violation of a fundamental principle. The reader looks to the news columns for truthful, sincere and wholly unprejudiced information, the product of writers who are responsible to the editor and no other person.

A good press agent will make available to reporters all the information they may seek, both favorable and unfavorable. He will hand out "news" which is authorized by his employer, subject to publication within "quotes" and with credit to a named official. Never will he stand as a shield between his employer and the inquiring reporter. When the good press agent's employer instructs him to induce a newspaper to publish an item which he, as a newspaper man, could not conscientiously hand to his city editor, or to get a news fact suppressed, he will point out that such an act would be subversive of impartial and independent news practice, and resign from the job if the employer insists.

Is this definition extreme? Is EDITOR & PUBLISHER "prejudiced" against the publicity craft? If so, the American Society of Newspaper Editors is extreme and prejudiced, for these rules of conduct are based upon the well-known "Canons of Journalism" of that responsible body.

To assist in my work, I have need for one or more of the best newspaper men available.

The accompanying editorial from Editor & Publisher sets forth some of the qualifications which applicants should possess.

In addition the men desired must be American citizens, college graduates, of sound judgment, and able to write good English with scrupulous regard for accuracy of fact and expression. They must be not more than thirty-five years old and possessed of general ability of a high order.

For the work in hand it is also desired that applicants be men who have lived and worked in the territory between the Allegheny Mountains and the Rocky Mountains.

111 Broadway
New York City

IVY LEE

What is the distinction between news and advertising?

News is that which the people are willing to pay to have brought to their attention; while advertising is that which the advertiser himself must pay to get to the people's attention.—

—From a brochure entitled "Publicity: Some of the Things It Is and Is Not."

CYRUS H. K. CURTIS SETS ADVERTISING'S TASK

It Is Service and Preparation of Copy, He Tells Guests of A. A. A. Luncheon to Publishers in Chicago

(By Telegraph to Editor & Publisher)

CHICAGO, Oct. 21.—If you were to ask Cyrus H. K. Curtis, president of the Curtis Publishing Company, the primary factors in the advertising business—the attributes which appeal to the publishers—he would tell you that it was “simply a matter of service and the preparation of copy.”

But then he would go on to tell you as he did 867 guests of the Western Council of the American Association of Advertising Agencies at the luncheon they gave to publishers at the La Salle Hotel here today that these factors were not so simple after all—that they had much to do with the \$320,000 business which James O'Shaughnessy, executive secretary of the organization, reported had been done by the 134 affiliated bodies during 1925.

Incidentally this volume of business was an increase of \$20,000,000 over the total for 1924 and \$70,000,000 in excess of that for 1923.

“Copy must have that indefinable something which cannot be expressed,” said Mr. Curtis. “A man tells me what he is going to put into an advertisement and I order him to write it. But when it comes back it is not the same thing. It has had a hair cut and shave.”

Then he told of John E. Powers, who wrote magic copy in Portland, Me., where they both were raised. Powers' copy drew the attention of John Wanamaker, who brought him to Philadelphia, where he wrote material which brought about the situation that “the women of Philadelphia wouldn't take a paper that did not have Wanamaker ads.”

“They had that indefinable something,” said Mr. Curtis.

“The space buyer should be the highest paid man in your organization, but he should be worth what you pay him,” he said. “I once heard Rabbi Wise make a talk in which he decried the poor pay of ministers, but a minister who was present got up shortly afterwards and said that they were overpaid, that the right man in the pulpit would not suffer financially. So it is with the space buyers.”

“That man—your space buyer—should be intelligent enough to put my papers on his list,” he said smiling.

In a sort of benediction, he told them the words of the colored preacher:

“Oh Lord, use me, use me in any way you can; even if only in an advisory capacity.”

Merrill C. Meigs, publisher of the *Chicago Herald-Examiner*, whom Toastmaster James W. Young, vice-president of the association, introduced as “Babe” Meigs, with the added information that there had not been “a good football team in Chicago since he quit playing,” complimented the advertising men for the innovations they were bringing about.

“You are simplifying the problems of the publisher by cutting down the reading matter in what you send us,” he said. “Then, too, there are fewer trick clauses in the requests made of us—the top and front page tricks are things of the past.”

“It is unnecessary for the publisher to welcome the advertising agents,” he said, after doing that very thing. “They are always welcome, except”—and he smiled, “perhaps not as much those times they do not put us on their lists. But then,” he added cheerfully, “we generally manage to get a foot in when we talk to them awhile.”

Roy S. Durstine, president of the association, said that it was such meetings as the audit bureau of circulations' two-day session, of which the gathering was a feature, that would “bring about more intelligent and economic advertising.”

The *Jersey Shore* (Pa.) *Herald* has added the full United Press leased wire service.

LUCIAN SWIFT DEAD

Lucian Swift, 78, former manager and at one time one of the owners of the *Minneapolis Journal*, died Oct. 14 after a short illness. Mr. Swift went to Minneapolis in 1876 as a surveyor. In 1885 Mr. Swift, with Alden J. Blethen and E. B. Haskell, purchased the *Evening Journal*. Mr. Swift sold his interests in Sept., 1908. He also acted as manager, secretary and treasurer of the *Journal* during this period.

IDEAS EXCHANGED BY MICHIGAN EDITORS

Managing Editors, Editorial Writers, Columnists, and Head of Woman's Page on Program of University Press Club Meeting This Week

(By Telegraph to Editor & Publisher)

ANN ARBOR, Oct. 21.—The value of exchange of working methods and theory among Michigan newspapers was the keynote of the round-table discussion which opened the eighth annual meeting of the University Press Club of Michigan at the University of Michigan union this afternoon.

A. R. Treanor, editor and manager of the *Saginaw News Courier* and president of the club, said that “the press profits most from honest and constructive criticism and that these annual conferences clarify many errors. Much tribute must be paid to Dr. Marion LeRoy Burton, late president of the University of Michigan, whose greatness we know of more and more. The Press Club was his aim, and he did more to establish the club on a basis of value than anyone else. He is generously missed by the members of the club. Its aims are to bring the university and the press into relationship of usefulness, increasing the appreciation of journalists, and for co-operation between newspaper workers and students.”

A. E. McRea, managing editor of the *Muskegon Chronicle*, declared that the managing editor is the goat on a newspaper and should bear the responsibility for everything, as he does. It is his duty to see that the various parts of a newspaper's editorial and mechanical forces are co-ordinated. Managing editors will be forever misunderstood, but very little of the criticism he receives from the readers is well directed, he said.

Lee M. Woodruff, editorial writer on the *Grand Rapids Press*, stated that editorial writers are no longer of the Henry Watterson type, but now merged with the paper and are “interpreting agents rather than oracles.” Mr. Woodruff advised that each newspaper invest about \$200 for a library with references on logic, history, political science and theology and science for its editorial work.

The columnists point of view was given by Burt C. Bradner, columnist of the *Detroit Free Press*, whose address was made highly entertaining by much keen humor.

Miss Florence Davies, women's editor of the *Detroit News*, spoke convincingly of the value of a women's page in a newspaper. Instead of regarding this feature as fill up, it should be considered important, she said. The material should not be entirely from syndicates, but should have an understanding woman in charge, so that there will be a personality back of this section of the paper.

George Hunter, suburban editor of the *Port Huron Times Herald*, explained how this paper has increased circulation by delivering its papers within a radius of 85 miles in the Thumb District of Michigan by motor truck. The news gathering organization which makes this circulation possible is directed by two young men stationed in centrally located cities.

A banquet was given for the visiting editors by university regents Thursday evening. Addresses were given by William A. Frayer, history instructor at the U. of M.; James O. Murfin, of Detroit, member of the Board of Regents of the University, and W. D. Henderson, of university faculty.

CLEVELAND MOFFETT DEAD

Author and Former Newspaper Man Was 63 Years Old

Cleveland Moffett, 63, an author and a former newspaper man, died in Paris on Oct. 14.

Mr. Moffett was a versatile writer, author of several plays and a dozen or more books dealing with a variety of subjects. He was a graduate of Yale, class of 1883. He was on the European staff of the *New York Herald* from 1887 to 1891, and was with the paper for an additional year in New York. After a year as foreign editor of the *New York Recorder*, he devoted the rest of his life to writing books, plays and magazine stories and articles, except for a brief period as Sunday editor of the *Herald*.

Among the titles of Mr. Moffett's books are “Real Detective Stories,” “A King in Rags,” “The Mysterious Card,” “The Conquest of America.” His plays included “Money Talks,” “Playing the Game” and “The Battle.”

Obituary

CHARLES H. HENRY, prominent realtor and former South Carolina newspaper publisher, died recently. One time half-owner of the *Spartanburg Herald*, in 1900 he founded the *Spartanburg Journal*, and sold it in 1913. Next he went to Atlanta with the *Georgian* as business manager.

CHARLES N. SAWYER, 68, long time newspaper man in northwestern Iowa, died Oct. 10 in Sioux Falls, Iowa. He

was a pioneer of the territory and had at various times been editor of the *Larchwood Leader*, the *Hull Index* and the *Lismore* (Minn.) *Leader*.

M. F. COCHRANE, editor of the *San Rafael* (Cal.) *Independent*, died recently.

HARRY UNCAPHER, 50, former cashier in the *Los Angeles Evening Herald*, circulation department, died recently after a lingering illness.

Miss MARY E. MCKAY, for 40 years a member of the *Boston Globe* editorial staff, died Oct. 10. She joined the *Globe* staff in December, 1887. William D. Sullivan, managing editor, was one of the honorary pallbearers and among active bearers were Anthony J. Philpo, Kenson E. Taylor, Frank J. Flynn and Willard F. DeLue of the *Globe*.

HARVEY LYNN DAVIS, 29, a former newspaperman of Altoona, Pa., died in a hospital at Portland, Ore., recently after a long illness. His widow and one son survive. Prior to his illness he was connected with the *Portland* (Ore.) *Journal*.

JUDGE JOHN EVANS McCOMB, 78, father of John E. McComb, Jr., assistant to the publisher of the *San Antonio Express*, died recently in San Antonio.

HOE SHIPMENTS

Recent shipments from the New York and Dunellen works of R. Hoe & Co. Inc., include a 16-page super-speed press unit and stereo machinery to the *Charlotte* (N. C.) *Observer*; a finishing, cooling and drying machine with other stereotyping machinery to the *Perth Amboy* (N. J.) *Evening News*, and another 16-page super-speed press unit to the *New Orleans Times-Picayune*.

After several years of investigation and experimentation, the Mergenthaler Linotype Company announces the introduction of a new newspaper body. The new Ionic is an exceptional face. The openness of the face—well ledged—and with a decided gain in the height of the letters—over the seven point faces. The first paper to adopt the new face was the *Evening News* of Newark, N. J. After a trial of several weeks, the management of the paper were enthusiastic. They never about it, and readers were quick to send in words of commendation. One of the most appreciative was Dr. Joseph H. Salov, a optometrist, and past president of the Jersey Optometric Association. Salov, addressing the editor of the *Evening News*: “It would be for me or any one else who has the amount of good that will result from your recent change in the style type you use in the makeup of the news if this is not recognized, appreciated and so acknowledged by every one in the collection of news. The eyes, due to the extremely small type used in many newspapers, the eyes strain the day when artificial aid must be

BETTER THAN GLASSES for your readers

Isn't it about time to give your subscribers a dress of type they can read easily and comfortably and save their eyesight?

The new Linotype 6½ Point Ionic No. 5 is a face especially designed to meet modern newspaper printing conditions. Its strong lines and sturdy serifs always reproduce clearly; its round, open counters will not clog up with ink. It gives the word count of 6 point with the legibility of 8 point.

Why the South's Prosperity

fourth—

CLIMATE

The climate of a state, country, or group of states is an influencing factor in its growth or development.

The South can partly trace its prosperity to its marvelous climate because not only is it highly conducive to agriculture but especially so to manufacturing. Southern winters are short and mild. Even in the mountainous districts the winter weather is not severe enough to curtail industry as frequently happens in the North and West. The Southern summer is more comfortable than in many Northern localities.

These favorable climatic conditions mean dollars to manufacturers. Heating costs are a negligible factor. Fuel supplies are not subjected to interruption by snow blocked railroads. Hydro-electric power is not shut down by frozen streams—outdoor operations are not delayed by cold and snow—living conditions are easier—and life much pleasanter.

With the realization of its vast natural resources—and its concentration on a programme of development and expansion, it is only natural that the South should prosper.

A great market has opened up for the national advertiser. To take advantage of it the newspapers listed below are ready to cooperate—they have all the available facts and will gladly send them on request.

SHOP TALK AT THIRTY

By MARLEN PEW

SPEAKING of "speed" in modern newspaper work the story of how some 25 years ago, we put on the press the detailed and lavishly illustrated account of a crime, hours before the crime had been committed, may be apropos and perhaps enlightening to youngsters of the day who confidently believe fast reporting is a late discovery. The stunt alluded to may have a duplicate in newspaper history, but if so, I have never encountered it in years of "shop talking" and will happily publish an account of it in this column if it lies in the experience of any reader.

NEWSPAPER men who are greying around the temples will readily recall "Dr." Richard C. Flower, the most audacious old scoundrel that ever sold patent medicines and fake mining stock to the eager American public. Venerable as a priest in appearance, with one of those pipe-organ voices that can break into a sob at any opportune moment, "Dr." Flower could gyp a widow out of her insurance money with a degree of tenderness that would leave her his uncompensated devotee for life. When he traveled in stately fashion in a private car to and fro across the continent thousands of miserable sufferers from incurable diseases waited upon him at every station and gave him all he asked (which was plenty) for his bottled nostrums, each one a fake, of course. Then, when the new century ushered in the get-rich-quick stock certificate method of exploitation, this patriarch of graft scented easy money in large wads and forthwith opened offices at 11 Broadway and hung up a golden sign bearing the refined enticement: "Lone Pine Mining Co., Richard C. Flower, fiscal agent."

THE Lone Pine Mining Co. proceeded to flood the country with direct-by-mail selling literature. To read its prospectus and continue to keep one's money in a savings bank at 6 per cent interest amounted to sheer lunacy. An estimated million dollars poured in upon the good "doctor" who, in turn, distributed one of the fanciest gold-embossed certificates of stock that had ever been seen at the time. The interesting fact that the Lone Pine mine was a hole in the Montana hills, long since abandoned by practical copper miners, seeped into the *New York Journal* news room by way of the office of attorneys representing the late Mrs. Phoebe Hearst, William R. Hearst's mother, then administering the mining properties of the Hearst Estate. The present writer was assigned to obtain the necessary evidence to warrant prosecution and present it to William Travers Jerome, then District Attorney. The trail was devious and far-flung, but in the course of time the venerable old fraud paid an unexpected visit to the Grand Jury and was released from the Tombs on the largest cash bail that had ever, at that time, been exacted by a New York judge. This bail, by the way, was ultimately forfeited and was found to have been posted by a widow whom the blessed old rascal had for years been defrauding.

IT WAS while "Dr." Flower was awaiting trial in New York county that the curious circumstance which is the subject of this tale occurred. At a meeting of the duped Lone Pine stockholders, held in Cooper Union Hall, a report was offered by a young lawyer stating that mining men still believed that copper would issue from the Montana hole in the ground and that what was needed was patient confidence on the part

of stockholders and a reorganized corporation. Faithful to their trust in the crooks, despite all we had printed on the subject, stockholders turned in their Lone Pine shares and received certificates in equal amounts in the Arizona Eastern and Montana Mining Company, Dr. Richard C. Flower, fiscal agent. To make this little hocus-pocus real George Edward Mills, the lawyer, whispered to a chosen few, that Dr. Flower would never be prosecuted since there was "a way of reaching the District Attorney." By good luck, more than management, the reporter learned of this threat or promise and informed Jerome who promptly called in Sergeant Nicholas Brindley, a detective under assignment to his office, and said: "Go with this reporter and give that lawyer all the opportunity he needs to bribe me."

FOR nearly a month Brindley cultivated the acquaintance of Mills who, by the way, was a man of some distinction, having once held a chair in Carlsyle University. Each day Brindley reported progress. Mills was determined in the cynical notion that every public official had his price, and he bargained closely with Brindley. It was his fixed opinion that \$2,500 was enough. That amount was finally agreed on and the day was set for the passing of the bribe. On Brindley's information, supported by frequent listenings-in on telephone conversations between the detective and the crooked lawyer, it was possible for the reporter to write a complete story of the trap. On a certain day Mills agreed to meet Brindley at noon at Hahn's cafe on Park Row and have the money with him in bills of large denomination. That morning the reporter wrote for the *Evening Journal* a "new lead" phrased in the past tense, describing the passing of the bribe. The story was put into type under an enormous headline and with pictures of all concerned was made up in a first-page extra and this form was put on a press, held subject to a run order. The reporter meanwhile took a stand behind a clump of cafe palms and saw Brindley and his victim eat a hurried lunch. Finally Mills took from his inside pocket a legal-size envelope and handed it to Brindley. Brindley opened it and permitted \$2,500 in bills to fall to the table. Standing and flashing his badge he told Mills he was under arrest and then called witnesses, some of whom, including a head-waiter, had seen Mills hand over the package. The reporter stepped over to Brindley and asked: "Is everything as was expected, Nick?" "Yes, go

ahead," he replied, and in a few seconds the press, down under Brooklyn Bridge, was running on an order which was flashed over a telephone held open at the cafe.

BRINDLEY took his prisoner down Park Row in the direction of Tombs Police Court. En route he surprised Mills by buying a copy of the *Evening Journal* containing a full account of the attempted bribery. At his trial Mills' counsel introduced this paper to support his plea that his client was a "victim of yellow journalism," but a jury sent Mills to Sing Sing for a long term. Dr. Flower jumped his bail and for years roamed this country and Canada in the garb of a priest. Ultimately he was captured in Philadelphia and he died in prison.

NEWSPAPER men who are familiar with the psychological processes of crafty and greedy crooks will be interested in a side incident in relation to Mills. When he came up for pleading, prior to his trial, he and the reporter had a frank conversation at the prisoner's bench. The lawyer said he felt that he was "in for it" and indicated a desire to turn state's evidence. When this was reported to Jerome the District Attorney said he would entertain a voluntary confession as he sought to indict others. The reporter saw Mills again. At this interview the lawyer cast aside all reserve in discussing his plight. He seemed about to confess when suddenly his face hardened and he said: "All life is a gamble and this is where I put my life and the affections of my family on the wheel. There is a chance that I can beat this charge in court. If so, I can live in luxury for the rest of my life. If I lose it will be equal to death. The chances against me are ten to one, but I'll take the chance; yes, I shall make the fight." When the jury found him guilty his aged father fainted in the courtroom. Mills turned angrily to the reporter and snarled, "Damn you, you did this!"

SIoux FALLS WOMEN EDIT CRIMELESS PRESS

Chicago Gang Feud, Called "Disgrace to City," Only Murder Story Used

—Fight Played on Page One

Banner lines were abolished and nearly all crime news censored or used on inside pages, when the *Sioux Falls Press* appeared Oct. 13 under the editorial direction of the Sioux Falls History Club, a woman's organization. It was the 100th annual edition of the History Club.

Stories of the Sharkey-Wills fight went on the first page, Mrs. R. L. Springer, managing editor for the day, explaining that the victory of Sharkey was bigger news than a victory for Will. If the negro had won she said, the story would have "played down" because the result would have been as expected.

The Chicago gangland feud was the only crime story to escape the wastebasket, but it was termed a "disgrace to any city" and banished to an inside page. The preceding day was a holiday, and there were no stock markets, but Mrs. Springer said that they would not have been printed because they were mere accounts of a "gambler's market." Other routine market news, however, was used.

TUNNEY HOST TO WRITERS

Gene Tunney, the heavyweight champion, was host at a dinner given Oct. 1 to the sports writers of Greater New York. Among the newspaper men attending were: Gene Fowler, King Features Syndicate, Inc.; Ed Van Every, Vincent Treanor, *New York Evening World*; Hype Igo and George Dale, *New York World*; Harry Cross, *New York Herald Tribune*; Jack Farrell and Harry Schumaker, *New York Daily News*, and Harry Newman, *New York Evening Post*.

NEW YORK STATE

Newspaper Publishers of the great Empire State—are you satisfied to tell the advertiser about your lineage gains only, when you have a real story for him?

New York State represents the greatest buying power in the world. Every city is a great market in itself, worthy of the utmost consideration of every national advertiser. Just think what a world of facts there is to offer the advertiser to influence him to use your newspaper.

If you are following the territorial campaign on New York State in EDITOR & PUBLISHER, which we prepare, observe how we portray the important facts that sell the New York State market.

We know your story, and we can sell your individual market and newspaper. Let us show you how.

HEARD AMONG INLAND MEMBERS

THE nimble young fingers of sweet girl graduates of the *Ludington* (Mich.) *News* are proving an asset to G. H. D. Sutherland, publisher. "High school girl graduates in the commercial department make rapid, accurate linotype operators," he said. "I start them as private secretary and ease them into the shop. One of these girls set eight columns of solid six-point in seven hours recently."

THE *Vincennes* (Ind.) *Sun* recently purchased a site for a new building and is now planning the erection of an up-to-date publishing plant.

A FARM EDITOR has been added to the staff of the *Denton* (Tex.) *Record-Chronicle*, particularly for its semi-weekly edition. Farm news and news about farmers will be featured.

GEORGE W. PURCELL, former publicity manager of the Indiana Press Association, who sold his paper, the *Vincennes Sun*, several months ago and announced his intention of moving to Long Beach, Cal., surprised his many friends by appearing in an active role in the convention and reassuring them that he is finding it difficult to get out of the midwest. He may yet decide to remain, he said.

ROYALTY visiting in America is arousing much enthusiasm but not more so than the "royal" table at Wednesday's luncheon when an array of notables of newspaperdom gathered around one board and enjoyed an impromptu roundtable. Verne Joy of Centralia, Ill., acting president of the Inland, dubbed the gathering "royal" when he saw around him Edward H. Butler, *Buffalo Evening News*, vice-president of the A. N. P. A.; Jerome D. Barnum, *Syracuse* (N. Y.) *Post-Standard*; Walter C. Johnson, general manager of the *Chattanooga News* and past president and chairman of the board of the Southern Newspaper Publishers Association; Harvey J. Kelly of Indianapolis; Wiley L. Morgan, general manager of the *Knoxville* (Tenn.) *Sentinel* and secretary-treasurer of the Southern Newspaper Publishers Association; and Herman Roe of the *Northfield* (Minn.) *News*, president of the National Editorial Association.

BREAKING the ice for the first time in two years of membership, Ray W. Hammond, vice-president and general manager of the Hammond Printing Co., Fremont, Neb., attended his first meeting and found inspiration in it. Henceforth he will attend meetings, he said, with an expression of regret for missing the four which he has been eligible to attend.

LINWOOD E. NOYES, publisher of the *Ironwood* (Mich.) *Globe*, received congratulations of his friends. He and Mrs. Noyes are parents of a son born recently. Linwood Noyes and his father, Frank E. Noyes of the *Marquette* (Wis.) *Eagle-Star*, always attend meetings of the Inland, and now their friends are looking forward to the day when three generations of the Noyes family will come together.

LOREN D. UPTON, business manager of the *Kewanee* (Ill.) *Star-Courier*, made his first visit at the meeting.

JENS K. GRONDAHL, editor and manager of the *Red Wing* (Minn.) *Republican*, was among the interested visitors. He takes prominent part in all of the activities in his section, but despite his interest has been unable for a long while to attend Inland meetings.

ARTHUR PFANDER, business manager of the *Battle Creek Enquirer-News*, attended without his publisher, A. L. Miller. With the meeting of the

Michigan State Dailies in Ann Arbor the last three days of the week, a number of Michigan editors had to miss one or the other of the meetings. A new radio broadcasting station is being installed by the *Enquirer-News*; it will broadcast over a radius of 150 miles.

UTAH ETHICS FORBID HIGH POLITICAL RATE

Surcharge on Such Advertising Might Be Held as Subsidy, State Editors Feel—A. F. Dunn Named President

Alex F. Dunn, editor of the *Tooele Transcript-Bulletin*, was elected president of the Utah State Press Association at the annual convention last week. He succeeds W. R. Holmes, Brigham City publisher. Other officers chosen were, Dr. M. Markus, *Richfield Reaper*, vice-president, and Mrs. Grace Cooper, *Price News-Advocate*, secretary-treasurer. Mrs. Cooper succeeds James H. Wallis.

A resolution was adopted to the effect that the rate for political advertisements should be the same as the rate usually charged for other paid advertising. It was pointed out that ethics demanded this, as a higher rate might easily be made to appear as a subsidy. Another resolution called upon the Government to give the work of printing return addresses on envelopes, at present done by the Government printing press, to local printers.

One of the principal speakers was Senator Reed Smoot of Utah, who paid a tribute to the press as a great civilizing influence. He urged the editors to use their great influence during the next few weeks in the direction of getting the voters out to the polls. Senator Smoot said another great work they could do would be to "sell" the State's scenic attractions to the people at home while metropolitan papers are carrying advertisements acquainting the world at large with the beauties of the State.

The association appointed a committee with Mr. Wallis as chairman to consider the question of appointing a paid secretary, manager or field representative for the Utah association, if the two Idaho associations of country publishers will join with them.

AD BUREAU MEETS

Contest on Promotion Copy Meets Favorable Response, Rogers Reports

CHICAGO, Oct. 20.—The Bureau of Advertising of the American Newspaper Publishers' Association held an executive session at local headquarters, in connection with A. B. C. Week. The response to the bureau's prize contest for the best piece of advertising copy telling the advantages of newspaper advertising has been very satisfactory, William F.

Rogers, advertising manager of the *Boston Transcript* and chairman of the committee in charge reported.

The members attended a luncheon at the Chicago Athletic Club following the session.

Besides Mr. Rogers, there were present, William A. Thomson, New York, director of the bureau; F. Guy Davis, Chicago manager; Walter Burn, Pacific Coast manager; Frank Burgess, *Lacrosse* (Wis.) *Tribune*; Allison Stone, *Providence* (R. I.) *Journal*; David Plum, *Troy* (N. Y.) *Record*; Charles Atkinson, *Atlanta Journal*, and E. W. Parsons, advertising manager of the *Chicago Tribune*.

INLAND COST REPORTS NOW ON MONEY BASIS

(Continued from page 7)

this appears to be a kind of mutual complex, the manufacturer feeling that he ought to look for business away from home and the newspaper feeling that the manufacturer is too far out-of-town to be a local advertiser and too close to the town to be a national advertiser.

"Newspapers that make surveys of their own markets should, in my judgment, be in fine position to approach all their local manufacturers and show them distinctly the opportunities which newspaper advertising offers to them. Furthermore, in addition to creating advertising for themselves, these newspapers should be able to do some fine missionary work for the cause of newspaper advertising in general.

"The newspaper that is in position to give an advertiser a complete picture of market conditions as suggested above, should have little difficulty in finding a good excuse to turn down a large percentage of the unreasonable stunts which some advertisers ask us to perform under the name of 'co-operation.'

"In other words, if we can show ad-

vertisers that we are concentrating our energies on the real constructive side of co-operation, we have a very logical reason for declining the circus performances.

"There is one other thought that would like to express on this question of service to advertisers and that whatever service you offer be sure make it a real one. Do not make it maximum of promise and a minimum performance.

"If we are to believe the stories told us by some national advertisers, we must accept as true the assertion that a lot of so-called newspaper service consists of enthusiastic conversation born of a desire to outdo a competitor. There is difference between rosy promises made the heat of a fight for business and delivering the goods of service during the practical routine of a busy day.

"Don't let's make this service for advertisers the football of competition and go into it because we believe we are thereby keeping our competitor from getting some advertising. An ounce of real help given to an advertiser wishes to get an honest return for his money is far better for all concerned than many tons of pleasant promises given in the hope of getting on a high note.

James O'Shaughnessy, secretary of the "Four A's," also spoke.

The meeting closed late Wednesday.

AIL REPORTER WHO CRASHED COUNCIL GATE

**Houston Post-Dispatch Man Yearned
to Know What Solons Did Behind
Closed Doors—Everybody Ar-
rested but Freed**

"Magnolia Park City Council held an executive session Monday night. I don't know what it was about—because they sent me to jail."

Thus wrote C. Curtis Munz, reporter for the *Houston Post-Dispatch*, under its by-line, following his resistance to efforts to prevent his presence at the executive session.

"My city editor sent me out to find out what they did at that council meeting. I figure we have several thousand readers who want to know what they did," continued the story of Munz, who was released on bond in time to write about two columns for Tuesday morning's city edition.

But Munz was not the only one arrested. City Attorney B. L. Palmer filed charges of assault against him. Munz himself filed similar charges against Mayor W. H. Wilson, Palmer and City Secretary Royal H. C. Shepherd. Palmer also filed charges of assault against City Marshal L. A. McCrory for striking M. Pooley, *Houston Press* reporter, who was with Munz.

When the trial of Mayor Wilson later came up in justice court it was testified that Wilson tried to close the door to the secretary's office and the reporter sought to prevent it. Both the mayor and Munz denied they intended to hurt each other. Wilson was found not guilty, whereupon charges against Palmer, Shepherd and Munz were dismissed. Similar action was taken in the case of Marshal McCrory when he exhibited receipt showing he had paid \$10 fine in Magnolia Park corporation court for assault.

Magnolia Park is a suburb of Houston, which its annexation has been voted into the "executive session" row.

EDITOR SHARP STIRS THINGS UP

(Continued from page 26)

Printer, reporter, city editor, assistant postmaster and Secretary of the Chamber of Commerce. Then came three years in California followed by a jump to the East where for a year he owned and published the *Edinboro* (Pa.) *Independent*. He couldn't kill the feeling for Oklahoma, however, and when he left Edinboro he landed again in Bartlesville. In the East, Sharp has labored from Springfield, Mass., to Key West and his wanderings in this country have been supplemented by three trips into Mexico.

Sharp happened to come to Florida because he couldn't stay out of the World War, as old as he was.

"In 1918 I was secretary of the Merchants Association at Bartlesville; the war was on and advertisements for recruits for the Quartermaster Corps made it appear that if another printer did not come to the rescue the cause of the United States and the Allies would be lost," is the way he explains it. "I had 300 invested in Liberty Bonds and was afraid if Germany won the war the bonds wouldn't be worth any more than Confederate money, and so I enlisted. As I was 43 years old the Quartermaster Corps was the only branch of the service I could enter. I got to Camp Johnston, at Jacksonville, in August. When the armistice came I decided to resign my job as room orderly in the office of Company No. 1, and so I disclosed to the top sergeant and the doctors at the base hospital that I was far-sighted, had a hernia, ingrowing toenails and a mean disposition and was discharged in December.

"That was a time of year when it was uncomfortable to stay in Florida. Having solved several years before never again to write copy I sought a job as a printer at when I had only \$5 left and no job, took a job with the *Palm Beach Post*.

"On the Post I was successively reporter, city editor, telegraph editor, editorial writer, development editor and managing editor—and every once in a while I was all of that simultaneously. Long a semi-invalid and always frail, it took five years of that work to build my health up to the point where I required a vacation and, during the vacation, having time to think of my own affairs instead of the public's and the Post's, I got the mad idea of establishing the *Everglades News*.

"About that time the Post was substituting one brand of line-casting machines for another and a three-year-old Model 14 Linotype was for sale. I gave a check for \$200 as the first payment and borrowed enough money to make the check good by the time it got back to West Palm Beach. With the rest of the money I had borrowed I made a payment on a Country Campbell press and some other stuff and got W. J. (Fingy) Conners, of Palm Beach and Buffalo, N. Y., to give me an old frame building at the canal bank at Canal Point his highway construction crew had abandoned. Thus the *Everglades News* was launched in March of 1924. The rest is history."

That's Sharp's viewpoint of it. The viewpoint of one who is familiar with the 'Glades and keeps in touch with the progress of the territory is that Sharp is writing history in every issue of the *News*. He is writing the history of that section week by week while events still are fresh, writing it in a form that will open the eyes of people who in later years examine the files of the *News* of today. When Sharp desires he can write in a manner that undoubtedly must cause the bearings of his typewriter to sizzle with the heat. Again the columns of the *News* will make the late lamented Dick Wick Hall's "Salome Sun, Where She Danced" resemble the rough draft of a Shakesperian tragedy.

Elinor Glyn claims there's an "It" which all movie actors should have but which only two or three possess. If there's an "It" in the atmosphere for lowly newspaper men to grab off, Sharp has already come into its possession for "It" permeates the *News*.

BOOSTING ST. LOUIS

Chamber and Municipal Campaign Executives in New Post

Guy V. Kenton, manager of the news bureau of the St. Louis Municipal Advertising Campaign, has resigned to become assistant to Walter B. Weisenburger, vice-president in charge of advertising and promotion of the National Bank of Commerce in St. Louis, and Tom Parry, formerly of the *St. Louis Post-Dispatch*, has succeeded him.

A. C. Mungenast, advertising manager of Greater St. Louis, the official publication of the St. Louis Chamber of Commerce, also has been made secretary of publicity of the Chamber. George Marklin, formerly of the St. Louis office of the Associated Press, has been made editor of Greater St. Louis.

Walter B. Weisenburger, vice-president of the National Bank of Commerce in St. Louis and in charge of the bank's advertising and promotion, has been made director of the fifth annual campaign of the Community Fund of St. Louis.

BILLBOARD LAW INVALID

The Texas Court of Criminal Appeals has held invalid Galveston's ordinance prohibiting billboards in certain areas of the city. In its ruling the court declared the law "without support in reason," and said that proof failed to show that safety, welfare, health or morals of the community were jeopardized by signs in question.

LONDON NEWSPAPER DEAL

The *London Morning Post* has acquired an important interest in a new company which has taken over the controlling interest in the *Financial News* and the *Argus Press*, one of London's largest printing plants. The arrangement will afford the *Morning Post* increased mechanical facilities, required by its rapidly growing circulation.

EMPLOYMENT holds steady in ILLINOIS

Employment in Illinois is continuing on the upgrade. As compared with recent years, aggregate factory employment in the state has been remarkably steady, and shows an increase of over 38,000 above a year ago. The farm implements factories, electrical apparatus, machinery, boot and shoe factories, brick kilns, drugs and chemicals, job printing, men's clothing, the meat packing plants—all these industries continue to add labor at good wages.

This is a good indication of continued good business in the state—that national advertisers should carefully consider as a present market for good advertising results. The papers listed below cover this great industrial state and enter the homes of the wage earners who are large consumers of the national brands. If you are not getting your share—let these papers help you.

MAGAZINE, TRADE PAPER AND AGENCY MEN FAVOR A. B. C. STATUS QUO

**Advertisers Adopt Conciliatory Attitude Toward Daily Newspaper Program—Business Papers Want
New Renewal Method**

CHICAGO, Oct. 21.—Firm resolve to maintain "the fundamental principles of the A. B. C. was evidenced in the meeting of the advertiser's section, but the members were equally firm in suppressing any discussion that might be regarded distastefully by newspapers. Although the meeting was, as are all the sectional meetings, an executive session, a representative of EDITOR & PUBLISHER was permitted to hear the discussions and to observe the feeling of harmonious co-operation at the meeting.

The sense of the resolution providing for the retention of control by the advertisers was not in opposition to changes, provided the balance was maintained on the board and that no changes were made limiting the authority of the board of directors directly or indirectly.

When the question bobbed up a few minutes later regarding advertisers' feelings regarding morning-evening paper rate combinations, members squashed it vigorously.

"Leave that for the Association of National Advertisers," said a member.

Another member declared the newspapers would resent any action on combinations as an attempt to dictate their methods of business and that it was understood the matter of combinations would be taken up in at least one address at the A. N. A. convention.

Fred R. Davis, of the General Electric Company, presided and W. K. Towers of the Paige-Detroit Motor Company was secretary. Sitting close to chairman Davis was president Harn, a director from the Advertiser division, and he took a spirited part in the discussions.

The members greeted warmly the addition to their list of nominees of Edward T. Hall of the Ralston-Purina Company, St. Louis, president of the Association of National Advertisers.

He was offered in nomination to succeed W. S. Ashby, resigned. Ralph Starr Butler had been seated as a director the night before replacing E. E. Taylor, resigned, and thus, while one day on the board, was presented as a renomination. O. C. Harn, J. Murray Gibbon and L. L. King also were renominated.

A resolution was passed opposing any reduction in dues "at this time," and another, approving the action of the board of directors in the distribution of the excess of accumulated reserve. Regarding distributions of this kind, the section took the stand that there must be no reduction in the reserve beyond a sum established by qualified accountants, which may be equal to the liabilities of the bureau.

Separation of bulk sales figures from total net paid was asked for. The members suggested a change in the auditors report forms to eliminate the words "total net paid (including bulk)," leaving the total net paid to represent the total figure with the bulk sales average shown immediately below it but not added in to make a new total.

Chairman Davis explained a method of competitive analysis employed to determine the merit of an advertising

medium. Qualitative and quantitative surveys are undertaken on a percentage system the field of each publication is studied in relation to the article to be offered, editorial policies are examined as to their soundness and appeal, 25 per cent is given to mechanical features such as readability, uniformity, margins, printing and make-up, and a small percentage is given for rates.

Ten per cent is given for the A. B. C. figure and five per cent on the good reports of checkups.

The Farm Paper Division presided over by B. Kirk Rankin of the *Southern Agriculturalist*, Nashville, Tenn., attempted to throw light on the relative value of circulation figures separating or combining subscribers in towns of 1,000 or less with rural subscribers. It was felt that there was not enough uniformity in the postal system in various localities to make figures authoritative.

The division gave its endorsement to its director whose term expires, Marco Morrow of the Capper Farm Press, by renominating him.

Settling down to work in an earnest and enthusiastic fashion the business papers division of the Audit Bureau of Circulations first voted to ask the directors of their group to work out a standardized method of determining renewal percentages, to be applied to all members.

Paragraph 10 of the A. B. C. statement, it was held, should show circulation distribution by states, not for the bulk circulation but only for individual subscribers and news dealers.

The suggestion was also offered that the use of the word "salesman" instead of "canvassers" should be inaugurated in the A. B. C. statement.

In order that each member may have a program to study before the meeting hereafter the group passed a measure asking the A. B. C. to send them one in advance.

In another resolution, the business paper directors were asked to work out a method of showing the sources of subscriptions in a manner similar to the first page of the A. B. C. statement so that pages 2 and 3 will be as informative to advertisers as the initial one is. After approving the idea of printing rate cards on the A. B. C. statements the group went on record as opposed to the distribution of the A. B. C. surplus on the ground that there is no surplus over obligations and such action would mean that the bureau would be insolvent. The present rules and regulations regarding the machinery for changing the by-laws is to be left as it is, it was decided.

Mason Britton of McGraw-Hill Publishing Company, Inc., New York, was renominated as director.

The magazine section confined itself to the discussion of trade and technical problems of the magazine field. The members nominated F. W. Stone, *American Review of Reviews*, New York, as director to succeed himself. S. R. Lashaw, Butterick Publishing Company, New York, is the other director. His term does not expire.

Ernest R. Mitchell, of Mitchell-Faust Advertising Company, Chicago, was renominated a director at a meeting of the advertising agency divisional meeting.

The session was the largest divisional meeting ever held by the group being attended by 89 of the 130 members in person or by proxy. It was presided over by Walter A. Hine, president of Frank Seaman, Inc., N. Y.

The board of directors of the division passed a resolution in which they indicated that they were in sympathy with any changes in the functioning of the Audit Bureau of Circulations making for greater efficiency, but no such innovations having been presented, the constitution and by-laws were left intact.

STORE SEEKS INJUNCTION

**Would Force Lansing Paper To Print
Cut-Rate Battery Copy**

Seeking an injunction to force the *Lansing (Mich.) State Journal* to accept its advertising copy, the Collier & Lee Auto Supply Company has filed a bill of complaint in Ingham circuit court, alleging that such advertising is essential to the firm's successful disposal of a certain stock of radio batteries. Judge Leland W. Carr ordered the *State Journal* Company, publishers of the *State Journal*, to appear Oct. 21 in court to show cause why the injunction should not issue.

The hearing was postponed to permit investigation of precedent.

In its bill of complaint, the store cites the fact that it has a contract with the *State Journal* for advertising, that the publication named has the widest circulation of any paper in Ingham county, and

that access to its columns is necessary to prevent "irreparable loss and injury" to the plaintiff concern. It is charged the advertising matter was accepted under contract for some six months, but that Oct. 8 and again on Oct. 12, copy was refused because of objection voiced by the paper's management to the price which the company wished to sell its batteries, which are of a well-known make.

It is further claimed that a precedent advertisement of the same commodity at the same price was carried and that success attending that advertisement's appearance prompted the concern to lay a larger stock of batteries to be sold at the same price and advertised, under contract, in the defendant's newspaper. The injunction is asked on the ground that the paper's refusal to accept advertising copy was "arbitrary, unjust and unreasonable," and that great loss will follow unless court action for acceptance of the advertisement.

A paper with the people

The public decides the progress of a newspaper.

The continuous rising circulation of the New York Evening Graphic vividly demonstrates popular acceptance of this newspaper as a medium of unusual reader interest.

Advertisers daily realize the benefit of this power through achieved results from the advertising columns of the New York Evening Graphic.

With a constantly increasing circulation, plus a constant growth in advertising lineage, the New York Evening Graphic offers the advertiser an extremely profitable opportunity.

WHEN QUEEN WRITES FOR THE PRESS

(Continued from page 11)

American officials saw for the first time Marie of the Rumania—granddaughter of Queen Victoria, grandmother of the errant Prince Carol's more or less royal children and "mother-in-law of the Balkans."

Here was the Queen who had talked and written herself into more space in the newspapers of the United States than any ruling monarch left tottering in Europe, and face to face with her was the most powerful battery of supposedly arboiled writers, headed by New York's famous ship news squad, ever ordered to Quarantine by this country's doctors.

And when this so-called interview was all over in eight minutes, it was Queen Marie on C deck in the old game of royalty and the public.

From a purely newspaper point of view there were three outstanding features of the meeting of press en masse held back by hefty stewards with a red rope and the Queen flanked by officials arrayed in a variety of dress ranging from white pants to yards of gold braid.

First came Queen Marie's appeal to the American press for fair treatment, and it was a plea voiced with deep feeling, in a rather pathetic way which had more of the woman and less of the Queen in it than anything Her Majesty said on the Leviathan.

Next came the stupidest question that has been asked in New York harbor in years. When the Queen had told the gathering how glad she was to be here, that she had taken us to her heart and wanted us to take her ditto, etc., etc., Captain Hartley picked out to question Her Majesty one of the "ship news boys," as he introduced them, but "ship news-boys" as one New York paper's proof-oom had it. This boy, a ship news veteran with a great reputation as an interviewer, said not a word, although he had announced beforehand in the privacy of the press that he had just one question to ask. His alibi, given later, was that he was sick, but the charge was made that the cat which can look at a queen had got his tongue.

His failure to respond to Captain Hartley's invitation opened the way to some unknown woman reporter's asking, "Your Majesty, what do you think of the New York skyline?" That was Queen Marie's first introduction on American soil, or rather water, to the intelligence of the American press. With the Leviathan still anchored at Quarantine and with Manhattan five miles away in fog and rain, it was impossible even for Her Majesty to save the questioner's face.

Then came the episode which made the third outstanding feature of the interview. Although it had been announced that political subjects were barred from the interview, there came a voice from the wilderness of the press: "I represent Jewish newspaper and would like to learn your government's attitude toward the Jews of Rumania."

Europe's cleverest woman politician was not at a loss for an answer. Instead of calling this indirect question out of bounds and before any official could

register an objection, Her Majesty was settling the matter skilfully.

Later it was learned that the voice belonged to Zvi H. Rubinstein, city editor of the *Day*, a Yiddish newspaper, and the same voice even called up various New York newspapers to say: "I'm the man who asked that question about the Jews. I just want to say I'm perfectly pleased with her answer. The policy in Rumania is much better than it was. That's all. Thank you."

The press deputation that greeted Her Majesty on the Leviathan had the largest number of women that ever went down the bay to meet celebrity, royal or common. In their stories the women reporters confined themselves largely to the apparel and personality of the Queen, also of Princess Ileana and of Prince Nicholas. And some of New York's star women writers were quite catty—perhaps because the men unanimously voted her "some Queen." One woman writer even went to such bitter absurdity as to say that Her Majesty was "quite the most colorless person I ever met."

But the big story of the Queen in the New York papers was written by men except in one case—Imogen Stanley wrote the leading story for the *Daily News*. The *Daily Mirror* played up Micheline Keating's write-up of the Queen's impromptu interview on the Macom.

Among the women who helped the men to cover the Queen on the Leviathan were Dorothy Dayton Jones, *New York Sun*; Jane Dixon, *New York Telegram*; Emma Bugbee, *New York Herald Tribune*; Evelyn Boone, *New York American*; Irene Kuhn, *Daily Mirror*, and Charlotte McLevidge, *Chicago Daily News*.

CANTON NEWS SUED

Louis Mazer, indicted for the murder of Don Mellett, publisher of the *Canton Daily News*, filed suit Oct. 15 against the Daily News Publishing Company for \$50,000 damages for alleged prejudicial statements published by the newspaper against him.

KERMATH NOW WITH TABLOID

George F. Kermath, formerly manager of the *New York Evening Telegram's* real estate department, has been appointed real estate editor of the *New York Daily Mirror*. He assumed his new duties Oct. 18.

STARBUCK HEADS BADGER A. P.

Wisconsin Associated Press editors in annual meeting recently at Janesville elected Frank R. Starbuck, *Racine Journal-News*, as president, and received the report of William T. Evjue, editor of the *Madison Capital Times* and Wisconsin member of the A. P. advisory board. Edgar T. Cutter, superintendent of the central division, heard suggestions for improvement of the service. He advised leased wire papers to install a secondary wire.

GASKELL RESIGNS

Vice-President in Charge of Intertype Production Announces No Plans

C. W. Gaskell, vice-president of the Intertype Corporation in charge of manufacturing, recently tendered his resignation to the board of directors, to take effect Nov. 1. He has not yet made any definite plans for the future, but it is known that he has several connections under consideration.

C. W. GASKELL

During Mr. Gaskell's administration, the Corporation has made marked progress both financially and in the design and production of typesetting machines.

H. R. Swartz, chairman of the board, said: "Mr. Gaskell joined the Intertype Corporation nearly nine years ago, and has been a very important factor in the rapid growth of the company. Although his foresight and sound judgment have been invaluable, his ability to handle men stands out as most prominent. He created a spirit of loyalty to himself and the product that was unusual. His resignation will cause regret to his many friends within and without the organization."

KANSAS CITY WEEKLIES UNITE

The *Kansas City Tribune*, weekly, has been purchased by Garrett L. Smalley, publisher of the *Kansas City News-Press*. The two papers will be issued from the News-Press plant, the Tribune on Fridays and the News-Press on Tuesday. Robert W. Bassett, formerly of the *Cleveland (O.) Plain Dealer*, was named manager of the Tribune. Mr. Smalley purchased the News-Press with A. H.

Tucker in 1920. Five years later he became full owner. Before coming to Kansas City Mr. Smalley was advertising manager of the *Muskogee (Okla.) Times-Democrat* for six years and connected with the Critchfield Advertising Agency of Chicago for several years. He was on the *Kansas City Journal* advertising staff before buying the News-Press.

KLAMATH FALLS HERALD SOLD

Bruce Dennis, one of the best known Oregon newspaper men, has bought the *Klamath Falls Evening Herald* from E. J. Murray, its publisher for ten years. Mr. Dennis formerly published the *La Grande Observer* and the *Baker Herald*. After selling these newspapers he was engaged as industrial representative of the Portland Chamber of Commerce. Mr. Murray expects to make his home in California, but otherwise his plans are not announced. The price paid for the Herald was not made public.

ARGENTINA Bought from the U. S. A. \$3,365,143 worth of HOSIERY in 1925 LA PRENSA of Buenos Aires

has a sworn average net circulation of 236,065 on week days and 296,442 on Sundays, the largest newspaper circulation in South America. Your advertisement in LA PRENSA will reach an intelligent, responsive audience in the wealthiest, per capita, country in the world.

A booklet on "Argentina as a Market for American Products" will be sent free on request to those interested.

OUR OWN WORLD OF LETTERS

By JAMES MELVIN LEE

E. W. HOWE, when he was running the *Atchison Globe*, knew human folk—their foibles and their follies. He had a passion for printing items that stirred the people to action. Anything that would arouse a controversy appealed to him. The controversy might be over so trivial a thing as how old a baby should be before it is spanked. He would set the ball rolling with a little item and then his women readers would pick it up and push it along for several columns of type.

The editor of the *American Mercury* seems to have adopted Howe's editorial policy in this matter. He, too, likes to start something and he is not very particular what subject furnishes the material. In the November issue he prints from the pen of Hugh Kent a controversial article which thus spans the press of New York:

The big New York newspapers, because of their size, seem to print everything they can get hold of. There are so many pages to fill and such a variety of tastes to appeal to that the job becomes like laying bricks for a skyscraper. The result is a perfectly colorless, dull and stupid product. About the only time they serve up anything with vitality and color in it is when the news is fool-proof. A man dies and leaves a will reading: "I leave to my wife Sarah, who has continually nagged me for twenty-five years, the sum of one dollar, with which she can buy a good rope and hang herself. The rest I bequeath to the Bide-A-Wee Home for Tomcats." That's amusing and all the papers print it. But the late harassed husband did the whole story himself, even to the writing. If enough persons with senses of humor don't clown, New Yorkers next day have to wade through a paper with as little piquancy as a dairy lunch.

News writing in the town is standardized to boredom. It is bromidic, hackneyed and mechanical, save on the big stories to which the most talented men on the staffs are assigned. Even then it often runs along in ruts. Many of the stories carried on the first page might be written by boys of twelve. You always know about what the speakers will say and how the headline-writer will caption the story.

If the newspapers of New York will only pick up this ball and roll it along a little in their columns, they will give the *American Mercury* a lot of free advertising which should result in an increased subscription list.

MORE magazine articles about present-day press tendencies come from the editorial rooms of the *New York World* than possibly from any other newspaper. Charles Merz, who is connected with the *World*, prints in the *Century Magazine* for November a story giving a summary of the changes in a quarter of a century under the head of "The American Press." It shows that newspaper styles have changed like fashions in fiction.

Mr. Merz begins his story with an account of how the Battle of Waterloo was handled by the *London Times*:

When Wellington smashed the armies of Napoleon Bonaparte the *London Times* took the news calmly and printed it without a headline. Down in the last column of the first page, under an advertisement headed, "Education—Ladies' School," began the first printed story of the battle of Waterloo as quietly as an uncle writing to his niece.

How the modern metropolitan paper

would cover a similar battle is described as follows:

With a new Waterloo to report, there would be headlines in our own press high enough and black enough to shout their news a city block. There would be bulletins flashed from the scene of battle, to accompany photographs of troop movements sent by telegraph. There would be eye-witness stories sent by cable and eye-witness stories sent by wireless, bulletins of Napoleon's arrival in Nivelles almost before he got there and a column of speculation on the woman's page as to how Maria-Louisa took the news.

Mr. Merz mentions the press changes that have taken place since 1815 in general and since 1900 in particular. He is speaking of the first quarter of the present century when he says:

No previous quarter-century since the original discovery of the art of printing has done so much as this last quarter-century to revolutionize the mechanics of newspaper publication. It is not only that new equipment such as the phototelegraph has been developed, and that enormous progress has been made in adapting such devices as electric-telegraphic typewriters and high-speed octuple rotary presses to the fine requirements of printing giant editions between midnight and early morning; but in addition, the whole business of gathering the world's news in a hurry and bringing it within reach of the hungry presses has been put upon a new and modern basis.

Mr. Merz then traces the reorganization of the Associated Press, mentions the development of the United Press and gives many facts about the increase in size of newspapers. He thus dramatizes his facts about the stories that went out from Dayton:

When Bryan and Darrow fought over John T. Scopes at Dayton, Tennessee, that small village was actually the shipping-point for two million words of telegraphic news within ten days—the equivalent of two full volumes of the *Encyclopaedia Britannica*.

To show that this same quarter of a century was an era of "absorptions," Mr. Merz prints the following:

Witness New York, where Mr. Munsey bought paper after paper, only to destroy the identity of each latest acquisition by merging it into a new combination. Witness Chicago, where the Record swallowed the Herald, and then Mr. Hearst ate both. Witness Cleveland, which at the beginning of this quarter-century had three standard morning dailies, and now has only one. Witness Philadelphia, where nothing is left of the Times, the Press, the Telegraph, the North American, except empty names.

What has happened in these cities is only typical of what has happened in the country as a whole. It is one of the striking but little known facts about contemporary journalism that while the size, the income, and the circulation of the press have all increased enormously in the last quarter-century, in numbers the press has just about stood still.

The growth of "strings" is then taken up. The figures collected by Arthur T. Robb of EDITOR & PUBLISHER for the American press as of January 1, 1924, are analyzed but the results need not be set forth in "Our Own World of Letters" because the survey for that year and for later ones have appeared in de-

tail in EDITOR & PUBLISHER. The lay public is doubtless unaware of the tremendous growth of "strings" since 1900. Mr. Merz, however, does print this note of caution:

To say that we are on the verge of a "press monopoly" is to overstate the case. But not to recognize the amazing growth of newspaper chains in recent years is to overlook one of the chief characteristics of the press since 1900. Like the merger, chain ownership tends toward centralization of control.

The sudden expansion in "syndicates" and the extensive use of "boiler-plate"—a word that is explained to the lay reader—next receive attention with some comment about "patent insides." The situation is summed up in the assertion that "ideas are crated and shipped F. O. B. in cargo lots." The effect of the wide use of syndicated material—"rubber-stamped from one end of the country to the other"—is not overlooked so far as they exert a tug and a pull on the newspaper page:

Circulations increase; it is more to the interest of the publisher to keep his news unprejudiced, lest, by coloring it with a partisan point of view, he scare off readers. The Associated Press, for instance, is a non-partisan organization with both Republican and Democratic clients. It must furnish both Republican and Democratic news. There was a howl from the Republican papers, in the last presidential campaign, because the Associated Press was furnishing more Democratic news than Republican news. Mr. Davis was making speeches, Mr. Coolidge was not. Huge circulations and syndicate methods make for non-partisanship, as far as news itself is concerned. But huge circulations also breed timidity on editorial pages. For the theory is, why tread on anybody's toes?

The story about the summary of changes in American journalism is thus concluded with a paragraph about 1900 and another about 1926:

1900—McKinley was president, the New York Times printed a thin paper of twelve pages, radio dispatches were unheard of, Mr. Hearst had not yet bought his first paper in the Middle West, bicycles were in vogue, news by cable came in nuggets, somebody was just organizing the Associated Press.

1926—there have been changes enough for any quarter-century, and among them these: a press more centrally controlled, more informative, more machine-made, more a necessary adjunct of the business of keeping pace with

life, and much stronger in its striking-power, both for good and bad.

Progress has been so rapid that even members of the working press need to be reminded of the changes, told of the dangers, and cautioned about their ethics. Consequently this article should have an extensive reading before it finds a final resting place in the newspaper morgue.

* * *

GOOD goods in a small container is just the phrase to describe the pamphlet "Development of the Cartoon" by Clifford K. Berryman, cartoonist on the *Washington Evening Star*. It is published by the School of Journalism of the University of Missouri at Columbia. Readers of the EDITOR & PUBLISHER can doubtless get a copy if they write or newspaper stationery to Walter Williams, Dean of the School of Journalism. Mr. Berryman has been a cartoonist at Washington for more than thirty years, first on the *Post* and now on the *Evening*

He is also president of the Grid-Club. Development of the Cartoon" opens with a historical sketch that shows care-research on the part of Mr. Berry- One of the results of his researches given as follows:

found, too, that our respectable ancestors not the least notion of what we call decency. lay aside from the mass the obsolete and improper, there are not so many startling and a few of them tell their own story ly and pointedly. such of the ancients differed from ourselves ther particulars, they certainly laughed at another, just as we do, for precisely the reasons, and employed every art and device implement of ridicule which is known to us. is India which first arrests, and longest bs, our interest in antique cartooning. e, the fruitful mother of tradition—the ce of almost all the rites, beliefs and ob- nances of ancient nations; her brazen images combined forms show partly men, partly als. Surely it is possible that some of the e-makers may have been inspired, partly sence of the ridiculous, as well as partly eligion.

subject matter for the cartoonist was same in ancient Egypt as in gay nam. An illustration from the Egyp- art is "Servants Carrying Master ne From Banquet." The original is the Egyptian collection belonging to New York Historical Society. Mr. ryman is speaking of Egyptian cars- when he makes the remark, "It is nge to find cartoons in a tomb, but it ns as if death and funerals and ves, with their elaborate parapherna- were provocative of mirthful delinea-

f Grecian art which aimed to amuse, Berryman speaks as follows:

omic artists and cartoonists were not wanting Athens. Strange to say, it was the gods goddesses whom the caricaturists of Greece, ell as the comic writers, chiefly selected for ule. But all their works have perished, pting a few specimens preserved upon ry.

a Rome the Christians were the car- rist's special delight. Previous to 1720 cartoonist had a propensity to render objects of his satire odious to the id, not because they were immoral in r private life but because they held places under the government and sibly needed the chastisement of the cil.

he booklet must be seen to be appre- ed. It is quite impossible to show Hogarth made good his boast that could draw a sergeant carrying his , entering an ale-house, followed by dog—all in three strokes—without ac- ly reproducing the cartoon. Especial- valuable is the account of the begin- gs of "wordless journalism" in Ameri- Cartoons of Washington present him an entirely different light from that d on the pages of accepted school ories.

he influence of the cartoonist is ched in the words that follow:

here is nothing in our modern life so alarm- as the power which reckless and dissolute it has to make virtuous life seem provincial ridiculous, vicious life graceful and metro- n. The cartoonists' pencil cannot, however, at a good measure. Caricature is powerless nt an administration that is honest and com- nt. Powerless against a public official who his duty in his place. It is curious to also that cartoons and caricatures on the ing side of great public questions are never lent.

While "The Development of the Car- " will have its greatest appeal among members of the art staff on the paper, will amuse and entertain all members he staff, including the printer's devil

in the back office who not infrequently tries his hand on the editor's copy paper.

FRED W. ALLSOPP of the editorial staff of the *Arkansas Gazette* of Little Rock has published in a special pamphlet his "Rhymes of the Press." The verses found in this pamphlet were mentioned in "Our Own World of Letters" when Mr. Allsopp published his larger volumes from which the pamphlet is taken.

A BOOK containing current reviews of books is announced for early publi- cation by Henry Holt & Co. It will be edited by Lewis Worthington Smith, professor of English and Comparative Lit- erature at Drake University and author of "The Sky Line in English Litera- ture." The volume will receive addition- al comment upon publication.

IN A recent volume of the Home Uni- versity Library Series, Sir Charles Higham discusses "Advertising—Its Use and Abuse" (Williams & Norgate, Ltd., London, England). The volume ad- dresses itself to the lay reader rather than to professional advertising men. It opens with a general and historical sur- vey, talks about the advertising genius, has a chapter on commercial art, dis- cusses morality in advertising, classifies advertising media, mentions the influence of the dealer and concludes with some re- marks on civic advertising.

The author believes that French ad- vertising in general is inferior to Eng- lish, but that American advertising is in many ways superior to both. After men- tioning this fact he thus speaks about the direct influence of newspaper and maga- zine advertising:

In short, that country in which the newspapers and magazines with large circulations do most to promote an interest in dress by clever ad- vertising produces the greatest number of well-dressed women, whether the sum of money they spend on their clothes is large or small. The shopping announcements in every paper have had a widespread, educational influence which has revolutionized sartorial taste. And who is to say how far this democratization of beauty has affected morals as well as manners, and made for the greater refinement of speech, movement and feeling in classes that were once boorish and crude.

A little farther along in his general survey of advertising the author com- ments as follows about nationally adver- tised goods:

Although we cannot say that all unadvertised goods are fraudulent, it is a fact that none of the national advertisers sell goods that are below the standard they claim for them, more often than not they are better; while what is shoddy or adulterated is seldom advertised extensively, for if it were, either the sales would cease, or costly improvements would have to be made in the process of manufacture.

In his discussion of the little news sheets, technically called corantos, which were the precursors of modern newspa- pers, the author is not so sure of his facts and makes a number of slips which show that he has not followed recent re- search in the early history of the press. He is also in error about the appearance of the first trade advertisement. But from Addison and Steele's day on, the author is much more accurate.

Sir Charles Higham, as has been pointed out, writes this volume for the general public. On the whole he presents a comprehensive view of the general field of advertising. For the American adver- tising man the volume has some practical value, in that it shows the subject from the point of view of Great Britain. A timely section deals with the advertise- ments of political parties. It shows that the same conditions obtain in England as in America. The section on civic adver- tising is one of the best chapters in the volume.

The Home University Library of Mod- ern Knowledge is edited by Professor Gilbert Murray of Oxford University, Professor J. Arthur Thomson of Aber- deen, and Professor W. T. Brewster of Columbia University—not New York, as is stated on the jacket of the book.

WILLIAM PRESTON BEAZELL, who sits at the right hand of Her- bert Bayard Swope on the *New York World*, except when he goes up to the Pulitzer School to teach what he practices, chats in *The Quill* for September about "Those First Two Years." P. S. *The Quill* does not come from Green- wich Village but from Detroit, Mich., where it is edited and published in the interest of Sigma Delta Chi, a profes- sional journalistic fraternity.

Mr. Beazell implies that his first year on the *Pittsburgh Leader* was his hard- est. He pays the *Leader* a distinct com- pliment when he says he has never known a paper that was more wholly the achievement of its reporters and "re- flected the love we bore our craft." He does not review the history of his news- paper life, but he does give in some de- tail the story of his first two years, be- cause "they, or their present-day equiva- lent, are what every 'prentice newspaper- man ought to have."

Here is what Mr. Beazell thinks should

receive special attention during those critical years:

In his first two years, especially, the news- paper man ought to be concerned about his style. There is small place for *fine* writing on a news- paper, but there is no place for anything but good writing, and there is all too little good writing on them.

He ought, no less, to make it his second nature to regard every fact as a holy thing. An accurate story, though poorly written, is infinitely to be preferred to an inaccurate story, however brilliantly written. Carelessness and indifference are the shadows that hang over every newspaper office, and I know of no surer commendation a newcomer may offer than demonstration that neither weakness is his.

The article contains other practical ad- vice for the cub on the paper and for the student in the school from one who is both a teacher and a practitioner.

"ON THE AIR," by Graham McNa- mee, former St. Paul newspaper man and now one of the best known radio announcers in America, has been published by Harper & Bros. The book is written in collaboration with Robert Gordon Anderson.

FIND COMPOSING ROOM MEN NEAR SIGHTED

Milwaukee Journal Conducts an Optical Survey of Employees—Work of Some Is Changed as One Result—Some Remarkable Discoveries

With a view to obtaining mutual betterment—greater comfort for the employees and increased efficiency for the office—the *Milwaukee Journal* has permitted a local optical company to conduct an optical survey among the Journal employees. C. W. Morris, M. A., a graduate of Ohio State University in the department of applied optics, conducted the survey, with headquarters in the first aid hospital of the Journal building.

Employees, one by one, were given a thorough optical examination, with results more or less startling. In several instances, the work of employees was changed with a threefold result—greater ease, better work and a decrease of liability to the newspaper.

"Watch the eyes of the men in your composing room," the examiner told officials. "In spite of the ideal lighting and ventilating, the excellent working conditions, and the fact that the eyes of the employees as a whole are above the average, the survey showed that 66 per cent of the men in the composing room are near sighted." This situation might have been remedied, according to Mr. Morris, had it been taken in hand earlier, for practically all myopia, which comes as the result of close work, makes its appearance during the first year the victim is engaged in the work.

Sixty-four per cent of the employees examined are what is known as emmetropes, either naturally or artificially; that is, the vision of these employees is without defect naturally, or they are using corrective measures which are making their vision normal. Of this 64 per cent, 49 per cent are wearing no glasses and have normal vision in all respects, and 15 per cent are wearing satisfactory glasses. The remaining 36 per cent either needed glasses, or were wearing glasses which did not properly fit.

One outstanding case was that of a girl employed in the library. She was wearing no glasses, yet was doing work which naturally made great demands on her vision. This librarian had 15 degrees of left hypotropia. In other words, her left eye was focused 15 degrees lower than her right. By means of prisms, the examiner was successful in establishing binocular vision. According to Mr. Morris, had this state of affairs continued for another year, the sight of the left eye would have been completely destroyed.

When asked as to what he believed accounted for the fact that so high a percentage of the Journal employees had normal vision, Mr. Morris gave this explanation:

"Experimental data has proved conclusively that there is a direct ratio between the intelligence of a person and his powers of vision. In a group of imbeciles and idiots, the proportion of those having defective vision is amazingly high. In a newspaper plant, the intelligence of the employees is above the average; if it weren't, they wouldn't be in a newspaper office. This physiological fact, I believe, accounts for the high percentage of persons at the Journal having normal vision."

FIGHTS PRISON PRINTSHOP

Statement of Profit Rouses Officer of North Carolina Press Group

A vigorous protest against the operation at the State prison, in Raleigh, N. C., of a printing plant was voiced in a letter mailed last week to all members of the North Carolina Press Association, by B. Arp Lowrance, field secretary.

Mr. Lowrance called attention to a recent press dispatch, which quoted George Ross Pou, prison superintendent,

as saying that the printing plant earned a profit of \$148.99 the first week.

"Just because two printers are in prison is no reason for operating a printing plant. The prison does not operate a bank or jewelry store to give employment to bankers and jewelers who might be inmates," it was declared.

NEW CALIFORNIA DAILY

The *Graham* (Cal.) *Record-Review* has been purchased by the *Huntington Park Morning Sun*. It will be published as a daily.

RADIO CONFUSION SEEN

Advertisers using or planning to broadcast good will entertainment from New York stations are facing the problem of confusion in the air. Arthur Batcheller, radio inspector of the New York district, declared last week that 12 new stations had begun operation since July in the New York district, and that 12 more would probably be added in the next month. He said the new stations have already caused great confusion to radio listeners, and that those to be established would add to it.

STUDENTS DEBATE ADVERTISING

Columbia University, New York, and Cambridge University in a debate on importance of advertising on Oct. 21, New York. The Britishers championed the affirmative of the question, "Resolved that this house regrets the large part played by advertising in modern life."

SHOE stores might be induced to take extra space with a sales campaign that included a contest among users of their shoes in the writing of letters telling how well a pair of shoes, their shoes, stood up under the daily grind. Small prizes could be offered, either in money or shoes, for the best letters.—F. D. H., Rockford, Ill.

A window display of old files of the *Yakima* (Wash.) *Herald and Republic* in that city showed the progress of journalism in the last few decades, style of dress, make-up, etc., as the paper fell into step with modern trends. Even to laymen, the copies of the first issues, some 30 years ago, side by side with the new issues fresh from the presses, formed a striking contrast and an interesting window display.—C. M. L., Seattle, Wash.

Daily newspapers, especially Sunday papers, might find an index to advertising good promotion. I have heard many women complain that they can't find the ad they want in large issues.—Norman J. Radder, Bloomington, Ind.

December 12 will be the 25th anniversary of the first use of radio. Marconi signalled the letter "S" from England, and it was received in Newfoundland Dec. 12, 1901. Why not use the idea for a page layout of radio advertisements, stressing the progress made in the 25 years? The page could be gotten up easily and at that particular time would also be appropriate for Christmas advertising.—L. B. Edwards, Bloomington, Ind.

Inasmuch as National Apple Week will be observed Oct. 31 to Nov. 6 throughout the country, opportunity is afforded for advertising by not only apple men, produce and commission houses, but restaurants serving baked apples, apple dumplings, etc., and bakeries featuring apple pies and tarts.—C. M. L., Seattle, Wash.

One newspaper took this method of proving to its advertisers that it was read. It announced that the paper would be good for 25 cents in trade at the stores advertising in that issue. The paper had to be presented when the goods were bought. The stores laid in a stock of old papers that kept the baler busy.—A. B., Austin, Minn.

A page headed with: "A Gift a Week," and a talk about making it easier to remember everybody by starting early to buy gifts one at a time, ought to sell easily to commence in October and run once a week for ten weeks. It facilitates selling such a series to make a flat single charge to cover the entire run. Copy should be changed each week.—Fremont Kutnewsky, San Luis Obispo, Cal.

Massachusetts newspapers may take advantage of the new compulsory auto-

mobile law by securing a group of local insurance ads to run any time during the week or on their automobile page. The text accompanying ads may consist of a resume of the provisions of the new law or questions and answers as to many points arising from the law. Suggest that the automobile owner get in touch with his insurance agent and print a coupon for him to mail to his agent or broker.—Cole, Fall River, Mass.

"KNOW YOUR GROCERIES—"

And Tie Up With National Newspaper Copy, Armour Man Advises

Charles W. Meyers, director of trade relations for Armour & Co., Chicago, addressing the Iowa Retail Grocers' and General Merchants' Association at Des Moines last week, declared that every retailer should be a thorough reader of the daily newspapers and should co-ordinate his displays by "tuning in" on the national advertising campaigns of the goods they carry.

"By reading the newspaper, the retailer is enabled to sense the public pulse. The buying public today is an absolutely changed entity from a few years ago, and to make the proper appeal the grocer must be a constant and consistent advertiser of his business," he said. "There are plenty of opportunities in the retail business for the merchant who 'knows his groceries.'"

out a good feature story. Then, too, mous cases in which they have participated, if they do not touch on persons still living, will tend to give the out a "kick."—Jellison, Dubuque, Iowa.

"Meeting the Cameraman" is a d feature in the *Portland* (Me.) *Press Herald* that hundreds of readers may fail to look for every morning. It's a spicy chat underneath a two-column picture of two persons snapped on Portland's streets. The two are told at end of the comment that they will be presented with two tickets apiece to a particular motion picture house by sending that page of the paper.—Richwagen, *Portland* (Me.) *Express*

What is the chief point of interest the visitors to your city? Your man can get a few snappy interviews each day from visitors (not businessmen) regarding just what they thought that was interesting that day.—The McKee, Cleveland, O.

NEW YORK STATE

The World's Richest Market

Compare the markets of the world—in wealth—in industry and commerce. Study the buying habits of each class or group of people and you will always find New York State on top of the list.

In New York State the advertiser is not limited in buying or selling power. Every product that the world grows or manufactures can be sold in the Empire State. There is always a market awaiting the advertiser who has something worth while to offer to New York's eleven million consumers. There is no limit to quality, quantity or price. The best is not good enough for some of its buyers.

You can reach the world's greatest and richest market thru the newspapers listed below.

“FLASH”

LASH! A second's startled silence and—a short, sharp message that may hold a hundred tragedies.

Then the deluge! Stories “big” a second before are broken by breathless bulletins. Datelines are killed before they are copied. Streamered sensations scheduled for page one, sink into back-page oblivion. Brilliant leads hopelessly slugged “more,” perish abruptly on the dead-hook.

And meanwhile money is spent unchecked, lives are risked, records are broken as every resource of each of the great news-gathering agencies is strained to deliver the one big scoop of the day.

The Consolidated Press pays full tribute to these great achievements, **but it does not compete for their honors.** It has its own appointed task.

Through fire and flood, while champions battle or candidates compete, through wars and rumors of war, the steady flow of copy into each department of the newspaper from the writers of “the news behind the news” is **never interrupted.**

Sports, politics, finance, business, fashions, national affairs, radio, world news of human interest, come through each in its accorded time.

Thus each financial dispatch, each intricate financial table clears with the **rigid regularity** of the stroke of the gong on the “big board” on Broad Street.

Nothing short of an act of Providence can break the schedule of The Consolidated Press.

Pathfinder Tires can be had with Service at the following Goodyear Service Stations

Here It Is! A lower-priced good tire! We call it PATHFINDER, because it pioneers a new level of tire values

Long known as the best rubber tire in the world, the Pathfinder is now being sold at a lower price than ever before. This is because the Goodyear engineers have found a way to make a tire that is as good as the best, but costs less. The Pathfinder is a tire that is built to last, and it is built to give you the most service for your money. It is a tire that is built to give you the most service for your money. It is a tire that is built to give you the most service for your money.

PATHFINDER Made by Goodyear

AMONG the national advertisers who place more than 50% of their total Chicago newspaper advertising in The Chicago Daily News is the Goodyear Tire and Rubber Company.

Their advertising in The Daily News, placed by Erwin, Wasey & Company, totaled 4,880 agate lines in the first eight months of 1926, or 68.4% of their total Chicago newspaper advertising.

Scott "Multi-Unit" Balcony Type Double Sextuple Press. Atlantic City Press-Union Installation

The Scott "Multi-Unit" Balcony Type

—installed as a double sextuple in the plant of the Atlantic City Press-Union. This installation gives all the advantages of an under-fed press without calling for the building of pits or for the utilization of two floors. A solid foundation 10 inches below the finished floor line and a fourteen foot ceiling only are required. The Balcony Type Press, in fact, is an under-fed press installed upon one floor. It, therefore,

conserves valuable space while providing maximum accessibility to both the presses and the paper rolls. Pressmen can watch the paper rolls at all times and it is easy to change both rolls and plates.

The development of the Balcony Type "Multi-Unit" Press is still another step in Scott achievement. We will be glad to discuss the possibilities of this type of installation as applied to your particular press room conditions.

Quality and Quantity

In a Single Medium

PHILADELPHIA'S newspaper advertising situation is unique in its appeal to the national advertiser, in that one newspaper—The Bulletin—offers both quality and quantity.

The Bulletin enjoys the confidence of its readers to an unprecedented extent. In the radius of its circulation—the largest in Philadelphia and the third largest in the U. S.—over 3,000,000 persons reside. U. S. Census averages 4.5 to a family. No other newspaper offers such complete coverage and domination at one minimum cost.

Dominate Philadelphia

Create maximum impression at one cost by concentrating in the newspaper "nearly everybody" reads—

The Evening Bulletin.

"VALUE OF ADVERTISING UNDERESTIMATED"—COOLIDGE

Complete Text of the President's Address Before Annual Convention, American Association of Advertising Agencies in Washington, October 27

SOMETIMES it seems as though our generation fails to give the proper estimate and importance to the values of life. Results appear to be secured so easily that we look upon them with indifference. We take too many things as a matter of course, when in fact they have been obtained for us only as the result of ages of effort and sacrifice. We look at our economic condition upon which we are absolutely dependent for the comforts and even the necessities of life, and forgetting that it all rests on industry, thrift, and management, dismiss it lightly as a matter that does not concern us. Occasionally our attention is directed to our political institutions, which have been secured for us through the disinterested exertion of generations of patriotism, and, going along oblivious to the fact that they are the sole guarantees of our rights to life and liberty, we turn away with the comforting thought that we can let some party committee attend to getting out the vote and that probably the Government will run itself all right anyway. Then perhaps we are attracted by the buildings erected for education, or the temples dedicated to religious worship, and, without stopping to realize that these are the main source of the culture of society and the moral and spiritual life of the people we pass them by as the concern very largely of schoolmasters and clergymen. We have become so accustomed to the character of our whole, vast, and intricate system of existence that we do not ordinarily realize its enormous importance.

It seems to me probable that of all our economic life the element on which we are inclined to place too low an estimate is advertising. When we come in contact with our great manufacturing plants, our extensive systems of transportation, our enormous breadth of agriculture, or the imposing structures of commerce and finance, we are forced to gain a certain impression by their very magnitude, even though we do not stop to consider all their implications. By the very size and nature of their material form they make an appeal to the senses, even though their import does not reach the understanding. But as we turn through the pages of the press and the periodicals, as we catch the flash of billboards along the railroads and the highways, all of which have become enormous vehicles of the advertising art, I doubt if we realize at all the impressive part that these displays are coming more and more to play in modern life. Even the most casual observation, however, reveals to us that advertising has become a great business. It requires for its maintenance investments of great amounts of capital, the occupation of large areas of floor space, the employment of an enormous number of people, heavy shipments through the United States mails, wide service by telephone and telegraph, broad use of the printing and paper trades, and the utmost skill in direction and management. In its turnover it runs into hundreds of millions of dollars each year.

When we stop to consider the part

which advertising plays in the modern life of production and trade we see that basically it is that of education. It informs its readers of the existence and nature of commodities by explaining the advantages to be derived from their use and creates for them a wider demand. It makes new thoughts, new desires, and new actions. By changing the attitude of mind it changes the material condition of the people. Somewhere I have seen ascribed to Abraham Lincoln the statement that "In this and like communities public sentiment is everything. With public sentiment nothing can fail; without it nothing can succeed; consequently he who molds public sentiment goes deeper than he who enacts statutes or pronounces decisions. He makes statutes and decisions possible or impossible to be executed." Advertising creates and changes this foundation of all popular action, public sentiment, or public opinion. It is the most potent influence in adopting and changing the habits and modes of life, affecting what we eat, what we wear, and the work and play of the whole Nation. Formerly it was an axiom that competition was the life of trade. Under the methods of the present day it would seem to be more appropriate to say that advertising is the life of trade. Two examples of this influence have come to me in a casual way. While I can not vouch for the details, I believe in their outline they are substantially correct. One relates to an American industry that had rather phenomenal growth and prosperity in the late eighties and early nineties, being the foundation of the one or two large fortunes. In its development it had been a most generous advertiser. A time came when various concerns engaged in this

line of manufacturing were merged and consolidated. There being no longer any keen competition, it was felt that it was now no longer necessary to explain to the public the value of this product or the superiority of one make over another. In order to save the large expense that had been made for that purpose, advertising was substantially abandoned. The inevitable result followed, which all well-informed trade quarters now know would follow. But the value of advertising was not so well understood 25 or 30 years ago. This concern soon became almost a complete failure. As I recall, it had to be reorganized, entailing great losses. This line of trade was later revived under the direction and counsel of some of its old managers, and with the proper amount of publicity became a successful enterprise.

But let us turn from the unfortunate experience of the loss that occurred through lack of advertising to an example of gain that was made through the shrewd application of this principle. In a somewhat typical American community a concern was engaged in an industrial enterprise. Its employees were not required to be men of great skill. Oftentimes they were new arrivals in this country who had been brought up to be accustomed to the meager scale of living abroad. Their wants were not large, so that under the American rate of wages they found it possible to supply themselves and their families without working anywhere near full time. As a result, production was low compared with the number employed and was out of proportion to the overhead expense of management and capital costs. Some fertile mind conceived the idea of locating a good milliner in that communi-

ty. The wares of this shop were generously advertised through window display, newspaper space, and circularization. I suppose that every head of a family knows that a new bonnet on the head of one of the women in the neighborhood is contagious. The result in that community almost at once was better wearing apparel for the women, which necessitated more steady employment for the men. The output of the plant was greatly increased, its cost units were reduced, its profits were enlarged, it could sell its product to its customers at a lower figure, and the whole industry was improved. More wealth was produced. But the reaction went even further. The whole standard of living in that locality was raised. All the people became better clothed, better fed, and better housed. They had aspirations, and the means to satisfy them, for the finer things of life. All of this came from the judicious application of the principle of advertising.

The system which brought about these results is well known to the members of this association. You have seen innumerable instances where concerns have failed through lack of advertising and innumerable others where they have made a success through the right kind and amount of publicity. Under its stimulation the country has gone from the old hand methods of production which were so slow and laborious with high unit costs and low wages to our present great factory system and its mass production with the astonishing result of low unit costs and high wages. The preeminence of America in industry, which has constantly brought about a reduction of costs, has come very largely through mass production. Mass production is only possible where there is mass demand. Mass demand has been created almost entirely through the development of advertising.

In former days goods were expected to sell themselves. Oftentimes they were carried about from door to door. Otherwise, they were displayed on the shelves and counters of the merchant. The public were supposed to know of these sources of supply and depend on themselves for their knowledge of what was to be sold. Modern business could neither have been created nor can it be maintained on any such system. It constantly requires publicity. It is not enough that goods are made, a demand for them must also be made. It is on this foundation of enlarging production through the demands created by advertising that very much of the success of the American industrial system rests.

It will at once occur to those who have given any thought to these subjects how important it is to the continuing success of the business which this gathering represents, and to the general welfare of the country, that the conditions under which these results have been secured should be maintained. It is our high rate of wages which brings about the greatest distribution of wealth that the world has ever seen and provides the enormous capacity for the consumption of all kinds of commodities which characterizes our country. With

HIGH LIGHTS FROM PRESIDENT'S SPEECH

"It seems to me probable that of all our economic life the element on which we are inclined to place too low an estimate is advertising."

"When we stop to consider the part which advertising plays in the modern life of production and trade we see that basically it is that of education."

"It is to be seen that advertising is not economic waste. It ministers to the true development of trade."

"There can be no permanent basis for advertising except a representation of the exact truth. Whenever deception, falsehood, and fraud creep in they undermine the whole structure."

"Advertising ministers to the spiritual side of trade. It is a great power that has been entrusted to your keeping which charges you with the high responsibility of inspiring and ennobling the business world."

Delegates to A. A. A. convention, photographed at the Mayflower for EDITOR & PUBLISHER. (Left to right): D. W. Henderson, New York; E. L. Triffitt, Detroit; William H. Johns, New York; James O'Shaughnessy, New York; Ralph H. Jones, Cincinnati; and Harry E. Lesan, New York.

our improved machinery, with the great increase in power that has come from steam and electricity, with the application of engineering methods to production, the output of each individual engaged in our industrial and agricultural life is steadily increasing. The elimination of waste through standardization has been another most important factor in this direction. If we proceed under our present system, there would appear to be little reason to doubt that we can continue to maintain all of these high standards in wages, in output, and in consumption indefinitely, and with our home markets as a foundation increase our foreign commerce by a greater exchange of those commodities in which we are peculiarly favored for the commodities of other nations in which they have a special advantage. But nothing would appear to be plainer than that this all depends upon the maintenance of our American scale of wages, which is the main support of our home market.

It is to be seen that advertising is not an economic waste. It ministers to the true development of trade. It is no doubt possible to waste money through wrong methods of advertising, as it can be wasted through wrong methods in any department of industry. But rightfully applied, it is the method by which the desire is created for better things. When that once exists, new ambition is developed for the creation and use of wealth. The uncivilized make little progress because they have few desires. The inhabitants of our country are stimulated to new wants in all directions. In order to satisfy their constantly increasing desires they necessarily expand their productive power. They create more wealth because it is only by that method that they can satisfy their wants. It is this constantly enlarging circle that represents the increasing progress of civilization.

A great power has been placed in the hands of those who direct the advertising policies of our country, and power is always coupled with responsibilities. No occupation is charged with greater obligations than that which partakes of the nature of education. Those engaged in that effort are changing the trend of human thought. They are molding the human mind. Those who write upon that tablet write for all eternity. There can be no permanent basis for advertising except a representation of the exact truth. Whenever deception, falsehood, and fraud creep in they undermine the whole structure. They damage the whole art. The efforts of the Government to secure correct labels, fair trade practices, and equal

opportunity for all our inhabitants is fundamentally an effort to get the truth into business. The Government can do much in this direction by setting up correct standards, but all its efforts will fail unless it has the loyal support of the business men of the Nation. If our commercial life is to be clean and wholesome and permanent in the last resort, it will be because those who are engaged in it are determined to make it so. The ultimate reformers of business must be the business men themselves. My conception of what advertising agencies want is a business world in which the standards are so high that it will only be necessary for them to tell the truth about it. It will never be possible to create a permanent desire for things which do not have a permanent worth. It is my belief that more and more the trade of our country is conforming to these principles.

The National Government has a large interest in all these problems, though many of them are confined in their jurisdiction to the States. The general welfare of the country, its progress and prosperity, are very intimately connected with the commerce that flows from agriculture and industry. Unless that be in a healthy condition, constantly expanding, securing reasonable profits, employment begins to fail, sooner or later wages begin to fall, markets are over-supplied, movements of freight decrease, factories are idle, and the results of all these are that want and distress creep into the home. You can easily draw the converse of this picture. It has been the almost universal experience in American life of late. Local conditions here and there have brought contrary results, probably unavoidable for a long time to come, but in the main the country has been and is prosperous. Perhaps the most creditable aspect of our present prosperity is that wages are high while profits have been moderate. That means that the results of prosperity are going more and more into the homes of the land and less into the enrichment of the few, more and more to the men and women and less and less to the capital which is engaged in our economic life. If this were not so, this country could not support 20,000,000 automobiles, purchase so many radios, and install so many telephones. From a recent fear of being exploited by large aggregations of wealth, the people of America are learning to make such great concerns their most faithful servants. This problem is not entirely solved yet. Here and there abuses occur, but business is gradually being taught that the only method of permanent suc-

cess lies in an honest, faithful, conscientious service to the public.

You are familiar with the efforts which the Federal Government has been making to contribute to peace and prosperity during the recent reconstruction period. We are steadily reducing our national debt, cutting down the interest charges. We have released hundreds of thousands of people from the unproductive field of Government employment to the productive field of business life. The burdens of taxation have been so far removed that they are now for the most part lightly borne, and the disproportionate charges formerly made to supply the public revenues have been released to flow into the avenues of trade and investment. We have supplied large sums for the rehabilitation of Europe and the financing of South America to the advantage of our foreign commerce, which now stands at a peace time record. Through international covenants limiting naval armaments we have reduced the cost of national defense and made large guarantees to the peace of the world. All of this has been a program of constructive economy, beneficial alike to ourselves and to other people. In making this economically possible, in spreading its benefits, in carrying its fruits into the homes of the land, advertising has supplied and will continue to supply a very important part. Without the advantages that accrue from that art these accomplishments would not have been possible.

But Americans are never satisfied with the past or present. They are always impatient of the future. Our history has been that of an increasing prosperity. There have always been fluctuations in trade, but with our present system of banking and our enormous capacity for consumption such fluctuations will apparently be much less violent and are unlikely to sink to the level of depression. We can not tell what a particular month or locality may develop, but over the broad face of our country seedtime will be followed by the harvest, the productive capacity will increase, and our people will become more prosperous.

These results, however, can not be considered as guaranteed by our material resources alone. They will accrue to us, not because of our fertile agricultural fields, our deposits of coal, iron, and precious metals, nor even from the present state of our development of trade with its accompanying supports of manufacturing, transportation, and finance. We can not rely on these alone. They could all be turned into instruments of destruction.

Our chief warrants for faith in the future of America lies in the character of the American people. It is our belief in what they are going to do, rather than our knowledge of what they are going to have, that causes us to face the coming years with hope and confidence. The future of our country is not to be determined by the material resources, but by the spiritual life of the people. So long as our economic activities can be maintained on the standard of competition in service, we are safe. If they ever degenerate into a mere selfish scramble for rewards, we are lost. Our economic well-being depends on our integrity, our honor, our conscience. It is through these qualities that your profession makes its especial appeal. Advertising ministers to the spiritual side of trade. It is a great power that has been intrusted to your keeping which charges you with the high responsibility of inspiring and ennobling the commercial world. It is all part of the greater work of the regeneration and redemption of mankind.

ST. LOUIS B. B. B. ACTIVE

Handled 3,415 Merchandising Cases, 4,681 Financial Inquiries

The number of merchandise cases handled by the Better Business Bureau of St. Louis during the twelve months ended Oct. 1, aggregated 3,415, an increase of 51 per cent over the preceding year, according to the report of Harry W. Riehl, manager, made at the annual meeting held last week.

There were 3,395 shopping reports covering the sales efforts of representatives of member firms, of which 2,393 evidenced exceptional service, 625 were fair, and 387 disclosed poor service. The financial cases docketed for investigation numbered 1,949 and 4,681 financial cases were handled, the latter representing an increase of 52 per cent.

William McChesney Martin, chairman of the Board of Federal Reserve, Bank of St. Louis, is president of the Bureau. Ten new trade group directors were elected for a term of three years.

LOAN GROUP AIDS 225

The Medill Building and Loan Association of the *Chicago Tribune*, in the four years since it was organized, has furnished financial aid to 225 Tribune employees who have purchased or built homes. At the close of business June 26, there were 750 members of the association.

(Left to right): Rossiter Holbrook, New York; Eugene McCuckin, Philadelphia; Howard R. Barnes, Philadelphia; Earl R. Trangmar, Cincinnati; S. C. Stewart, Chicago; William Reyndell, New York; Charles Blum, Philadelphia, and James W. Young, Chicago, new Four A's president.

PARK'S ATTACK ON TRADE COMMISSION THRILLS A. A. A. CONVENTION

James W. Young of Chicago Elected President—Coolidge Graces Annual Banquet—Agents Say Two Per Cent Cash Discount Protects All Advertising Interests

By J. BART CAMPBELL

(Washington Staff Correspondent, EDITOR & PUBLISHER)

WASHINGTON, Oct. 28.—Although the Federal Trade Commission "does not offer a single remedy or plan as substitute," it is threatening to "damage the present structure of handling national advertising," a business that "is the result of more than a half century of actual experience by all the advertising men of the nation."

This strong condemnation of the Commission's efforts to hold the advertising agency and the newspaper guilty of conspiracy to control national advertising, efforts which have been hanging fire before the Commission for months, was registered today before the tenth annual convention here of the American Association of Advertising Agencies by John A. Park, publisher of the *Raleigh* (N. C.) *Times* and president of the Southern Newspaper Publishers Association.

Mr. Park's stinging indictment of the Commission was read to the convention by James O'Shaughnessy, executive secretary of the Four A's, in the absence of the Southern publisher, who was unavoidably detained elsewhere.

"In view of the testimony given at the hearing before the Commission we feel that it is reasonable to hope for a dismissal of the case," was the conclusion reached in the report submitted on the Commission's complaint that the advertising agency and the newspaper are engaged in "an unlawful combination and conspiracy," which was submitted by Newcomb Cleveland, chairman of the committee of the Four A's in charge of the matter.

Mr. Park, in his statement of the case, handled the Commission without gloves and charged special manufacturing interests with having inspired the Commission's action.

These interests, Mr. Park declared, "want the same commission allowed direct on their own advertising that newspapers usually allow advertising agents, and, through the Federal Trade Commission, they are seeking to get the usual agency commission. They perform no service

whatever for the newspaper, neither do they assist in creating any advertising except for their own use. They will not solicit advertising for the newspapers; so why should they have commissions?"

Mr. Park's statement was entitled, "What Price Agencies? Southern Newspapers and Four A's Now Have Problems in Common."

The statement read, in part:

"It was probably at the time of the great flood when readers of the *Noah's Ark News* started the discussion, 'Does the advertising agent work for the advertiser, or for the newspaper?'"

"Now that the Federal Trade Commission has taken a hand in the matter, there comes forth more speculation as to what may become of newspapers if agencies become extinct. Naturally, all newspaper publishers and all agency managers have much in common at this time, and there is some conjecture as to whether they may congratulate or console each other when the courts render a decision."

"Certainly, the present serious problem should serve to bind closer these two great instruments of human endeavor—newspapers and agencies. There is a marked tendency now, in the face of a common menace, to overlook trivial matters, like extension of payments, time for taking discounts, full position, re-runs on account of changes in the weather, the beating down of rates and other similar indoor sports."

"Constructive work done by the Four A's in urging standard rate cards, uniform contracts, careful checking and modern accounting has taken the dark clouds from many newspaper offices, and they should certainly be very appreciative, whether they admit it or not."

"Lack of information, so far as it relates to advertising, is one of the obstacles daily newspapers of America in the conduct of business. I know of no better place to discuss the subject than in the great city of Washington, where one of the Government agencies is threatening to damage the present struc-

ture of handling national advertising, although that business is the result of more than a half century of actual experience by all the advertising men of the nation."

"The Federal Trade Commission is threatening to destroy that structure—and it does not offer a single remedy or plan as a substitute. I can speak from intimate knowledge of the situation, so far as the Southern Newspaper Publishers' Association is concerned, and I believe that what I say applies to every publishers' organization and individual publisher in America."

"The S. N. P. A. is charged with being in a conspiracy with the American Association of Advertising Agents and other organizations to control the advertising business of America against the best interest of the public welfare. The charge is ludicrous on its face, and would not be taken seriously if so many evidences of misinformation in official circles about this matter were not appearing. One serious side to S. N. P. A. members is that it costs thousands of dollars each year to retain lawyers, pay their expenses and attend hearings which, at this time, give no signs of abating. This suit, styled by the Federal Trade Commission as a complaint, was first issued in December, 1924, and today our small Association has paid out a substantial sum for actual expenses in defending ourselves. Attorneys' fees will be determined when the case is determined."

"We are not informed as to who our prosecutors are, who instigated the complaint which caused the Federal Trade Commission to act. We do know circumstances show that two individuals, manufacturers, have been active in getting the Trade Commission to act. An attorney of New York appeared before the Commission representing one of these two interests."

"Efforts were made, I have been informed, to induce the Department of Justice to act, on the grounds that newspapers and advertising agents were operating in violation of the Sherman Anti-Trust Law, not Inter-State Commerce, but a service, and the Federal Government did not have jurisdiction."

"Then persons, whose identities are withheld by the Federal Trade Commission, went to that body and the suit was announced publicly in December, 1924. This complaint was issued against the S. N. P. A. and its individual members, the Four A's and the American Press Association, charging an 'unlawful conspiracy' to control advertising against the best interest of the public welfare. The com-

plaint was denied in the answers of all the defendants, and a motion was made by the S. N. P. A. attorneys to discuss the complaint on the grounds that advertising was not inter-state commerce, that there were no unfair methods used and no public interest violated. The Federal Trade Commission overruled the motion and permitted the complaint to be amended to include the S. N. P. A. and the Six Point League."

"After a delay of 15 months, hearings were started before an examiner for the Federal Trade Commission in New York on April 29 and ran until May 7, with the result that 834 pages of testimony have been taken, all of which related, more or less, to the history of the present structure of handling newspaper advertising and the services provided by the agencies."

"I think it was shown that S. N. P. A. members ran their own business as they saw fit, and the S. N. P. A., as an organization, had no power over its individual members. Still, the attorneys for the Commission are trying to prove that some S. N. P. A. members have been coerced and threatened into refusing Firestone, Vick and other direct advertisers, the usual agency commission."

"The question is asked, 'What will happen if the Federal Trade Commission makes an order to cease and desist?' It is not clear, for the Commission has offered no suggestion about any desirable practice to take the place of the present advertising structure. However, if advertising is held to be inter-state commerce, it opens the way for Federal control of advertising."

"I am not one to join in the criticism of every Government effort to curb proper and needful regulations in the interest of public welfare, but I am impatient over endless delay, which is costing me money and costing my colleagues thousands of dollars. There is both consolation and compensation to be derived, however, through the knowledge that the American Association of Advertising Agencies stands shoulder to shoulder with Southern publishers in defending common standards of integrity and fair dealing which must be maintained and strengthened for the good of all of us."

The report of Mr. Cleveland's committee stated, in part:

"The charge by the Government is that the five respondent organizations are engaged in 'an unlawful combination and conspiracy' to various ends, among which are specified, that direct advertisers be constrained from obtaining national ad-

(Left to right): James W. Young, Chicago; Roy S. Durstine, New York; Robert K. Leavitt, New York; S. Roland Hall, Easton, Pa.; Edward T. Hall, St. Louis; H. K. McCann, New York, and S. E. Thomason, Chicago

Tenth annual convention dinner of the American Association of Advertising Agencies in Hotel Mayflower, Washington, Wednesday evening, attended by President Coolidge (left of microphone.)

vertising at less than gross rates and that all national advertisers be constrained to employ respondent agencies or such other agencies as agree uniformly to receive and actually do receive as their minimum remuneration from their activities from inter-state commerce the standard trade differential of fifteen per cent.

"The word differential is used in the complaint; our contention is that what is involved is not a differential but a commission, and that there is only one real rate, namely, the rate that the advertiser pays.

"Being engaged in interstate commerce is not strictly a charge against us; it is the preliminary condition without which the commission has no right to act. If there is no 'commerce' involved, the Commission lacks jurisdiction and the case against us falls. The Commission's position that distribution of so-called 'type-parts' (mats, electros, etc.) constitutes interstate commerce is held by us to be unjustified for the reason that type-parts are not essential to advertising (for example, in the case of an advertisement that is set up), and that the ownership of such type-parts does not change at any time, whether they are transported from one State to another or not; and further, that they are only incidental to the service given by an agency.

"An interesting circumstance in connection with the amended complaint was that only three of the five commissioners were present when it was voted to issue it. This procedure was somewhat unusual. A week afterwards Commissioner Humphrey, who had been prevented by illness from being present, filed a dissenting opinion. This has been published in full.

"Although all the witnesses at the New York hearings were called by the Government, the testimony of several of them was exceedingly valuable to our side of the case.

"Lincoln B. Palmer, manager of the American Newspaper Publishers Association, asserted positively that the commission system was the most economical and efficient of any within his knowledge for securing and maintaining the desired volume of advertising revenue for the newspapers. It was brought out further that the system had been in effect before any of the associations which are defendants had been organized.

"Major Floyd Y. Keeler, who has had wide experience in various fields, in finance as well as in advertising, and who was called by the Government as

an expert, testified that the agencies were of service to both publishers and advertisers.

"Whatever may happen further there has already been presented to the public, through the reports of the hearings in the daily press and the trade publications

and in other ways, a vast amount of information relative to the fundamentals of the advertising agency business.

"In view of the testimony that was given at the hearing we feel that it is reasonable to hope for a dismissal of the case."

RESOR REPORTS RESULTS OF QUALITATIVE CIRCULATION SURVEY TO FOUR A's

WASHINGTON, D. C., Oct. 28,

A report of an extensive analysis of the circulations of 74 national magazines was one of the outstanding features of the tenth annual convention of the American Association of Advertising Agencies. This survey is a classification of magazine subscribers and buyers into occupational and income groups. This is the first of a series of studies to be made by the association. The next study to be undertaken will probably be in the field of newspaper circulations.

Stanley Resor, president of the J. Walter Thompson Company, in explaining to the convention the reasons for the establishment by the association of a department of research to undertake work of this kind, said, in part:

"The amazing increase in the cost of business failure, due to the large scale of operations, has made any disregard of essential facts in business more than ever dangerous.

"The task of business research is to show what the facts are—to pick out the truth from many pieces of conflicting evidence and to formulate these facts in useable form. The use of the material is a matter for individual skill—the facts ought to be common property.

"Research is merely the process of ascertaining facts by careful and open minded observation."

The survey was conducted for the association under the direction of Dr. Daniel Starch, director of its Department of Research, who formerly was a professor in the Harvard School of Business Administration. It reflects the work of two years and a large expenditure by the American Association of Advertising Agencies in an effort to determine more accurately and scientifically the specific markets reached by these magazines.

Emphasizing the extent to which the

association has gone in the survey conducted by Dr. Starch, the committee stressed the fact that the report contains an occupational classification of 381,000 subscribers of 74 magazines in 29 cities and 30 rural towns. These magazines represent a combined circulation of approximately 43,000,000, it contains also the results of a house-to-house canvass in which personal interviews were had in nearly 20,000 homes in 20 cities and 17 rural communities. Every section of the country was covered in the survey, which represents the most complete analysis of its kind ever made.

"Publishers have for years made studies of their own to indicate the quality of their subscribers and readers," said Dr. Starch in his report to the convention, "the difficulty, however, has been that each publisher has made studies according to his own methods which, consequently, have not been comparable with those made by other publishers. There was, therefore, a distinct need of reliable methods applied in a uniform manner to all publications.

"The chief problem on which the Research Department has been engaged since its inception in December, 1924, may broadly be referred to as a study of the quality of magazine circulation. Quality of circulation is a general term which may have many different meanings. Some have suggested that quality is measured by the subscription price of a magazine, by its literary or editorial content, by the economic status of its readers, or by the race religion or occupation."

"All of those criteria have some value and, in a certain sense, indicate quality. However, for the purposes of this investigation, it was necessary to describe the problem specifically. Instead of using the general term 'quality' we have defined our survey as an analysis of the

occupations and incomes of the subscribers and buyers of magazines.

"There has been a decided need of a careful study of this problem. In 1914 the Audit Bureau of Circulations was established to provide reliable and comparable figures on quantity of circulation. This has been one of the outstanding forward steps in this field. We next needed, however, reliable information as to other aspects of circulation, namely, the kind of subscribers and buyers that national magazines have. In other words we wanted to determine what kind of a market is reached by each publication."

In the opinion of the Research Committee, the survey "will not to any marked degree change many conceptions which we have already formed of magazine circulations through observations.

JAMES W. YOUNG IS NEW A. A. A. PRESIDENT

FOLLOWING are the new officers of the Four A's elected Thursday:

President, James W. Young, J. Walter Thompson Company, Chicago; vice-president, H. K. McCann, H. K. McCann Company, New York; secretary, Richard S. Humphrey, H. B. Humphrey Company, Boston; treasurer, E. Dewitt Hill, H. K. McCann Company, New York.

Members of executive board, members-at-large, one year term—Stanley Resor, J. Walter Thompson Company, New York; Merle Sidener, Sidener Van Riper & Keeling, Inc., Indianapolis; two-year term—Herbert S. Gardner, Gardner Advertising Company, New York; H. T. Ewald, Campbell-Ewald Company, Detroit. Three-year term—R. S. Simpers, McLain-Simpers Organization, Philadelphia; Roy S. Durstine, Barton, Durstine & Osborne, Inc., New York.

Members representing councils—Robert Tinsman, Federal Advertising Agency, Inc., New York; A. King Aitken, Aitken-Kynett Company, Philadelphia; A. E. Greenleaf, Greenleaf Company, Boston; E. D. Mason, Albert P. Hill Company, Pittsburgh; Shelley E. Tracy, Southwestern Advertising Company, Dallas.

STANDARDIZATION OF METHODS A. A. A. A. TOPIC

New Era of Co-operation at Hand, Speakers Declare at Tenth Annual Convention in Washington—Thomason Foresees Better Newspaper Printing Through A.N.P.A. Efforts

By BART CAMPBELL

(Washington Correspondent, EDITOR & PUBLISHER)

WASHINGTON, Oct. 28.—Closer co-operation between the newspaper and the advertising agency in the betterment, development and standardization of advertising methods and mediums, was urged here Wednesday by S. E. Thomason, business manager of the *Chicago Tribune*, former president of the American Newspaper Publishers Association, before the tenth annual convention of the American Association of Advertising Agencies.

"The ultimate good of your business and ours is accomplished when we co-operate to make our work more easy and more honest," said Mr. Thomason. "And every step in this direction reduces the ultimate cost of marketing borne by the consumer."

The progressive ideas registered by Mr. Thomason were among a series of constructive suggestions made by representative publishing and advertising men whose exchange of viewpoint contributed much toward making the convention notable for its promise of national service.

In paying tribute to the leadership the Four A's "are taking in promoting a new era of co-operation among all branches of advertising," Malcolm Muir, president of the Associated Business Papers, Inc., declared to the convention that "the principles promoted by you, more than any other factor, have brought about a complete interchange of commodities throughout the entire country and a higher standard of living; they have made possible mass production by bringing about mass consumption, and have added a tremendous contribution to both the national wealth and to our present great national prosperity."

Of the 133 advertising agencies represented at the convention, with a membership handling 80 per cent of the national advertising in this country, James O'Shaughnessy, executive secretary of the Four A's, said:

"As creators and builders of advertising these advertising agencies today are one of the greatest factors in American commercial stabilization. Increased consumption, influenced by advertising, increases sales for the retailer, the jobber and the manufacturer. It increases production, and this larger production is reflected in greater efficiency in manufacture—hence, improved products and lower prices for the consumer."

"In a word, the whole fabric of national advertising revolves in a circle, with each interest benefited and with the general commercial scheme of the nation proportionately stabilized—a stabilization that is apparent, too, from the standpoint of the banker and the financial interests whose investments thus are given larger protection."

Appearing on the same platform with Mr. Thomason, as spokesman for the newspaper publishing interests, and Mr. Muir, as representative of trade journals, was Frank Braucher, of the Crowell Publishing Company, vice-president of the Periodical Publishers Association.

"As we all progress and as we travel toward a better day in business," Mr. Braucher told the convention, "and I think we are travelling very fast—in spite of the pessimists and the cynics—the time is coming when the advertising agent who regards recognition as meaning merely the collection of 15 per cent will find himself in the minority."

"Stated another way around, I think there is a growing conviction on the part of the advertising agents that recognition means more than just the collection of fifteen per cent. I think it is meaning to him more and more the privilege of contributing something to the business he is in, his contribution being the conduct of a clean, legitimate, lawful and honest business."

"The standards of practice of the American Association of Advertising Agents generally practiced and generally ad-

hered to will make the whole business more than just a 15 per cent operation. It will mean something that men will strive to uphold. And in this connection, let me say that it would hearten you a great deal if you knew the number of young and sometimes small advertising agents who in spirit and practice adhere to your principles and standards."

"It is not at all uncommon to have an applicant say to us, 'In principle and practice we are a Four A agency.' Having had a number of years' experience in passing upon agents for recognition, I can assure you that the high standards you have set and the ideals to which you aspire have influenced beyond your conception the whole advertising agency business, and in behalf of the Periodical Publishers' Association, I congratulate you for it."

In opening his address, Mr. Thomason remarked humorously that "in this atmosphere of friendliness and geniality, so foreign to those occasions when I have taken part in efforts to change the minds of some of you about listings and appropriations, I could almost be excused if I found myself expanding to the point where I discussed with you general rate reductions, accompanied by universal increases in commissions."

Mr. Thomason referred to the assembled advertising men as "fellow-defendants" as he touched upon the thus-far unsuccessful efforts of the Federal Trade Commission to hold the Four A's, the A. N. P. A., the Southern Newspaper Publishers' Association, and other organizations, guilty of conspiracy to control the marketing and placing of advertising.

Mr. Thomason then warmly commended Secretary of Commerce Herbert Hoover as one who "has been quietly and efficiently making a study to bring about better marketing methods, to reduce the cost of getting the manufactured product from the manufacturer to the consumer."

"You and we in the publishing business," continued Mr. Thomason, "are vitally concerned with that problem. As I see it, it is only through organizations such as yours, and such as ours of the American Newspaper Publishers Association that progress can be made in these broader purposes of our industries."

"You have an effective and capable Research Division. We have a Bureau of Advertising and a newly established Mechanical Research Division. I have in mind two bits of work that we might accomplish in co-operation."

"I know that your efforts to improve the quality of reproduction in printing have heretofore been confined to the higher grades of process work. We haven't given much thought, either of us, to improvement in the quality of newspaper printing. Newspaper printing has been 'just printing.' You don't expect high grade results in newspaper reproduction."

"Yet I venture to say that a most substantial amount of lost motion could be saved the members of your organization if you could be assured of uniform results in newspapers, having in mind that newspapers must be produced at high speed."

"The A. N. P. A. Department of Mechanical Research is just beginning to function under the direction of Professor Wines, of the University of Wisconsin, an experienced and capable printing engineer. By the elimination of antiquated methods in newspaper photo-engraving, stereotyping, and press room departments, and the standardization of modern practices in these mechanical departments, the whole level of newspaper printing can be raised."

"The result is going to be a saving on your part, and every saving in effort is

a movement in the direction of lower marketing costs. I hope that this movement on the part of the newspapers is going to have your complete co-operation and support."

"As you all know, there has been no standardization of newspaper advertising statistics, or statistical methods up to this time. In New York advertising data is compiled by the *New York Evening Post*. In Chicago we think we do the job better through the work of an independent company, The Advertising Record Company. In most other cities these figures are compiled by one or another of the competing newspapers, and sometimes they prove the truth of the epigram that 'liars figure.'"

"The Bureau of Advertising of the A. N. P. A. is turning its attention to the possibility of standardizing these statistical methods throughout the country. Here again there is the largest opportunity for successful co-operation between the research division of your organization and ours. The industry as a whole will make a big advance when you are able to regard statistical data of all metropolitan newspapers with the same confidence that you can have in the records of the Advertising Record Company. This, too, is another move toward better marketing methods."

"Of course, we can never hope to accomplish a complete accord between your organization and by one of the publishing organizations in this matter of the best and most economical advertising methods. Some of you will always lend an ear to the sweet strains of the periodical publisher's song. Some of you will always lend a helping hand to nature in establishing a spot of color against the background of autumn foliage with the aid of the American Posting Service."

"And the fact that personally I am persuaded that the only economical and effective advertising appropriation can be obtained by restricting the use of the advertising dollar to the purchase of newspaper space, with perhaps just a little 'Liberty' for a magazine expenditure, will be of small consequence to you. In these matters we will never quite agree. I may think that you are a little prejudiced. I might even confess to some bias in these questions myself."

"But the fact remains that the ultimate good of your business and ours is accomplished when we co-operate to make our work more easy and honest. And every step in this direction reduces the ultimate cost of marketing borne by the consumer."

Mr. Muir told the convention he appeared as an unofficial representative of a "great group of manufacturers whose products have a value of \$33,000,000,000 yearly." He said in part:

"Industry's problems largely have been confined to the science of production, which has now been developed to such a high state. We have, with the exceptions of a few short periods, always had an industry in this country, a sellers' market. Conditions are changing. Our productive capacity is now such as to bring about keener competition at home and abroad and the need for the creation of new markets for the products of industry. Our industrialists have been primarily production men. They are now developing a marketing consciousness and are awakening to the need for more efficient industrial marketing methods. There is, therefore, now developing a whole new industrial marketing system, in which advertising agents as a whole have taken very little part as yet."

"Industry needs the counsel of men who have had your background of experience, who have studied and evaluated the ebb and flow in markets, who have applied sound principles to the problems of dis-

tribution. Industry needs men like you, who with the background of your present experience in consumer merchandising, can bring to play your keen powers of analysis, can apply your vision and courage to the problems of industrial marketing, which are basically and fundamentally different to those of consumer merchandising, and which will be found to have principles all their own."

American industry has been so intent on selling its goods in the cities, stated H. H. Charles, of the Charles Advertising Agencies, New York City, that it has almost overlooked the enormous possibilities among the farmers and their families. The money spent in all forms of advertising in 1925 reached the astonishing total of \$1,391,000,000, but only \$30,000,000 of this staggering amount went into advertising appealing directly to rural population.

"You have sold the city and almost forgotten the farm," said Mr. Charles. "The farm population in 1925 was more than 31,000,000. You have overlooked the buying capacity of about 42 per cent of our total population. You have made no effort or only partial effort to secure some of the annual agricultural wealth amounting to nearly \$13,000,000,000 for 1925. You have expended only \$1 a year per capita to reach the farmer and nearly \$10 per year per capita to reach the city dweller."

Among the farmers' needs which advertising can play a part in meeting, Mr. Charles mentioned hundreds of thousands of buildings that need paint and the demand for water systems, electric light and power plants, iceless refrigerators and radio. He said that the farm home was the logical place for radio and that "sales have steadily increased in spite of only half-hearted advertising."

Roy S. Durstine, of Barton, Durstine & Osborn, New York, retiring president of the American Association of Advertising Agencies, presided. Other speakers were E. L. Triffitt, of Brooke, Smith & French, Inc., Detroit; Henry T. Ewald, of the Campbell-Ewald Company, Detroit, and Newcomb Cleveland of the Erickson Company, Inc., New York.

"We look to the advertising agency to develop and increase advertising through adding to its productivity," said Mr. Braucher at one stage of his address.

"Obviously it is necessary for us to determine which agencies shall represent us in this capacity and for this purpose we make our investigation through the medium of the Periodical Publishers' Association, and of course have set up standards to which an applicant for recommendation must be able to conform and live up to."

"I have no hesitancy in saying that the advertising agent is the agent of the publishers. Stated more directly, you are our agents. We have the right clearly fixed and established by the Supreme Court of the United States to appoint whom we will as our agents and for any reason that we see fit, to reject an application for agency recognition. Literally speaking, the publisher pays the agent for service to himself, the publisher."

"You can readily see that that is the thing which gives us our usefulness to the advertising agency business. In selecting our agents we try to use the utmost care and to act only when we are convinced that new agents have some contribution to make to the advertising business. Of course, we have to deal with human beings and many of them are subject to the well known frailties."

The grand climax to the convention was unquestionably supplied by the recognition given to the national economic importance of advertising by President Coolidge in his address at the dinner tendered by the association at the Mayflower Hotel, Wednesday night.

(The President's address will be found

elsewhere in this issue of **EDITOR & PUBLISHER.**)

Cyrus H. K. Curtis, newspaper and magazine publisher, occupied a seat of honor near the President.

Following the President, addresses were delivered by B. Kirk Rankin, *Southern Agriculturist*, Nashville, Tenn., former president of the Agricultural Publishers' Association; John A. Park, *Raleigh* (N. C.) *Times*, president of the Southern Newspaper Publishers' Association; Kerwin H. Fulton, president, General Outdoor Advertising Company; and Edward T. Hall, Ralston Purina Company, St. Louis, president of the Association of National Advertisers. James W. Young, of the J. Walter Thompson Company, Chicago, was toastmaster.

Mr. Rankin emphasized the importance of the farm markets to the national advertiser, stressing the fact that in a recent survey covering the circulation of one farm publication, 89 per cent of its subscribers were found to be located in territory now served by manufacturers who are national advertisers in magazines and newspapers other than farm publications. This new audience, Mr. Rankin explained, can be added "without increasing selling expense" on the part of the advertiser.

Mr. Rankin emphasized the stability of the South's industry and agriculture, explaining that the recent decline in cotton prices soon will be adjusted and adding that 98 per cent of the spindles throughout the South were in full operation in September. The world consumption of cotton, he said, is 28 per cent above the pre-war record, "in face of fashions which cut 66.2-3 per cent off the length of the skirt."

S. M. Holliday, representing the General Outdoor Advertising Company, spoke in place of Kerwin H. Fulton, president of the company, who was called to Boston. He spoke of the growth of the outdoor advertising business and referred to it as a necessary adjunct of advertising, "but one that can't stand alone," urging for the industry the sympathy and co-operation of the advertising agencies.

Thursday's sessions were devoted largely to the discussion of reports of various committees, with addresses by T. E. Moser, Moser & Cotins, Utica, N. Y.; S. W. Page, George Batten Company, Inc., New York; Ernest Elmo Calkins, Calkins & Holden, Inc., New York; Charles W. Hoyt, Charles W. Hoyt Company, Inc., New York; Richard S. Humphrey, H. B. Humphrey Company, Boston; William H. Johns, George Batten Company, New York and Louis Honig, Honig-Cooper Company, San Francisco.

Edgar D. Mason, of the Albert P. Hill Company, Inc., of Pittsburgh, was chairman of the committee on convention plans. His associates comprised: John A. Dickson, Mitchell-Faust Advertising Company, Chicago; Ernest E. Dallis, Johnson-Dallis Company, Atlanta; C. L. Eshleman, the Griswold-Eshleman Company, Cleveland; Willard French, Brooke, Smith & French, Inc., Detroit; Louis Honig, Honig-Cooper Company, San Francisco; Richard S. Humphrey, H. B. Humphrey Company, Boston; Eugene McGuckin. The Eugene McGuckin Company, Philadelphia; T. E. Moser, Moser & Cotins, Utica; C. D. Newell, Newell-Emmett Company, Inc., New York; Rositer Holbrook, Nelson Chesman & Company, New York. Frank J. Reynolds, Albert Frank & Company, New York, headed the committee on hotel arrangements. The entertainment committee comprised Winthrop Hoyt, Charles W. Hoyt Company, Inc., New York, and Clarence W. Scully, Lord & Thomas and Logan, Washington.

At the open session on Wednesday, John Benson, of Benson & Gamble, of Chicago, spoke at length on profitable methods of conducting an advertising agency, and in his introduction gave statistical proof that the present credit standing of the members of the Association is remarkably high, credit being given by the speaker to sound business conditions and modern agency efficiency. Collections, he said, are in excellent shape; for, out of \$7,819,315.97 receivables at the close of 1925 fiscal year, only

half a million was overdue and losses throughout the year were negligible.

Mr. Benson gave credit for this collection showing to "the cash discount allowed agents by the publishers." Of this he said: "The cash discount is passed on to the advertiser for prompt payment and not only expedites collections, and thus saves a large capital investment, but it also serves as a danger signal. When an advertiser fails to take advantage of a cash discount, his credit is not right, for any man who can borrow at the bank at five or six per cent per year will surely take a discount of two per cent a month.

"The cash discount granted by publishers is a big safeguard for their own credit; it enables the agent to secure prompt pay from the advertiser, and thus have the money in hand for payment of the publisher's bills. The tendency some publishers have shown to eliminate the cash discount is unfortunate indeed. If it became general at all, there would be a marked falling off in agency credit. This the publisher can not afford. No measures he might adopt to secure prompt pay from the agent could long be effective if the agent can not collect what is due him before he has to pay the publisher. Few agents can afford to provide a large capital investment in their business. The margin is too small and certainly cannot safely be reduced by allowing clients a cash discount out of the 15 per cent. In a period of depression there would inevitably follow financial failures among agents and serious losses to the publisher."

The speaker analyzed what became of the 15 per cent agency commission, saying that the average net profit in 1925 was 2.63 per cent of volume. The average gross was 14.29 per cent. The difference represented expense, being divided by copy service, art service, research, contracting, solicitation, placing, checking, accounting and administration.

Mr. Benson held that, considering the skill required and the hazard taken, a net profit of less than 3 per cent was inadequate.

"Our problem is to make a better profit out of the 15 per cent commission paid by the publisher," he said. "That commission cannot well be increased. It is often inadequate in individual cases, but on the total volume of commissionable business placed through agencies it is as much as should be included in the cost of advertising in this country. An immense amount of service is rendered for this commission, both to the publisher and to the advertiser. The cost of rendering it is moving up very fast, in larger salaries for talent, in greater and better equipped facilities, in higher taxes. Only the steady and material increase in individual appropriations has kept net profit from vanishing altogether. The time is coming when volume of advertising may stabilize and give no increased support to profit; then an inten-

sive effort will have to be made to hold down expense, without lowering the grade of service modern advertising needs. This is a problem upon which the agencies themselves are hard at work, guided and aided by the Association; but they cannot solve it alone. They are so intimately involved with the other two sides of the advertising triangle, the publisher and the advertiser, that only by close co-operation can the cost of advertising service be kept down. In maintaining the agency commission at a uniform rate of compensation, the publisher has done much to standardize agency operation and keep down costs. The advertiser has not yet generally realized how important a part he could play in eliminating waste effort and reducing expense. By his giving prompt decisions, quick and constructive criticism, ready co-operation, and cutting down useless or ill-advised work, more agency effort might be available for real service and a better net.

"We need a better definition of agency service. There is little standardization of the kind and extent of it to be rendered without extra charge. Clients differ in their needs. One wants pure copy service; another, a study of markets; a third, sales help in the field or by mail. Obviously the cost of rendering service varies accordingly. One account may break even; another pay a profit; and a third lose money for the agent. And still all may be valuable clients having equal access to the organized facilities for service which the agency commission uniformly supports.

"Some agency minds have been studying this problem and trying to work out a classified schedule of service to be presented to a client in graphic form, so that he could indicate the amount and kind of service needed, and an arrangement be arrived at in advance as to compensation not covered by the regular agency commission. Based upon that schedule, a system of accounting might be devised to show the agent what it costs him to do business for a given client and whether he makes or loses money.

"Some helpful developments are in prospect along this line which, we feel sure, both advertisers and agents will welcome. Mr. Lynn Ellis has been making a thorough study during the past year, giving all his time to it, and the Four A's have a committee at work in charge of Fred Ross. Another committee in charge of Earle Clark is studying a better system of cost accounting.

"The more thoroughly one studies the financial and service structure of the modern agency, the more convinced one becomes that, in building up and maintaining the agency commission system, the publishers have done advertising service a signal benefit. That has made possible the strides in agency skill, in agency organization and in agency facilities which have been made in the last

twenty years. There has been little or no price rivalry. Competition has been put on an ability-to-serve basis. The best, not the cheapest, wins. And the whole cause of advertising has been supported. The same organized service has been made available to all advertisers, large and small. The more substantial earnings on the larger appropriations have helped to make good losses sustained by the agency in developing new business and in nursing smaller business through the early and critical stages of growth. The agent has thus been assured of a later reward when volume would repay advertising, as a whole, has been benefited by increased results. When he stops to consider that the great bulk of advertising lineage is made up of relatively small advertisers, the importance of good service is apparent in developing and keeping them alive.

"This is especially important to the publisher, whose future market for space would be jeopardized by poor service. If advertising results were lacking, advertising volume would soon shrink. The large advertiser also would suffer. Any material shrinkage in volume would compel the publisher to raise his rates, lower the effectiveness of his circulation. Space would either cost more or become less resultful. Ineffective advertising appeal would also impair public confidence in it. The large advertiser would pay more and receive less for his expenditure.

"Economically speaking, who pays the agent is a small matter anyway. The main thing is to earn what you get. And earning what you get in the agency field is a much broader question than immediately applies to a particular employee. He can not take a narrow view. He is an inseparable part of a community of interest affecting all business. He is directly dependent upon the welfare of the advertising, how well it is done, how much confidence it inspires, how prosperous are all related factors engaged in it. The old theory of looking out for yourself at the expense of the other fellow no longer applies.

"There is no divorcing the three sides of the advertising triangle, the advertiser, the publisher and the agent. They are inseparably linked in a single-hearted endeavor to make advertising pay. That is the agent's sole function. Everything that he does for advertiser or publisher is reducible to just that. In making advertising pay, he serves both masters at the same time and in the same act. He helps the advertiser to cash in on his investment and he makes a future market for the publisher's space. There need be no conflict between them. In obtaining for his client the most advertising for the money, the agent is helping the publisher; and on the other hand, he is helping his client in refusing to obtain unfair advantage for him at the expense of the publisher or of popular confidence in advertising appeal. The agent is a servant of both and the arbiter between them. He serves the advertiser directly, the publisher indirectly; and both look to him for the effective use of advertising.

"The agency commission system, serving both seller and buyer is right from an expediency standpoint. It works. That is in itself a complete answer. But it is also in line with modern developments of selling effort. The modern salesman is a servant of the buyer, his customer as well as the servant of the seller, his employer. In serving the former, he serves the latter."

Another address of interest at the session of Wednesday was delivered by Clarence D. Newell, of Newell-Emmett Company, of New York, who discussed the advertising agency in the field of business economics. He declared that through the increasing experience of the professional advertising man and the efficiency of organized advertising the percentage of waste and failure of advertising expenditures is being steadily lowered and the hazard of advertising steadily reduced.

"This statement," he said, "will be readily endorsed by such publishers as are in a position to compare the mortality of advertisers today with that of twenty years ago."

PRESIDENT COOLIDGE GIVES HEARING TO PUBLISHERS ON POSTAL RATES

PRESIDENT COOLIDGE is giving careful consideration to a request made by a delegation of newspaper and magazine publishers at the White House Wednesday for a revision of the Post Office department's budget and cost-finding system.

The delegation was headed by Cyrus H. K. Curtis, including R. J. Cuddihy, of the *Literary Digest*; A. J. Baldwin and A. C. Pearson.

No member of the delegation would discuss what transpired at the conference. **EDITOR & PUBLISHER** was informed authoritatively, the conference hinged upon the practice of allowing religious and fraternal publications preferred rates.

Brig. Gen. Herbert M. Lord, director of the Budget Bureau, was called into the conference. It was pointed out to the President that publications not on the department's preferred list are paying what their publishers consider unreasonably high rates, and are not responsible for

the Post Office department's deficit which is held partly due to the preference given the religious and fraternal publications complained of.

The suggestion was advanced at the conference that the department's budget system could be so revised as to justify lower rates on publications other than those listed as religious and fraternal. It was thought if through the budget system a revision of postal costs can be effected, without conflict with the existing "stop-gap" law which is likely to remain unchanged at the coming session of Congress, some relief may be afforded those newspaper and magazine publishers who are carrying so much of the department's excess overhead.

One objection raised to the department's system is that it makes sweeping distinction between preferred publications and those it classifies as commercial, with the result its cost findings are frequently at the expense of the latter.

NEWSPAPERS WIN TWO NEW A. B. C. DIRECTORS

Also Victors in Fight to Eliminate Rate Card Printing as Bureau Activity in Historic Chicago Convention—Town and Bryant New Board Members—All Officers Reelected

By WARREN BASSETT

Brilliant scene at annual A. B. C. banquet, at the Hotel La Salle, Chicago, Oct. 22, attended by more than 1,200.

A HURRICANE which started in New York City and spread rapidly over a large portion of the newspaper field burst full upon the annual Audit Bureau of Circulations convention in Chicago last week, shook the A. B. C. structure to its base, levelled the rate card issue and cracked open the board of directors.

As a result the Bureau in the future will confine its activities to collecting and disseminating circulation data only, and the newspaper division, which represents approximately 50 per cent of the total membership of the Bureau, will have four directors on the board instead of two. A corresponding increase of two directors was made in the advertiser division, making the total for this section 13 instead of 11. These measures were sponsored by the New York City members of the A. B. C.

The increase in newspaper directors does not mean newspaper control of the Bureau. Control still rests with the advertisers' division, which has 13 votes on the enlarged board out of a total of 25.

The majority of newspaper members went to the convention in fighting mood and emerged triumphant after over-riding the board of directors in both of the two main issues.

The stiffest fight centered about the attempt to increase the newspaper members on the board. It was dramatically won, but not until the newspaper members withdrew from the general convention Friday morning and passed an ominous resolution which might have been interpreted as a threat by some members to withdraw from the Bureau if their wishes were not respected.

The board, meeting Thursday night in a session that lasted from 6:30 p. m. to midnight, refused to grant the petition of the newspaper division for four additional directors. The New York City group and their more than 400 supporters realized a bludgeon stroke was necessary to overcome this attitude.

There was something in the air where all sections of the Bureau met Friday morning for the general session. President Harn called the meeting to order and Managing Director Clague read the annual report of the board. He finished and before he had laid the document on the table David B. Plum, general manager of the *Troy (N. Y.) Record*, a director for the newspaper division arose and requested an adjournment for ten minutes to allow the newspaper members to meet across the hall in the Red room.

The newspaper members filed out leaving the rest to wonder at the meaning of the move.

Once assembled, Director Plum called upon J. F. Bresnahan of the *New York World* to explain the purpose of the meeting. The latter declared he had information the board had refused to increase the number of newspaper directors, and that this ignoring of the wishes of the newspaper division called for some action. A resolution had been prepared, he said, which Fred A. Walker, managing director of the *New York Telegram* would read.

A portentous silence fell upon the group as Mr. Walker stepped to the platform and read the following resolution.

"Whereas, the board of directors of the Audit Bureau of Circulations has refused to give favorable consideration to a request unaimously endorsed by a meeting in which more than 700 members out of a total newspaper membership of 828, participated, and

"Whereas, this request did not involve even a suggestion of any change in the

recognized and approved principle that the advertiser members should constitute a majority of the board of directors, and

"Whereas, this indicates the ineffectiveness of any attempt of the newspaper members which constitute approximately 50 per cent of the entire membership to gain the representation on the board of directors which because of their numbers, their wide geographical distribution and their multiplicity of technical problems, they conceive rightfully belongs to them, and

"Whereas, this attitude of the board of directors may logically be taken to indicate its future attitude on this and similar proposals,

"BE IT RESOLVED, that a continuance of the present attitude of the directors, with the accompanying impossibility of amending the by laws without their approval, is a dangerous condition, most destructive of the influence of the Bureau and fatal to its future."

Asked whether the concluding phrase

"fatal to its future" was to be interpreted as a threat, Mr. Walker denied this, declaring the whole resolution to be merely an expression of the feeling of the newspaper members at being denied additional directors by the board.

Mr. Bresnahan then explained that the resolution did not cast any reflections upon the work of Mr. Plum, who, as the newspaper representative on the board, had favored increasing the directorate.

John Francis Neylan, of the *San Francisco Call-Post* was next to speak. He urged adoption of the resolution, saying the newspaper request had been a fair one, aiming merely at better representation, and not at disturbing the control of the Bureau. He asked Mr. Plum if it would be possible for him to disclose the division of vote on the board when the newspaper request was vetoed.

"I am not at liberty to say how it was divided," Mr. Plum said, "but I will say it was the closest vote ever taken on any subject since I have been a member."

Mr. Neylan then declared this to be another instance of the need for more newspaper directors. The vote of Walter Strong, who was in Europe, might have decided the issue favorably, he stated.

When Mr. Neylan finished, the resolution was put to a vote and passed unanimously. The extraordinary meeting was then adjourned and the newspaper members returned to the general convention.

A technical question then arose as to whether this resolution should be placed before the full convention at that time, or held and submitted after the resolutions committee had formally reported the veto of the request for additional directors.

President Harn speeded matters by telling the meeting the unfavorable action of the board, and while every member listened attentively Mr. Walker read the document.

Here was not only a solemn warning, but also an intangible threat. What would the board do, was the question uppermost in the minds of advertiser, agency, farm and business paper members, who now heard the resolution for the first time. Speculation was cut short by adjournment for lunch, the meeting to re-convene at 2:15 P. M.

But it was nearer 3:30 when the session opened again, and in the meantime the board of directors had been considering this new proclamation from the rebellious newspaper members.

Cheers greeted the directors as they came into the room where more than 900 delegates had been waiting almost an hour. They responded with broad smiles. But the climax was not immediate. The

The Advisory Board of the newspaper division of the Audit Bureau of Circulations photographed in Chicago last week. Left to right: Hugh A. O'Donnell, assistant business manager, *New York Times*; T. R. Williams, *Pittsburgh Gazette-Times* and *Chronicle-Telegraph*; David E. Town, Hearst general management, New York; David B. Plum, general manager, *Troy (N. Y.) Record*, and A. B. C. director; Gardner Cowles, publisher, *Des Moines Register-Tribune*. Mr. Plum, being a director of the Bureau, is not a member of the advisory board. The fifth member is G. M. Rogers, *Cleveland Plain Dealer*, who succeeded E. Lansing Ray, *St. Louis Globe-Democrat*, who declined re-nomination.

W. B. Bryant

secretaries of each of the six divisions read their reports of the separate Thursday meetings.

Then P. L. Thomson, publicity director of the Western Electric Company, New York, and chairman of the resolutions committee took the platform and presented three resolutions, the first eliminating the printing of rate cards as a bureau activity, the second increasing the newspaper directors from two to four, and adding two directors to the advertiser group, the third referring all other resolutions passed by various divisions to the board for appropriate action.

Each was passed unanimously. The newspaper division rebellion had won.

The text of the first two resolutions follow:

"RESOLVED that Section 2, Article 6, shall be amended to read as follows:

"The control and management of the Bureau shall be vested in a Board of Directors consisting of twenty-five (25) members, who shall serve without salary, each to be elected for a term of two years. Any vacancy occurring shall be filled by the Board at any meeting of the Board to hold until the next annual meeting."

"The Board of Directors shall consist of:

"Thirteen Advertiser (Class A) Members,

"Two Advertising Agent (Class D) Members,

"Four Daily Newspaper Publisher (Class F) Members,

"Two Magazine Publisher (Class F) Members,

"Two Farm Paper Publisher (Class F) Members,

"Two Business Paper Publisher (Class F) Members."

T. F. Driscoll

"RESOLVED that the charter and By-Laws of the Audit Bureau of Circulations be, and the same are hereby amended:

"The objects of the Audit Bureau of Circulation shall be to issue standardized statements of the circulation of publisher members; to verify the figures shown in these statements by auditors' examinations of any and all records considered by the Bureau to be necessary; and to disseminate circulation data only for the benefit of advertisers, advertising agents and publishers.

"Each report issued to members shall embrace verified figures and facts bearing on the quantity, quality, distribution of circulation and circulation methods; thereby enabling quality as well as quantity to be established. Facts, without opinion, to be reported."

President Harn, in announcing the increase in newspaper directors, said that the board would give full consideration to similar requests from other divisions.

A resolution was then passed praising the board and the officers for their work.

Adjournment followed, and the newspaper and advertiser sections held brief meetings to name their additional directors.

David E. Town of the Hearst general management, New York, and W. B. Bryant, publisher of the *Paterson* (N. J.) *Press-Guardian* were named by the newspapers, and T. W. Driscoll, advertising manager of Armour & Co., Chicago, and Verne Burnett of General Motors Corporation, Detroit, by the advertisers.

The board of directors then met and re-elected all present officers of the Bureau. They are: O. C. Harn, National Lead Company, New York, president; J. Murray Gibbon, Canadian Pacific Railway Company, vice-president;

The speakers' table at the luncheon given last week to publishers attending the A. B. C. convention by the Western Council of the Four A's. Left to right: James O'Shaughnessy, executive secretary, American Association of Advertising Agencies; Roy S. Durstine, president A. A. A. A.; Henry D. Sulzer, Cyrus H. K. Curtis, James Young, M. C. Meigs, publisher *Chicago Herald-Examiner*, and O. C. Harn, president, A. B. C.

Ernest I. Mitchell, Mitchell-Faust Advertising Company, Chicago, 2nd vice-president; F. R. Davis, General Electric Company, Schenectady, N. Y., 3rd vice-president; Walter A. Strong, publisher *Chicago Daily News*, secretary; E. R. Shaw, Power Plant Engineering, Chicago, treasurer; Stanley Clague, managing director.

Misunderstanding of the aims of the newspaper division caused strong opposition to its plans in other divisions, as reported in *EDITOR & PUBLISHER* last week. Resolutions were passed opposing additional newspaper directors so as to, alter control of the Bureau; but backers of the enlarged directorate insisted that the advertiser section be also increased so as to maintain a majority on the board. At no time was any move to upset the present control made.

Objection to the annual report of the board was voiced by the newspaper section. The sentence in question had to do with rate card printing and read: "The propriety or necessity of this added service of the Bureau has been questioned by a comparatively few members of the Bureau."

It was decided to withhold distribution of the report until a correction saying that the change had been questioned by a majority of the newspaper members was sent out simultaneously.

The report showed the Bureau to be in excellent financial condition. The cash

balance on Aug. 31, 1926 was \$101,371.24 as compared with \$71,881.05 at that time last year.

The excess of earnings over expenses for the year was \$26,959.85.

Of this sum \$24,428.63 was distributed to members in the form of a 7½ per cent rebate on dues. The balance covering liabilities to members stands at \$188,399.18. Out of a total of \$430,626.71 received from dues and sales publishers paid \$372,824.72, agents \$41,347.36 and advertisers \$16,454.63.

During the year, the Bureau added to its membership 112 advertisers, advertising agents and publishers. As against this, 11 publications were discontinued; 4 advertisers and advertising agents ceased business; 22 publications and 2 advertising agents were consolidated; 10 publications and 1 advertising agent were dropped from membership; there were 58 resignations, 40 of which were local advertisers.

The net result, after taking into account applications rejected, etc., shows a total membership and applicants for membership in the Bureau of 1,919, as of Oct. 6, 1926.

During the 12 months 1,402 audits were made, an average of 117 per month. There are 22 applicants for membership at the present time, 12 of them newspapers.

"The meeting was one of the most important ever held," President Harn told *EDITOR & PUBLISHER* after the convention.

"I believe the decisions arrived at will result in increased usefulness of the Bureau, a greater appreciation of not only its benefits but also the problems which must be met every month.

"This in itself will be a great aid to

David E. Town

"My hope was that the fundamental basis on which the Bureau was founded would be preserved; and this was maintained. Especially in view of the acquiescence of the leaders in the newspaper division that if at any time other divisions of the Bureau desired an increase on the board of directors, along the same lines as was decided upon for the newspaper division, they would have no objection.

"In regard to the rate cards, the board was animated only by a desire to serve the membership in making the A. B. C. service of greater value, and at the time the annual report was written it seemed that this met with the approval of a majority of the members—over 800 newspaper publishers' rate cards having been received, of which more than 700 were later approved.

"However, the membership at the convention decided that the service was not desired—which, in the final analysis, will relieve the executive officers of a considerable amount of work which would have been necessary had the rate card proposal been approved.

"I think, in justice to myself, it is proper to make this statement in regard to the rate card proposal, in view of the comment made on one paragraph of the annual report of the board of directors."

More than 1,200 members and their guests attended the annual A. B. C. dinner Friday night, the largest number ever attending.

The chief banquet speaker was Senator Pat Harrison of Mississippi, who assailed Vice-President Dawes' campaign against the Senate's cloture rules. He declared that if it succeeded it would act as a throttle to discussion. He said the present Senate rules are a safeguard against

Ralph Starr Butler

the Board of Directors because it is always easier for a governing body to perform its functions effectively when it knows that the larger organization for which the Board acts is giving sympathetic accord.

"I believe that the increased representation of the newspaper division on the Board will be of distinct benefit to the Board because a large proportion of the specific problems which have to be met from time to time arise in the newspaper field. An increase in the number of minds available for solution of these problems should make their solution more easy and more rapid. The acquiescence of the other divisions in this innovation after the matter was thoroughly understood speaks well for the spirit of real interest in the success of the Bureau as a whole on the part of all members."

President Harn said he did not believe that the success of the newspaper division in increasing their representation on Board would be followed by attempts to do likewise by other divisions.

Stanley Clague, managing director of the Bureau, made the following statement:

"The decision arrived at in the general session of the A. B. C. convention to add two newspaper members to the board of directors was in line with sentiments expressed by me at a meeting of the board held on the evening prior to the general session.

The Board of Directors of the Audit Bureau of Circulations and Bureau staff members at dinner meeting in Chicago, Thursday night, following divisional meetings. They are (left to right) seated: Marco Morrow, Capper Farm Press, Topeka; Ernest I. Mitchell, Mitchell-Faust Advertising Company, Chicago; Mason Britton, McGraw-Hill Company, Inc., New York; P. L. Thomson, Western Electric Company, New York; E. W. Chandler, chief auditor, A. B. C.; W. K. Towers, Paige-Detroit Motor Car Company, Detroit; O. C. Harn, A. B. C. president; Stanley Clague, managing director, A. B. C.; E. R. Shaw, Power Plant Engineering, Chicago; L. L. King, Goodyear Tire & Rubber Company, Akron. Standing: W. F. Hoffman, New York manager, A. B. C.; A. R. Petterson, assistant chief auditor, A. B. C.; J. L. McNab, attorney; F. R. Davis, General Electric Company, Schenectady; Ralph Starr Butler, Postum Cereal Company, New York; F. W. Stone, American Review of Reviews, New York.

Socialism and must be left as they are. "There is a no greater percentage than one bill in a hundred that is harmed by filibuster," Senator Harrison declared. "This percentage could easily be reversed if Mr. Dawes' plans materialized."

He also urged the lowering of certain tariff laws in order to permit European business to expand, enabling debtor nations to pay their debts.

Other speakers were the Rev. John Davis of New York and ex-Congressman Frederick Landis of Indiana, who urged that American newspapers live up to the freedom of thought and expression upon which they are founded.

Leaders from every branch of the publishing and advertising fields were present for the convention.

Some outstanding personalities present were:

P. T. Anderson and W. T. Anderson, Macon (Ga.) *Telegraph*; Herman Black, Chicago *American*; Norman B. Black, Fargo *Forum*; Paul Block, New York special representative and publisher of several newspapers; John S. Brohm, circulation director of the Crowell Publishing Company; Homer J. Buckley, of Buckley-Dement Co., Chicago, who is chairman of the Advertising Division of the Chicago Association of Commerce; George M. Burbach, St. Louis *Post-Dispatch*; Frank J. Burd, of Henry Declerque, Inc., Vancouver, B. C.; Frank T. Carroll, Indianapolis *News*; W. G. Chandler, of Scripps-Howard Newspapers, Cleveland; Gardner Cowles, Des Moines *Register-Tribune*; James C. Dayton, New York *Evening Journal*; T. F. Drummie, St. Johns *Telegram-Journal*; C. F. Jenkins, Farm *Journal*, Philadelphia; B. A. Forsterer, Oakland (Cal.) *Tribune*; John B. Perkins, Sioux City *Journal*; A. L. Shuman, Fort Worth *Star Telegram*; Ed T. Hall, president of the Association of National Advertisers; M. F. Hanson, Duluth *Herald*; W. W. Hawkins, vice-president of Scripps-Howard Newspapers, Inc., New York; Gil Hodges, New York *Sun*; Allen Hoffman, Scientific *American*, New York; Walter C. Johnson, Chattanooga (Tenn.) *News*; Verne E. Joy, Centralia (Ill.) *Sentinel*, acting president of the Inland Daily Press Association; Eugene Kelly, manager of the Sioux City (Ia.) *Tribune*; Horace Klein, Webb Publishing Company, St. Paul; Malcolm Muir, president of Associated Business Papers, New York; Fredrick E. Murphy, Minneapolis *Tribune*;

Jesse H. Neal, secretary-treasurer of Associated Business Papers; W. Frank McClure, of Albert Frank & Co., Chicago; W. H. Neal, St. Paul *Daily News*; A. G. Newmyer, New Orleans *Item-Tribune*; Millar McKnight, Consolidated Press, Ltd., Toronto; Walter W. Manning, *Woman's World* Chicago; Hugh A. O'Donnell, assistant business manager, New York *Times*; John C. Martin, New York *Evening Post* and *Philadelphia Public Ledger*; E. T. Meredith, *Successful Farming*; former Secretary of Agriculture; John A. Park, Raleigh (N. C.) *Times*, president of Southern Newspaper Publishers Association; Paul Patterson, Baltimore *Sun*; Wiley L. Morgan, Knoxville (Tenn.) *Sentinel*; G. Logan Pagne, former publisher of the *Washington Times*; A. W. Shaw, *System, Factory*, and other periodicals; Carl C. Proper, president of *People's Popular Monthly*; Major John W. Sifton, Winnipeg *Free*

Press; William H. Rankin, William H. Rankin Advertising Agency, New York City; E. Lansing Ray, St. Louis *Globe-Democrat*; H. A. Sprague, St. Joseph (Mo.) *News-Press*; John C. KEY MAN IN MELLETT MURDER FOUND

Pat McDermott Arrested and Lodged in Canton Jail Under Murder Indictment—Believe He Can Clear Up Crime

By CHARLES E. MORRIS
(Publisher, Canton (O.) *Daily News*)

CANTON, O., Oct. 28.—Patrick Eugene McDermott, the elusive "key man" in the prosecution of the murderers of Don R. Mellett, crusading publisher of the *Canton Daily News*, is now in the Stark County workhouse here, held to answer to indictment for murder.

Resentful at the act of his relatives at Nanty Glo, Pa., who lured him to his home by news of his mother's critical illness and then surrendered him to the authorities last Sunday, McDermott has declined to tell his story unless he is promised complete immunity. He has, however, admitted that he could clear up the mystery, and as this dispatch is written there is a race between Prosecuting Attorney McClintock and the attorneys for McDermott's co-defendant as to which party shall get McDermott's story first. The race is being run at the court house through a series of motions by the other defendants, which the prosecutor charges are part of the attempt to have McDermott keep silent and take his chance with the others against the web of circumstantial evidence the state has to present.

It was learned today that during the three-month man hunt, McDermott was living in a luxurious apartment in Cleveland and the state is now seeking to learn who supplied his funds, and who was the "black haired man" living with him.

Relatives of McDermott are here working with the state authorities in the effort to get him to confess and throw himself on the mercy of the court.

They caused him to surrender only after they had convinced themselves of his complicity in the Mellett murder and because they believed his better course would be to tell his story.

The hunt for McDermott started shortly after the murder on July 16, when Steve Kascholk, who had entered a conspiracy to "beat up" Mellett and then withdrew when it came to murder, told his part of the story. Heretofore two other witnesses whose names are withheld told how they had been approached by McDermott to join in "the killing of an editor." The trail seemed lost and prosecution at a standstill when Mellett's newspaper brought in its own investigators, and they, starting with the underlying causes, brought the connection to McDermott and Kascholk, and presented a state of facts to the grand jury which resulted in the indictment not only of McDermott, but of Louis Mazer and Ben Rudner, alleged "go-betweens" in the employment of the killers. Following the indictment the trail for McDermott was again taken up until finally Detective Ora Slater convinced McDermott's relatives that "Pat" should be surrendered, promising that if he gave himself up he would be given "a square deal."

The trial of Mazer is set for Nov. 8, and that of Rudner immediately to follow. This procedure will continue if McDermott confesses, otherwise McDermott, as the "key man," will be placed first on trial. Whatever the procedure, the prosecuting attorney will reassemble the grand jury, asserting confidence that he not only has evidence that will convict the three men, but sufficient to secure additional indictments.

Meantime District Attorney Bernstein of Cleveland is pursuing his investigation of the conspiracy to violate the liquor laws, out of which the Mellett murder grew. He has already held Mazer and Rudner to the Federal grand jury along with Carl Studer, their chief, who since has been sent to the state penitentiary for operating houses of ill-fame.

The Federal authorities also look upon McDermott as a "key man" who will involve certain officials.

W. E. WINES NAMED TO DIRECT NEW A.N.P.A. MECHANICAL BUREAU

Will Be Introduced to Membership and Develop Plans for Press Room Standardization at Association's Fall Convention at French Lick, Ind., Nov. 10-12

W. E. WINES, now assistant professor of mechanical engineering, extension division, University of Wisconsin, will be the manager of the new mechanical department of the American Newspaper Publishers Association, L. B. Palmer, managing director, announced this week, confirming reports previously published by EDITOR & PUBLISHER that Mr. Wines was being favorably considered for the position.

Mr. Wines, together with W. J. Mathey, manager of the recently organized traffic department, will be formally introduced to the A. N. P. A. membership at the second annual fall convention to be held at French Lick, Ind., Nov. 10-12. Present indications are that this convention will draw a record crowd.

Plans for making these two new membership service departments of the A. N. P. A. of utmost benefit to the members will be discussed in detail. Mr. Mathey has already been able to protect members against excessive railroad rates and will be available for consultation regarding any individual traffic problems.

"The first efforts of the mechanical department will be directed to gathering and disseminating among members all available mechanical statistics," Mr. Palmer told EDITOR & PUBLISHER this week. "Later the efforts will be directed toward standardization of press room equipment."

"The department is really intended to be a service station for the use of the membership and will at all times be ready to assist and advise members in mechanical problems."

Mr. Wines received his education in Chicago public schools and at the Armour Institute of Technology, after which he spent two years doing mechanical construction work and drafting. Later he became connected with the mechanical department of the *Minneapolis Tribune* where he remained eight years. Subsequently he was connected with the mechanical departments of the *New York Times* and the *Chicago Tribune*.

In addition to consideration of mechanical and traffic questions, the French Lick convention will be a trading post of ideas for creating greater newspaper revenues. "Greater Revenue" is the keynote of the convention and W. B. Bryant, *Paterson* (N. J.) *Press Guardian*, chairman of the program committee, is choosing as speakers men who have proved their expertness in successful newspaper management. Increasing revenue from advertising and circulation departments will be two of the topics discussed.

That the membership is expecting that this year's meeting will duplicate the White Sulphur Springs success of 1925 is indicated by the fact that reservations so far received are far ahead of last year. Because of the large numbers planning to attend, there is a possibility that a special section of the St. Louisian, will be taken over by the A. N. P. A. delegates leaving New York at 4:50 P. M., Nov. 8. E. P. Adler, publisher of the *Davenport* (Ia.) *Times*, has chartered a special car to carry executives of the Lee Syndicate of Newspapers to French Lick from Chicago. Other special cars may be made up at other points.

Golfers among the A. N. P. A. are promised a paradise at French Lick. Each afternoon during the convention will be given over to this sport, with a qualifying round the first day, handi-

cap, the second, and special events for the final afternoon. Prizes will be awarded winners in each event. There are two golf courses at French Lick and both will be thrown open for A. N. P. A. delegates.

Elzey Roberts, *St. Louis Star*, is chairman of the golf committee, which consists of E. J. Fehn, *Evansville* (Ind.) *Courier-Journal*; E. K. Gaylor, *Oklahoma City* (Okla.) *Oklahoman*; Hilton U. Brown, *Indianapolis News*; and J. L. Mapes, *Beaumont* (Tex.) *Enterprise*.

A schedule for increasing the membership of the A. N. P. A. will be mapped out at a special meeting of the membership committee under the chairmanship of E. H. Butler, *Buffalo Evening News*.

G. B. LONGAN SUCCEEDS STOUT ON K. C. STAR

New Managing Editor Has Served 26 Years on Daily—Was Assistant M. E. Under Late Executive

KANSAS CITY, Mo., Oct. 28.—With the death of Ralph Stout, George B. Longan, news editor and assistant managing editor, who has been acting managing editor practically for the last two years, becomes managing editor of the *Kansas City Star*.

The *Star*, fortunate in its organization, has retained at the end of a dozen years from William R. Nelson's death, practically all of the executives who were trained under that great newspaper chieftain. When Ralph Stout dropped out the organization was prepared. Mr. Longan, who had been with the *Star* 26 years, 15 years during the lifetime of Mr. Nelson, already had the operating reins in his hands, so there was not a ripple in the *Star* office except that occasioned by the personal loss of managing editor who had been there 21 years.

George B. Longan is a Missourian, born 47 years ago, just outside Kansas City. Both of his great-grandfathers on his father's side came from Virginia to Missouri 100 years ago. Both grandfathers, George W. Longan and Moses E. Lard, were pioneer preachers of the Christian Church. The father of the *Star*'s new managing editor was in the Kansas City school system for 30 years, being assistant superintendent at the time of his death.

George Longan became a reporter of the old *Kansas City Times* 28 years ago. Two years later, he went to the *Star* and later held the positions of telegraph editor, city editor, news editor, and assistant managing editor.

Mr. Longan is married and has two children, both girls, one of whom is the wife of Dale Beronius, Kansas City artist who established himself in New York two months ago and is now with the *New York American*.

RECEIVER APPOINTED

Three Stockholders of Atlantic City Times Take Case to Court

Vice-Chancellor Robert H. Ingersoll last Saturday appointed Leonard D. Algar, banker and merchant, temporary receiver for the News Publishing Company, publisher of the *Atlantic City* (N. J.) *Times*, an evening and Sunday newspaper which began publication April 11, last.

The company was ordered to show cause on Tuesday why the receivership should not be made permanent. Application for the receivership was made by Frank Gravatt, Charles I. Lafferty and Newton W. Spence, stockholders.

The application lists the company's liabilities as \$167,000 in bills payable,

\$87,000 in promissory notes, and a \$62,000 mortgage on the newspaper's plant at North Carolina Avenue and Absecon Boulevard, having an appraised valuation of \$340,000, including the equipment. According to the petition, \$500,000 in stock was authorized, and only \$210,000 was sold.

The Vice-Chancellor authorized the receiver to continue publication. George F. Goldsmith, Sr., formerly of Philadelphia, is president of the News Publishing Company. Francis C. Richter is managing editor.

AN INVESTMENT IN HARMONY

Moline (Ill.) Daily Dispatch Unites Dividend Business Organizations

What Merritt W. Campbell, associate editor, calls "a good investment, although a novel one," has just been made by the *Moline* (Ill.) *Daily Dispatch*, the city's only daily. It might be called an investment in harmony. Local business was in the throes of a civil war. There was no commercial organization common to all. "The very fact that the community was so divided along business lines presented the basic problem of who should lead them to a point where there should be unity," said Mr. Campbell.

The paper arranged a dinner in the leading hotel, attended by nearly 400 business and professional men, at which jealousies were forgotten. The 400, according to Mr. Campbell, are "now on their way to give new life to the Chamber of Commerce or the rejuvenated body, whatever its name may be."

H. P. WARRINGTON BUYS LAWRENCE TELEGRAM

Business Manager of Wilmington (Del.) Sunday Star Takes Control from F. W. Enwright—Will Divide His Time Between Two Cities

Horace P. Warrington, for the past 11 years business manager of the *Wilmington* (Del.) *Sunday Star*, has purchased the *Lawrence* (Mass.) *Evening Telegram* and *Sunday Sun* from Frederick W. Enwright. The consideration was not disclosed. The transaction was closed by Palmer, Dewitt & Palmer, New York.

Mr. Enwright acquired control of the *Lawrence* papers last June from the estate of the late Benjamin S. Pouzzner of Lowell, Mass. The new owner, Mr. Warrington, will divide his time between *Lawrence* and *Wilmington*.

Announcing the transfer the *Telegram* stated:

"Mr. Warrington's many intimate contacts with banking and industrial enterprises, together with his present extensive newspaper interests, bring to the *Telegram* a publisher of the highest repute and one in whom the tradition of the two papers will meet a sympathetic support and an energetic promotion."

ADDS SPORT PICTURE PAGE

The *New York American* this week added a page of sport pictures as a new daily feature.

Lansing Auto Supply Dealer Gets Court Injunction When Paper Rejects His Copy—Dealer Had Year's Contract

(By Telegraph to EDITOR & PUBLISHER)

LANSING, Mich., Sept. 27.—An injunction order has been issued by Judge Le-lan W. Carr, of Ingham County Circuit Court, compelling the State Journal Company, publishers of the *Lansing State Journal*, to accept the advertising copy of the Collier & Lee Auto Supply Company under that concern's contract. Hearing in the matter late last week failed to bring out citations of any parallel cases on which the court might base its decision.

It was shown that the accessory company had a year's contract with the defendant newspaper, that the contract did not specify that the newspaper had a right to edit or reject advertising copy, that certain copy advertising a certain well-known make of radio batteries at a price said to be but a cent over wholesale was rejected by the paper after a similar advertisement had once been accepted.

Counsel for the advertiser argued that, because the company possessed an unexpired contract which had no provision for rejecting copy, the injunction should be issued to prevent the company from sustaining a loss on the stock of batteries which, it was claimed, could not be sold without the use of Journal advertising.

Defense counsel tried to maintain the position that a newspaper always has the right to reject or demand changes in advertising copy. Charles N. Halsted, president of the State Journal Company, said the case will probably not be carried to Supreme Court, but the newspaper will accept the plaintiff's copy in compliance with the injunction order, for violation of which a penalty of \$10,000 may be collected by the court.

The copy had not been resubmitted up to Wednesday of this week.

Mr. Halsted said that all contracts now being entered into by the paper with advertisers contain the proviso that the publication shall have the privilege of passing on all advertising matter submitted. The old local contracts omitted this clause, although foreign advertising contracts contained such provision.

CORRECTION

In a recent picture caption in EDITOR & PUBLISHER it was erroneously stated that Marshall N. Dana was associate editor of the *Portland Oregonian*. He is associate editor of the *Portland Oregon Journal*.

CANADA PAPER EXPORTS HIGH

Bureau Reports Increase of \$15,570,-856 in Nine Months Period

The Dominion Bureau of Statistics in Ottawa this week reported that exports of pulp and paper from Canada during September were at a high level, being valued at \$15,219,210, an increase of \$1,268,389 from August, and of \$1,544,204 over September of last year.

For the nine months to Sept. 30 they were \$127,090,721, an increase of \$15,570,856 from the corresponding period of last year. Pulp accounted for \$38,371,467, as against \$34,181,917 in 1925, and paper for \$88,719,254, as against \$77,337,948.

For the twelve months ended on Sept. 30, 1926, the combined exports showed an increase of \$22,165,806 over those of the preceding twelve months. News print was the largest single item. In September exports of this product were 143,523 tons, valued at \$9,460,633, as against 149,935 tons in August, valued at \$9,865,830, and 116,277 tons in September, 1925, valued at \$8,190,000. In the twelve months the exports totaled 1,646,494 tons, against 1,330,137 tons in the preceding twelve months.

86-PAGE REGULAR ISSUE

St. Louis Post-Dispatch Sets Record—560 Columns of Advertising

With an 86-page issue, containing 560 columns of paid advertising, the *St. Louis Post-Dispatch* on Friday, Oct. 22, established what is believed to be a new world's record for a regular week-day issue of any newspaper published in any of the leading cities. This is the fourth time in two years that the Post-Dispatch established a similar record.

Retail merchants' advertising was largely responsible for the Post-Dispatch establishing its new record. Famous & Barr Company used an entire section of 16 pages to advertise one day's selling on Oct. 23. Stix, Baer & Fuller Company used 10 pages in the issue also for that day's selling only. Nugent's used four pages, and Scruggs, Vandervoort & Barney 2½ pages. These are department stores.

200 SEEK TO REPORT HALL-MILLS TRIAL

And Court House Press Section Can Seat Only 74—Newspaper Bill Estimated at \$600,000 Exclusive of Salaries

More than 200 applications have been received from newspapers for seats in the press section of the Somerville, N. J., court house during the Hall-Mills murder trial scheduled to open Nov. 3, and there are only 74 seats available, according to James Kevin McGuinness, of the *New York Evening Post*, who reported preparations for the trial for his paper last week. He wrote in part:

"There will be telegraphers, photographers, celebrities, editors, common and extraordinary nuts and mere reporters flowing steadily into town soon; all of whom, except the nuts, will be a considerable expense to the newspapers of the country.

"Estimates are notoriously inaccurate trifles, and never can they include such items as retaining fees to gentlemen, or lady authors who have written murder and mystery tales, but the cold facts of telegraph tolls, expenses for lodgings, and sundry items—exclusive of salaries—will total, during the four weeks of the first trial, more than \$200,000 for thirty representative papers. If you have a flare for figures, you can add salaries, multiply the whole sum by three and have something approximating the cost to the newspaper world at large of seeing an acknowledgedly backward male, his sister, brother and cousin brought to justice.

"Momentarily, there are thirty-odd newspaper correspondents in town who flow languidly in and out of the dazzling marble County Court House. In that monument to justice, by the way, is assembled pretty nearly all the marble in the county, except for a few headstones, and the majority of even those are granite."

TREANOR AGAIN HEADS MICHIGAN PRESS

Saginaw News-Courier Man Re-elected President at Ann Arbor Meeting Closes—McNitt, Lawrence and Hopwood Speak

The University of Michigan Press Association brought its eighth annual meeting at the Michigan Union, Ann Arbor, to a close last week by re-electing the officers which have served the organization during the past year. They are:

president, A. R. Treanor, editor, *Saginaw News Courier*; vice-presidents, Louis Wild, *Port Huron Times-Herald*; George Averill, editor, *Birmingham Eclectic*; Frank Russell, *Marquette Miner*; secretary and treasurer, Prof. John L. Brumm, head of the school of journalism, University of Michigan. In pursuance of the association's desire to promote co-operation between the Michigan Press and the University school of journalism the press club authorized the appointment of a committee of Michigan newspaper men to co-operate with the journalism department in an advisory capacity.

The relation of the press to various outside enterprises was the main topic discussed at the session on Friday morning. The speakers and their subjects were Fred Newton Scott, Professor of Rhetoric, "Standards of English and the Newspaper"; Wilbur R. Humphries, Assistant Dean of the College of Liberal Arts, "The Bible and the Newspaper"; Lawrence H. Conrad, Instructor in Rhet-

A. R. TREANOR

oric and author of "Temper," "The Way It's Written"; Virgil V. McNitt, president, McNaught's Syndicate, "Standardization"; John B. Waite, Professor of Law, "Crime Waves."

The program Friday afternoon followed the same policy and was as follows: "Michigan's First Greenland Expedition," William H. Hobbs, Professor of Geology; "The Newspaper and International Relations," Thomas H. Reed, Professor of Political Science; "Experiences Abroad with the Associated Press," S. B. Conger, Detroit correspondent for the Booth newspapers; "A Half-Century of Newspaper Work," G. V. Adams, publisher of *Fowlerville Review*.

The annual press club dinner was given for about 200 members and guests Friday evening. The speakers were David Lawrence, Washington correspondent and publisher of the *United States Daily*; Erie C. Hopwood, editor, *Cleveland Plain Dealer*, and Fielding H. Yost, football coach at the U. of M. Mr. Treanor was toastmaster.

Weekday and Sunday

THE WEEKDAY EDITIONS of The New York Times are the greatest influence on the purchasing power of the New York metropolitan area on the business days of the week.

The average net paid circulation of The New York Times weekday editions for the six months ended September 30, 1926, was 358,350—a gain of 7,944 over the corresponding period of the previous year.

<i>Six months ended September 30, 1926.....</i>	<i>358,350 copies</i>
<i>Six months ended September 30, 1925.....</i>	<i>350,406 copies</i>
<i>Increase.....</i>	<i>7,944 copies</i>

The present circulation of The New York Times weekday editions is 370,000 copies—larger than that of any other New York morning newspaper of standard size.

The New York Times advertising columns are consulted every morning by men and women purchasers in hundreds of thousands of homes of Greater New York and the surrounding suburbs.

In ten months of this year The New York Times has published approximately 14,480,000 agate lines of advertising in weekday editions only, about 4,730,000 lines more than the second New York morning newspaper. The Times weekday editions showed a gain of 700,000 lines over the corresponding period of last year.

The quality of The New York Times circulation is not equalled by that of any other newspaper. The Times advertising censorship has established the strongest confidence of its readers.

The average net paid weekday and Sunday circulation of The Times is 391,465 copies.

WILLIAMS REPORTS ON WORLD MEETING

Press Congress Plans Conference to Attack Government Censorships—Would Have News Services Identified

A resolution calling for a world conference sponsored either by the League of Nations or various world powers to consider international news communications with the view to abolishing many of the governmental and dictatorial restrictions which are now imposed upon news services was one of the outstanding accomplishments of the Press Congress of the World at its Third Assembly in Geneva-Lausanne, Switzerland, Sept. 14-18, Dean

DEAN WILLIAMS

Walter Williams, the new Honorary President of the Congress, declared upon his arrival in New York this week. A committee will be appointed to promote the conference.

Another important accomplishment was the decision to appoint a committee on freedom of the press to function for the Congress whenever cases arise involving freedom. Another committee on journalistic education will be named.

The Congress also provided for the formation of a World Press Council, to be composed of 50 leading journalists of the world, which will give counsel on subjects of journalistic interest. Dean Williams has been named chairman of the council, the other members to be named later. The Congress also laid plans for a paid secretary with headquarters in New York.

New officers of the World Press Congress are: Robert Bell, of Christchurch, New Zealand, proprietor of the *Littleton* (N. Z.) *Times*, president; Wallace Odell, publisher of the *Tarrytown* (N. Y.) *Daily News*, secretary-treasurer. Mr. Bell succeeds Dean Williams, while Mr. Odell succeeds James W. Brown, of

EDITOR & PUBLISHER. The new president is a member of the British Empire Press Union and was chairman of the New Zealand delegation to the Press Congress. It was on his motion that the Congress was formed in 1915 at a meeting of representatives of the press in San Francisco. Mr. Odell is a past president of the National Editorial Association.

Another resolution passed at Geneva called for the identification of news agencies, to indicate whether they are privately owned or government controlled.

Speaking of this resolution Mr. Williams said: "It means a great deal to the newspaper reader to know the source of the news he is reading, to know whether it has been reported as straight news or sent out in behalf of a specific government."

More than 30 countries were represented at the Congress, Mr. Williams said, and delegates were from all branches of the newspaper profession.

While in New York, before returning to the University of Missouri where he directs the journalism school, Dean Williams was tendered a dinner by former students of the School of Journalism of the University of Missouri.

FRIENDS SEEKING T. C. COULTER

Two old-time friends of Todd C. Coulter during the time he was in the Pacific Northwest nearly twenty years ago would like to hear from him or learn of his whereabouts. In 1907 Mr. Coulter was in the classified advertising department of the *Tacoma Ledger*, but since his departure no word has been learned concerning him. Those desiring the information are James E. Macpherson and Woodburn McDonald, then associated with Coulter

on the *Ledger*. Mr. McDonald is now assistant to the publisher of the *Seattle Post Intelligencer* and Mr. McCaperson is comptroller and assistant treasurer of the *Tacoma News Tribune and Ledger*. Information communicated to either would be appreciated.

RADIO PICTURES PRAISED

Bartholomew, London Daily Mirror, Reports Progress

Considerable progress has been made in development of the machinery for transmitting pictures by radio, telegraph and cable, H. G. Bartholomew, art editor and a director of the *London Daily Mirror*, declared when interviewed prior to his return to London last week on the S.S. Olympic.

"Sending pictures across the Atlantic or the Pacific ocean will always be expensive," he said, "but it is worth it. The new methods of rapid picture transmission developed recently have come to stay."

Mr. Bartholomew is often called the "dean of picture editors." He is a frequent visitor to this country, studying the picture angle of American newspapers.

Another passenger on the Olympic was Sir Pomeroy Burton, former managing director of the Associated Newspapers in London, who, with Lady Burton, spent three weeks in the United States visiting friends.

CATHOLIC WRITERS MEET

With Kent Cooper, general manager of the Associated Press, as principal speaker, the Catholic Writers Guild opened its winter season of regular monthly meetings Oct. 21 at Guild Hall, New York. Mr. Cooper stressed the importance of "selective news," urging those present to take more interest in foreign affairs. Melville E. Stone, counselor of the Associated Press, spoke briefly in praise of Mr. Cooper.

JEWISH DAY TO CELEBRATE

The *Day*, a Jewish Daily published in New York, will celebrate its 12th anniversary Nov. 7, with a concert at Carnegie Hall. Proceeds of the concert are to go to a fund to be used in aiding the destitute Jewish writers of Europe, especially in Russia.

ELGIN DAILY MOVES TO NEW HOME

Courier-News Now Printing from Remodelled Building—Col. Ira C. Copley Is Editor and Publisher

The *Elgin* (Ill.) *Courier-News* this week occupied its new home at South Spring and DuPage streets, transferring its activities from the publication and editorial rooms in the Odd Fellows building over the week-end. The new publishing plant site was purchased last Spring and has been completely remodeled and equipped until the paper now claims the finest newspaper plant in northern Illinois. Colonel Ira C. Copley is owner and publisher.

Two modern Duplex tubular presses, with 24-page capacity print the paper. Cutler Hammer conveyors carry the papers to the circulation and mailing rooms 65 feet distant. Beside the press and circulation departments the stereotyping room is also located on the basement floor. Temporary business offices have been located at the rear of the first floor, but will eventually be extended to occupy the entire first floor with the main entrance at the corner now under lease to a fashion shop.

The composing room is on the second floor, rear, with 12 linotypes, two matrix making machines, 50 makeup tables and proportionate mechanical equipment. The editorial rooms are on the southeast section of the second floor.

D. A. McKenzie is president and general manager of the *Courier-News* company, representing the consolidation with in the last year with the *News*. John E. Thompson is managing editor; Raymond Long, advertising manager; Howard Jones, circulation manager; Paul E. Jacoby, city editor; Wallace Stericker, head pressman and Alex M. Clark, superintendent of the composing room.

WOULD DEPORT EDITORS

U. S. Brings Action Against Three Portuguese Tabloid

Diamantino Teixeira, Antonio Di Costa and Antonio Alves Perriera, publishers of *A Luta*, a Portuguese tabloid in Fall River, Mass., will be given hearings in Providence, R. I., Thursday to show cause why they should not be deported by the government which alleges the publication by the men in their tabloid of articles advocating the overthrow of organized government.

Deportation proceedings were temporarily halted by the securing of habeas corpus writs from the Federal Court on Oct. 14 by their attorneys.

JAPANESE DELEGATION ARRIVES

A party of Japanese business men organized by the *Osaka Mainichi* of Tokyo, to make a study tour around the world, was scheduled to arrive in New York Oct. 25. Shiro Nagaoka, staff correspondent of the newspaper, is with the party.

Richmond Spends Thousands of Dollars for Automobiles and Accessories

Richmond enjoys continuous and general prosperity. As a result her citizens own and maintain many passenger automobiles and a large number of business trucks.

The tremendous amount of money spent annually in Richmond for the purchase and upkeep of these automobiles not only gives employment to hundreds of citizens—it also means that as an automobile market Richmond has tremendous purchasing power.

And because Richmond's prosperity is a continuous thing, it is always a good automotive market. Richmond does not go through periods of deflation. Its business interests are too diversified to permit of marked business fluctuation.

Richmond is always ready and able to buy the necessities and luxuries of life.

SALES EXPERT TELLS HOW TO USE NEWSPAPERS TO MOVE GOODS

Outstanding Feature of Sale Advertising Should Be Newsiness, Says T. K. Kelly—Declares Newspaper Space His Company's Greatest Ally—Describes Best Selling Copy

By HAMMOND EDWARD FRANKLIN

THE Judith Hardware Company of Lewiston, Mont., had a heavy overstock.

It was during the post-war inflation. The Judith Basin, which is the name of the Lewiston territory, had been hard hit by low prices and poor weather. The store felt it necessary to cut its stock down from a war-time basis to that in keeping with the new times and to realize all the cash possible, but there was a serious question as to the buying power of the territory—whether it could be done.

The stock of farm implements was selected for a special campaign, with hardware incidental. The representative of a nationally known selling organization took charge, and a striking campaign in the *Lewiston Democrat-News* was mapped out.

Within 10 days, the store had obtained \$16,000 cash from a population at the time reputed to be "broke." Newspaper advertising, used in the right way, had had much to do with this result.

Newspaper advertising managers and local solicitors are being called upon for sound advice as to how to put across sales. Sometimes, the newspaper executive even writes the copy and plans the details. If the effort falls down, the newspaper is blamed. If it proves a success, "glory" is reflected on all concerned.

Thomas K. Kelly of Minneapolis, head of the Kelly Sales System, has spent a lifetime in the conduct of quick sales and in the solution of retail problems for all sorts of stores. He himself has staged successful clearances in towns as small as 25 inhabitants as well as big cities. He has between 200 and 300 associates who are working with dealers, and who in many cases are demonstrating how newspaper advertising should be used by a store the year 'round, as well as on drives.

For the benefit of EDITOR & PUBLISHER readers, Mr. Kelly has set down some observations on what to do and what not to do.

"Newspaper advertising is our greatest ally in carrying on our work of conducting sales throughout the United States," he brought out after citing dozens of cases of success.

"The outstanding feature of sale advertising should be newsiness. That is what our people work for. Each item presented in the advertisement is put forward not merely as an article to be sold, but as a news event. Each item is big news to someone, for it is merchandise that someone needs, that will fill long-felt wants and is available at money-saving prices. That is certainly important news.

"The headlines, or flash lines, and sub-heads might well have come from a newspaper copy desk.

"Whenever prices that discount prevailing retail prices for the article advertised are quoted, a logical, clear reason is given for these prices. We lay the reason for these prices before them in a way that secures their confidence and obtains a proper response.

"In addition to the printed word, illustrations are used to describe the merchandise, and we insist on thorough description of the merchandise offered. No advertisement worthy of the name can be simply a catalog of prices. It must contain description in detail. This should deal not only with quality and style, but also uses and advantages, for a person must understand the wants it is able to satisfy and the uses it will perform before he can have a definite idea of its value to him. This kind of advertising gets a better average of prices than can be obtained in any other way.

"As to the price leaders—they are se-

lected from the stock that the merchant is most anxious to sell. They must be items in general demand and whose established retail price is known—otherwise there is no standard of comparison by which the public can judge. Every piece of copy has certain preferred positions, and these should be devoted to those items that bring in the most money.

"I have seen the best space in advertisements used up in playing 10 cent handkerchiefs for 5 cents, which illustrates a mistake commonly made. That space should be devoted to either a leader that will attract a large number of people or else to merchandise that amounts to something, of sufficiently high unit value to bring in a good volume of money.

"In long years observing merchants in putting on sales, I have found ten main reasons why so many merchants fail to put over successful sales. They are:

"1. They try to get their sale ready in a few days, because their competitor is going to have a sale.

"2. They fail to use sufficient time to prepare good advertising, they fail to have cuts drawn by commercial artists and to have the advertising distributed over a broad territory with enough thoroughness.

"3. They copy advertising that has been used before.

"4. They permit inexperienced advertising writers to prepare their sales advertising.

"5. They fail to give complete description of the merchandise offered.

"6. They fail to be specific in their advertising, depending upon mere generalities to produce the needed selling force.

"7. They show reductions in advertising that appear unreasonable to the public.

"8. There is a lack of confidence on the part of the clerks that the sale will be a huge success.

"9. The store and stock are not properly arranged for a special merchandising event.

"10. Indifference on the part of the sales people due to lack of ability, lack of education in scientific selling or absence of loyalty to the store in selling trade.

"Of course, just the reverse of these things produces resultful campaigns."

More than 700 newspapers have used a series of six mat advertisements furnished without cost by Mr. Kelly as part of his attack on house-to-house sellers. He will send this series to any reader of EDITOR & PUBLISHER on request.

"Whether our customer's problem is

mainly one of quick stimulation of business, counteracting activities of house-to-house firms, speedy disposal of merchandise which is becoming rapidly out of date, selling a new location to the public or reselling a store's old location, building up the name and standing of a firm in its community or even reducing overhead costs," Mr. Kelly said, "newspaper advertising is our first aid."

These briefed stories from his experience show how some of these problems were met:

The Shields Clothing Company of Fort Wayne, Ind., was getting a good volume of business from its regular advertising in 1923 and 1924, but it was getting this on about 60 per cent of the stock.

They had changed gradually their system of special purchases to meet rapidly changing style requirements. The newest in men's wear were stocked immediately. Rapidly their business shifted away from staple merchandise to style and novelty stock. Their staples on hand began to depreciate, selling so slowly that it did not pay to carry them.

A special sale to fit this condition was mapped out, with newspaper space as its backbone. Practically every dollar of the slow-moving stock was cleaned out, bringing in over \$25,000.

The McCullough-Ashton Furniture Company, Cincinnati, established the latter part of 1923, had a retail location which was not especially good and had started in business just when there had been months of unsatisfactory business conditions. After 15 months, they had made little headway. Advertising had seemed to have little effect.

An analysis by Mr. Kelly's representative showed the advertising had been spasmodic. It had lacked a real message to the buying public and had not served to give the public an idea of how well equipped they were to handle demands of the public for home furnishings.

A campaign to sell the location to the public and the members of the firm as exceptionally capable furniture men who

could advise judiciously was evolved. It included also attractive prices, which were especially essential in a German community. Ten days of selling brought in \$15,000 cash business and consistent follow up has brought good business since.

George E. Homer, Boston jeweler had always catered to the highbrow trade, which limited his circle of patrons. Instead of a series of ultra-dignified direct mail pieces he had been considering, he was induced to use newspaper advertising, which, although dignified, carried a sales punch. Results proved this wise.

In New Orleans, Mr. Kelly's organization gave newspaper advertising a thorough test in two campaigns for A. P. Schiro. First, space helped market close to \$25,000 worth of merchandise which Mr. Schiro was saved from having to move from his old location. Then when he was in his new store, the new location was sold by a second campaign which moved about \$15,000 more of foot-wear.

Melville Stone—N. A. N. A. Host—Syndicate
Snarl Unchanged**

The actual presentation to the Queen was made by Judge R. W. Bingham, of the Louisville (Ky.) *Courier-Journal*, and Mrs. Bingham, who stood at the end of a receiving line of 30 and nearest to Her Majesty. Others who received were: Major and Mrs. Loring Pickering, of the Alliance; Edwin Cowles, *Spokane Spokesman-Review*, and Mrs. Cowles; E. J. Lynett, *Scranton Times*, and Miss Elizabeth Lynett; Mr. and Mrs. Paul Wooten and Mr. and Mrs. James L. Houghteling, *Chicago Daily News*; H. S. Scott, *Detroit News*, and Mrs. Scott; William E. Scripps, *Detroit News*, and

An agency man this week came in contact with Marie's impulsive temperament. He was Sturges Dorrance, president of Dorrance-Sullivan & Co., New York advertising agency. Mr. Dorrance, with others of his staff, had worked 69 hours without sleep to arrange to have Her Majesty broadcast a speech through a

It is understood the Royal Typewriter Company paid upward of \$4,200 for the use of the broadcasting stations to reach listeners whom Her Majesty disappointed.

The Canadian Government took objection to the awarding of a contract by the Pacific Cable Board for the duplication of the cable between Fiji and Bamfield, British Columbia, on the ground that the project had not been sufficiently investigated in the light of radio-beam developments, and that Canada had not been consulted or its consent obtained before the contract was awarded. Canada took the stand that it would withdraw from its partnership in the Cable Board and would refuse to grant permission to the Board to land the cable unless its position in these respects was recognized.

Lord Rothermere, British newspaper proprietor, and Rudyard Kipling, were charged with creating hard feeling between England and the United States, by Hugh Campbell Wallace, former American Ambassador to France, when he was interviewed on his return to this country this week on the *Majestic*.

Linotyped in the Cloister Family

Advertisers Increasing Iowa Linage

In first 8 months of 1926, these Iowa dailies gained $3\frac{2}{3}$ million lines over same period of 1925.

From January first to September first of this year, these 28 leading Iowa daily newspapers gained 3,660,425 lines of national advertising over the same period of last year.

Every one of these papers made a substantial increase. Percentages range from 8.9 to 34.7. Fifteen of the 28 newspapers gained over 20%. Seven of them—over 30%.

UNIFORM COOPERATION

The following outline gives the *minimum* of help offered by each individual newspaper of this group, in connection with a campaign of 5,000 lines or more:

1. Make a study of local market and trade territory, as pertains to *your* specific product.
2. Supply complete and accurate list of retailers, in the newspaper's city and surrounding territory.
3. Introduce your salesmen to a number of big retailers. Advise

Circulation of these 28 newspapers.....585,091
Number of families in Iowa.....550,000

These figures present the story in most condensed form. They indicate the wonderfully effective coverage of the state.

Deal with this group as with *one* publication, if you wish: One order, one plate, one billing.

Note merchandising help below.

you as to relative sales stand of competing products.

4. Urge retailers to feature your advertised products. Furnish you names of stores that will make use of window displays.

5. Make market investigation for prospective advertisers (Identity to be made known first).

6. Urge local retailers to mention your products in their own advertisements.

7. Send, on receipt of contract, a multigraphed letter to list of retailers in the territory, telling of the campaign.

These Iowa daily newspapers provide unusual coverage of this unusual market.

We will be glad to send further information upon request.

IOWA—WHERE EVERY FAMILY READS A DAILY NEWSPAPER

I. N. S. NAMES THREE REGIONAL DIRECTORS

Mason, Elwell, and Parker Appointed by Koenigsberg to Head New Divisions Created Because of News Agency's Growth

Appointment of three regional directors to assist the general management of the International News Service in administration of the service in the United States was announced this week by M. Koenigsberg, president.

The new executives are: Capt. Frank E. Mason, eastern division; Hector H. Elwell, central division; and William Parker, western division. Heretofore the entire operations of I. N. S. were handled by general headquarters in New York. New headquarters of the eastern zone will be in New York; the central zone in Chicago; and the western zone in San Francisco.

The appointments, Mr. Koenigsberg said, were necessitated by the growth of I. N. S. in the last two years. Mr. Koenigsberg also announced that Timothy P. Beacom has been appointed mechanical advisor to I. N. S. clients.

"Newspapers that have stereotype, press or engraving problems may have the advice and assistance of Mr. Beacom," he said.

Mr. Mason joined I. N. S. in 1919, when he was attached to the American Commission in Berlin as an intelligence officer. Prior to entering military service he was engaged in newspaper work in Milwaukee and Detroit, and had wide experience on middle western newspapers. He is a graduate of Ohio State University.

In 1921 Mason was relieved in Berlin by S. Dunbar Weyer and went to London to assume the management of the I. N. S. London bureau. After a short period in London, he was transferred to the management of the Paris bureau.

While in Paris, Mason covered the long series of Inter-Allied conferences which were held throughout Europe and he made frequent trips to Geneva where he covered the early meetings of the League of Nations.

Mr. Elwell started his newspaper career on the City News Bureau of Chicago in 1897 as a copy boy. Ten years later he went to the *Chicago American*, covering the Federal building during which time the famous Beef Trust case, the John R. Walsh bank case, and other famous cases were tried. Later he became assistant city editor, and supervising city editor of the *Chicago Evening American*. In 1921, Elwell became managing editor of the *Wisconsin News*, a Hearst newspaper at Milwaukee, and about four years later he was sent to Chicago as managing editor of the *Chicago Herald & Examiner*.

Mr. Parker began newspaper work as a typesetter on his father's newspaper,

FRANK F. MASON

H. H. ELWELL

WILLIAM PARKER

the *Walla Walla* (Wash.) *Statesman*. He was employed in various capacities on Pacific coast newspapers until 1905 when he went to Nevada and worked for a year as a miner. Returning to newspaper work in 1906 he served with the news department of the *Chicago Tribune* and *Record Herald*, and in 1907 came to New York and was employed successively on the *World*, *Sun* and *Globe*.

The following year he went to San Francisco and worked a half year each on the *Daily News* and *Examiner*. From 1908 until the present he has been with the Hearst newspapers except for one year which he spent abroad, studying European politics and economics. He was recalled from Europe to take the regional directorship of the Pacific coast for I. N. S.

INTERTYPE ELECTS CHAIRMAN

R. H. Swartwout Heads Directorate, Resuming Position Held Previously

R. H. Swartwout was this week elected chairman of the board of the Intertype Corporation, a position he held from March, 1916, until last July 1, when he became chairman of the executive committee.

In resuming his position as chairman of the board Mr. Swartwout succeeds H. R. Swartz, who has resigned as a director of the corporation. Neal Dow Becker, president of the corporation since July 1, was elected to the vacancy on the board created by Mr. Swartz's resignation.

The resignation of C. W. Gaskell, who for some years has been vice president in charge of manufacture, was accepted as of Nov. 1. D. R. Salisbury, who has been assistant to the president and general sales manager since Aug. 1, was elected a vice president. H. G. Williams, secretary since 1923 also was elected a vice president. He will continue to act as secretary.

The company reported a net to surplus after taxes and depreciation of \$103,725 in the quarter ended Sept. 30, against \$215,570 in the same quarter last year. Net to surplus in the first nine months of this year was \$382,220, against \$616,650 in the same period last year.

SEES GAME DESPITE FLOOD

L. G. Schaeffer, editor and publisher of the *Beardstown* (Ill.) *Illinoisian Star*, who hasn't missed a home-coming game at Illinois University in the last decade, was hard pushed to make the trip this year but overcame all obstacles. The streets of Beardstown were still so flooded that he was unable to drive his car out of the garage, but procuring a small barge the night before the game, he floated it to his garage, running the machine up on it by a small incline. He towed the car and barge to the levee road and ran the auto off. Then he ran the barge back to his home, trundled up the family, towed back to the road and went on to Champaign.

NEW MOVE FOR DUTY ON U. S. MAGAZINES

Canadian Advisory Board on Tariff Hears Plea This Week—Dominion Publishers Claim Their Business Is Hurt

Publishing interests in Canada concerned with the production of magazines and other periodicals have for several years been advocating the placing of a duty on imported publications, in order to give them a better opportunity to succeed in the limited Canadian field. Up to the present time, their efforts to obtain a measure of protection have not been successful. The recent appointment by the Canadian Government of an Advisory Board on Tariff and Taxation, charged with the duty of investigating applications for the raising or lowering of the tariff on various articles, has, however, given them new hope, and shortly after the Board was appointed a formal application was placed before it for the adoption of some measure of protection for domestic periodicals. A hearing in connection with this application was held on Thursday, Oct. 28, when advocates and opponents of a duty on United States magazines presented their arguments before the Board.

The principal arguments advanced by the advocates of a duty are as follows:

The paper, ink, engravings and other component parts of the magazine are dutiable, whereas the finished magazine enters Canada duty free. This, it is claimed, is not fair to the Canadian publisher. In the second place, advertising matter, in the form of catalogues, booklets, circulars, etc., is dutiable, whereas advertising in the pages of magazines enters duty free. In view of the tremendous circulation of United States periodicals in Canada with their advertising of United States products, it is claimed that not only is the business of the Canadian magazine publisher injured, but also the gen-

eral business of the Canadian producer. In the third place, a good deal is made of what is described as the Americanization of the Canadian people through circulation of such large numbers of United States publications. These are advanced as the principal reasons in favor of a duty.

On the other hand, there are not wanting opponents to this proposal, who argue that nothing should be done that would hamper in the slightest degree the dissemination of literature, much of which is of an educational character.

Whatever decision may be reached, the Tariff Board will be communicating to the Government; and action, if will presumably be taken by the Government at the forthcoming session of Parliament.

STAFF HONORS PAPE OF WATERBURY

**Publisher of Republican and American
Given Surprise Party Celebrating
His 25th Anniversary—Asso-
ciates Present Chair**

William J. Pape, publisher of the *Waterbury* (Conn.) *Republican and American*, was given a surprise party, Oct. 21, by his employees celebrating his 25th anniversary as a newspaper publisher in Waterbury, and celebrating the completion of a new plant for the newspapers.

WILLIAM J. PAPE

Mrs. George Benjamin, formerly Caroline Dikeman, assistant treasurer of the American-Republican, Inc., was also honored by her associates in recognition of her 25 years' connection with the Republican. Mr. Pape was presented with a tapestry-covered reclining chair, and Mrs. Benjamin with a platinum wrist watch.

E. Robert Stevenson, editor of the Republican and managing editor of the American, presented the chair to Mr. Pape, saying:

"We are here in an intimate friendly gathering to do honor to you, Bill Pape, at the passing of the milestone that marks 25 years of your period in newspaper work in Waterbury. Next week this fine new building will be thrown open and dedicated to a period of greater newspaper service in behalf of the people of Waterbury and the region around it. "Tonight this group of close newspaper associates in all departments of the newspapers which you head wishes to express to you the esteem with which they have long regarded you as their publisher. It was you who laid the foundations on which has been built the consolidated newspaper making of this plant."

Referring to the fact that Mr. Pape has been pursuing a course of studies at the Department of Drama in the Yale University School of Fine Arts, Mr. Stevenson said that this was an evidence of the full vigor of youth still with the man to whom the chair was presented.

In speaking of the new newspaper plant about to be thrown into operation, Mr. Stevenson noted that, just as at Yale, it was ever borne in mind that fine buildings, even the remarkable Harkness group, do not make the greatness of the institution, but a spirit of service to mankind and the developing of worth-while character, so it was here; that the building, excellent as it was, was secondary in the making of worth-while newspapers with which this community is to be served.

BRITISH AD MEN ELECT

**C. A. McCurdy Named President—
Plan Exposition for Next Year**

Lieut.-Colonel E. F. Lawson presided over the annual general meeting of the Advertising Association, held at the Hotel Cecil, London, recently. C. A. McCurdy, K.C., was elected president for the ensuing year, Philip Benson treasurer, and W. H. Hartley, secretary, and the following were elected members of the executive committee: A. Milne, T. B. Lawrence, Mrs. Ethel M. Wood, Alderman Charles Pascall, Thomas Russell, Sir William Veno, Philip Emanuel, Gerald France, S. H. Perren and Stuart A. Hirst.

It was proposed that the British Advertising Convention of 1927 should be held in London, in conjunction with an advertising exhibition, the theme of the convention and exhibition being "The Development of Imperial Trade." It is hoped to hold the convention and the exhibition at Olympia, in July, 1927.

STAMP ADS BANNED

**British Withdraw Scheme to Sell Space
On Letters**

British business men were practically unanimous in their protests against the proposed introduction by the Postmaster-General of a scheme whereby commercial advertisements were to replace the "Buy British Goods" slogan in the cancellation stamp for letters, and it was officially announced, on Oct. 15, that the scheme was to be withdrawn.

It is understood that an alternative proposal is under consideration by the postal authorities, which will be free from the objections raised against the original plan.

MACFADDEN BUYS NEW \$4,000,000 PLANT

New York Evening Graphic and Magazines Will Be Housed in Nine-Store Building on Property Owned by Trinity Church

Soon after the end of the current year, the *New York Evening Graphic* will be issued from a new \$4,000,000 nine-story plant on property owned by Trinity Church.

The new home of the Graphic will also be used by the several magazines and the *Automotive Daily News* published by Macfadden Publications, Inc., of which Bernarr Macfadden is president. The building to be completed in January covers the west side of the Hudson street block, between King and Charlton streets in Greenwich Village.

About half the structure will be utilized by the Macfadden interests at the outset. The centralization of the publications will begin early next year, when the Graphic will be moved up from 25 City Hall Place, the old home of the *New York Evening Mail*, and the magazines will be moved down from the Macfadden Building at 63rd street and Broadway.

The Graphic, according to present plans, will occupy the two lower floors of the building and the basement. The pressroom, large enough to hold eight presses, will be on the ground floor and fed from reels in the basement, where paper will be stored. The six presses now printing the Graphic will be moved into the new plant and for the present, one second-hand Hoe press recently purchased by Macfadden will be added to the battery.

Space occupied by the Graphic will total 90,000 square feet.

Guy Harrington, treasurer of Macfadden Publications, Inc., closed the deal for the new home this week. Negotiations had been in progress for two years and the fact that 51 per cent of this particular area of the city is not troubled with traffic congestion was one of the factors which influenced the decision to locate in Greenwich Village.

N. E. A. APPOINTMENTS

Roe Appoints New Advertising Committee for National Group

W. H. Bridgman, of the *Stanley* (Wis.) *Republican*, has been appointed chairman of the advertising committee of the National Editorial Association by Herman Roe, association president.

W. H. BRIDGMAN

The purpose of this committee is to act as a clearing house for advertising problems which arise among association members, such as the cost of production and what constitutes a remunerative advertising rate.

Other members of the committee are H. Z. Mitchell, *Bemidji* (Minn.) *Daily Pioneer* and O. J. Benjamin, *Nevada* (la.) *Journal*. Mr. Bridgman was a member of the same committee in 1925 and 1926. He is a past president of the Wisconsin Press Association. Mr. Mitchell formerly served as president of the Minnesota Editorial Association.

HEARST THANKED FOR RELIEF

The Mayor and City Commission of Miami, Fla., passed a resolution Oct. 26, thanking William Randolph Hearst and the *Chicago Herald and Examiner* for relief sent to the city following the recent storm.

NEW A. N. P. A. MEMBER

The *Morgantown* (W. Va.) *New Dominion* has been elected to membership in the American Newspaper Publishers Association, L. B. Palmer, manager, announced this week.

IOWA DRUGGISTS TO ADVERTISE

Seventy-five members of the Northwest Iowa division of the Iowa Pharmaceutical Association in annual session in Sioux City, Ia., endorsed plans for a state-wide advertising campaign to emphasize the public service performed by the druggist. R. E. Broholm and R. H. Carey of the Chicago Advertising Agency, Des Moines outlined the project, which will use space in Iowa dailies, farm journals and the class weeklies of the state.

SOUTH DAKOTA A. P. ELECTS

Fred Christopherson, *Sioux Falls* (S. D.) *Press*, was elected president of the South Dakota Associated Press at a membership meeting, and W. C. Lusk, *Yankton Press and Dakotan*, was chosen vice-president. Edgar T. Cutter, superintendent of the central division, Chicago was speaker at the meeting and R. Z. Henle, Pierre office head, also spoke.

The Evening World

NEW YORK

Breaking Records in The Evening Field

ON Friday, October 15th. THE EVENING WORLD carried 269½ columns of advertising—the largest volume it has ever printed in a single issue. The best previous record was 262½ columns, printed just a year ago, so that this growth represents a consistent performance.

During the first nine months of this year THE EVENING WORLD has gained 919,302 lines of advertising. Of this increase, 632,906 lines represented Dry Goods lineage—an expression of confidence on the part of the city's great merchants.

In fact, THE EVENING WORLD'S increase in Dry Goods advertising—amounting to 20% over the corresponding period last year—was more than double the increase of The Sun, the only other evening paper to gain in this classification.

PULITZER BUILDING
NEW YORK

TRIBUNE TOWER
CHICAGO

The Favored Evening Newspaper in the New York City Home

The Pace Increases!

THE EVENING WORLD rounded out last year with a gain of 993,294 lines, so that it will be seen, from the statement above, that it has accomplished in the first nine months of this year almost as great an increase as it registered during all of 1926. The increased pace is convincing proof of its value to the merchants of New York as an established mover of merchandise!

NEWSPAPER STANDARDIZATION STILL DISTANT

More Than 70 Different Sizes of Paper Rolls Needed to Print Newspapers of 20 Varying Page Arrangements, Editor & Publisher Census of U. S. and Canadian Dailies Demonstrates

STANDARDIZATION of newspaper equipment and with it standard dimensions of the raw and finished product are further from realization in 1926 than at any time during the past quarter century.

According to statistics gathered by **EDITOR & PUBLISHER** during the past two months and presented in this issue, all of the pronouncements of Mr. Hoover and his Department of Commerce in favor of simplification in industry have been just words to the newspaper publisher. The idea is an old one in newspaper circles. Approval of efforts to reduce the myriad minute differences in the equipment that every newspaper office must employ has long been a subject of A.N.P.A. conventions, resolutions, and special bulletins. Press manufacturers have tearfully pointed out the waste incidental to building machinery to suit every individual—less of time, capital and useful space tied up in patterns designed for one or a very limited number of presses, unnecessarily high prices caused in part by both of these elements. Paper manufacturers long ago lost track and count of the roster of roll-widths, which range, almost by eighth-inch steps from 16 inches to 83 $\frac{3}{8}$ inches.

A key to the situation is available in the variety of column widths in daily use by almost 2,000 daily and Sunday newspapers. There are 20 different arrangements of columns to the page and column widths, starting at four 14-em columns and ending with nine 12-em columns to the newspaper page.

Most popular is the page having eight 12-em columns, which is preferred by 693 newspapers.

Next in esteem is the old favorite, seven 13-em columns, which still has 585 adherents.

Third in rank is the compromise between these two, the page with eight 12 $\frac{1}{2}$ -em columns, with 324 papers.

Three different pages thus serve 83 per cent of the 1,900-odd dailies, and the remaining 17 various page arrangements are distributed among the remaining 17 per cent of the daily newspaper publishing industry.

Leading in this group is the old-style country format of six 13 em columns, which numbers 110 papers.

Then we find the newspapers, some of them distinguished in the business, which make up an eight-column page with 13-em columns. They number 29.

Economically-minded publishers, 16 in number, seek the other extreme of seven columns, 12 ems wide. Only eight use a seven-column page with 12 $\frac{1}{2}$ -em columns. Six prefer a seven-column page with 13 $\frac{1}{2}$ em columns and one paper used an eight-column page with 13 $\frac{1}{2}$ ems between the column rules. Two publishers, both noted in the field, prefer a page of seven columns, 14 ems wide. Three eight-column papers compress their space between rules to 11 $\frac{1}{2}$ ems—a width which none of the tabloids has adopted.

The tabloid papers give a majority to the five-column page with 12-em columns, 11 papers having this makeup. Two use five columns of 12 $\frac{1}{2}$ ems, and 9 five-column papers, few of them metropolitan tabloids, use the 13-em measure. One tabloid uses four 14-em columns and one uses four 13-em columns.

Three six-column papers, published in small towns, use 12-em columns.

One business daily uses five columns 20 ems wide and another uses five 18-em columns.

Ten newspapers use the nine column page with 12-em columns. Apparently no dailies of the old blanket-size nine 13-em columns are now published.

Column rules are more nearly standardized than any other of the mechanical elements. The six-point rule is used by

almost all publishers, fewer than 50 stating another calibration. The dissenters, however, start at 1-point rule, step to 1 $\frac{1}{2}$ points, then 2, 3, 4, 5, and 5 $\frac{1}{2}$ point, and a few even use the old style 8-point brass rule for the purpose.

Page margins, one might think from a rapid inspection of the ensuing tables, are determined by picking lottery or picking number combinations out of a jury wheel. One or two newspapers report their margin in decimals carried out to three places, but the majority reports in-

passing the two-foot length. The 22, 22 $\frac{1}{2}$, and 22 $\frac{3}{4}$ -inch cut-offs are favored by the majority of publishers whose printing machinery has been modernized since the war.

Twenty-five different makes of presses are indicated in the tabulation, and an unknown number of types and combinations of types of the trade-marked machines. Statistics are incomplete for a number of newspapers, for the stated reason that their plants are undergoing extensive alterations, including the installa-

pliance that he has demonstrated ability to dispense with.

Another field which shows evidence of intensive cultivation, as well as the need for continued and more intensive tillage is that of the dry mat. Many metropolitan and other large city dailies are on the dry-mat basis entirely, especially in the Southern states, where summer heat in the stereotype moulding room can be made unbearable by steam-tables. Most of the small offices which use flat-perfecting presses are now using the dry mat solely for flat casts, and the office with the small rotary press is also represented strongly in the dry-mat ranks. The convenience and speed of the dry mat and its excellent printing results in the hands of competent and adequately-equipped stereotypers, plus the paper economy afforded by shrinkage, point to its almost universal adoption within the next few years.

Possibly, also, the universal use of the dry mat may lead to tacit agreement upon a more limited number of page and column arrangements, with simpler and cheaper press specifications and a greater reduction in the now bewildering number of paper-roll sizes.

About a third of the daily papers in the country now print from sheet paper which has a wide range of dimensions peculiar to itself. The remaining two-thirds print from rolls—and a fairly complete check of the roll sizes given in the tabulation shows their number to be not less than 70. It is quite possible that the eye of the checker failed to catch some of the fractional variations. The smallest reported is 16 inches wide, the next is 17 inches, followed by eighth-inch gradations to 19 inches. Then there are the 21 $\frac{1}{2}$, 22 $\frac{1}{2}$, and 23 $\frac{1}{2}$ -inch rolls. Multiplying each of these narrow rolls by two, three, and, in the narrower widths by four, and you get a slight idea of what the paper manufacturer and the factory which builds the mill machinery face in furnishing adequate and accurate tools. There is little doubt that some part of the cost that adds to manufacture of newsprint paper comes out of the newspaper cash-drawer. It is a branch of the newspaper industry that merits renewed attention from the organized publishers, among whom detailed knowledge of the economics of the business is much more widespread than it was a dozen or more years ago when well-informed leaders of the American Newspaper Publishers Association made it a topic of prime importance at the annual meetings.

Two columns of the tabulation are of considerable interest both to supply manufacturers and to publishers—the columns showing the annual consumption of paper and news ink. This is the first effort ever made to gather such data on a nation-wide scale, and the accuracy of the reports cannot be checked or guaranteed. The indicated consumption of paper, about 2,500,000 tons by the 1900-odd daily newspapers and their Sunday editions, is difficult to set any estimate on the ir consumption. One might expect a reasonable proportion to be maintained between amount of paper and ink consumed, but such a proportion is hard to find in the reports—indicating that a great many newspaper offices keep lax records of their ink especially.

For instance, a publisher reporting an annual consumption of 500 tons of paper reports an ink consumption of 24,000 pounds. His ratio is 48 pounds of ink to each ton of paper. Another publisher reports a paper tonnage of 4,000 and an ink poundage of 124,000—or a ratio of 31 pounds of ink to a ton of paper. Another publisher shows 700 tons of paper and 18,000 pounds of ink, and still another shows 400 tons of paper and 20,000

indicate that the old campaign in the days of the war paper scare against the waste in wide margins has borne no permanent fruit. Comparatively few publishers have taken full advantage of the potential paper saving afforded them by using dry mats—even though the tabulation shows that the dry mat is coming into ever-increasing popularity. Margins of an inch or more on all sides of the printed page contribute not inappreciably to the paper cost, as the dry matrix manufacturers have long argued in their selling efforts, but the realization of this truth is either still vague or the saving may be considered of little consequence by the small-city publisher. Its importance to numerous metropolitan publishers is evidenced by the tightly-trimmed marginal measurements and the small spread in the roll-widths between type-page and overall measurements.

Cut-off, or overall lengths of pages, demonstrate again and even more forcefully the individualistic notions of publishers regarding the appearance of their journals, notions which have been fostered by the makers of printing machinery. On standard sized dailies, the cut-off length ranges between 19 $\frac{1}{2}$ and 24 inches, with one or two papers even sur-

passing the two-foot length. The 22, 22 $\frac{1}{2}$, and 22 $\frac{3}{4}$ -inch cut-offs are favored by the majority of publishers whose printing machinery has been modernized since the war. Twenty-five different makes of presses are indicated in the tabulation, and an unknown number of types and combinations of types of the trade-marked machines. Statistics are incomplete for a number of newspapers, for the stated reason that their plants are undergoing extensive alterations, including the installation of new presses, and these, taken in conjunction with the number of modern installations now noted, apparently warrant the view that five years from now will see the end of many old-fashioned and uneconomic newspaper operations. The press manufacturers' advertising in the past few years has stressed the unit machine, which can be expanded as a publisher's operations grow by the addition of duplicate units. This is an old story in metropolitan fields; it has been read and carried into effect in many of the smaller cities, but any number of newspaper plants in both of these classes are still issuing papers in 1926 competition with equipment that might have been young in the 'nineties. The age of printing presses, like that of the elephant, is still undetermined, according to the number of ancient machines still noted as doing a daily stint.

More than 40 branded types of mailing machines are reported in newspaper service throughout the country, and hundreds of small newspapers state that they use either a home-made mechanism or none at all. The sales field for the mailing machine manufacturer is still large and obvious, although the publisher of the small daily newspaper is not easily sold any ap-

on standing order

Mechanical staffs do not have any trouble installing the Certified Dry Mat COLD process of stereotyping. There is no loss of time or interruption to schedules.

While so-called experts are NOT needed to install Certifieds, our practical men are always available to answer any questions that may arise, and to give our customers the benefit of our daily experiences with more than 300 newspaper plants. This is a part of Certified service and there is no charge to the customer for either the time or expenses involved.

The fact that Certifieds have replaced wet mats and steam tables in some of the very largest newspaper plants in the country (*a few names are listed in the column to the left*) is the best proof that our mats meet the requirements of the larger as well as of the smaller papers.

We are particularly pleased to say that it has NOT been necessary for us to make special mats at special prices for any of our customers. They all use our regular mats taken from regular stock and selling at 15 cents per mat on standing order.

Certifieds have won their way on their MERITS. We invite you to TRY them; COMPARE them; and PROVE to yourself that they can meet your every requirement.

Our booklet "The Certified Road to Simplified Newspaper Stereotyping" tells our story. A copy will be gladly mailed to you upon request—there's no obligation on your part.

Duplex Printing Press Co.,
Battle Creek, Mich.

Gentlemen:

The Duplex Metropolitan Super-Speed Interchangeable Unit Sextuple Press, which we ordered last December, is now in operation daily printing the Press-Guardian and Sunday Chronicle. We are congratulating ourselves that we were not swerved from our preconceived ideas of your press. It is all that you claim for it and we are very proud of it. The material and workmanship of the press have been favorably commented upon by expert machinists who have visited our plant to view the press, which by the way was very carefully and efficiently installed.

We turned over from our old press to the new press with confidence. Our confidence was not misplaced. *We are printing a very satisfactory product.* The first day's edition was the equal of any paper that we have ever printed in all our many years' experience. We have the most modern bit of printing press machinery in the entire state.

We feel satisfied that the Duplex Printing Press Company has delivered just what we ordered. If you have any prospects in view who desire to see a practical demonstration of this press, don't hesitate to have your salesman bring them to our plant at any time they desire. If you will submit us a complete statement of our account, we shall be very glad to send you our check for the balance due.

With kindest regards to Mr. Stone, Mr. Bechman, and Mr. Farley, whose personal interest in the development of this press has been thoroughly appreciated by all of us here, I beg to remain

Yours most sincerely,

W. B. BRYANT,
Publisher.

(Continued on Page 34)

Wood Dry Mat Equipment

As the pioneer in the development of the dry mat stereotyping process in America Wood Flong Corporation invented certain equipment which has brought dry mats into such successful use.

Wood Flong equipment is necessary to get best results from all makes of dry mats and, excepting humidors, is also best with wet mats.

WOOD GAS HEATED HUMIDORS FOR DRY MATS

These humidors are made in three sizes, to condition in 24 hours or less 100-200 and 500 dry mats. They are made either of galvanized iron or copper, and a complement of metal storage boxes accompanies each humidor. WOOD HUMIDORS of larger capacity will be built upon request. Where gas is not obtainable electrical heating units may be arranged for.

More than 800 WOOD HUMIDORS now in use.

THE WOOD CURVED SCORCHER (Patented)

is the most efficient piece of small apparatus used in the foundry. It is unquestionably the best scorcher for roasting either wet or dry mats. WOOD CURVED SCORCHERS, gas heated and asbestos lined, are made for both single and double page mats. Electrically heated if preferred.

Every newspaper stereotype room should have one or more of the scorchers.

More than 1,000 in use.

WOOD FLAT MAT DRIERS are made in two sizes, for half or full page mats.

WOOD CORK MOLDING BLANKETS

We were the originators of the cork blanket which is now almost exclusively used for molding dry mats—and in many plants for wet mats. WOOD CORK MOLDING BLANKETS are resilient and durable.

For single or double page mats.

Sold in packages of four. Size 20" x 25".

Newspapers that are not getting satisfactory and uniform results from dry mats will find the purchase of WOOD EQUIPMENT a profitable investment.

If preferred, WOOD DRY MAT EQUIPMENT may be purchased through your press builder.

WOOD FLONG CORPORATION

Stillwater, New York

33,000 per hour

on a 64 page paper "Collect Run"

-and no ribbons

GOSS High Speed Folders are "The heart of the modern printing press." For speed and large capacity coupled with simplicity and stamina, they are outstandingly in the lead. Here are some of the exclusive features which make them so:

All main driving spur and bevel gears on side and end folder, including cutting and folding cylinder gears and steel rotary folding guide gears, have **HELICAL** or **SPIRAL TEETH**. Helical teeth—latest development in gear design—insure quiet running, eliminate back lash and are 30% **STRONGER** than straight tooth design.

Impossible to cut ribbons when running collect products because of design of Goss direct geared collector arrangement and collecting cylinders.

Patented choke release makes possible immediate separation of second fold rollers in event of web breakage.

Semi-steel, extra heavy cutting and folding cylinders, forced by hydraulic pressure on chrome nickel steel shaft.

Solid steel second fold rollers independently driven and adjusted simultaneously by hand wheel. Gears driving these rollers are always in perfect mesh for products of all page sizes.

Folding guide has a quick adjustment to accommodate the fold for various sizes of products.

One piece forging tumbler lever and folding knife shaft—and many other distinctive features too lengthy to mention here.

Office of Business Manager

September 29, 1926

The Goss Printing Press Company
1535 South Paulina Street
Chicago
Illinois

Gentlemen:

Answering your recent inquiry we are pleased to tell you that the performance of our Goss presses, installed three years ago, has been satisfactory in the printing, folding, and delivery of 64-page papers.

The first run of 64-page papers was a 215,000 edition, December 1, 1925. We had no trouble of any kind on this run, not even a change of cutting rubbers being necessary. The run was begun at a speed of 200 revolutions per minute (24,000 per hour) but increased to 250 revolutions (30,000 per hour).

On an edition of 440,000 64-page papers in April, a cylinder speed was attained of 275 revolutions per minute, or 33,000 per hour.

These presses have met every condition imposed upon them since their installation and we believe that the appearance of The Christian Science Monitor is evidence of their good printing quality and satisfactory performance.

Sincerely yours,

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Charles E. Jones
Business Manager

Service!

**YOU GET WHAT
YOU WANT WHEN
YOU WANT IT**

Newspaper publishers have come to appreciate the importance of Ault & Wiborg Co.'s service, and they realize that it is a service worthy of its hire.

Functioning through every department of our organization are men whose experience dates back for years. This, in union with great resources, large modern plants, distributing branches in 18 important cities that insure prompt deliveries to all customers no matter where they are located, is assurance of our aims and desires to render a permanent, satisfactory service to the newspaper publishers.

GRITLESS NEWS INK—known for its highest standards of American Newspaper Printing.

WEB COLORS need no introduction to the publisher. Their popularity has long been established in the publishing world, as standard of comics and magazine sections.

INTAGLIO INKS—First made in America, and first with the publisher ever since.

THE AULT & WIBORG CO.

CONTINUOUS COMPOSITION

MEANS—MORE PROFITS in the Newspaper Composing-Room

CONTINUOUS COMPOSITION *means* first of all that you can ASSEMBLE MATRICES FROM ALL MAGAZINES in the same line allowing any desired combination of *roman, italic, bold face* and *advertising figures* or *displayed side-heads* to be set with the speed of straight-matter. And all matrices will be AUTOMATICALLY DISTRIBUTED to their proper places.

CONTINUOUS COMPOSITION *means* that on a machine equipped to set two sizes (as for example 7-point for news matter and 5½-point for classified), the operator can CHANGE INSTANTLY from one size to the other.

CONTINUOUS COMPOSITION *means* that MULTI-DECK HEADINGS involving several sizes and faces can be set at a single operation and delivered on the galley with all lines assembled in proper order, ready to drop into the page.

CONTINUOUS COMPOSITION *means* that IMMEDIATE CORRECTIONS can be set in any face on the machine without even waiting for the matrices from the previous line to be distributed. To sum it up—CONTINUOUS COMPOSITION LINOTYPES enable the operator to set galleys of news, bold face, classified and heads without leaving his machine.

A. B. C. ON EVEN KEEL

ARE-DEFINITION of the objects of the Audit Bureau of Circulations was the outstanding result achieved at the annual convention held in Chicago last week. The attempt to enter the field of rates was effectually checked and the by-laws amended so as to prevent the adoption of any such extraneous activities in the future. "Hands off everything but circulation" was the clear-cut instruction to the board from the members.

EDITOR & PUBLISHER reaffirms its belief that this is excellent sense, and will result in more efficiency in Bureau work and more harmony among its members. The printing of rate cards was viewed by the board as an added service to publishers, but the latter saw it as a trouble-making practice which at some future time might result in a standardizing of rates. It was pointed out on the floor of the convention that the net result might be a simultaneous rate rise by hundreds of papers just before the issuance of the A.B.C. statements, in order that advertisers might have the new rates at the same time as the new circulation figures. An advertiser planning a large campaign might have been forced, by such simultaneous rate increase, to curtail the number of papers he could use, or might decide to use some other medium. Trouble with agencies and advertisers was foreseen in cases where papers changed their rates after publication of the A.B.C. statements, the notification of such change having been mislaid or not added to the A.B.C. record. Publication of rates was made optional, but it would undoubtedly have resulted in the forcing of protesting publishers to print their rates because competitors were printing theirs. There is work enough in the circulation field to occupy the staff of the Bureau without adding the burden of rate card printing.

The addition of two newspaper directors to the board without disturbing its advertiser control was another progressive step taken at the convention. It will mean four experts from the newspaper field available in the settling of the many complex problems before the Bureau, and will give fuller representation to a group comprising nearly 50 per cent of the members. Newspaper control of the Bureau would be a fatal step, but the present arrangement means a more satisfied membership.

The elements for a bitter and destructive fight were present at the Chicago convention, and it is a tribute to the statesmanship of both the board and the leaders of the protesting members that no such fight occurred. The issues were clearly outlined and cleanly fought. The settlement, as it was worked out, clears the way for Bureau progress in a single direction, relieved of the tension of dissatisfaction.

Another week and Queen Marie has not melted under the fierce heat of the publicity spotlight. Marvelous! If nobody presents her with a house and lot, which she might give away, it is possible that she may sail home intact.

HOW WRONGS RETREAT

PUBLIC wrongs in the United States exist only by reason of neglect, for the machinery to correct them is available and is now as efficient as it ever has been. The truth of this assertion is demonstrated by the recent instance of Professor William Z. Ripley's exposé of the snide trick of Wall Street financiers in selling stock that gave the owner no vote in the management of the corporation. This obviously vicious scheme of professional corporation manipulators must have been known to the governors of the New York Stock Exchange, but when it became the subject of a very serious essay by an economist of high standing, first published in *The Atlantic* and then, within a few days, hotly discussed in many newspapers, notably *New York World*, the Stock Exchange announced that the evil would be curbed. The President of the United States was sufficiently interested in the exposé to call Prof. Ripley to the White House.

Audacious financial exploiters of public confidence have had a sound trouncing and the end is not yet. It has been a neat demonstration of the old established principle in journalism that no wrong, however powerfully supported, can long withstand the white glare of newspaper publicity.

He that rebuketh a man, afterwards shall find more favor than he that flattereth with the tongue.—Proverbs, XXVIII; 23.

THE MOVIE DOLLAR

AMUSEMENT enterprises which lean more heavily on the daily newspaper for maintenance of public interest than almost any American industry are among the weakest supporters of newspaper advertising. They contribute little more than two per cent of the display lineage in New York City, which is the heart and center of the nation's amusement field. We seriously doubt if the two per cent figure is exceeded throughout the country.

One section of the amusement world is the motion picture business. Its free publicity demands have become one of the publishers' heaviest burdens. It bases these exactions on the ground that it is a "regular advertiser," usually at special amusement rates.

EDITOR & PUBLISHER, from available statistics, is of the belief that the total investment in newspaper advertising of motion pictures in the United States does not exceed \$10,000,000 per year. It is our further belief that for every line of motion picture paid advertising printed at least two lines of free space are given, either directly to local exhibitors or to the picture industry over which Hon. Will H. Hays presides.

It is granted, and is here distinctly stated, that there is a legitimate news interest to be served by the newspaper, since the rank and file of readers are patrons of the movie house and enjoy familiarity with the figures that move across the screen. Whether this legitimate interest deserves the space that editors give it is a question aside from the business argument which is offered in this editorial. Our contention is that, from the business point of view, the movie is a heavy financial charge upon the newspaper and that demands for free editorial space, sought because of advertising patronage, are wholly specious.

That the motion picture industry can jolly well afford to pay its way in the advertising columns of the daily press may be seen by glancing at statistics offered by William A. Johnson, editor of *Motion Picture News*, writing in *The Annals*, magazine of the American Academy of Political and Social Science. He shows that seven million persons attend motion picture houses daily, paying an average of 28 cents for admission, giving the industry annual box office receipts for the United States of approximately \$650,000,000. He tells of the stupendous expenditures for artistic material and splendid productions and finds that business ills afflicting the industry are due in large measure to faulty distribution methods.

Mr. Johnson does not say it, but he might well have mentioned that the motion picture is most favored among all industries by the newspaper press. In view of this mothering wing we are astonished that it should have business ills. It should flourish like the well-known green bay tree. No other business that trades with the general public on such terms of daily intimacy, outside of the amusement field, pays so little for newspaper advertising. It is our belief that out of every motion picture box office dollar the newspaper receives no more than one and a half cents. Our further belief is that the news interest in movies is wildly exaggerated, perhaps tenfold, in the average newspaper office, having the effect of discounting the movie advertising dollar to the vanishing point.

"As willingly as the next man will I be hanged in protest against present-day encroachments upon a free press but I look back over a half-century of editorial decisions and the soul of me is harried by instances wherein there was catering to human morbidity instead of human good, in some instances to an extent to warrant the hanging of me on general principles."—Robert F. Paine.

PRICE MAINTENANCE ISSUE

THE right of a manufacturer of branded goods to contract with the dealer to sell his article at a prescribed price is provided in a bill before Congress sponsored by Senator Capper and Representative Kelly. Advertising agents and publishers have a legitimate interest in this measure. The bill represents the latest movement to establish in this country the principle of price maintenance. Those who oppose this principle believe that the vendor has a natural right to sell merchandise at prices fixed by himself. If it suits his purpose he may advertise and sell an article at a price representing an actual loss in order to create for his institution a reputation for low prices, but actually to draw a crowd to which he may sell other articles at margins of profit which more than recompense what is lost on the advertised article. Of course, it is the contention of the advocates of cut prices that "the public gets the benefit."

Those who are fighting cut prices say that the dealer who advertises "leaders" is merely baiting the buying public, his advertising being essentially dishonest in that it creates a false impression. They can see nothing in such practice but evil consequences.

That price cutting on standard trade marked articles is a blow delivered to the vitals of nationally advertised goods is an obvious conclusion, since it tends to break down the element of goodwill that advertising establishes in the public mind. It disorganizes business and is a real hardship on the independent producer. It violates high ethical principles in advertising.

Students of this subject should have before them Congressman Kelly's nine points in favor of the bill, the purpose of which is to legalize contracts fixing the price at which branded merchandise must be sold to the public. These nine points follow:

(1) Price standardization or maintenance on standard goods as provided by this bill will prove of public benefit, because, first, it encourages and protects the policy of making standard, guaranteed goods, which assures uniform quality, saves the time of the buyer and makes possible higher labor and factory conditions.

(2) It means a fair price fixed under competitive conditions with rival producers. This measure legalizes contracts made only by independent producers without monopoly. Such a manufacturer is in direct competition with producers of similar articles. He dare not fix the price too high or he would simply be building for his competitors.

(3) It recognizes the principle that the maker of the goods is best equipped to name the fair price, which includes the cost of production and distribution and a fair profit for producer and distributor.

(4) It means a lower distributing cost than through costly selling agencies and consignment systems.

(5) It means greater and not less competition, for under it all producers and distributors will have a fair chance, no more and no less. The true competition is not a jungle war where the most ruthless and unscrupulous overwhelm truthful trading. It is rather emulation in excellence, rivalry in service.

(6) It will prevent malignant price warfare upon certain widely wanted standard products, which causes many dealers to refuse to handle them. The grower or manufacturer who puts his labor and brains into the production of a superior article certainly should be able to protect his good will against the evil described by Mr. Justice Holmes, of the United States Supreme Court, in the Doctor Miles decision where he said: "I can not believe that in the long run the public will profit by this court permitting knaves to cut reasonable prices for some ulterior purpose of their own and thus to impair, if not to destroy the production and sale of articles which it is assumed to be desirable that the public should be able to get."

(7) It will hinder the process of monopolization of retail merchandising. There has been an ominous growth in the past 15 years in agencies and brand stores clustered under one ownership. If it continue the independent dealer is doomed.

(8) It will place business on a more honest plane.

(9) It will stimulate the national growth of business and enterprise.

Do not overstate, nor understate, but just state the facts, both in advertising and news copy, if you wish to be believed.

PERSONAL

LIAM T. DEWART, president of the *New York Sun*, will share a during the coming season of the Metropolitan Opera Company with Vin-Astor.

Percival Phillips, special correspondent of the *London (England) Mail*, is at present in Canada on a tour for his paper.

ator Carter Glass, owner and publisher of the *Lynchburg (Va.) News and Advance*, made the Founders' Day address at Sweet Briar College, Va., Oct. 23. Senator Glass is a brother of Dr. Glass, president of the college.

ry L. Gage, of the Mergenthaler Linotype Company, assistant director of the typography for the Americas member of the International Typographic Council, sailed from New York on the *Majestic*, Oct. 30, on a business trip and typographic journey to Germany, Belgium, England and

id Lawrence spoke at a luncheon of the Erie County League of Women at Buffalo on Oct. 23.

ard M. H. Wharton, vice-president general manager of the *Harrisburg Patriot and Evening News*, returned from a trip to Europe.

a W. Kennedy, managing editor of the *Miami (Fla.) Herald*, visited New last week and on Saturday sailed on a vacation tour of Havana and

odore Noyes, Jr., associate editor of the *Washington (D. C.) Star*, was recently promoted to chief of army officers at Fort Leavenworth. Mr. and Mrs. Noyes are in the middle west.

IN THE BUSINESS OFFICE

C. GRANT, general manager of the *Salt Lake City Desert News*, associated with Salt Lake City news for many years past, celebrated his birthday Oct. 17. Mr. Grant is a half brother to Heber J. Grant, president of the News and head of the Mormon Church.

B. Trundle, for a number of years manager of the *Danville (Va.) Bee and Bee*, who resigned some time ago to enter the newspaper business for himself, has returned to the Bee in the same capacity.

ay Hirshfield of the *San Antonio Express* advertising department is returning from France with a bride, formerly Mlle. Madeline Louise Ladet of Rufrescence. The marriage culminated in a union begun during the World War.

ck B. Cressey, former advertising manager of the *Fitchburg (Mass.) Sentinel* and the *Whitehall (N. Y.) Times*, associated with the *Rome (N. Y.) Tribune* in the same capacity.

C. Inman, formerly with the *Field (Mass.) Union* and later in the oil order field, is now advertising manager of the *Fitchburg (Mass.) Sentinel*.

THE EDITORIAL ROOMS

C. HICKOK, Paris correspondent of the *Brooklyn Daily Eagle*, is on a short holiday and business tour of the United States.

ey Walker, night city editor of the *New York Herald Tribune* has returned from a four weeks' leave of absence.

Clair Minot, literary editor of the *Boston (Mass.) Herald*, opened the series of book talks in the assembly of the Jordan Marsh Company store on Tuesday afternoon.

D. Hammond, veteran member of the *Toronto Globe's* editorial staff and one of its editorial writers, has been elected President of the Toronto Camera

eric Kohler, of East Orange, N. J., has been appointed New York correspondent to the *Tribune* of Lausanne, Switzerland, and to *Feuilles d'Avis* of

Paris. He has been assigned to attend the party of Queen Marie of Roumania and write of her activities for those papers.

Clarence L. Wilson, managing editor of the *Worcester (Mass.) Evening Post*, has returned to his desk after a severe illness.

Victor N. Vetromile has joined the Sunday editorial staff of the *Boston Sunday Advertiser*.

George Geiger of the *Kansas City Journal-Post* staff has been supplying his paper with copyrighted articles concerning liberty conditions at the Missouri state penitentiary in Jefferson City, Mo.

Frank D. Woodworth, night editor of the *Richmond (Va.) Times-Dispatch*, has returned from his vacation.

Roy Hohl, former editor of the *Newark (O.) American Tribune*, has become assistant editor of the *New Lexington Tribune*.

Albert F. Phillips, state capitol reporter for the *Salt Lake City Telegram* and known as the dean of Western newspaper men, celebrated his 76th birthday this week.

Clayton C. Slocum, for 15 years city editor of the *Sandusky (O.) Star Journal*, has resigned to become manager of the Sandusky Elks Club.

William S. Hunt, managing editor of the *Newark Sunday Call*, is making a three-weeks' motor tour among the Appalachians with Mrs. Hunt.

William B. Southall, of the reportorial staff, *Richmond (Va.) Times-Dispatch*, has been made city editor. He also conducts an editorial page column, "Open Letters from Father Byrd."

Fred Gaston, formerly city editor of the *Spokane Spokesman Review*, returned to Spokane, Wash., last week, for a visit.

Milton S. Malakoff, formerly telegraph editor of the *Waterbury Republican* and now engaged in publicity work in New York.

Fred Jacob, dramatic and musical editor of the *Toronto Mail and Empire*, was the speaker at the Montreal People's Forum on Sunday, Oct. 24, his theme being "Self-Conscious Canada."

Edward A. Livingston, formerly sports writer for the *Newburgh, (N. Y.) Daily Times*, has been appointed manager of the Shine theatres at Corning, N. Y.

Alexander Inglis, of the editorial staff of the *Pasadena, (Cal.) Star-News*, has returned from a ten weeks' vacation spent in Scotland.

Willard de Lue of the *Boston (Mass.) Globe* is giving a series of radio talks over Station WEEL, Boston, on the making of a newspaper.

Herbert Brandt has succeeded James P. Copeland as a member of the Orange

FOLKS WORTH KNOWING

FRANK W. STARBUCK, president of the Journal Printing Company, publishers of the *Racine (Wis.) Journal-News*, will celebrate his 82nd birthday Nov. 8, at his home in San Jose, Cal., where he has resided for the past 14 years.

FRANK W. STARBUCK

Mr. Starbuck has been blind for several years, but all during the time as sight gradually left him and up to the present time he has continued his editorial work

with practically no intermission. He operates his own typewriter, and considering his affliction, produces very excellent copy; his daughters read the daily papers to him, with outside help when needed, and the copy is sent forward three times a week; his editorials are supplemented in Racine by those which news developments dictate. He turns out about the equivalent of a column and a half of ten point a day, and it is rarely that any changes have to be made through changing events.

Mr. Starbuck was one of the first presidents of the Inland Daily Press Association in the late eighties, and is the son of Calvin W. Starbuck, the owner of the *Cincinnati Times* before and during the Civil War. Frank R. Starbuck, of the third generation, has had active charge of the business for a number of years.

Bureau of the *Newark Star-Eagle*. Copeland has joined the staff of the *Newark Evening News*.

W. R. Ashford, editor and manager of the *Marion (Ia.) Sentinel* for four years, has joined the editorial staff of the *Muscatine (Ia.) Journal*.

Harry Tucker, veteran city hall reporter of the *Richmond (Va.) Times-Dispatch*, conductor of "Main Street," a feature column, is spending his annual vacation in New York City.

Barnet Nover of the *Buffalo Evening News* staff is giving a series of ten lectures on European conditions as part of the extension work of the University of Buffalo. Mr. Nover toured the European continent this summer.

Herbert G. Olson, *Worcester (Mass.) Post* reporter, will be a candidate for school committee at the November city elections.

T. C. Cornell, state editor, *Salt Lake Tribune* (Continued on page 44)

GOOD FICTION

Readers will buy newspapers to get it.

City Deseret News, has returned to his desk after a motor trip to Los Angeles.

Dilworth Woolley, University of Utah campus reporter for the *Salt Lake City Deseret News*, has been named a candidate for the Rhodes scholarship.

Charles Winans, of the city hall run, *Paterson* (N. J.) *Morning Call*, has returned after a three weeks' trip through Quebec province and the New England states.

WITH THE SPECIALS

CONE, HUNTON & WOODMAN, INC., publishers representatives, New York, have been named to represent the *Burlington* (Ia.) *Hawk-Eye* effective Nov. 1.

Suplemento Semanal Ilustrado, a weekly feature supplement that circulates with more than 100 provincial newspapers in Brazil, has appointed Joshua B. Powers, New York, exclusive representative for the United States.

HOLDING NEW POSTS

GLENN W. HAWKINS, from sports desk of *Lansing* (Mich.) *Capital News*, to assistant telegraph desk of *Lansing State Journal*.

Lee Chilson, from city staff of *Lansing* (Mich.) *State Journal*, to director of publications for Michigan State Farm Bureau.

Hugh Lago, from telegraph desk of *Lansing* (Mich.) *State Journal*, to city staff of *New Orleans* (La.) *Times-Picayune*.

Dale Stafford, from sports desk of *Lansing* (Mich.) *Capital News*, to publications assistant at Michigan State College.

Edward L. Vaile, from the desk *Youngstown* (O.) *Vindicator* to news editor *Mt. Clemens* (Mich.) *Daily Leader*, succeeding Louis L. Richards, resigned, former city editor of the *Detroit News*, who will establish a weekly in Halfway, a Detroit suburb.

Lester Murray, formerly of the *Portland* (Me.) *Express*, from copy desk, *Worcester* (Mass.) *Telegram*, to sports staff, *Providence* (R. I.) *Journal*.

Joseph Creighton, from city staff of *Detroit News*, to city staff of *Lansing* (Mich.) *State Journal*.

Theodore Ediger, from reporter, *Lawrence* (Kan.) *Journal-World*, to city editor, *Concordia* (Kan.) *Blade-Empire*.

R. W. Goodell, from reporter *Salt Lake City Tribune*, to editorial staff of *Provo* (Utah) *Evening Herald*.

SPECIAL EDITIONS

PHOENIX (Ariz.) GAZETTE, 160-page annual edition, stressing agricultural and industrial development in that section, Oct. 11.

Three Rivers (Que.) *St. Maurice Valley Chronicle*, eighth annual industrial Review, Oct. 14.

Tampa (Fla.) *Daily Times*, special edition marking opening of the new Tampa Theatre, Oct. 15.

Sarasota (Fla.) *Herald*, 108-page first anniversary edition, Oct. 3.

Boston (Mass.) *Herald*, an 8-page book section devoted entirely to new books, Oct. 16.

MARRIED

JOHN WAGNER, of the *Duluth* (Minn.) *News Tribune* reportorial staff, to Miss Dorothy Chisholm, of Duluth, Oct. 21.

William H. Beatty, city editor of the *Lincoln* (Ill.) *Star*, to Miss Florence Nortridge, Springfield, Ill., in the rectory of the Christ Episcopal Church, Springfield, Oct. 15.

Charles L. Sheely, member of the editorial staff, *Spokane Daily Chronicle*, to Miss Virginia Crenshaw Heslon of Germantown, Pa., at Davenport, Oct. 16. Mr. Sheely has been engaged in newspaper work in Spokane for 15 years.

Richard F. Crandell, of the *New York Herald Tribune* staff, to Miss Katherine Keith, at the Church of the Holy Spirit, at Missoula, Mont., Oct. 27.

Henry L. Schoenig, of the *Janesville* (Wis.) *Gazette* staff, to Miss Helen Victoria Meim, Rockford, Ill., in Janesville, Oct. 19.

Donald Major, editor of the *Tenino* (Wash.) *Independent*, to Miss Dora Henley, Saturday, Oct. 16.

William L. Cramer, assistant sales-manager of the U. O. Colson Advertising Specialty Company, Paris, Ill., to Miss Irene Corzine, Assumption, Ill., Oct. 23 in Assumption.

PRESS ASSOCIATION NOTES

JOHN EVANS, who has rejoined the Associated Press after a year as managing editor of the *Des Moines* (Ia.) *Capital*, will sail Oct. 30 to become a member of the A. P.'s Paris bureau.

Thomas Allen, Havana bureau manager for the United Press, returned to Havana Oct. 24, from the Isle of Pines where he was dispatched to report the damage caused by the recent hurricane.

H. H. Stanbury, assistant general manager of Universal Service European staffs, with headquarters in London, will sail shortly to New York for his vacation.

Guido Enderis, chief of the Associated Press Berlin bureau, has returned to the United States to spend several months. He is now assigned to the Washington staff. Harry Romer is acting as Berlin correspondent.

Edward Anderson has been appointed Associated Press correspondent at Olympia, Wash., succeeding the late C. A. Hayes.

James R. Nourse has returned as managing editor of the Washington bureau of Universal Service. He was formerly managing editor of the *Washington* (D. C.) *Herald*.

J. H. Jenkins, formerly representing the Associated Press in Little Rock, Ark., has been transferred to Charlotte, N. C., replacing H. C. Renegar, who has been sent to Atlanta.

W. O. Schroeder is now Associated Press correspondent at Raleigh, N. C., taking the place of E. W. Rogers, transferred to Louisville, Ky.

A. R. Bird has been named temporary Associated Press correspondent at Orlando, Fla., succeeding W. O. Cantrell.

Ward H. Moore is the new Associated Press correspondent at Wichita, Kan. He replaces R. V. Peterson, transferred to Dallas, Tex.

M. N. Stiles, head of the Associated Press foreign news department, returned to New York headquarters this week following a vacation spent on Cape Cod.

Wiley Smith, manager of the Chicago bureau of Universal Service, is taking over the work of T. A. Pinson, Atlanta bureau manager, while Pinson is on a month's vacation. Earl Shaub, of Universal's New York bureau, is sitting in for Smith.

William Hillman, formerly of Universal Service New York staff, and more recently with Universal in London, is now in charge of the Paris bureau of Universal Service.

John T. Lambert, editor of the Washington bureau of Universal Service, has been making a tour of the states where the Senatorial election results are doubtful.

H. B. Hart, formerly of the United Press, more recently with the *Dallas News* advertising department, has joined the International News Service, opening a San Antonio bureau.

J. F. Sweeney, Associated Press operator for the *Newport* (R. I.) *News*, is on a two-weeks' vacation. His place is being taken by Rev. L. Hubbard, relief man.

H. Martin Glenn, formerly of Kansas City, has been transferred to San Antonio as Associated Press correspondent, succeeding Theodore Keniston, who recently was moved to the Denver office.

ASSOCIATIONS

SPOKANE ADVERTISING CLUB recently moved to the Peyton Building. Its new offices give it more room and provide committee meeting rooms.

First social event of the SEATTLE PRESS CLUB this year was the reindeer party Oct. 19, when reindeer steaks were served, and theatrical numbers given.

Marshall N. Dana, president of the PACIFIC COAST ADVERTISING CLUBS, has been elected to membership in Alpha Delta Sigma by the chapter at the University of Oregon.

Thirty members of the WESTERN NEW YORK PUBLISHERS ASSOCIATION recently held a two day conference in Rochester discussing the problem, presented by invasion of the smaller communities by house to house canvassers. President Merrit M. Landen of the *Bath* (N. Y.) *Steuben Advocate*, presided.

W. S. Walters has been appointed membership secretary of the ADVERTISING CLUB OF ST. LOUIS. David Lawrence, president of the Consolidated Press and publisher of the *United States Daily*, spoke before the Club, Oct. 19. The speaker on Oct. 26 was J. N. Kellerman, sales manager of the Hudson-Frampton Motor Car Company, St. Louis.

Everett R. Smith, advertising manager for the Fuller Brush Co. of Hartford, was a speaker Oct. 20 at a meeting of the WORCESTER ADVERTISING CLUB. His subject was "Advertising's Task in Selling the Consumer Direct."

Retail Departmental of the MILWAUKEE ADVERTISING CLUB held a special dinner meeting Thursday evening, Oct. 21, at the new Elk's clubhouse. G. Schaeffer, advertising manager of Marshall Field & Co. of Chicago, spoke.

MEDINA (N. Y.) ADVERTISING CLUB has elected these new officers: President Dr. Frederick W. Neff; vice-president William L. Bennett; secretary, Pe Krompart; treasurer, David Barnes; rectors, A. E. Miller, Edward O'Regan and Wellington MacClew.

PORTLAND ADVERTISING CLUB has ready begun work of preparation for meeting of the Pacific Coast Advertising Clubs which is to be held in Portland June 19-22, 1927. Marshall N. D. of Portland, president of the Pacific Coast association, has named a long list of committees from the membership his own club to have charge of various phases of preparation for convention. The executive work will be in charge of the following: W. J. H. man, chairman of the general convention committee, and A. C. McMicken, vice chairman; Anne P. Keil, convention secretary; C. O. Chatterton, assistant chairman; Lindsey Spight, secretary treasurer of Pacific Coast association and William P. Merry, president.

Over 3,000 cities and towns have streets paved with portland cement concrete

Horse-and-Buggy Pavements Won't Do

Property owners in many towns and cities whose streets swarm with motor traffic are still wasting their money on horse-and-buggy "pavements" of bygone days.

These rough, bumpy streets are directly responsible for broken springs, cut tires, greater depreciation of cars, physical discomfort, loss of time, and many accidents involving loss of life or limb.

And the heavy expense of trying to keep worn-out, dangerous, horse-and-buggy streets in repair added to their original cost, amounts to more than enough to pay for true, even, non-skid concrete pavement that has the maintenance built in.

So in the long run you are paying for concrete streets. Why not get them?

All of the facts are in our free booklet on "Concrete Streets." Ask for your copy

The new plant of THE CLEVELAND NEWS, showing the line arrangement of twenty new Hoe Superspeed Units, together with the new Fifteen-Cylinder Hoe Patented Universal-Unit Multi-Color Press

ON July 4th *The News* moved into its splendid new building and the new Hoe Superspeed Press Units were put on the edition without ever having had a real trial run.

Every edition went out on time and on July 14th, Dan R. Hanna, Jr., President, wrote:—"We are well pleased, for such a performance, combined with the prompt delivery and speedy erection of the entire equipment, as well as the splendid construction throughout, instills a confidence in our press equipment that is gratifying."

On July 23rd, Mr. Hanna wrote:—"Our First Edition this morning of 26,500, was completed on one press in one hour and one minute. On the Home Edition today:

Press No. 1	turned up to the rate of	37,500
Press No. 2	" " " " " "	38,400
Press No. 3	" " " " " "	39,000
Press No. 5	" " " " " "	38,500

On August 24th, Mr. Hanna wrote:—"We have reached a maximum speed of 40,000 an hour on each of the deliveries. This lives up absolutely to Hoe & Co.'s guarantee. I cannot recommend R. Hoe & Co. too fervently to anybody."

Performance Is What Counts—Hoe Presses Give the Maximum

Putting life in the deadline!

Numbers [1] and [3] indicate the pushbutton stations and number [2] the transfer switch which put the entire manipulation of the presses in the plant of The News Leader, Richmond, Va., directly at the pressman's finger tips.

Number [4] shows the C-H Conveyor which carries the papers to the delivery and mailing tables, completely eliminating delay between the presses and the street.

The small view below illustrates the ability of C-H Conveyors to carry the papers vertically, upside down, overhead, through spiral twists, both horizontal and vertical turns, through ceilings or walls, to wherever they're wanted.

AT the deadlines—editorial and pressroom—that's when seconds count!

Cutler-Hammer Automatic Control puts every press manipulation instantly at the finger-tips of your pressmen for quick threading and make-ready, safe starting, maximum running speed and instantaneous braking.

Cutler-Hammer Newspaper Conveyors take the papers from the presses in a swift, steady stream, and lay them down in neat counted piles on the delivery or mailing tables—as fast as the presses can deliver them.

Thus, C-H Equipment enables you to "get going" quicker, operate your presses at more efficient speeds, and hit the street earlier.

Newspaper plants small and large, around the world, are finding Cutler-Hammer Control and Conveyors profitable.

Press Room Efficiency Depends on Electrical Control

The C-H Full Automatic Newspaper control board used in the plant of the News Record, Richmond, Va. "The Safest System in the World" is also the most PROFITABLE.

NEED A NEW DRESS?

Here is a new type face, designed by Intertype for The New York Times, which is said by experts to be ideal for newspaper use. Very small but wonderfully legible.

ROB AGED INVALID AND OPEN GAS JETS

Two Thieves Empty Strong Box of \$11,500 Life Savings as Woman Screams.

DRAG HER INTO KITCHEN

There She Writes of Deed and Is Overcome, but Is Found Just in Time.

against the public, he said. Yesterday came the breakdown of the negotiations because the operators refused to do as the miners had already done—make real concessions from their original position in the interest of reaching a settlement. The matter now comes before the Legislature of Pennsylvania for its action. I shall do my best to press the bill which recognizes anthracite as a public utility. That is the next step.

Of the Governor's coal bills, the first would amend the Public Service Company law and would classify anthracite production as a public service function and thereby render the operators amenable to the same regulation that now applies to street car companies, telephone, gas and other public utilities.

The second bill is aimed primarily at the retail end of the anthracite trade and authorizes the Governor to enter into compacts with other anthracite consuming states providing for the regulation of the business of producing, preparing, transporting, selling and distributing anthracite.

Amends Public Service Law

The first bill amends the public service law by inserting the phrase "anthracite producers" in the category of businesses that fall within the jurisdiction of the public service commission. Furthermore, it defines anthracite producers as including "all persons, partnerships, unincorporated associations or corporations engaged in the production, preparation and distribution of anthracite coal for domestic use and in the sale of such coal."

The bill would make it possible for the Public Service Commission to inquire into anthracite production, for the public to attack the rates charged by the operators and would generally provide for a public scrutiny of the anthracite business that has not hitherto been possible.

The second bill, aimed at the retailers, "requests" the Governor to negotiate compacts with anthracite negotiating States providing for the regulation of the retail features of the anthracite trade. This bill declares anthracite as "affected by the public interest."

Mrs. Agnes Greise, 63 years old, of 946 Anderson Avenue, the Bronx, an invalid for six months, was in bed and alone in the apartment where she lives with her husband and nephew yesterday when at the sound of footsteps she looked up and saw two young men at the door of her room.

"What are you doing here?" she demanded.

"Shut up!" said the taller man. Mrs. Greise screamed. The tall man grasped her by the shoulder and clapped a hand over her mouth. Mrs. Greise saw the second man open her bureau and take out a strongbox where she had \$11,500, the life savings of her husband, Henry, 65, an I. R. T. guard, and their nephew, Ewald Bredsguard, 28, a machinist. She saw the man empty the box and stuff the contents in his pocket. She heard the two

In holding the petition in abeyance for further information, Commissioner Harkness referred to the fact that in earlier hearings there had been intimations that the corporation might be forced into a receivership. "If a receivership is inevitable," said Mr. Harkness, "it might be advisable for the company to refrain from putting out any additional bond issues. It might be better not to complicate the situation."

He requested counsel for the company to consider that angle of the situation carefully before the next hearing. The hearing was adjourned subject to call, to permit the preparation of reports by the commission's accounting department, and of further evidence by the Interborough. The summoning into joint conference

The above specimen, reproduced by photo-engraving and printed on finished stock, does not show all the characteristics of this new Intertype face. A full-page specimen, printed on newspaper stock, will be sent on request.

HAVE YOU noticed the new dress in which the New York Times is now appearing? It is worth your attention. The Times wanted the best newspaper type face that money and skill could produce. Experts of the slug machine manufacturers, including Intertype, were asked to submit a new face that would be as easy to read as possible, yet small enough to allow printing the most news in a given amount of space.

After much research and experimentation, the Intertype Typographic Department submitted a new face—6½-point No. 2-a with Bold Face No. 2-a—which was chosen by the

Times, after consultation with a number of skilled optometrists, as the most legible and practical type face for its purpose.

This remarkable newspaper face is now available to all users of slug composing machines.

If you are interested in condensing a large amount of news in the space you have available—at the same time pleasing your readers by the clearness of your printing—study this new Intertype face. A complete newspaper page of it will be sent on request by any Intertype Office, also comments about it by several New York optometrists.

If you are considering a new dress, the Intertype Typographic Department will prepare special comparative samples for you without charge.

A FEW REPEAT ORDERS FOR INTERTYPES

	Initial Order	First Repeat	Second Repeat	Further Repeats	Total Intertypes
Hearst Newspapers	50	15	23	23	111
Scripps-Howard Newspapers	26	40			66

These Newspapers Use Monotypes

More than five hundred daily newspapers in the United States and Canada are equipped with Monotypes. The list covers every degree of prominence in the world of newspaperdom—from those in small cities to the most influential in the world. Every machine unit

in the Monotype System of Composing Room Operation is saving time and making money in newspaper plants. Facts speak for themselves. Following are listed some of the daily newspapers now operating Monotypes in the United States and Canada:

If we can satisfy "The Evening Bulletin,"
whose newspaper printing plant is
the largest in the world,
we can satisfy you!

MERCHANT & EVANS COMPANY
Philadelphia

Stocks in Principal Cities

ESTABLISHED 1866

\$50,000 LOVE PRIZE FOR SWEET LAURA

Come to My Arms and be My
Sweet Laura

GLACIER AURORA PEAK

Glacier Aurora Peak
in the Alps

NIBBLES AT THE TABLE

At the table the nibbles
are the most popular

COULD I BEG HIM HOME

He is the only man who
can beg him home

FURNITURE TRUCK BUENS

Guinness Lost China Fire—
Picked at \$1000

ABOUT 675 HELPS AND SALVATION WENT AWAY

In Today's Bulletin

DRAYTON ARRESTED FOR OVERSEAS HAT

Drayton arrested for
overseas hat

CRIMINAL OF HOTEL FIRE

Arrested in connection
with hotel fire

FIRE DRILL IN TOP HATS

Drill in top hats
at the hotel

DISASTROUS COLLISION

Collision between
two cars

THE MISTRESS' TROUBLES

The mistress's troubles
in the hotel

LOST AND FOUND

Lost and found
in the hotel

In a Word ~ ~

Advertising Agencies and National Advertisers

consult

EDITOR & PUBLISHER'S

MARKET GUIDE

to get the answers to their two
most important questions—

1. What is the ability of such and such trading area to absorb our commodities?

and

2. What medium shall we use to cover it?

Beyond all question, both will find in the 1926 Edition—to be issued IN THREE WEEKS—all the data they need to determine the character, the habits, the needs, the desires, and the purchasing power of the people of your city.

How about the second question?

Will they see the name of your paper close to the marketing data of your city? Will they be told how thoroughly it covers its trading area? How it is looked up to as the leader and molder of public opinion—civically, politically and ADVERTISINGLY?

That is up to YOU. It certainly is an opportunity out of the ordinary for you to get an entering wedge on greater National Linage—to DRAMATIZE your paper's story, on a stage and in a setting the like of which exists nowhere else.

BUT YOU MUST HURRY—the forms close in a few days.

FACTS

NO. 5 - about New England

FIRST - IN
FISHERIES -
PRODUCES ONE
HALF BILLION LBS.
OF FRESH FISH
ANNUALLY!

New England's fishing industry represents an investment of over \$40,000,000. Over 30,000 persons and 1,000 vessels are directly engaged in earning a livelihood, and the annual return to the fishermen runs well over \$20,000,000.

New England produces about 20% in pounds and 25% in value of the entire country's fish production.

What a great market this alone offers to manufacturers of fishing equipment—boat builders—contractors of supplies and fishing material.

The buying power of this industry and its people runs into millions. A campaign in the New England papers covers the entire industry—Results are almost certain if the product has merit and the campaign properly prepared.

The newspapers listed below can show you the way—They have valuable information covering the entire market—They have a complete service that will enable you to cover the field and obtain distribution at minimum investment cost—Write them today.

BROOKLYN EAGLE GIVES 85th BIRTHDAY PARTY

Newspaper's Staff Dramatizes Incidents of Its History in Musical Review Held Oct. 26—22-Page Historical Section Also Issued

Incidents in the history of the *Brooklyn Eagle* were dramatized by members of the staff in a musical review held Oct. 26 to celebrate the paper's 85th anniversary.

H. F. GUNNISON

Also in celebration of the birthday, the *Eagle* was issued Oct. 26, with a 22-page historical section edited by S. W. Cooper and a handsomely colored pictorial section edited by George Currie and illustrated by James S. Young.

The "Eagle Revue" was witnessed by an audience of 2,500 employees and friends of the paper. It was arranged, largely written and coached by Cleveland Rodgers, associate editor. A sketch in a news room of 1936 progressed to picture the conduct of the *Eagle* in a future when reporters would come strolling to their luxurious offices at noon, immaculately attired in morning coat, gray trousers and high silk hat; when crimes would be committed and solved in the newspaper offices, making it unnecessary to go outdoors for the best stories; and when the day's routine would be interrupted every now and again with a pleasant song, dance and exchange of repartee.

A serious history of the *Eagle* was given by John Alden, editorial writer, who traced the newspaper's development from its first appearance, as the *Brooklyn Eagle and Kings County Democrat*, Oct. 26, 1841, to the present day. He pointed out that during the 85 years since its founding the *Eagle* has been under one continuous ownership and management, the only newspaper in the city to remain for that length of years without a change of control. There have been but four presidents of the *Eagle*: Isaac Van Anden, Col. William Hester, William V. Hester and now Herbert F. Gunnison. Mr. Alden referred to the various editors who have developed the *Eagle's* policies, including Walt Whitman, the poet, and Arthur M. Howe, who has been the editor since he succeeded St. Clair McKelway, in 1915. Preceding the intermission, President Gunnison presented medals to employees for long service with the newspaper. One hundred and seventy awards were made for service from 10 to more than 50 years. Those given the 50-year gold medals were: Miss Celia Kenny, who joined the paper in 1870; George Windham, 1871; George F. Dobson, 1873; Henrietta F. Clark, 1874; James G. Phillips, 1875; Bart L. Schneider, 1876, and Charles J. Carlin, 1876.

EMPLOYEES OFFERED STOCK

The International Paper Company this week announced that officers and employees had been offered cumulative 7 per cent preferred stock at \$94 per share, the price to remain open until Dec. 1. Employees have the option of paying for the stock outright or in instalments. Commencing Jan. 1, 1928, a bonus will be paid to employees holding the stock amounting to 1 share and increasing \$1 each year until \$5 a share is paid Jan. 1, 1932.

NEW OREGON "SPECIAL"

Doty & Stypes, Inc., is a new firm of publishers' representatives formed in Portland, Ore. The incorporators are Walter L. Doty, who has conducted a similar business in San Francisco, and Arthur W. Stypes, until recently advertising manager of the *Western Farmer*.

CHARLES F. CHAPIN DIES

Was Editor of Waterbury (Conn.) *American* for 48 Years

Charles F. Chapin, for 48 years editor of the *Waterbury (Conn.) American*, died Oct. 27.

Mr. Chapin was born in South Hadley Falls, Mass., and prepared for college at Wilbraham Academy. He was graduated from Yale in 1877. On Jan. 1, 1878, he became editor of the *American* and in 1883 was made secretary as well as editor.

Mr. Chapin is survived by one son, Carl H. Chapin, associate editor of the *American*, and one daughter.

BIG BRITISH NEWSPAPER GROUP EXPANDS

Allied Newspapers, Ltd., Buy Remaining Shares in Daily Sketch and Sunday Herald—To Merge Sketch and Graphic

Allied Newspapers, Limited, which already own newspapers in London, Manchester, Sheffield, Newcastle-upon-Tyne and Glasgow, and which in September purchased the *Northeastern Daily Gazette* and associated newspapers in Middlesbrough for near to half a million pounds sterling, have now purchased the whole of the ordinary shares in the *Daily Sketch* and *Sunday Herald*, Limited, London. This represents an amalgamation of capital amounting to nearly £10,000,000.

The *Daily Sketch* and the *Sunday Herald* were purchased from E. Hulton and Co. Ltd., in July, 1924, by the *Daily Mirror* and the *Sunday Pictorial* for £1,300,000. No public issue of shares is contemplated by Allied Newspapers in connection with the purchase.

On Oct. 16 it was announced that following on this purchase, and according to an agreement made in July, 1925, between Allied Newspapers and the *London Daily Graphic*, the latter paper is to be amalgamated with the *Daily Sketch*, as from Oct. 18, thus reducing the number of picture dailies in London to two, the *Daily Mirror* and the *Daily Sketch* and *Graphic*.

ADDS UNIVERSAL SERVICE

Milton A. Smith, editor and publisher of the *Tallahassee (Fla.) Morning State*, signed a contract for Universal Service this week.

BROOKLYN CLUB ELECTS

F. Arthur Lozier, district man for the *Brooklyn Eagle*, has been elected president of the Brooklyn Newspapermen's Club, succeeding Marshall Covert, resigned. Frank X. Lambert, head of the copy desk of the *Brooklyn Standard Union*, has been named vice-president.

Imperial METAL

The Finest Equipment You Can Give Him!

YOU, Mr. Publisher, can give your stereotyping department and your composing room the finest mechanical equipment money can buy, but if you do not give them Imperial Type Metal, serviced by the Imperial Plus Metal Plan, you are handicapping your machines and your men.

Imperial Metal and the Plus Plan are the finest type metal equipment you can give your shop. Good mechanical equipment demands good type metals. And good workmen likewise need the best on the market.

This finest of all type metals serviced by the Plus Plan is not only the most efficient type metal equipment but it is also most dependable and economical. Dependable, because your type metal is constantly in A-1 condition. Economical, because the working life of the metal is extended by years.

Let us give you details on the finest equipment of type metal that money can buy!

IMPERIAL TYPE METAL CO.

Manufacturing the following metals:

NEW YORK PRESSMEN WIN WAGE INCREASE

New Agreement Between Publishers and Union for Term of Three Years from Sept. 4—No Other Changes in Contract Except Pay Boost

An increase in wages has been granted members of the New York Newspaper Pressmen's Union Number Two by the Publishers Association of New York, according to an agreement reached last week which renews the present contract for a period of three years from Sept. 4, 1926.

The agreement was the work of a joint conference committee in which the publishers were represented by Bradford Hill, general manager of the Hearst papers, F. D. White, *New York Herald*, and W. H. Field, *New York News*, and the union by Andrew Armstrong, president of the local union, and E. W. Edwards. Mr. Armstrong announced the agreement as follows:

The agreement between the Publishers' Association of New York City on the one part and the International Printing Pressmen and Assistants Union of North America and New York Newspaper Pressmen's Union No. 2 on the other has been renewed in all its terms for a further period of three years from Sept. 4, 1926, with an increase in wages. The increase is \$2.50 per week for the first year, an additional \$2 per week for the second year, and a further increase of \$1 per week for the third year for journeymen. Pressmen-in-charge are to receive the same increases and an additional increase of \$3 per week. The wages of apprentices, being certain percentages of those journeymen, are constantly also increased. The Joint Conference Committee which reached this agreement made the following statement: The present contract between the union and the publishers was made by agreement between them dated July 17, 1924, ending Sept. 4, 1926, with a continuing provision for arbitration of differences. The subject of current differences between the parties to the contract was the question of its amendment and extension.

After a careful examination of the terms of this contract, the Joint Conference Committee of the union and the publishers have reached the unanimous conclusion that their common interest is best served by continuing the present contract for a further period of three years without change except in the scale of wages.

On the scale of wages, the publishers willingly proposed and the union willingly accepted a cumulative increase of \$2.50 per week for the first year, a further increase of \$2 per week for the second year; and an additional increase of \$1 per week for the third year of the extended term for all journeymen. For pressmen-in-charge, the publishers have also proposed, and the union accepted, the foregoing increase

and an additional increase of \$3 per week. The wage of apprentices, flyboys and carriers being certain percentages of those of journeymen are consequently also increased, as provided in Sections 31 and 32.

In the case of Brooklyn evening papers with Sunday editions the Saturday night bonus shall be increased from \$2.75 to \$3.

The Joint Conference Committee desires to emphasize that these increases are tendered and accepted in recognition of increased efficiency developed through the faithful performance of mutual obligations under the existing contract. In

these voluntary increases and in the perpetuation of all the terms of the present contract for a further period of three years the committee thus testifies to the wisdom of the provisions of the contract; to their success in improving production, eliminating waste and promoting harmonious relations between the parties concerned.

While this decision was reached in joint conference, without the necessity of invoking those provisions of the contract concerning arbitration, the committee was constantly aware that its deliberations were being conducted under the comforting assurances of certain set-

tlements of possible differences by peaceable means. The committee feels that this protection has enabled it to give a full measure of unprejudiced thought to its discussions that would not otherwise have been possible, and desires to reaffirm its belief in the wisdom and fairness of the principle of arbitration, the ingenious provisions for which in the existing contract were mainly suggested by President George L. Berry.

The *Omaha* (Neb.) *Bee* each year promotes a "free shoe fund" for the poor children of its city.

AM" WIRELESS SYSTEM IN OPERATION BETWEEN LONDON AND MONTREAL

**Lists Exchange Greetings in First Messages Sent by
Fastest Wireless in World"—Speed of 200 Words
a Minute Claimed**

Executives of American wire agencies this week expressed in the inauguration of the "Marconi Wireless" system between London and Montreal, claimed to be the fastest wireless service in the world. It was stated that if the England to Montreal service proves successful, the system will be installed between London and Montreal early next year.

The Canadian system was opened for the exchange of messages from Montreal to London at a speed of nearly 200 words a minute and instantaneously recorded in the Central Telegraph Office in London. British newspaper men were gathered to witness the operation.

The first message that went out from London to the Canadian metropolis was one from Lord Burnham, chairman of the Imperial Press Union, which reads as follows:

"On the occasion of the transmission of the first wireless press message by the Marconi System between Canada and Britain permit me to congratulate you on the completion of this new Empire. With full knowledge of the efforts you have made to increase the efficiency of inter-Dominion communication within the Empire, I am sure the first message sent by the Marconi System should be one of good wishes to you for the new step forward in the invention of Senator Marconi, aided by able engineers on both sides of the Atlantic, has made possible what we believe that we are at the beginning of a new era in Empire communication with possibilities not hitherto known which will work a revolution in the distribution of Empire news."

"ATHOLSTAN."
The first message was sent at 11 o'clock, London time, and was immediately received by Lord Burnham, and his secretary, and filed with the Central Telegraph Office at 4.58 London time, which is 15 minutes later than Montreal time. The expiration of a minute the message had been received in the Marconi office in Montreal, decoded and the Star representative.

Journalists of the two countries expressed each other in sending messages of goodwill. At the moment that the message of the British writers were being received over the high-speed undulator in the office of the Canadian Marconi Company in Montreal, those of the British newspaper men were going out to the Wheatstone transmitter at an early hour. The messages exchanged

Journalists of London send messages through new wireless beam service from London to Montreal. Their colleagues throughout the world with their wishes that this new communication may foster further understanding of communion and in the Empire."

The first message from Montreal journalists to London, represented by those who are working to unite the bonds of Empire fealty, both Canadian and English-speaking. Canada, send heartiest greetings to British journalists whom they feel within a moment's reach of the metropolis."

The following message: "Editor of the London Daily Telegraph rejoices in further of space and time between Britain and Canada bringing them both respects than ever before. After 100 years it seems the Atlantic is entirely abolished and we are beginning the work of Columbus necessary."

Editor of the beam wireless sys-

tem seemed greater than had been imagined by the newspaper men who had some knowledge of cable work. The working of the system was concisely explained to them by H. M. Short, the managing director of the Canadian Marconi Company and other officials that were with him, including J. W. Kerton, the traffic superintendent, and J. H. Thompson, the chief engineer, and G. A. Mathieu, personal assistant to Senator Marconi, who designed the receiver apparatus.

The messages are handed to an operator who sits before a Creed perforator which is a peculiar shaped typewriter with an ordinary keyboard. He copies them out, but instead of punching letters on to a continuous tape he punches the Morse code for those letters. This tape is then run into a Wheatstone transmitter at a speed which can be regulated from 20 to 400 words a minute. That transmitter operates the main transmitter at Drummondville by a system of wired wireless controls over Bell Telephone wires and from Drummondville the message is sent out instantaneously by the directional beam, and at the same instant is recorded in Bridgwater, Somerset, where the general receiving apparatus is, automatically transferred to the land line of the British General Post Office and recorded in the Central Telegraph Office in London. There is no re-transmission of the messages anywhere—immediately the tape goes into the transmitter in Montreal it operates the high speed undulator in London which records the Morse code on a moving tape, which passes in front of an operator at an ordinary typewriter in London, who decodes the message as it passes in front of him.

Similarly messages from London were transmitted by landline to Bodmin in Cornwall, which is coupled with the main transmitting station, and instantaneously recorded through the Canadian receiving station at Yamachiche over a landline to the Montreal office. So far, the highest speed attained by the receiving undulator is 265 words a minute, and in order to handle the messages, the Marconi Company have a corps of typists, who take the strips of Morse code as they come in and divide it up into sections.

"The speed at which communication can be obtained between Montreal and London is only controlled by the mechanical limitations of the receiving undulators," declared Mr. Short. "The signals are so intensified by the beam system that no matter how fast they are sent they are recorded on the tape and in a readable manner, and there is no doubt that with the introduction of this system, Canada is brought into the closest touch with the heart of the Empire."

WITH THE GENERAL ADVERTISER

**Sterizol Using Newspaper Space—Railroad Advertising Gains—
New Gasoline on Market Early Next Month—
How Campaign Helped Atlanta**

WSPAPERS are being used by the Sterizol Company to promote its Septic for the first time in the history of the company. The account is led by the Nelson-Chesman Company, New York advertising agency. The schedule now lists about 20 dailies. Starting nine years ago, the business built up on a house to house canvassing basis. The product was popular and was taken up by the retail trade. The Sterizol company sold to the retailer because it was felt the sales were too small to obtain support of jobbers.

All copy in women's magazines was for years. The results were not tant. Nelson-Chesman Company led the account, and in September, a campaign was started, after analysis of sales had shown that good circulation existed only in Central West-states.

house to house method of selling pursued, but backed by newspaper signs of from 3,000 to 7,000 lines, become more of a sampling campaign. The effort is mainly to introduce product.

Increase in sales has already been encouraging that the product is now in the hands of jobbers, who are pushing and the advertiser promises to continue a newspaper advertiser year-in-year-out.

Four railroads ran a total of 1,000 lines of advertising in 170 newspapers of 48 cities during June, according to figures made by the Hanford Advertising Bureau, Mount Vernon, N. Y.

Ethyl Gasoline Corporation, a company which markets the rights to produce a gasoline containing its trademark, has sold the rights on the East Coast to both the Union Oil Company and the Associated Oil Company. These two companies will place the new compound gasoline on the market about May 15. At the same time they will launch a special newspaper and bill-board campaign featuring the product. The expenditure will probably be in the neighborhood of \$200,000 for each company. The new compound gasoline will be a premium over straight gasoline. Sales will continue to be sold by the companies.

Companies marketing ethyl gasoline include the Standard Oil Company of Indiana, the Continental Oil Company of Illinois, the Standard Oil Company of New York, etc.

Expected, however, that following upon the completion of arrangements to market ethyl gasoline all over the United States, which is practically completed now, the Ethyl Gasoline Company will conduct a national campaign of its own, through Barton, Durand & Osborn.

Community advertising campaign led by Atlanta, Ga., doubled the city's industrial growth in the last months of its operation, according to the current number of *Forbes* magazine.

Many new concerns and as large a pay roll were added in five months, the editorial points out, "as a whole of 1925."

A secret was intelligent preparation before a dollar was spent in advertising. Atlanta thoroughly analyzed its advantages and her shortcomings, and definitely to which industries appeal should be made, carefully worked out the best kind of advertisement set up machinery to give attention to every inquiry. . . . Atlanta a thousand inquiries have been made by executives who actually have in mind as their next move."

The Kotex Company and the Kleenex Company of Neenah, Wis., have established an office in the Chamber of Commerce Building, Boston, Mass., to take care of the New England territory. The concerns which make Kotex and Kleenex, respectively, are also providing local warehouse facilities.

The wholesale distribution and retail sales of the General Motors trucks and Yellow Cab Manufacturing Company in New England are now being handled by a direct factory branch with W. H. Moore, formerly of New York, as manager.

The New Hampshire Department of Agriculture in co-operation with the state publicity bureau, has launched an advertising campaign in newspapers to educate the public to the value of New Hampshire apples. The apple crop this fall is an unusually good one, and it is planned to make New Hampshire apples as well known as Florida oranges or Vermont maple sugar. "Ripened in Sunshine" is the slogan being used in connection with the campaign. The State of New Hampshire Publicity Bureau, Concord, N. H., is handling advertising accounts for the campaign.

G. R. Elliott, formerly with the advertising staff of the Truscon Steel Company, of Youngstown, Ill., has been made advertising manager of the Skelley Oil Company, of El Dorado, Kan.

Newspaper and advertising circles are awaiting with interest confirmation of a report of plans for a merger of Sears, Roebuck & Co. and Montgomery Ward & Co., big Chicago mail order houses. Informal negotiations have been conducted for several weeks and the preliminary basis for the merger discussed. Only in the last few years did the two concerns start to use the Chicago newspapers for their retail advertising.

The plans are now said to have reached a point where government sanction of the consolidation will be sought.

A merger of the two companies would effect one of the largest combinations in recent years. It would result in a corporation with assets of about \$230,000,000 and an annual volume of business of about \$450,000,000. The companies are the oldest concerns in the mail order field and do a tremendous business in agricultural districts. The outlay now made by the two houses for catalogues alone each year is between \$15,000,000 and \$20,000,000, and about one-third of that amount would be saved by avoiding duplication to customers.

Even when a town runs out the thieves, it never bothers those who pay office rent.—*Vancouver Sun*.

The Rockaway Automatic Spaceband Cleaner

has proven its great merit and is here
to stay as long as typesetting ma-
chines will use spacebands.

Because it does better work than can be done by hand, does it in a fraction of the time and does it uniformly (which can not be said of hand cleaning), besides truing up the sleeve.

Don't be stubborn—give us a chance to prove our claims that we have a machine which will save you money and help you to produce better printing. You have nothing to risk, nothing at stake, if we can't prove our assertions! Our machine is in daily use in the largest newspaper plant in the world and in the largest commercial printing plant in the world; it is in daily use in nearly all civilized countries.

INVESTIGATE!—at our expense and save real money every working day of the year.

No more hair lines, no more crushed matrix walls, no more loose sleeves, no more distorted spacebands.

The following newspapers, after thorough tests, have installed the Rockaway Automatic Spaceband Cleaner:

Cappers Weekly, Topeka, Kans.	The Elmira Star-Gazette, Elmira, N. Y.
Omaha News, Omaha, Nebr.	The Utica Observer Dispatch, Utica, N. Y.
Birmingham News, Birmingham, Ala.	The Peoria Journal Transcript, Peoria, Ill.
Minneapolis Tribune, Minneapolis, Minn.	The Times Herald, Dallas, Tex.
St. Paul News, St. Paul, Minn.	The New Orleans Times-Picayune, New Orleans, La.
Winchester Sun, Winchester, Ky.	The Miami Herald, Miami, Fla.
Rochester Times Union, Rochester, N. Y.	The Schenectady Gazette, Schenectady, N. Y.
Buffalo Times, Buffalo, N. Y.	The Pittsburgh Press, Pittsburgh, Pa.
Ft. Wayne Journal-Gazette, Ft. Wayne, Ind.	The Wheeling Register, Wheeling, W. Va.
Gazette Times, Pittsburgh, Pa.	The Providence Journal, Providence, R. I.
The Times Mirror Co., Los Angeles, Calif.	The Jackson Daily News, Jackson, Miss.
The Fond du lac Commonwealth, Fond du Lac, Wis.	Houston Post Dispatch, Houston, Tex.
The Belleville News-Democrat, Belleville, Ill.	Fond du Lac Reporter, Fond du Lac, Wis.
The Ft. Worth Star-Telegram, Ft. Worth, Tex.	Oshkosh Northwestern, Oshkosh, Wis.

We send all machines on ten days' trial—you are under no obligations until you accept it as satisfactory. Write us for descriptive literature and the opinion of users.

The Rockaway Company

3508 Grand Ave., MILWAUKEE, WIS.

ADVERTISING AGENCY AFFAIRS

Ivy Resigns from N. W. Ayer & Son, Philadelphia—New Canadian Agency Organized—Johnson Joins Irvin F. Paschall

AL D. IVY has resigned as manager of the Philadelphia territory for N. W. Ayer & Son to become vice-president of Eastman, Scott & Co., Inc., Advertising agency. Mr. Ivy had associated with Ayer for eight years. No successor will be appointed.

William Findlay Company, Limited, is the latest addition to the list of Canadian advertising agencies, with offices in the Hamilton Building, Toronto. Findlay, president and general manager, started his newspaper career on the *Toronto News* and was later business manager of the *Ottawa Free Press* and *Toronto Globe*. He then joined the Hamilton Limited Advertising Agency as manager. Associated with Mr. Findlay are Donald F. Philp, in charge of art and production; Arthur J. Francis, secretary of the Canadian Association of Advertising Agencies, who became secretary-treasurer, and Henry J. Irvin, an experienced advertising man.

General Outdoor Advertising Company, Inc., reports consolidated net income for the quarter ended September 30, 1926, of \$1,101,675, after providing for depreciation and Federal income taxes. This compares with \$678,299 for the same quarter last year, and with \$1,065,466 for the second quarter of this year. The board of Directors, meeting yesterday, declared quarterly dividends of one and one-half per cent on the preferred stock and one per share on the 125,000 shares of common stock, both payable November 1, 1926.

R. Johnson, formerly with Erwin, Johnson & Co., advertising agency, Chicago, has joined the advertising agency of Irvin F. Paschall, Inc., McCormick & Co., Chicago, in an executive capacity.

Price Osborne, head of the radio advertising agency of Osborne & Co., Boston, is writing a series of articles on radio construction for the *Christian Science Monitor*.

M. Williams, formerly Western manager for *Architectural Record*, Chicago, and Robert H. Irvine, formerly connected with Rock Products, Chicago, have joined the Buchen Company, advertising agency, Chicago. They will have charge of space schedules for advertising accounts.

D. Ring, formerly vice-president of St. Paul Advertising Company,

St. Paul, Minn., has joined the Geyer Company, advertising agency, Dayton, O. He will handle the merchandising and sales promotion work.

Paul S. Weil, for several years actively engaged in radio advertising, has become associated with Albert Frank & Co., in their New York office, in charge of their radio advertising department. Mr. Weil was formerly with Frank Kiernan & Co.

Sell Travel to Travelers - In Florida

One and one-half million people from all parts of North America came to Florida last winter. In fact, during the entire past year there was a constant stream of travelers to and from this state.

This is one of America's focal points for travel and transportation. All roads lead to Florida—railways, highways and waterways.

For this reason every transportation company serving this territory should cultivate Florida business through advertising—in Florida. Here a concentrated travel market can be reached by means of inexpensive newspaper advertising. Class circulation can be had at mass rates.

The Associated Dailies of Florida, being practically all the dailies in all the principal buying centers of the state, cover this great market more completely and at lower cost than any other medium. For rates and detailed information consult Standard Rate & Data Service or address:

NEWSPAPER STANDARDIZATION STILL DISTANT

(Continued from page 26)

pounds of ink. Still more striking is the discrepancy in the smaller plants—one showing 100 tons of paper and 1,000 pounds of ink, while another shows consumption of annual 48 tons of paper and 1,100 pounds of ink.

The ink cost is a small total in most offices, while paper is a major item. Presumably, records of paper tonnage are carefully and correctly kept—although some fairly large shops regard the income to be derived from white and printed waste as negligible. The reports gathered by EDITOR & PUBLISHER on this part of the business indicate that either ink is being wasted in many plants or that publishers, guessing their way through press-room costs, reported a figure which did not exist except in their mental estimates.
